CALIFORNIA LEGISLATURE
1958 Budget Session

Budget Message

By

GOVERNOR GOODWIN J. KNIGHT

1958-59 Budget

To the Senate and Assembly of the Legislature of California:

I submit the budget for the State of California for the fiscal year beginning July 1, 1958, and ending June 30, 1959, in compliance with the provisions of the State Constitution.

Formulating the budget for this great, fast-growing State of ours is no easy matter in any year. It is an especially difficult undertaking for the 1958-59 fiscal year. Our revenue yields, because of the economic situation, will be considerably below the trend of recent years. The estimate of General Fund revenues for the current 1957-58 year has been reduced more than \$27 million below last year's estimate and the 1958-59 estimate is \$57 million less than the preliminary forecast made a year ago. The State's expenditure obligations, on the other hand, are largely geared to population growth; a great part is fixed by constitutional and statutory provisions which make increased outlays mandatory whether or not revenues are available. The State's General Fund, particularly, is caught in a squeeze between rigidly fixed expenditure requirements and revenues which fluctuate sensitively with the ebb and flow of economic conditions.

Economy in expenditures has been stressed in every one of the budgets I have presented in the last four years. The circumstances facing us at this time require even greater belt tightening. Through the very fine co-operation of state department heads substantial savings have been made within current appropriations and expenditures for next fiscal year are budgeted at rock bottom minimum amounts. Accordingly the budget I am submitting for the forthcoming 1958-59 fiscal year has these important characteristics:

- (1) Expenditures are at a reduced total amount.
- (2) No increases in tax rates or new tax measures are required.

Lest these statements be overly encouraging, however, let me hasten to point out some very serious aspects of the State's financial situation. The above-mentioned reduction in expenditures is largely a technical one for these reasons: Capital outlay for the State's building construction program is to be financed from the sale of bonds rather than from current funds, and the budget as presented temporarily omits urgently needed major expenditures for water development, as will be explained later. Let me further point out that the General Fund portion of the budget can be financed without increased taxes only by the full utilization of the Revenue Deficiency Reserve Fund (the so-called Rainy Day Fund) and by repaying the General Fund from School Building Aid Bonds a \$20 million advance made to the school building aid program in 1952.

REVENUE ESTIMATES

Again every effort has been made to formulate an accurate and reliable estimate of revenue for the coming year. As in past years we have had the advantage of consultation with economists from industry, utilities, banking, the Federal Government, and universities, in conferences both within this State and nationally.

It must be recognized that a forecast of economic conditions at this time is fraught with extraordinary difficulties. The forecasts which are the basis for the revenue estimates in this budget are predicated upon a slight increase in volume of business and personal income next year both in the Nation and in this State. Most of the improvement is expected in the last half of the year. Some might challenge these forecasts as being too optimistic, but I have great confidence in our economic strength, particularly in California. The budget document contains a complete discussion of the appraisal of the economic outlook upon which the revenue estimates are based.

EXPENDITURES

Total Expenditures—All Funds

Expenditures estimated for the 1958-59 fiscal year total \$1,984,576,603, a decrease of \$9,271,904 from the estimated total of \$1,993,848,507 for the current fiscal year. The following summary tabulation shows that this reduction is the net result of increases for State Operations and for Local Assistance which are more than offset by a decrease in Capital Outlay. The Capital Outlay decrease, let me point out again, is largely technical because of the proposed

use of bond funds and because of the temporary omission of recommended expenditures for water development.

SUMMARY—ACTUAL AND ESTIMATED EXPENDITURES—ALL FUNDS

	<i>Actual</i> 1956-57	<i>Estimated</i> 1957-58	<i>Proposed</i> 1958-59	<i>Change from</i> 1957-58
State Operations-----	\$462,909,120	\$548,382,129	\$601,795,991	+\$53,413,862
Capital Outlay-----	356,307,092	425,511,464	293,370,621	--132,140,843
Local Assistance-----	913,251,244	1,019,954,914	1,089,409,991	+69,455,077
Total-----	\$1,732,467,456	\$1,993,848,507	\$1,984,576,603	--\$9,271,904

I shall briefly review the more important features of the expenditure program. Complete information will be found in the budget document concerning every expenditure item. As in the past, expenditures are presented in the three main segments of State Operations, Capital Outlay, and Local Assistance.

STATE OPERATIONS

Generally speaking, State Operations are budgeted at the minimum amounts needed to continue existing levels of services with adjustments to meet increased workloads. The very few cases of improvements in program are set forth for your review and I am confident you will find them fully justified even in face of the scarcity of funds.

Higher Education

Education continues to be the largest single item of expenditure under State Operations, as is the case also under both Capital Outlay and Local Assistance. In the State Operations segment the greater portion is for higher education, with more than \$94,500,000 for state support of the University of California and \$50,800,000 for the state colleges. Much is being said these days of the importance of our educational system and the need for emphasis on science and engineering. California can take great pride in its institutions of higher education. The University of California and the California system of state colleges is a publicly-supported system of higher education second to none in the world. In recent years we have made tremendous outlays for new classrooms and laboratories and have greatly expanded the faculties throughout the system. The University of California is one of the world's greatest centers of research in nuclear physics, to name but one important field in which it is a great leader. More and more emphasis has been given to engineering and sciences in the University and the state colleges. We are this year spending roughly \$45,000,000 of state funds through our University and state

college systems for instruction in science courses and for research. Another \$22,000,000 is appropriated for buildings, laboratory equipment and other facilities, bringing to \$50,000,000 the amount spent for this purpose in the last three years. Nearly 38 percent of the 41,200 students enrolled at the University are pursuing courses in this field and the ratio—22½ percent—is almost as great at the state colleges. This budget proposes expenditure programs which will maintain the high standards of this State's university and college system and will continue the program of expansion to meet the heavy increases in enrollments.

Mental Hygiene

Expenditures of \$106,000,000, an increase of more than \$7,500,000, or 7.7 percent, are recommended for the operations of the Department of Mental Hygiene, including its 14 state hospitals for the mentally ill and mentally retarded and its clinics and institutes. The expenditure program will provide staffing for additional facilities at the new Fairview State Hospital and at the Metropolitan and Sonoma State Hospitals. Expanded programs are provided for professional training and for psychiatric research. Increased allowances are provided for drugs and medical supplies.

I call your particular attention to this most gratifying evidence of the results of our modern treatment program in Mental Hygiene: The average number of mentally ill patients in our state hospitals during the last fiscal year was 163 less than during the preceding fiscal year in spite of the continued increase in state population. A few years ago it was taken for granted that we had the unavoidable necessity of providing upwards of one thousand additional beds each year in our hospitals for the mentally ill to keep up with population growth. The intensified treatment program has so greatly increased discharges and so shortened the average period of hospitalization of the mentally ill that we have been able to make a radical downward revision in our scheduling of future hospital construction. It is to be hoped that future progress of this kind can be made in respect to the thousands of mentally retarded patients, the growing numbers of which continue to present a very great problem.

Highway Patrol and Motor Vehicles

Budgets for both the California Highway Patrol and the Department of Motor Vehicles make provision for an intensified traffic safety program. More adequate patrolling of the highways is a most urgent requirement. A total of

264 additional positions is recommended for the Patrol. A further strengthening of driver examination will result from a recommended increase of 50 additional driver's license examiners for the Department of Motor Vehicles.

Water Resources

Under State Operations appropriations totalling \$11,138,062 are recommended for the Department of Water Resources, an increase of \$2,719,207. Provision is made in this budget for a continuation of the program of developing the staff of the department, particularly in the engineering field. Provision is also made for engineering and planning work on the Feather River Project which is included in the proposed expenditure of \$6,834,431 under Capital Outlay. The State Operations part of the budget for 1958-59 is divided as follows:

From the General Fund:

General Administration and Operations.....	\$6,258,569
Work in cooperation with the Federal Government.....	1,000,625
Total General Fund.....	<u>\$7,259,194</u>

From the Investment Fund:

California Water Plan Development.....	\$3,878,868
Total State Operations—Department of Water Resources.....	<u>\$11,138,062</u>

The appropriation for development of the California Water Plan is recommended to be paid from the Investment Fund since this work is the initial phase of the program of capital improvements which appropriately can be financed from this fund. I am strongly of the opinion that the Investment Fund should be devoted to water development and used for no other purpose.

Salary Adjustments

The State Personnel Board, in compliance with the Government Code, has submitted its annual report to the Governor and the Legislature in which it points out that prevailing wage data indicate that by July 1st next an increase of approximately 3 percent will be required in order to maintain the levels of pay in the state service on a parity with rates of pay in comparable employment in private industry and other governmental jurisdictions. Accordingly the budget contains provision for funds with which to make such an adjustment if the actual facts next fiscal year are as forecast by the Personnel Board and the Personnel Board authorizes the adjustment.

CAPITAL OUTLAY

The expenditures proposed for Capital Outlay *from current funds* for 1958-59 total \$293,370,000, which is \$132,142,000 less than the estimated corresponding expenditures in the 1957-58 fiscal year. The principal reason for the reduction is the proposed greater use of State Building Constructions Bonds in 1958-59. You will see from the summary tables that when bond funds are added a large building program is scheduled to go forward in line with the five-year building plan.

In the first report on the State Building Construction Program issued January 19, 1955, it was pointed out that current revenues could not provide all of the funds required for the projects urgently needed in the next four years. A bond issue of \$200,000,000 was recommended, and subsequently approved by the voters, to supplement current revenues. It was anticipated the building program for the period could be financed half from current revenues and half from bond funds. For the three-year period July 1, 1956, to June 30, 1959, with the adoption of the proposals in this budget we will have carried out an approximate sharing of costs.

The highway construction expenditures programed for 1958-59 amount to \$221,817,079, some \$23,600,000 less than in 1957-58. Expenditures had peaked in the current and preceding years because accumulated surpluses were available to help finance unusually heavy outlays. The 1958-59 program is still a large one and is more nearly on the basis of keeping pace with current income.

LOCAL ASSISTANCE

A total of \$1,089,409,991—55 percent of all required expenditures—will be paid by the State as assistance to local governments during the 1958-59 fiscal year. The largest item is school support; substantial amounts are also included for public assistance, roads and streets, public health and other purposes. In all, local assistance will increase \$69,400,000 next year. More than three-fourths of this advance is in State support for public schools and other items related to local education. Subventions for the support of public schools will rise by more than \$40,900,000 next year to help to meet the cost of educating three million youngsters. Contributions for other educational purposes, such as teachers' retirement, free textbooks, and school building bond requirements, will be \$11,300,000 above the corresponding amounts for the current year.

Population growth, coupled with liberalization of the public assistance grants effected last year through allowance of medical benefits and aid to the disabled,

has added materially to the State's financial responsibilities in the field of social welfare. Subventions for this purpose in the coming year will amount to \$185,718,000, an increase of nearly \$11,000,000 compared with the current period and \$38,300,000 above expenditures for this purpose in 1956-57.

Other important developments in State assistance to local agencies include the greatly expanded program of grade crossing separation adopted last year which will provide a total of \$5,000,000 in matching funds to be used by cities and counties in the elimination of particularly dangerous railroad crossings. Additional amounts are also made available for local mental health work, support of juvenile homes and camps, and for programs of aid to crippled children.

FINANCIAL OUTLOOK

Budget Financing Plan for 1958-59

You will see from the summary tabulation of the General Fund shown below that estimated expenditure requirements through the 1958-59 Fiscal Year exceed available current funds by \$94,463,762.

CONDITION OF THE GENERAL FUND Estimates in Millions of Dollars

	1957-58	1958-59
Surplus July 1_____	\$109,694,825	\$8,482,620
Revenues_____	1,144,524,507	1,183,487,986
Expenditures:		
State Operations_____	398,384,622	431,982,463
Capital Outlay_____	86,925,076	30,204,836
Local Assistance_____	772,302,005	831,979,109
Total Expenditures _____	\$1,257,611,703	\$1,294,166,408
Deficiency of Current Income_____	—\$113,087,196	—\$110,678,422
Transfers from Other Funds ¹ _____	11,874,991	7,732,040
Surplus June 30, 1958_____	\$8,482,620	---
Accumulated Deficiency June 30, 1959_____	---	—\$94,463,762

¹ Includes transfers from School Bond Retirement Fund in accordance with Chapter 1073/1957.

I recommend the following means of meeting this deficiency as a budget balancing plan which does not require additional taxes:

1. Transfer the Revenue Deficiency Reserve Fund to the General Fund	\$75,000,000
2. Repay to the General Fund an advance made to the School Building Aid Fund in 1952 of_____	20,000,000
Total to be made available_____	\$95,000,000
Estimated deficiency _____	94,463,762
Estimated working surplus_____	\$536,238

In view of the present economic situation this is no time to impose additional tax burdens. Your 1957 Session wisely provided for a comprehensive study of the State's tax structure and expenditure trends by a committee which will make a report at your 1959 General Session. At that session there should be sufficient time for a very complete consideration of the report in face of the then current conditions. Economists advise us that the current business lag will have run its course by that time so that your re-examination of the revenue system can be made in light of normal business conditions. Meanwhile the use of the Revenue Deficiency Reserve Fund, in my judgment, is a sound action and in keeping with the basic purpose of establishing the Fund. The time of revenue deficiency unfortunately has arrived.

In 1952 a transfer of \$20,000,000 was made from the General Fund to the School Building Aid Fund. The purpose of the transfer was to reduce if possible the amount of bonds to be sold from the \$185,000,000 School Building Aid Bond issue approved by the voters in November 1952. Provision was made, however, for the return of the advance if needed at June 30, 1953, to maintain the solvency of the General Fund at that date. As it turned out the General Fund surplus was such on that date that the repayment of the advance was not then required, and there is still \$20,000,000 of unsold bonds remaining in the bond authorization. Since our revenue estimates now indicate a deficiency in the General Fund on June 30, 1959, I recommend that you authorize the repayment of the \$20,000,000 as of that date if the deficiency actually develops as forecast. It appears clear that it was the intent when the advance was made originally that it be returned if needed to maintain the solvency of the General Fund. It will be necessary that you authorize the sale of the remaining \$20,000,000 in authorized bonds of the 1952 issue to make funds available for this repayment.

Future Budgets

Even with an upswing in business a large deficiency of revenues under the existing tax structure will inevitably face future budgets unless basic changes are made in expenditure requirements.

As has been pointed out in previous budget messages, the State's tax structure has remained virtually unchanged for more than 20 years. During this period, however, many heavy additional burdens have been imposed upon the State Treasury. Increases have been made in state support of the public school system so that today the unit allowance is almost three times that of 1935.

Subventions for welfare and public health purposes have followed much the same pattern. Increases have been made in rates of payments. More liberal fea-

tures and extensions have been added. Heavier sharing of costs has been shifted from the counties to the State.

In a number of important fields in State Operations, expenditure obligations have increased greatly too. Enrollments in the University of California and in the State colleges have increased at rates much greater than the rate of growth in the State's total population. Stepped-up programs of treatment have been made in the mental hygiene hospitals and in the correctional institutions.

All through these years these additions to the State expenditure obligations have been made without corresponding adjustments to the State's revenue system to finance the increased costs.

The effect of inflation on revenue yields has partially obscured the fact that during this 20-year period the many obligations which have been placed on the State Treasury in the aggregate call for heavier expenditures than the 20-year-old tax structure can finance, even in prosperous times. The day of reckoning will be here all too soon.

I cannot stress too much the great need for a very searching examination into the whole expenditure and revenue structure so that sound measures can be taken to maintain the State's finances on an even keel.

Water Development

Because of its exceptional importance to the future of California, I have reserved to the end of this message a discussion of the water problem which must become a part of your consideration on this year's budget.

Substantial progress is being made in the initial highway and railroad relocation phases of the Feather River Project at Oroville. It is urgent that we keep this program moving forward and now augment it by acquisition of rights of way and the construction of additional features of the project in order that the development of this vastly important water resource not be delayed to the future detriment of the State. The budget as now drawn includes a proposed appropriation for \$6,800,000 to continue the basic engineering work.

Further, I strongly recommend an additional appropriation of \$71,000,000 at the earliest possible time to provide for the acquisition of rights of way at Oroville, on the Upper Feather River, on the South Bay and San Joaquin Aqueducts, at the San Luis Reservoir, and for the State's North Bay Aqueduct Project. This sum also includes provision for further relocation construction at Oroville, construction of Frenchman Reservoir in the Upper Feather River Basin, and beginning construction on the South Bay Aqueduct and on the North Bay Aqueduct Project.

It should not be a difficult task for reasonable people to find a solution to the water rights problem and I believe it is imperative that the Joint Committee on Water Resources Problems continue to work diligently on the problem in the hope of reaching a successful conclusion this year.

I am aware of the discouragement which some of your members have expressed and I know it is reflected by many Californians who have given unselfishly of their time and energy in an earnest effort to find the solution.

As the chosen representatives of the people you know that there can be no simple announcement of a hung jury and a dismissal of the case.

A decision is imperative. We know of California's current maldistribution of water. It is a problem which demands an answer. We must not be guilty of taking a perilous short-range view. Our State's destiny, if it is to fulfill the expectations of even the most conservative forecaster, must have available vast quantities of additional water to attract industry, to provide jobs, to increase the productive capacity of our agricultural lands and to provide abundant domestic water supplies for rapidly growing urban areas.

There is no reason why significant, affirmative progress cannot be made toward actually, physically meeting our water distribution requirements.

Regardless of the ultimate details and legal technicalities, a start will have to be made quickly on the Feather River Dam if the people are to be properly served.

I consider this water development program so important that I have temporarily withheld placing this amount in the recommended budget appropriations in the 1958-59 Fiscal Year until it can be determined, after consultation with your leadership, whether a special session should be called for action on water problems. If such a special session is called I would prefer that you enact this \$71,000,000 appropriation in the special session and make the funds immediately available. If, however, it develops that sectional and partisan differences are impossible of settlement at this time, I shall request an amendment to the budget when you return from your recess and will ask you to include this appropriation in the Budget Bill.

It is my hope that many of our water problems are closer to solution than some of you have indicated to me. However, whether or not final action on all the questions presently facing us can be achieved this year, we must not permit our substantial progress to date to be wiped out through failure to act decisively and affirmatively whenever we can. Prudence and deliberation are excellent virtues; when practiced to excess they can become cowardice and in-

decision, neither of which attracts the support of the forward-looking people of California. They look to you for positive, dynamic action.

Approval of the right of way and construction appropriation which I have recommended will constitute a strong demonstration of good faith and assurance that all of the manifold water problems of our State will be solved in a manner which will work to the long-range benefit of every section of California.

I assure you of my full cooperation in your consideration and action on the budget.

Respectfully submitted,

Goodwin J. Knight

February 3, 1958

Governor

Letter of Transmittal

HONORABLE GOODWIN J. KNIGHT
Governor of California
State Capitol, Sacramento, California

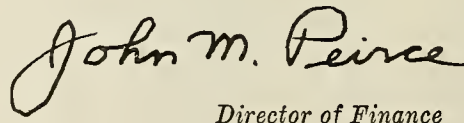

DEAR GOVERNOR KNIGHT: Transmitted herewith are the summary tables and detailed statements for the Budget of the State of California for the fiscal year July 1, 1958 to June 30, 1959.

We have streamlined the budget document by consolidating much of the detail and by placing schedules of salary payments in a separate supplement. More information is given concerning the programs and services for which funds are required. I am sure this will make the budget a more convenient document with which to work.

The co-operation of department heads has been outstanding in carrying out your policy of holding expenditures to absolute minimum requirements. We are confident that expenditures will be reduced in the overall even below the amounts set forth in the individual items. Accordingly, so that budget figures be more realistic, unallocated reductions are anticipated in respect to General Fund expenditures amounting to \$8,000,000 for the current fiscal year and \$16,500,000 for the 1958-59 fiscal year.

The staff and facilities of the Department of Finance are, as always, available to furnish further information and otherwise assist in the budget consideration.

Respectfully yours,

Director of Finance

BUDGET DOLLARS

1958-59 FISCAL YEAR

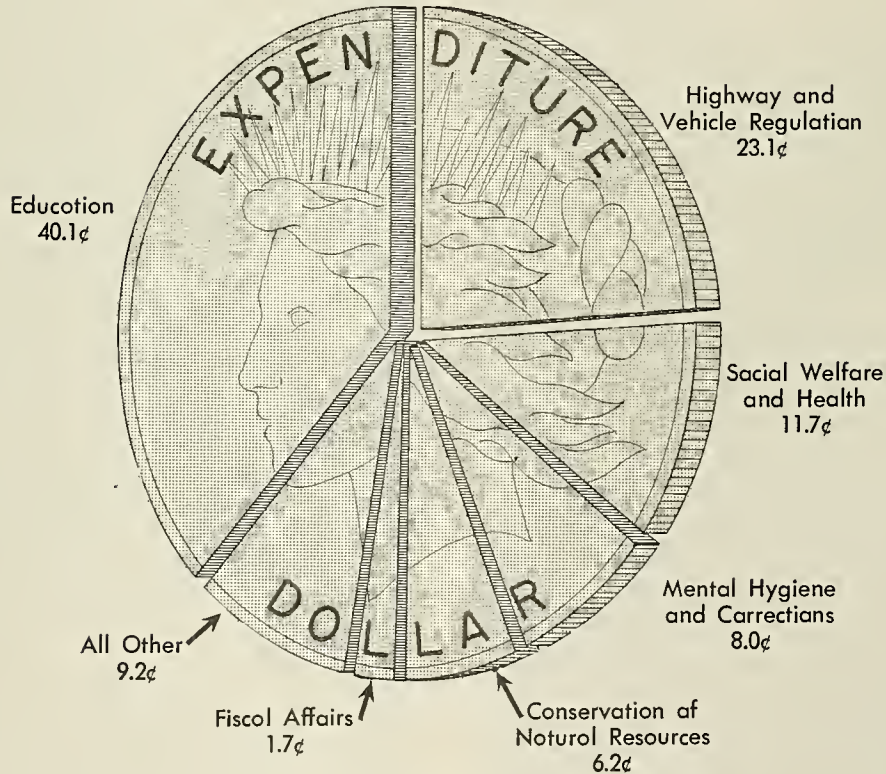

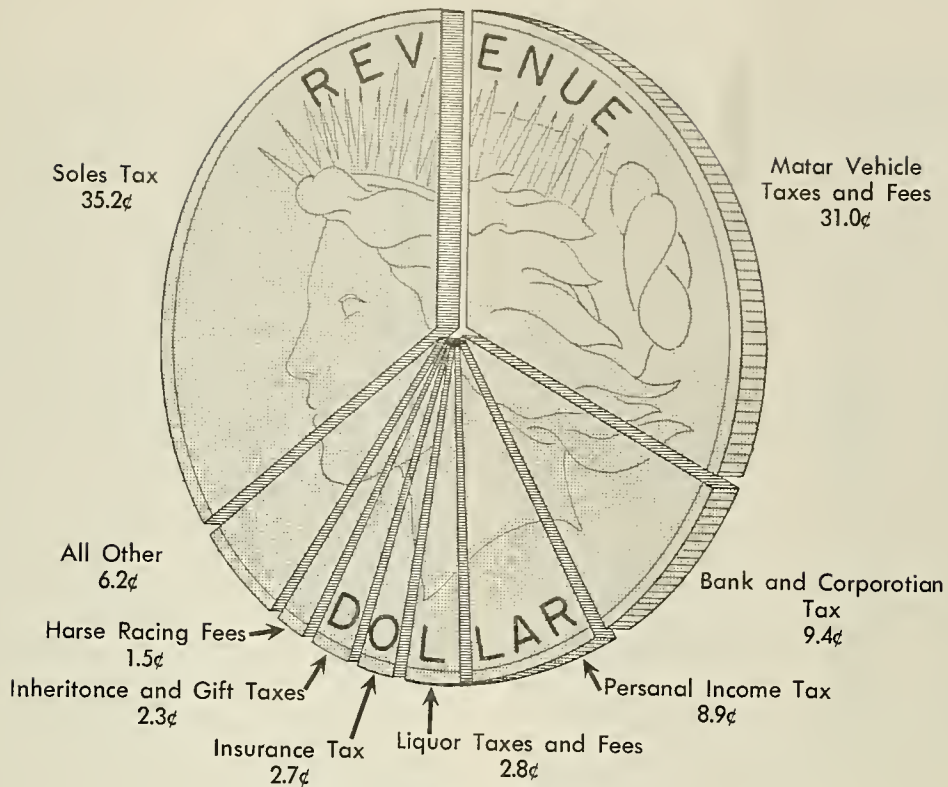

CHART 2

Revenue Estimates

Recent business developments and uncertainties regarding future trends make it essential to emphasize the economic assumptions underlying the 1958-59 budget revenue estimates. The forecasts here presented are predicated upon a slight increase in volume of business and personal income, both in the Nation and in the State, with the improvement particularly apparent in the last half of the year. In general terms, it is estimated that gross national product will increase from \$434.3 billion in 1957 to \$442.0 billion in the current calendar year. Personal income is expected to rise from \$342.8 billion to \$350.8 billion, and California's share of this income is projected at \$35.7 billion, compared with \$34.6 in 1957.

Since California's tax system is closely geared to business and income, any marked difference between the actual and estimated patterns will influence revenue receipts. If economic activity does not improve, State income will fall short of these estimates. If there is a sharp resurgence early in 1958 as a result of developments now unforeseen, revenue from such levies as the sales, personal income and corporation taxes during the budget year will reflect this improvement. A detailed statement of economic factors involved in these estimates is given below.

Aggregate State revenue from all sources during the 1958-59 Fiscal Year is estimated at \$1,860,104,414, an increase of \$66,387,931 over the amount anticipated during the current operating period and \$26,409,339 over actual receipts during 1956-57. As the State's income last year was materially inflated by receipt of \$130,459,915 in accumulated oil and gas royalties on production from tidelands held in trust by the City of Long Beach, this sum should be excluded in making year-to-year comparisons. On this basis, receipts during the coming year are expected to exceed normal collections of 1956-57 by \$156,869,254 *.

A little more than one-third of the revenue next year will come from the retail sales tax; a little less than one-third from the various highway user levies; about one-sixth from income taxes—corporate and personal; and one-sixth from all other sources.

Receipts for the General Fund will amount to \$1,183,488,000, or 63.6 percent of all income. At this level, general purpose revenue will be \$38,963,000 (3.4%) above the anticipated total for the current year and \$104,580,000 more than last year's actual collections. Gains over 1957-58 are expected in the sales, personal income and insurance taxes, with other levies showing either relative stability or a slight decline—some as a result of changing economic conditions and some for other reasons. Special fund revenues are expected to total \$676,616,000, or roughly \$27,424,000 more than during the current year. All of the increase will be found in motor vehicle fuel and license fees and in receipts from horse racing. Collections under the motor vehicle transportation tax will decline sharply both this year and next principally

as a result of the rate reduction effective January 1, 1958. Revenues during the three fiscal years covered by this budget are summarized in the table below.

COMPARATIVE REVENUE (Thousands of dollars)

<i>Taxes, Fees and Other Sources</i>	<i>1956-57 Actual</i>	<i>1957-58 Estimated</i>	<i>1958-59 Estimated</i>

Totals, Special Funds.....	\$754,787	\$649,192	\$676,616
Grand Totals	\$1,833,695	\$1,793,716	\$1,860,104

* Excluding General Fund share.

Revenue Revisions

Revenue during 1956-57 ran somewhat above the original budget forecast but below the revised total prepared a year ago. Against an original estimate of \$1,745,345,000 * and a revised figure of \$1,840,378,000, actual receipts were \$1,833,695,000. The margin of difference between the final figure and the original projection was 5.1 percent, while the variation from the revised total was —0.4 percent. With regard to the General Fund, actual receipts were \$65,071,000 above the original estimate (6.4%) but below the revision by \$6,392,000, or 0.6 percent.

Changing economic conditions have made it necessary to revise the revenue estimate for the current year by a rather substantial amount. Income of California residents did not fully measure up to expectations last year and will be at a lower level in 1958 than had been counted upon in the projections made a year ago. There has also been a fractional decline in the productivity of such important levies as the sales, income and motor vehicle taxes at this lower level of personal income. Moreover, legislation adopted last year reduced revenue receipts in 1957-58 by roughly \$2,700,000.

Consequently, current estimates of revenue during 1957-58 have been revised downward by \$39,272,000 from the amount shown in last year's budget. Approximately \$26,778,000 of this sum relates to the General Fund; the remaining \$12,494,000 occurs in

* The Long Beach settlement has been added to the original revenue estimate for 1956-57 in order to allow comparisons with the revised estimate and actual revenue in that year.

the special fund items and is mainly in motor vehicle taxes and fees.

Accuracy of the estimates of General Fund revenue are especially important in planning the State's fiscal program, since variations between the forecasts and actual receipts may mean the difference between surplus and deficit operations. In the last five fiscal years, the original revenue estimates have proved to be too conservative by an average of 7.5 percent while the annual revisions have run 1.1 percent below actual receipts. Ratios for each of the years follow:

	<i>Actual compared with</i>	
	<i>Original estimate</i>	<i>Revised estimate</i>
1952-53-----	4.1%	-0.3%
1953-54-----	-0.5	-1.7
1954-55-----	9.6	6.3
1955-56-----	17.2	2.0
1956-57-----	6.4	-0.6
Average-----	7.5	1.1

ECONOMIC CONDITIONS

The new calendar year has opened with more uncertainties regarding probable economic developments than any time since 1954. Although record levels of employment, production and income were achieved in 1957, the rate of expansion slowed sharply during the last six months, and at the close of the year a business readjustment was well under way. Productive capacity exceeded immediate demand in several basic industries; shipments exceeded new orders, with the result that business backlogs diminished; inventories were being reduced; and expenditures for plant and equipment which contributed importantly to the level of 1957 were being curtailed. Prices of raw materials declined and there was a distinct drop in the rate of advance in prices of finished goods and consumer items.

These developments are traceable in part at least to the credit and monetary policies adopted by the Federal Reserve Board in an effort to forestall disastrous inflation and to avoid the consequences of unbridled expansion. Price stability and a decline in the demand for funds by business and industry which became evident in October reduced the need for monetary controls, and the initial move in relaxing credit came last November with the lowering of discount rates by all the Federal Reserve Banks. In addition, the Reserve Board has recently been increasing the money and credit supply through other moves in its management of monetary affairs. Thus, two of the factors limiting expansion last year—tight money and rising interest rates—will exercise less influence in 1958.

A resurgence in expenditures for national security will also contribute to an improvement in this year's business climate. Until the successful launching of earth satellites by Russia drove home the scientific advances of that nation, the emphasis here was upon reducing outlays for defense and foreign aid. Successive cut-backs in aircraft production, postponement of substantial defense orders and confusion in missile development contributed to business uncertainty, particularly in California. The reversal of defense policy in the closing months of last year and assurance that the missile program will go forward at an accelerated rate will contribute to business confidence.

The increase in federal purchases of goods and services will be supplemented by a further rise in expenditures of state and local governments made necessary by sustained population growth. Highway construction is expected to expand sharply as work on the interstate system approaches full swing, public housing will be up, and there will be further increases in outlays for educational buildings and other nonresidential structures.* Hence, demand in the government sector of the Nation's economy will not only be stronger this year but will be in a rising trend, as contrasted with the slight decline during most of 1957.

Private residential construction also appears to be one of the strong points in the 1958 outlook. Forecasts of residential building indicate a moderate recovery from the downturn of the last two years. Vacancy ratios are lower, especially in rental units, and the recession in home construction last year made possible a substantial liquidation of the surplus in speculative houses. Although a return to the levels of 1950 and 1955 is not foreseen, an increase from approximately 985,000 unit starts in 1957 to about 1,050,000 this year is anticipated.

There are conflicting opinions regarding trends in private nonresidential building. Some surveys indicate a slight rise in expenditures for this purpose, while others contemplate a fractional decline. Outlays for plant and equipment during the first quarter will be 4.7 percent below the corresponding period of 1957, according to a report by federal agencies,** while a survey by the McGraw-Hill Publishing Company indicates a 7 percent decline for the year as a whole.† On this basis, aggregate expenditures for private nonresidential construction and producers' equipment have been reduced 7 percent from last year's level in formulating the economic assumptions underlying the budget revenue estimates for 1958-59. Because the decline in equipment can be expected to lag behind the drop in construction and because equipment needs should be sustained by replacement demand and modernization, the decrease in equipment expenditures has been estimated at 5 percent while construction has been projected at a level approximately 10 percent below that of last year (See table following page). The aggregate value of business inventories is not expected to change appreciably, though there probably will be periods of liquidation and others in which stocks are accumulated.

Net foreign investment—the balance of this country's trade with the rest of the world—is likely to decline, largely as a result of a drop in the volume of surplus agricultural products sold in foreign markets. However, this segment of the national economic accounts is affected by many factors—trade, travel, foreign aid, maintenance of armed forces abroad, etc.—and the net change is extremely difficult to forecast. The lower total here anticipated is largely a concession to the possibility that foreign trade will not be conducted in the same volume in 1958 as last year.

* Spendable resources of California residents represents disposable income adjusted for estimated change in short-term consumer credit and estimated change in liquid asset holdings of individuals—e.g. money, bank accounts, savings bonds. Amounts are estimated by the State Department of Finance.

Source: Data for 1956 from reports of the Office of Business Economics, U. S. Department of Commerce; preliminary figures for 1957 based on Department of Commerce reports for the first three quarters with fourth quarter estimated by the State Department of Finance; estimates of national data for 1958, the estimates of California's personal income (except 1956), personal taxes, disposable income and population are based upon studies by the Financial Research Section, Budget Division, State Department of Finance.

Combined expenditures of the three non-consumer sectors of the economy—government, business and foreign investment—will show essentially no change in 1958 under this projected pattern. The declines in investment and net foreign trade will be offset by the increase in purchases of goods and services by governmental agencies. This leaves the consumer sector as the area which will tip the balance either toward a further climb by the economy this year or a net recession.

Consumers have established a remarkable record in their support of the Nation's economy. Only once in the last twenty-four years have the aggregate purchases of goods and services by individuals declined from one year to the next. Eliminating the contribution made to this record by prices, only twice in this period has the physical volume of consumer purchases fallen from one year to the next—first in 1938 and again in 1942. Thus, those who hold the key to 1958 business trends have usually turned it toward an increase.

There are substantial reasons to believe that consumer purchases in the aggregate this year are more likely to increase than to decline. In the first place, population will continue to grow. Approximately three million individuals will be added to the domestic market, an increase of nearly two percent. Second, the consumer market is not only broader than ever before, but deeper as well. In terms of purchasing power, per capita income has increased 9 percent since 1954

and 23 percent since 1949—the last two recession periods. The median income of spending units in 1956 was estimated at \$4,250, compared with \$3,700 and 1954 and \$2,700 in 1949.* Third, dollar volume of expenditures this year will also be influenced by a slight further increase in prices—estimated at one percent for purposes of these revenue projections. A fourth expansionary factor will be generated by the anticipated increase in residential building. Coupled with a growing backlog of replacement needs in the household appliance field and an increase in the dollar value of automobile sales, the recovery in housing should carry sales of consumer durables to a higher level this year. Consumer credit and the probable easing in money supply provide other elements on the favorable side of the equation. As a result of the anticipated decline in need for capital funds by industry and relaxation of monetary policies, it is likely that a larger volume of resources will be available for consumer credit than was the case last year. Finally, the urge toward better living which has raised standards more than 50 percent in the last two decades and one-sixth in the last nine years † will continue to be an important force in determining consumer expenditures in 1958.

On the basis of these factors, personal consumption expenditures are estimated to increase from an indicated \$281.1 billion last year to \$289.0 billion in 1958. This will carry the gross national product to \$442.0 billion, an increase of \$7.7 billion, or 1.8 percent, above the total for last year. Under this estimate, about half of the current year's increase will be the result of higher prices and half will represent a larger physical output of goods and services.

Recent additions to the Nation's economic plant should result in a further increase in productivity. It is likely, therefore, that the \$442 billion production this year will be turned out by a slightly smaller working force than was employed in 1957. Allowing for a moderate rise in compensation rates, wage and salary receipts have been estimated to increase from the \$238.8 billion total indicated for 1957 to \$240.5 billion in the current year—a level only a little above that of the July-December period just closed.

Among the other important sources of personal income, proprietorship receipts should increase slightly as the result of a continued rise in professional income, supplemented by an improvement in net receipts from farming operations and larger government payments to farmers. Dividend income is likely to repeat the pattern described in 1948-49 and again in 1953-54 when dividend payments increased in spite of a decline in corporate profits. As in these earlier years, a decline in capital investment will lessen the need for retained earnings, releasing a larger share of profits for dividend purposes. Interest income can be expected to reflect the larger volume of savings and investment funds put to work last year at higher interest rates. Rental income should rise while transfer payments (i.e. unemployment and social security benefits, public assistance, etc.) can be expected to

* *Federal Reserve Bulletin*, August 1950, June 1953, and August 1957.

† As measured by per capita civilian expenditures for goods and services in constant dollars.

increase with a slackening in the rate of industrial growth.

In total, personal income during 1958 is estimated at \$350.8 billion, compared with \$342.8 billion indicated for last year and a \$345.6 billion annual rate in the closing half of 1957. Federal, state and local taxes on income are assumed to remain unchanged in rate, but slightly higher in amount because of the augmented volume of personal receipts. Income after taxes is estimated at \$306.7 billion, against \$299.7 in 1957. With personal spending expected to reach \$289.0 billion, savings will drop to \$17.7 billion, compared with \$18.6 last year.

Although production and income are expected to show these fractional increases, the early months of 1958 may disclose a decline. Such stimulating elements as the increase in defense expenditures and residential construction are likely to be slow in developing, with the result that activity late this year and in the early part of 1959 will show a marked improvement over the winter and early spring months.

CALIFORNIA SITUATION

Only six times in the last twenty-eight years has California failed to increase its share of the Nation's total personal income.* Three of these instances occurred during the 1935-40 recovery period and three in the 1946-48 readjustment from wartime heights. There have been no set-backs in this State's progress toward a higher status in the national economy during the last nine years. While this record does not guarantee a further advance in 1958, it is substantial evidence of the strong economic forces governing development of this State.

Realignment of the defense program toward greater dependence upon guided missiles undoubtedly will affect California's economy. The loss in aircraft production will be alleviated, however, by this State's prominent position in the missile and electronics industries. With a background of knowledge and experience in defense production, scientific resources, plant and equipment, capable labor force and climatic advantages, this State is virtually certain to obtain its full share of missile orders and other defense production.

California should also participate fully in a recovery of home building. Vacancy ratios have been declining for the last two years and the backlog of speculative houses in many of the surplus areas is being worked down. Surveys of housing needs in the northern part of the State indicate increases up to 10 percent over last year's volume and this prospect appears to be borne out by a moderate upturn in the San Francisco Bay Area during recent months. Highway construction will remain relatively stable at the high level achieved last year under the new Federal-state program, and an easing of interest rates is likely to bring out public works projects previously deferred. Industrial construction is expected to decline, while investments by public utilities will continue at approximately the same rate as in 1957.

Personal income of California residents is estimated to reach \$35.7 billion in 1958, an increase of \$1.1 billion over the total indicated for last year. At this level, California would account for 10.18 percent of the estimated national total, compared with 10.09 percent last year and 9.94 percent in 1956. With no change in Federal or State income taxes, disposable income is estimated at \$31.2 billion this year. Allowing for a moderate drop in rate of savings and an increase in use of short-term consumer credit, spendable resources of California residents are projected at \$30.5 billion for the year, or approximately \$1.3 billion more than in 1957. The corresponding increase for 1957 over 1956 is estimated to have been \$1.2 billion. Corporate profits last year—taxable in 1958—are estimated at \$3.76 billion, based upon reports from a selected sample of 365 corporations submitting preliminary data to the Franchise Tax Board. Earnings of corporations from operations in this State during 1956 amounted to \$3.77 billion.

These estimates of personal income, spending and profits, with allowance for collections under the various tax audit programs and receipts of the several operating departments of State government, form the basis for the 1958-59 revenue forecasts presented in this budget. Additional details are presented in the following comments regarding each tax source.

GENERAL FUND REVENUE

Sales Tax—\$654,300,000

Revenue from the retail sales and use taxes is expected to total \$654,300,000 during the budget year compared with probable receipts of \$626,300,000 in the current fiscal year and actual collections of \$600,102,000 for 1956-57.

The estimate of taxable sales for the calendar year 1958, which is the primary consideration in forecasting revenue for this budget, has been based on a combination of two analyses. The first involves a study of the over-all relationship between spendable resources and total taxable sales. The fact that sales volume rises and falls with income is quite understandable, particularly if allowance is made for the amount of income tax paid or withheld on income of Californians. Sales, however, may also increase or decrease as accumulated savings are used for current purchases or as part of current income is set aside in the form of additional savings. Sales are likewise affected as a greater or lesser use is made of credit.

Taxable sales for 1958 have been estimated at \$21.33 billion using the assumption previously outlined regarding personal income to be received by Californians (\$35.7 billion), the rate of income taxes on such receipts, and the income-spending relationship. It was further assumed that a smaller amount of income would be set aside as savings than was apparent for 1957 (\$1 billion contrasted with \$1.4 billion), and that credit outstanding would increase in about the amount of last year (\$335 million).*

The second method involves an estimate of taxable sales based upon trends in the physical volume of sales

* Based upon *Personal Income By States*, Office of Business Economics, United States Department of Commerce; *Personal Income by States, 1956*, *Survey of Current Business*, August 1957; and Department of Finance estimates for 1957.

* The correlation equation: Taxable sales equal —\$752 million plus .750 times spendable resources. Spendable resources represent civilian income less Federal and State income taxes minus or plus the increase or decrease in liquid assets of Californians and plus or minus the increase or decrease in consumer credit in this State.

per capita for more than 50 types of businesses, and sales trends in each of these businesses in relation to spendable resources of Californians. The general economic assumptions previously mentioned regarding construction activity, investment in plant and equipment, price changes and new car sales were used in this second approach.

Under these conditions sales of nondurable goods, accounting for about 40 percent of all taxable sales, have been raised 3 percent on the average—somewhat less than the assumed increases in population and price. Consumers' durables excluding motor vehicles—approximately 9 percent of the base—were increased 4.4 percent in line with the expected recovery in housing this year. A five percent increase was taken in sales of building materials under the assumptions made regarding home building and public projects.

Sales of automobiles, parts and other automotive supplies constitute an important source of tax revenue—about \$120 million, or a fifth of the total. Such purchases are expected to improve by 3.7 percent. A smaller volume of motor vehicle sales in 1957 than was anticipated explains more than half the difference between estimate of revenue for 1957-58 prepared last year and that presented in this budget.

Taxable sales of manufacturers and wholesalers have been estimated at \$3,970,000,000, down approximately 1.5 percent from last year. The principal reason for this decline was the 5 percent drop taken in the purchases of heavy machinery in line with the basic assumptions made in the forecast of investment plans of industry for plant and equipment.

Application of this second method resulted in an estimate of taxable sales of \$20.68 billion or \$650 million below that based on total spendable resources. The two results were averaged and an estimate of \$21 billion was used. This level compares with an indicated \$20.16 billion for 1957 † and reflects an expected rise of 4.2 percent.

Estimates of sales were also made for the first two quarters of 1959 assuming an increase of 6 percent over the like period in 1958. This increase is similar to that which occurred between the first halves of 1956 and 1957. Taxes, interest and penalties under the Board of Equalization auditing program, sales tax withheld on gas tax refunds, and retailers' permit fees are included in the \$654.3 million sales tax yield.

Bank and Corporation Tax—\$174,200,000

Revenue estimates from this source for the years under consideration are, for the greatest part, determined by corporate profits attributable to California for 1956, 1957 and 1958. The estimate for 1957 was based on a sample of 365 corporations in 67 industry fields, accounting for over 45 percent of the total profits earned in the State. Interestingly enough, the data indicated that corporate profits were up in 34 industries; down in 32 industries and unchanged in the remaining one. In the aggregate, the survey indicated that in 1957 corporate profits totalled \$3,764,100,000, down very slightly from the \$3,772,600,000 recorded in 1956.

A comparison of income by major industrial classifications for 1956 and 1957 follows.

† Fourth quarter estimated.

CORPORATE PROFITS BY MAJOR INDUSTRY 1956 AND 1957

(Thousands of dollars)

General Corporations	1956	1957	Percent Change
	Actual	Estimated	
Agriculture -----	\$36,803	\$42,000	+14.1
Mining -----	25,443	19,000	-25.3
Construction -----	106,129	110,000	+3.6
Manufacturing -----	1,565,204	1,574,550	+0.6
Oil production -----	262,832	232,000	-11.7
Trade -----	533,771	517,500	-3.0
Services -----	157,051	164,500	+4.7
Miscellaneous -----	2,045	2,000	-2.2
Totals -----	\$2,689,278	\$2,661,550	-1.0
Financials -----	572,459	606,250	+5.9
Utilities -----	510,868	496,300	-2.9
Grand Totals -----	\$3,772,605	\$3,764,100	-0.2

The profit outlook for 1958 calls for a continued decline from 1957. General corporations will be faced with an increasing cost-price squeeze as labor and other production costs rise and price levels remain relatively stable. Earnings of the financial group should increase, as gains from sales of government securities augment operating income. During the last three years, losses taken on sales of government bonds to provide working capital in the tight money market were offset against operating income. In addition, increased housing activity during 1958 should tend to raise profits of financial institutions.

Population growth, rate increases granted to offset higher costs, and a larger investment base upon which profit ratios are determined should produce an increase in taxable incomes of utilities next year. The larger earnings of financials and utilities are not expected to offset the decline anticipated for general corporations, however, and aggregate corporate profits of \$3.65 billion are expected—3 percent less than in 1957.

Collections from the audit program administered by the Franchise Tax Board returned \$9,005,000 in 1957, and are expected to increase \$500,000 annually in 1958 and 1959. The second installment of the bank tax, due in January, 1958 was assessed at \$12,174,000. The corresponding payment in 1959 is estimated at \$13,560,000. After converting calendar year data to fiscal years, the revenue from the bank and corporation income tax is estimated at \$174,200,000, compared with \$177,400,000 for the current year and \$167,431,000 received in 1956-57.*

Personal Income Tax—\$165,150,000

Revenue from the personal income tax, which varies in rate from one percent of the first \$5,000 of taxable income to a maximum of six percent on taxable incomes over \$25,000, is estimated at \$165,150,000 for 1958-59. This compares with \$157,800,000 expected during the current fiscal year and with actual receipts of \$143,290,000 during 1956-57.

The basic factors needed for these estimates are: (1) personal income segregated into wages and salaries, business and professional income, dividends, interest and rents; (2) the relationship of income data to taxes attributable to these sources; and (3) the net gain

* The supplementary corporation income tax is combined with the bank and corporation tax for purposes of revenue estimating and reporting in this budget. The two levies are identical in essential features.

received by individuals from the sale of property, both tangible and intangible.

Based on the United States Department of Commerce data on personal income received by California residents during 1956, the Department of Finance has prepared estimates for 1957, using employment and payroll data, farm income and national figures on dividends, interest, rents, and receipts from other sources. A projection of aggregate personal income of Californians in 1958, as shown in the accompanying table, was prepared on the basis of anticipated national trends and California's growing importance in the Nation's economy.

ESTIMATED PERSONAL INCOME

(Millions of dollars)

	1956	1957	1958
Wages and salaries	\$22,420	\$24,027	\$24,675
Proprietors' income	4,070	4,130	4,150
Property income *	4,213	4,438	4,610
Other income †	2,448	2,747	3,040
Less: Social insurance contributions	-650	-742	-775
Totals	\$32,501	\$34,600	\$35,700

* Dividends, interest and rents.

† Chiefly pensions, unemployment benefits, disability allowances and direct relief.

After analyses of tax returns over a period of years, data on income from each source and the resulting tax payments have been correlated. An estimate of the coming year's tax was made on the basis of the personal income projections and the long-term relationship of income to assessed tax. The following table compares the relative importance of the components of personal income and the tax attributable to these sources in 1956.

	Personal income	Tax assessed
Salaries and wages	67.6%	50.7%
Proprietors' income	12.3	19.8
Property income:		
Dividends	3.6	12.0
Interest	5.1	2.4
Rents	4.0	3.3
Other income	7.4	2.8
Capital gains	--	9.0
Totals	100.0	100.0

The tax on capital gains, having no counterpart in the personal income series, must be estimated separately. Following the technique developed last year which related the tax on capital gains to total value of stock transactions on registered exchanges, the estimate of tax from this source was decreased by 5 percent from last year's level.

An allowance of \$6,000,000 and \$6,250,000 for 1958 and 1959, respectively, was made for additional taxes assessed by the Franchise Tax Board in administering the income tax law. These amounts compare with \$5,641,000 collected under the Board's enforcement program during 1957.

Insurance Tax—\$50,030,000

Revenue from the gross premiums tax on insurance companies is expected to continue in the climbing pattern evident in previous years. The 1958-59 tax will be based upon an estimated \$2.37 billion in premiums received during calendar 1957, and will therefore be unaffected by economic conditions during the coming months. A sample group of 80 of the largest insurers

was asked for estimates of the volume of premiums written by them in California, and the replies indicate growth in all lines of insurance except fire and inland marine, which are to an increasing extent being replaced by package-type homeowners' multiple peril policies. Life insurance premiums continue to parallel population growth, while health and accident premiums show even greater gains. Automobile bodily injury liability insurance displays the most outstanding upward movement (+20.9%) and accounts for \$43 million of the \$190 million increase over total 1956 taxable premiums. Other automobile insurance shows significant expansion in line with increased automobile prices and repair charges. Workmen's compensation premiums, reflecting in part a larger civilian labor force, increased about 5 percent.

After adjustments for dividends paid to policyholders and deductions of local property taxes paid on the principal office buildings owned by insurers, the 2.35 percent tax rate is expected to yield \$50,030,000 in 1958-59, compared to \$46,037,000 this year and \$42,529,000 in 1956-57.

Inheritance and Gift Taxes—\$42,400,000

Inheritance and gift tax revenue depends primarily upon the number and size of bequests and upon the relationship between the decedent or donor and the beneficiary. In general, the rates of tax vary directly with the size of the inheritance or gift and with remoteness of the relationship. Exemptions are scaled down as the relationship recedes. General business conditions and property values also influence the volume of collections, but there is a lag between changes in property values and the resultant change in tax receipts. Hence, collections should continue for some time to reflect the increases in value of real property and intangibles occurring during recent years. Inheritance tax collections are running at a per capita rate of \$2.50 a year, indicating total receipts of approximately \$36,000,000 in this fiscal year. However, settlement of one large estate is expected before May 15 which will carry the total to an estimated \$42,000,000. This compares with actual collections of \$35,994,000 during 1956-57. Although another large estate remains to be settled, there is no information at hand regarding either the distributions to be made or time of payment. For this reason the estimate of 1958-59 collections—\$39,700,000—has been based upon the general trend in receipts from this source.

Gift tax revenue reached \$2,546,000 during the last fiscal year. Recent monthly collections are running slightly below last year's level, but are expected to pick up again during April and May when most of this year's revenue will be received. The growing tendency toward better estate planning, exhaustion of personal exemptions and application of higher rates to successive gifts to the same donee should result in further revenue increases. Hence, receipts from this source are estimated at \$2,650,000 in the current year and \$2,700,000 in 1958-59.

Alcoholic Beverage Taxes—\$41,090,000

Major source of alcoholic beverage tax revenue is the \$1.50 per gallon excise on distilled spirits. Over 23 million gallons of liquor were taxed during 1957,

averaging 2,625 gallons for each of the 8,854,000 adult residents. Although there had been a slight upward trend apparent in per capita consumption between 1954 and 1956, the last two years show almost no change, and average adult consumption for 1958 and 1959 has been projected at the same level as last year. The State's adult population is expected to increase to 9,107,000 by midyear 1958 and 9,382,000 in 1959. This should carry total annual consumption to 23.9 million gallons and then to 24.6 million gallons. On a fiscal year basis, tax revenue is estimated at \$34,500,000 in 1957-58 and \$36,250,000 in 1958-59, compared with actual receipts of \$34,902,000 in 1956-57. The current year decrease is the result of an unusually high proportion of sales during the first part of 1957, a situation not expected to recur this year or next.

Sales of beer should continue to follow a rather steep up-curve which has resulted from California's population growth and a slightly rising average consumption per adult. Total consumption is forecast at 206 million gallons in 1958 and 214 million in 1959. Application of the two cents per gallon rate will provide tax income of \$4,110,000 in the current fiscal year and \$4,185,000 in 1958-59.

The tax on wines accounts for about 1.5 percent of all alcoholic beverage revenue. Per capita consumption of dessert wine has followed a general downtrend for many years; per capita table wine sales had been rising steadily until 1955 when a leveling occurred, and sparkling wine sales are continuing a long term incline. Projections of these trends result in the revenue estimates shown with proceeds from distilled spirits and beer taxes in the table below:

<i>(Thousands of dollars)</i>			
	<i>1956-57 Actual</i>	<i>1957-58 Estimated</i>	<i>1958-59 Estimated</i>
Distilled spirits	\$34,902	\$34,500	\$36,250
Beer		4,110	4,185
Sweet wine	4,361 *	345	345
Dry wine		100	110
Sparkling wine		175	200
Totals	\$39,263	\$39,230	\$41,090

* Cannot be distributed according to source, due to audit adjustments and other factors.

Private Car Tax—\$1,725,000

Under this levy, railroad cars owned by companies other than railroads are taxed by the State rather than by the various local governments. Assessed valuations are determined by the State Board of Equalization and the average Statewide property tax rate during the preceding fiscal year is applied against the assessment roll.

Car values have increased sharply during the last two fiscal years as a result of replacement and modernization programs carried on by the owners. The average tax rate has also been rising and is expected to reach \$5.60 per hundred dollars of assessed valuation next year. Although the number of cars subject to this tax has remained relatively stable for some time, the combination of higher values and an increasing rate has resulted in larger collections annually. Anticipating a continuation of this trend, the total assessment in 1958-59 is estimated at \$1,725,000, compared with \$1,590,000 in the current fiscal year and \$1,424,000 received during 1956-57.

Other General Fund Revenue—\$54,593,000

Revenues from other tax and nontax sources for the State General Fund during 1958-59 are estimated to total \$54,593,000. These comprise five general types of income: (1) a share of receipts from liquor, horse racing and motor vehicle license fees; (2) departmental collections, such as the per diem charges for care and treatment of pay-patients at State hospitals; (3) interest income; (4) a share of oil and mineral royalties; and (5) miscellaneous receipts, such as the proceeds from sale of property, a surcharge on fines for violation of traffic laws and other items of minor income. Principal changes anticipated in these accounts include: a further rise in departmental collections—traceable chiefly to an adjustment in pay-patients' board—a decline in interest earnings caused by the utilization of surplus and reserves to finance expenditures during 1958-59; and a substantial increase in receipts from sale of surplus property largely as a result of discontinuing farm operations at Metropolitan State Hospital. Operating problems in a rapidly expanding urban area have made it advisable to abandon these activities and dispose of the surplus land which has an estimated value of \$4,250,000.

SPECIAL FUND REVENUE

Provisions of the State Constitution, codes and statutes restrict the use of certain revenue to specified purposes, and under California's financial procedure these receipts are separately accounted in various special funds. In general, three categories of income are comprised in these special accounts: (1) receipts from broad tax levies which are dedicated to specific functions; (2) charges for special services to specific groups; and (3) certain rentals, royalties and other receipts earmarked for particular purposes. Motor vehicle taxes and fees illustrate the first of these classes. License fees for the regulation of businesses and professions are typical of the second, while oil royalty revenue dedicated in part to beach and park development is an example of the third group. Interest earned by the investment of special fund money accrues to the fund for which the investments are held.

Motor vehicle taxes and fees account for roughly 85 percent of all special fund revenue, and under provisions of the Constitution and Statutes these receipts must be used for highway purposes—including maintenance and construction of roads and streets, traffic control and motor vehicle regulation. Principal sources of this income are the levies upon motor vehicle fuel, registration and weight fees, transportation tax and the vehicle license fee levied in lieu of local taxes on this type of personal property. During the 1958-59 fiscal year \$577,270,000 will be derived from motor vehicle taxes and approximately 40 percent of this revenue will be apportioned to local governments. In total, these levies are expected to increase \$26,270,000 over the anticipated level for the current year and to be \$49,675,000 above actual receipts in 1956-57.

Regulatory fees and charges for special services to industry, business and the professions constitute the second largest source of special fund revenue. Coupled with hunting and fishing licenses and horse racing fees, receipts from these sources will amount to more than \$58,000,000 in the coming fiscal year. Royalties

from oil, gas and mineral production on publicly owned lands will provide an estimated \$32,808,000, with all but a fixed \$3,000,000 General Fund share of this income going to special accounts.

Motor Vehicle Fees—\$249,400,000

Most of the State's income from motor vehicle fees is derived from the annual charge for registration, the various weight fees required on trucks and buses, and the vehicle "in lieu" fees. There are, however, several charges—drivers' licenses, transfer fees and other items—which in the aggregate make a substantial contribution to highway user revenue. Total receipts from all fees during 1958-59 are estimated at \$249,400,000, or \$16,600,000 more than indicated for the current year and an advance of \$30,134,000 over actual receipts in the last completed fiscal year.*

Continuing the sharp growth which has added nearly 2.5 million vehicles to the rolls in the last seven years, a total of 7,400,000 fee-paid registrations was recorded in 1957. Of this number, approximately 5,950,000 were cars, light trucks and motorcycles subject to the \$8 annual registration charge and 1,450,000 were trucks, buses and trailers on which additional weight fees varying up to \$267 per unit were paid. A sustained volume of new car sales and registrations from out-of-state, offset in part by normal scrappage and disappearance from other causes, is expected to raise the total to 7,710,000 at the close of the current calendar year and 8,128,000 by the end of 1959. In the coming fiscal year, registration and weight fees, drivers' licenses, charges for transfer of ownership and other items are expected to reach a new record of \$126,000,000.

The effect of an increasing number of vehicles is compounded by higher selling prices so far as the vehicle license fee revenue is concerned. This levy, patterned after the local property tax which it replaces, involves a tax equal to two percent of the value of each vehicle. Value, in turn, depends upon original sales price and age of the vehicle, with specified depreciation rates provided by law. Thus the higher cost of cars during recent years has had a cumulative effect upon receipts from this source, carrying revenue from \$106,232,000 last year to the \$123,400,000 in prospect for 1958-59.

Comparative data on collections from principal fees during the three years covered by this budget are summarized below.

	(Millions of dollars)		
	1956-57 Actual	1957-58 Estimated	1958-59 Estimated
License (in lieu) fees	\$106.2 *	\$114.0 *	\$123.4 *
Registration and weight fees	105.1	110.3	116.8
Drivers' licenses	6.3	7.2	7.6
Caravan fees	0.5	0.2	†
Other fees and charges	0.9	1.1	1.6
Totals	\$219.3	\$232.8	\$249.4

* Including General Fund share.

† Repealed by Chapter 342, Statutes of 1957, which also increased service charge to \$6 for the original registration of every vehicle previously registered outside this State, beginning January 1, 1958.

* Approximately \$2,250,000 of vehicle license fee revenue is transferred to the General Fund each year to pay interest and redemption charges on highway bonds.

Motor Vehicle Fuel Taxes—\$317,000,000

Taxable fuel consumption is influenced by several factors in addition to the number of vehicles registered in this State. The most important of these is the extent of tourist travel in California. In all, some 1,850,000 out-of-state cars were recorded in-bound at the border checking stations during the past year and though the majority of these cars stayed only a short time, their use contributed substantially to total gasoline consumption. Other considerations include the changing structure of registrations (light vs. heavy cars, cars vs. trucks, etc.), relative fuel economy and traffic mobility. In spite of these several variables, gasoline consumption in recent years has remained relatively stable at about 640 gallons per vehicle, including those which are exempt from registration fees but contribute to fuel tax receipts. On this basis net taxable consumption of gasoline next year should reach the 4.98 billion gallon mark—a volume which under the 6-cent tax rate will yield \$299,000,000 in highway revenue.

Diesel fuel consumption is somewhat more difficult to predict. As indicated last year, the movement of freight trailers by rail appears to have slowed the rate of increase in diesel fuel use. In fact the annual rate of consumption has traced a flat, high-level line during the last few months, whether due to piggy-back operations or a slowing of business pace. As a result, use fuel tax receipts of \$17,000,000 in the current year will register the smallest gain of any recent period. Under the economic pattern basic to the budget revenue forecasts, receipts from this source should improve during 1958-59 and an increase to \$18,000,000 has been projected.

A comparison of fuel tax estimates for this year and next with actual receipts in 1956-57 is given below.

	(Millions of dollars)		
	1956-57 Actual	1957-58 Estimated	1958-59 Estimated
Motor vehicle (gasoline) fuel	\$274.6	\$286.5	\$299.0
Use (diesel) fuel	16.7	17.0	18.0
Totals	\$291.4	\$303.5	\$317.0

Motor Vehicle Transportation Tax—\$10,870,000

During the last two general sessions of the Legislature amendments to this tax statute have both decreased the base and reduced the rate. Legislation adopted in 1955 included the exemption of gross receipts from operations within the external boundaries of a city, release from tax liability of operators engaged in hauling rubbish and waste, and exemption of gross receipts on which an operator pays city taxes. In 1957 the tax rate was reduced from 3 percent to 1.5 percent and the weight fee offset was repealed, both effective January 1, 1958. In addition, bus lines operating in urban and suburban areas with a one-way route of 50 miles or less were exempted from this tax.

The above changes in the tax law—coupled with increasing piggy-back operations over railroad lines, a growing trend toward truck leasing by business firms and declining business activity—will result in revenue from this source of \$10,870,000 during the budget year, compared with \$14,700,000 in 1957-58 and \$16,729,000 last year.

Horse Racing Fees—\$29,102,000

Receipts from parimutuel wagering at California race tracks during the coming fiscal year should again reflect full-schedule operations after last year's strike. The dispute over compensation rates for parimutuel personnel last fall closed down one of the major tracks for nearly a month and reduced the aggregate volume of betting approximately \$20,000,000. As a result, horse racing license fees in the current year will be approximately \$1,150,000 less than otherwise would have been received.

With 523 days of racing in 1958-59 and a slightly higher level of personal income than last year, total betting at California tracks has been estimated at \$505.8 million, compared with \$463.5 million in the current period and \$469.2 million in 1956-57. License fee revenue and other racing income is expected to reach \$29,102,000, against \$26,552,000 estimated for the present year and \$26,695,000 received during 1956-57. A segregation of these amounts according to sources and funds follows:

<i>(Thousands of dollars)</i>			
	<i>1956-57 Actual</i>	<i>1957-58 Estimated</i>	<i>1958-59 Estimated</i>
Tax on parimutuel pools	\$24,935	\$24,669	\$27,030
Breakage	1,527	1,580	1,749
Unclaimed wagering tickets	186	252	270
Licenses, fines and penalties	47	51	53
Totals	\$26,695	\$26,552	\$29,102

Alcoholic Beverage License Fees—\$10,700,000

The net result of developments affecting liquor license fee revenue will be to hold total collections during the budget year at roughly the same volume as during 1956-57. However, the General Fund share of this revenue, which includes all application fees and service charges and 10 percent of other collections, will decrease while funds to be apportioned to local governments will increase. This shifting is attributable to a series of legislative changes made during recent years in laws governing license issuance.

Application fees at \$6,000 and \$3,000 each for new on-sale general and package goods licenses accounted for a large part of the General Fund revenue in 1956-57, but the number of such licenses which may be issued is limited to one per 1,000 persons in each county. Although population increases have permitted the Department of Alcoholic Beverage Control to issue new on-sale licenses in a number of counties, the demand where they are available seems to have been fairly well satisfied. Consequently, it is expected that very few new licenses will be issued during the coming year and a half. Off-sale general licenses have been available in Orange County but elsewhere the limitation precludes issuance of this type of permit.

Legislation enacted in 1957 raised on-sale beer license fees, provided for application fees in connection with licensing of other retail premises, and allowed the Department to accept offers in compromise (payments in lieu of closing the premises) when, under certain circumstances, a licensee is convicted of violations. These changes in the statute will produce a

somewhat larger volume of revenue for apportionment to local governments this year and next.

Total revenue, the General Fund share, and the amounts held in the alcoholic beverage control fund for apportionment to cities and counties for the past, current, and budget years are shown below:

<i>(Thousands of dollars)</i>			
	<i>1956-57 Actual</i>	<i>1957-58 Estimated</i>	<i>1958-59 Estimated</i>
General Fund	\$2,216	\$1,950	\$1,300
Local governments	8,400	9,050	9,400
Totals	\$10,616	\$11,000	\$10,700

Other Special Fund Revenue—\$69,378,000

Departmental receipts, rentals and royalties, and interest on investments for special funds are estimated at \$69,378,000 during 1958-59. This is approximately the same level as that expected in the current year, but far below the \$200 million reached in 1956-57 when the lump-sum settlement by the City of Long Beach gave the State \$130 million in accumulated royalties and added a substantial new source of revenue. Departmental income from licenses, service charges and other items is expected to increase moderately during the coming year, reflecting in general the growth of California businesses and professions. Interest earnings will decrease from the current year's total, but will be well above the amount received in 1956-57.

TAX TRENDS

California's record in tax matters during recent years is in marked contrast to the situation in most other states. The tax system enacted almost a quarter-century ago remains substantially unchanged. The only important revisions of the last seven years have been the upward adjustment of highway user levies in 1953 and an increase in the distilled spirits tax to the national average in 1955.* The record elsewhere shows that since 1950—

- 14 states have enacted a sales tax or raised sales tax rates;
- 18 states have increased corporation income taxes;
- 19 have raised the distilled spirits tax rate, including those monopoly states which have added a tax to mark-up;
- 25 have raised gasoline tax rates at least once;
- 29 have enacted a cigarette tax or raised cigarette tax rates.

The situation regarding personal income tax adjustments is not clear, since selective changes and credit revisions have been made in some states which may not have raised this levy for all taxpayers, but available records indicated that income taxes were increased in at least eleven states.

Reports show a few instances of tax reductions, chiefly in the personal income tax and in what were formerly relatively high corporate tax rates. Many technical adjustments have been enacted in personal

* Changes between 1937 and 1950 included: the enactment of three levies of a loophole closing nature—the corporation income tax (1937), the use fuel tax (1937) and the gift tax (1939); a reduction in upper bracket income tax rates and an increase in personal income tax exemptions (1943); a temporary reduction in sales, bank and corporation and personal income tax rates (1943 to 1950); and an increase in highway user taxes (1947).

and corporate levies similar to those made in this State as a means of maintaining conformity with provisions of the Federal tax code. No attempt has been made here to trace the effect of such minor changes or to consider increases in taxes other than those outlined above.

This stability in the State tax system is reflected in the relatively stable burden of taxes upon the personal income of California residents. Aggregate General Fund tax collections are lower today than they were during the prewar period, when measured in terms of personal income. Receipts from broad general purpose levies during 1956-57 amounted to \$3.21 per \$100 of income received in calendar year 1956, compared with an average of \$3.30 in the last five prewar years. Estimates for the current fiscal period indicate a ratio of \$3.19 per hundred of income, while the budget projections contemplate an equal return in the coming twelve months. The highest ratio in recent years—\$3.27—was shown in 1955-56 when an abnormal expansion of credit greatly supplemented purchasing power. Perhaps ominously in view of current recession talk, the lowest recent ratio occurred in 1953-54 with a drop to \$2.95* of revenue per \$100 of income. If next year's collections follow this pattern, which appears unlikely for a number of reasons, the difference in General Fund revenue receipts would be approximately \$86,000,000. Conversely, if conditions were to follow the 1955 pattern—also unlikely—the return would be roughly \$30,000,000 above the \$1,139 million estimated from General Fund taxes next year.

Pressing highway problems and the policy of constructing new highways on a pay-as-you-go basis have raised special fund receipts considerably above prewar levels in relation to income. The yield of special taxes and licenses during 1956-57 amounted to \$1.71 per \$100 of income, against a prewar average of \$1.38. The current year level is estimated at \$1.67, while the budget projections amount to \$1.70. Rate adjustments in 1953 invalidate a comparison between prosperity and recession levels, but apparently the yield-income

* Adjusted for change in the distilled spirits excise tax from 80 cents to \$1.50 per gallon. The actual ratio in 1953-54 was \$2.90.

STATE TAX BURDEN TOTAL STATE TAXES PER \$100 OF PERSONAL INCOME

relationship for special fund taxes is more stable than for General Fund levies. The variation from high to low has been 4.5 percent, compared with nearly 10 percent for general purpose taxes. Probably the cause is to be found in the relative inelasticity of nontaxed items in family budgets—food, housing, utilities, medical services, etc.—which results in a wider variation in expenditures for taxable items and a proclivity to place car use near the bottom on a list of things to do without.

A summary of population and personal income data, tax collections, and pertinent tax ratios since 1936 is given on page A-19. Fiscal year receipts from each of the major taxes and licenses during the postwar years are shown at the bottom of that page, and a brief outline of the State tax system with rates for selected years is provided on page A-20.

* Amounts shown during period of World War II represent civilian population, estimated income of civilians, and per capita civilian income.

† Estimated.

Population data, 1936 through 1949, are based on United States Census Bureau estimates; population, 1950 to date, estimated by the State Department of Finance.

Personal income, 1936 through 1956, from estimates by the Office of Business Economics, United States Department of Commerce. Reported totals for 1941 through 1945 have been adjusted to exclude income of armed forces personnel. Data for 1957 and 1958 are estimates by the State Department of Finance.

Income per capita computed from population and income data shown. Amounts differ somewhat from U. S. Department of Commerce estimates.

Taxes per capita computed on the basis of population January 1st, the midpoint of the fiscal year.

¹ Includes the corporation income tax and includes amounts credited to the postwar employment reserve in 1945-46.

² Includes the motor vehicle (gasoline) fuel tax, use (diesel) fuel tax, and brokers and producers fees.

³ Includes registration and weight fees, motor vehicle license fee (in lieu tax) and other fees. Part of the revenue from the motor vehicle license fee is credited to the General Fund.

⁴ Motor vehicle transportation tax and permit fees. All revenue from this source accrued to the General Fund in 1945-46 and 1946-47 and the early months of 1947-48.

⁵ Includes General Fund share of revenue from horse racing and liquor license fees.

* Estimated.

NOTE: Receipts from the retail sales and use taxes, the bank and corporation tax, and the personal income tax were affected by the temporary tax reduction program during the period from 1943 through 1949. Rate changes also affected collections under the insurance, distilled spirits, private car, motor vehicle fuel, use fuel and motor vehicle transportation taxes, motor vehicle fees and liquor license fees during the period shown above.

SUMMARY OF CALIFORNIA STATE TAX RATES

1935-1957

Tax	Base or Measure	Rates

- (1) Dry wine 1 cent (2 cents 1933-37) and sweet wine 2 cents per gallon; champagne, sparkling wine, etc., 24 cents per gallon 1935-1955 and 30 cents per gallon thereafter.
- (2) Distilled spirits excise increased to \$1.50 per gallon effective July 1, 1955. Liquor in excess of proof strength taxed at double the rates shown.
- (3) A 15 percent credit against the tax was allowed in the years 1944-1949, inclusive, making the effective rate 3.4% in these years.
- (4) Rate is computed for each year, based upon the ratio of State corporation income tax and personal property taxes paid by general corporations, other than public utilities, to the taxable income of such corporations, but cannot exceed the rates shown above. A 15 percent credit was allowed during 1944-49, inclusive, making the effective maximum rate 6.8 percent in these years.
- (5) Enacted in 1939.
- (6) From 1933 to 1941 the horse racing parimutuel license fee was 4 percent of the parimutuel pool; in 1941 legislation was adopted specifying a rate of 4 percent of the first \$10,000,000 handled in a parimutuel pool, 5 percent of the next \$10,000,000, and 6 percent of the pool over \$20,000,000.
- (7) Beginning in 1943 the insurance tax rate was reduced .05 percentage points each year until the present 2.35 percent rate was reached in 1947. Concurrently the deduction for real estate taxes paid by the insurer on property other than the principal office in this State was gradually eliminated.
- (8) Motor vehicle license fee (in lieu tax) was increased from 1.75 percent of the market value to 2 percent of a specified depreciated value depending on age of the vehicle, effective January 1, 1949.
- (9) Gasoline tax increased to 4.5 cents per gallon effective July 1, 1947 and to 6 cents per gallon effective July 1, 1953.
- (10) Enacted in 1937. Diesel fuel tax increased to 4.5 cents per gallon effective July 1, 1947 and to 7 cents per gallon effective July 1, 1953.
- (11) Motor vehicle registration fee increased to \$6 effective January 1, 1948 and to \$8 effective upon the first registration or re-registration after June 30, 1953.
- (12) Various, depending upon unladen weight and number of axles.
- (13) Motor vehicle transportation tax was amended in 1947 to allow a credit against tax in the amount of one-third of the motor vehicle weight fees paid by each taxpayer. This had the effect of a tax rate reduction, although the rate remained at 3 percent. Chapter 1067, Statutes of 1957 reduced the transportation tax rate to 1.5 percent and eliminated the weight fee credit effective January 1, 1958.
- (14) Personal income tax exemptions were increased from \$1,000 (single) and \$2,500 (married or head of family) to \$2,000 and \$3,500, respectively, effective January 1, 1944 and to \$3,000 and \$4,500 effective January 1, 1946. The exemptions returned to \$2,000 and \$3,500 on January 1, 1950.
The maximum rate was reduced from 15 percent on taxable income over \$250,000 to 6 percent over \$30,000, effective January 1, 1944. Between that date and January 1, 1950, the 1 percent rate applied to the first \$10,000 of taxable income, rather than the first \$5,000 as originally enacted in 1935. On January 1, 1950, the 1 percent tax again became applicable to the first \$5,000 and the 6 percent rate was levied on all taxable income over \$25,000.
- (15) Private car tax was enacted in 1937. The rate is computed annually at the average property tax rate in the State during the next preceding year.
- (16) Retail sales tax rate was originally 2.5 percent and applied to sale of foodstuffs as well as other tangible personal property. In 1935, food items (except restaurant meals) were exempted from tax, the use tax was enacted, and the rate was increased to 3 percent. As part of a wartime tax reduction program the rate was reduced to 2.5 percent on July 1, 1943. It returned to 3 percent on July 1, 1949.

Schedule 2

COMPARATIVE STATEMENT OF REVENUES FOR THE FISCAL YEARS 1956-57, 1957-58, AND 1958-59

Summary	Page Ref- er- ence	Actual 1956-57			Estimated 1957-58			Estimated 1958-59

Expenditure Requirements

Under the accepted practices governing the fiscal program presented at the short, budget session of the Legislature, expenditure requests have been limited largely to the amounts required for continuation of currently authorized programs. Cognizance has been taken of changes in workloads of the various agencies and law revisions effected last year. Only under extraordinary circumstances have there been changes in the scope or quality of services, and in such instances an explanation is given in the performance statements accompanying recommendations for each agency.

Sustained population growth at the rate of 4 percent a year has increased the service demands experienced by virtually all units of State government. While prices have tended to stabilize during recent months, current levels are moderately above those of a year ago and this rise has also influenced amounts required for State operation. At the same time, revenue income has failed to fulfill earlier expectations; accordingly, it has been necessary to modify expenditure plans by postponing some items, by curtailing others, and by recourse to more extensive use of bond funds for buildings and other capital outlay.

State expenditures during the ensuing fiscal year are projected at \$1,984,576,603 under the recommendations contained in this budget—a decline of \$9,271,904 from the estimated amount for the present period. On the basis of experience since annual budgets were inaugurated, the total has been adjusted for the margin of “savings” which inevitably occurs in a program of this magnitude. Appropriations are authorizations to spend. They represent the maximum obligations which can be incurred legally. Since few agencies spend up to this limit there are savings both in the original appropriation and in expenditure revisions prepared while execution of the authorized budget is in progress. This inherent characteristic of the appropriation budget is recognized in the operating plan by deducting \$8,000,000 from the estimated General Fund total for State operations during the current year and \$16,500,000 from the sum of recommended General Fund appropriations for this purpose in 1958-59. Because these differences between appropriations and actual outgo cannot be identified or allocated at this time, a proration of the amounts has been made in the following material for purposes of this summary analysis.

In addition to expenditures from current resources the fiscal plan recommended for next year provides for disbursements from bond funds and other borrowing in the amount of \$144,533,000. This money will be used to finance the major part of essential needs for structures and other facilities at the University, State colleges, mental hospitals, correctional centers and other governmental installations. Under the State's accounting and reporting practice, payments from the proceeds of bond sales and similar debt obligations are excluded from current expenditures, but interest and redemption payments are included as the debt is serviced. Thus, outlays from the State Construction Program Fund are not shown in expenditure totals. However, amounts involved in each item are noted in the following statement and

are set forth in detail within the capital outlay section of the budget.

As in other years, education is the principal function of State government from the viewpoint of expenditure demands. With \$796 million earmarked for this purpose, education and related activities will account for 40.1 cents in the average dollar of outgo. In addition, \$88 million in bond funds will be used for expansion and improvements at centers of higher education and special schools. Highways and the regulation of motor vehicles rank second in fiscal importance with 23.1 cents of each dollar earmarked for construction and maintenance, traffic supervision and other motorist services. Together with education, these two functions account for five of every eight expenditure dollars.

Far below the two leading categories are the expenditures for social welfare, public health and similar activities, with 11.7 cents of the average dollar; mental hygiene and corrections (8.0 cents); conservation and development of natural resources (6.2 cents); fiscal affairs, including tax collection and business management (1.7 cents); and miscellaneous activities—embracing the legislative and judicial branches of State government, general administration, regulatory agencies, debt service and other items—with 9.2 cents. Inclusion of bond fund disbursements would raise the ratio for education to about 41.8 cents, mental hygiene and corrections to 9.0 cents, and fiscal affairs to 2.3 cents (due to office building construction) and would reduce amounts for other purposes accordingly.

A summary of expenditures during the three years covered by this budget is presented in the following table.

	1956-57 Actual	1957-58 Estimated	1958-59 Proposed	Percent of Total 1958-59
Education	\$677.4	\$788.6	\$796.4	40.1
Highways; vehicle regulation	426.7	460.0	457.8	23.1
Welfare, health, etc.	188.8	223.0	232.9	11.7
Mental hygiene; corrections	155.4	163.5	158.5	8.0
Natural resources	85.4	149.5	123.6	6.2
Fiscal affairs	30.1	38.7	32.9	1.7
All other	168.6	170.6	182.5	9.2
Totals	\$1,732.5	\$1,993.8	\$1,984.6	100.0

Approximately 55 percent of all State expenditures during the coming year will be made through local units of government. This includes payments for support of public schools; public assistance to the aged, blind, needy children and the disabled; apportionments for local roads and streets; and other subventions in various fields. In total, the local assistance section of the budget will reach \$1,089,410,000 * an increase of \$69,455,000 over the current year and \$176,159,000 more than was required during 1956-57. Rising grants for education are the principal factors in these increases.

Capital outlay expenditures will total \$293,371,000, or 14.8 percent of the aggregate outgo. The amount is down \$132,141,000 due to the shift from current resources to bond funds as the principal source of

* This and all subsequent amounts have been rounded to the nearest thousand dollars for purposes of this analysis.

money for structures and improvements in service areas other than State highways. Including bond money and borrowing from trust funds, capital outlay will total \$437,904,000 in the budget year against \$506,933,000 in the current year and \$356,307,000 during 1956-57.

State operations, the cost of supporting day-to-day activities of the various departments, boards, commissions, and independent offices—including the systems of higher education and the custodial institutions—will amount to \$601,796,000, or 30.3 percent of the aggregate. This represents an increase of \$53,413,000 over the corresponding figure for the current year and \$138,887,000 from the 1956-57 total. While elements comprising these increases are to be found in virtually all activities, more than half of the changes have occurred in education, mental hygiene and corrections. Summarized in the three broad classifications, the expenditure plan shows:

	(Millions of dollars)			Percent of Total*	Change†
	1956-57 Actual	1957-58 Estimated	1958-59 Proposed		
State operations -----	\$462.9	\$548.4	\$601.8	30.3	9.8
Capital outlay -----	356.3	425.5	293.4	14.8	-31.0
Local assistance -----	913.3	1,020.0	1,089.4	54.9	6.8
Total -----	\$1,732.5	\$1,993.8	\$1,984.6	100.0	-0.5

* Percent of total in 1958-59.

† Change 1958-59 from 1957-58.

One of the items in State operations is the 3 percent salary adjustment recommended for State employees. Provision for this general raise grows out of the Personnel Board finding that current salary scales are below the levels paid for work of comparable skill and responsibility in private industry and other governmental jurisdictions. Coupled with the additional contribution for employees' retirement which would accompany such a salary increase, this recommendation accounts for \$16,485,000, or approximately one-third of the advance in State operating costs. In this connection it should be noted that the appropriation for salary increase and additional retirement contribution have been distributed to the

BUDGET DOLLAR, 1958-59

various agencies in the expenditure data presented in this statement. In all other budget schedules this amount is given in a lump sum. The deviation is made at this point in order to show as accurately as possible the total to be spent for each function of government. Differences between the amounts shown below and the corresponding data in Schedule 3 and in the detailed budget are due to this adjustment and to the proration of estimated unallocated savings among the various items of State operation, other than debt service and support of the University.

Other principal developments in the program of State expenditures are summarized under the seven functional groups presented in the following pages.

Education—\$796,384,000

With aggregate expenditure requirements of \$796,384,000 for next year, the financing of education is the largest single expenditure program provided by the people of California through the State budget. At the same time, it is the governmental function affecting directly and indirectly the largest number of persons in the State. More than three million individuals are directly involved in the educational system as public school pupils and students at the University and State colleges. Additional millions are indirectly involved through their role as parents and teachers. Because of the tremendous increase in births during the war and postwar years, education is also one of the most rapidly increasing costs of State government. The bill next year for current operation of the public educational structure—kindergarten through all levels of higher education will be \$70,157,000 more than during the current period.

Basic objective of the State's contribution to support of local schools is that of providing equal educational opportunity throughout all areas. A total of \$193.37 is appropriated for each pupil in average daily attendance during the preceding school year. With 2,960,000 pupils in attendance in 1957-58, this will call for an appropriation of \$572,375,000 for school support in 1958-59. Although this sum is fixed by law, allocation of the school fund among the 1,800 school districts will depend upon the community's ability to support education from locally raised tax funds and the grade level of schools maintained. Special allowance is made for small schools and for the teaching of handicapped pupils. A gauge of the growth in this expenditure requirement is to be found in the fact that support apportionments during the coming year will exceed the current figure by \$40,994,000.

Other contributions for local school purposes include amounts for driver training in high schools, free textbooks in elementary grades, vocational education and the maintenance of child care centers. Among related items, the State's contribution for teachers' retirement, will increase \$7,392,000 to a total of \$34,620,000, due to liberalization of benefits starting last year and to 1957 legislation bringing the retired persons of the Los Angeles City school system into the State plan. Approximately half of the money required for support of the teachers' retirement program this year and next is appropriated for that purpose by provisions of Chapter 1073: Stat-

utes of 1957. The funds are taken from a special reserve created in 1944 and were reported as an expenditure for retirement in that year. Consequently only the remainder necessary to carry on the full retirement program in 1957-58 and 1958-59 is shown as an expenditure in the current and ensuing years. Requirements for interest and redemption of local school building bonds will amount to \$13,951,000, an advance of \$1,770,000. In total, State payments for local schools will reach \$617,777,000—\$52,291,000 more than during the 1957-58 fiscal year.

Higher education is provided through two public systems: the twelve State colleges, and the eight campuses of the University of California. Recent important developments in these systems include the establishment of San Fernando State College, which will come into operation July 1, 1958; the creation of off-campus centers at Bakersfield, Santa Ana and Santa Rosa as branches of Fresno, Long Beach and San Francisco State colleges; and the authorization of 4 new colleges at sites yet to be acquired. Although not included in this budget, action has been taken recently by the Board of Regents of the University to establish three additional campuses for that institution.

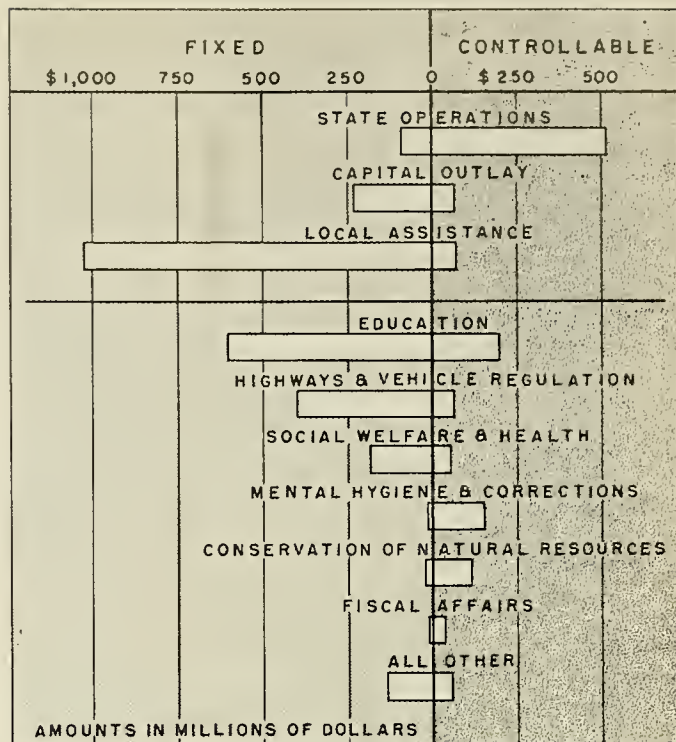

The colleges expect to enroll the equivalent of 59,100 full-time students next year, an increase of 6,000 over the current level. This growth factor, coupled with slightly higher prices and expenses incident to the opening of new facilities, accounts for one-half of the \$7,961,000 increase which will carry operating costs to \$50,051,000. Other elements include allowances for higher salaries and the accompanying rise in retirement contributions, a modest change in curricula, and a revision in staffing pattern to allow more free time to science laboratory teachers. A crude measure of the change due to factors other than growth is provided in the average cost per student, which will increase from \$811 currently to \$847 (including proposed salary adjustments) next year.

Many of the same factors influence the recommended budget for the University. Enrollments will increase approximately 6 percent to reach a record of 43,600. In this instance, growth is compounded by the gradual shift within the student body from lower division work to the more expensive upper division and graduate study. The total budget of the University will exceed \$130,000,000, but more than a fourth of this sum will be paid out of University funds. The State's appropriation for support purposes, including salary adjustments, will amount to \$97,926,000, or roughly \$9,024,000 more than during the current year. Again, increases due to elements other than enrollment growth are indicated by the rise in average costs from \$1,497 per student this year to \$1,570 in 1958-59.

Plans for physical expansion of the college system contemplate new facilities at all institutions, with San Jose, Long Beach and California Polytechnic College scheduled for particular attention, and science and engineering facilities given special prominence in the construction program. In total, capital outlay

FIXED AND CONTROLLABLE EXPENDITURES

BY MAJOR PURPOSE AND FUNCTION

Approximately two-thirds of the State's expenditures are fixed by provisions of the Constitution or existing statutes; one-third is subject to some degree of control by the Governor in making his budget recommendations. As this chart shows, most of the controllable amounts for 1958-59 are found in the State Operations section of the budget and in the expenditures for such functions as higher education, mental hygiene and corrections, and conservation of natural resources. The degree of control is usually very limited, since it does not extend to the number of people seeking higher education of State institutions, the number of hospital patients and many other factors affecting expenditures.

expenditures will amount to \$51,927,000 or a little less than half the amount shown for the current year. Of this sum, \$41,600,000 will be expended from bond funds.

In contrast to the colleges, which expanded physical plants rapidly this year, the University will nearly double expenditures for capital improvements in 1958-59—from \$33,684,000 currently to \$53,053,000. Important facilities are planned for all major campuses and here, too, greater consideration will be given to science and engineering. A total of \$45,808,000 in next year's building program will represent proceeds from sale of bonds.

Other educational expenses include maintenance of special schools and training centers for the physically handicapped, support of the Department of Education with its broad responsibilities in public school and State college operation, administration of the teachers' retirement system, and further expansion of the scholarship program, which next year will add the third increment of 640 awards in a four-year plan to provide 2,560 scholarships averaging \$500 each by 1959-60. Interest in this activity is attested by the fact that the scholarship commission received 5,260

applications and had 1,900 semi-finalists in its most recent contest for approximately 640 new awards.

Highways, Streets, and Motor Vehicle Regulation—\$457,805,000

This category of activities comprises essentially the services to motorists financed by highway user taxes. It includes highway construction and maintenance, State apportionments for county roads and city streets, traffic law enforcement, and the registration of vehicles and drivers. Expenditures for these purposes during the budget year will total \$457,805,000, a decrease of \$2,170,000 from the comparable amount in the current year. Most of the drop occurs in highway construction and largely represents a readjustment from the unusually high levels of last year and the current period, which include highway outlays financed in part out of accumulated surpluses. Other phases of the program—maintenance, support of the Highway Patrol, vehicle regulation and driver licensing, and assistance to local governments will show substantial increases over present year amounts.

Highway deaths last year dropped back under the concerted attack of more strict law enforcement, better driver training and examination, more complete community co-operation and improved thoroughfares. Though progress was not great in terms of the 2,352 death toll on rural highways, even a one-year interruption in the climb from 2,093 deaths in 1950 to a record of 2,481 in 1956 is an impressive achievement. In order to extend this gain in the coming year, budgets of both the California Highway Patrol and the Department of Motor Vehicles call for intensified traffic safety programs. A total of 264 additional positions are recommended for the Patrol, bringing the uniformed strength to 2,663 officers or one for each 2,900 registered vehicles. The Motor Vehicle Department's sector of this attack will be fortified by the addition of 50 drivers' license examiners as the second increment in a four year expansion program designed

to intensify the examination. Other areas of major increase include the analysis of driver records under the driver improvement program and the investigation of automobile dealers and salesmen in accordance with licensing provisions adopted by law last year.

State highway construction will go forward with 185 projects involving a total of 716 miles of new or reconstructed routes. Expenditures for this purpose are budgeted at \$223,635,000, a decline of \$21,823,000 from the unusually large total of the current year. Most of the change is traceable to the fact that current payments are being financed in part from accumulated surplus in the highway fund, but other factors also tend to reduce the amount of money available for new construction, such as the greater emphasis upon safety programs through driver education, examination and law enforcement and the allotment of funds for the elimination of grade crossings outlined below. Next year's program calls for the construction of 172 miles of multi-lane divided highways, most of which will be full freeways. Completion of this work will give this State well over 2,300 miles of modern, toll-free superhighways—more than that afforded in any other state system.

Payments to local governments for highway purposes during the coming year are estimated at \$122,346,000, an increase of \$7,927,000 over such apportionments in the current year and \$17,694,000 more than was paid for this purpose in 1956-57. Roughly 70 percent of the total will go to counties as their share of motor vehicle fuel tax, registration and weight fee receipts, and grants-in-aid. Fuel tax apportionments to cities—\$31,998,000—account for 26 percent of the total, while a new subvention for grade crossings separation made available by Chapter 2091 of last year's statutes amounts to \$5,000,000—the remaining 4 percent. This latter appropriation will match funds provided by cities and counties for railroad crossing separations on the basis of need as determined by the Public Utilities Commission.

A summary of proposed expenditures for highways and vehicle regulation during 1958-59, together with similar information for this year and last, is given in the table below.

* Less than one-half of one percent.

Social Welfare, Health, and Related

Activities—\$232,928,000

Third in volume of disbursements, the programs relating to public assistance, health, industrial relations and veterans' affairs show little change beyond that related to population growth and the liberalization in benefit payments authorized at the last legislative session. Nearly ninety percent of the expenditures in this general area are made through local governments and essentially all of the increase anticipated next year will occur in these local assistance items. Three factors—State contributions toward meeting the medical expenses of persons receiving public assistance, inauguration of an aid program for the disabled, and a further rise in expenditures for support of needy children—account for virtually all of the \$9,884,000 increase which will carry welfare and health expenditures next year to \$232,928,000.

Provision is made in this budget to reduce the backlog of workmen's injury claims pending before the Industrial Accident Commission and to obtain an adjudication within the period prescribed by law. This objective has been difficult to achieve in recent years because of the tremendous increase in the labor force and the steadily rising number of injury claims. The many other activities of the Department of Industrial Relations in the fields of safety, labor law enforcement, housing, apprenticeship standards, conciliation, employment and wage statistics, and other aspects of worker welfare are predicated upon continuation of existing programs, modified only for changes in workloads.

Similar considerations have controlled recommendations in the program of assistance to veterans. Budget provisions are based upon the requirements for educational assistance and other activities. Of particular importance is the recommendation for an allotment of \$1,204,000 for a convalescent barracks and other improvements at the Veterans' Home. In this connection it should be noted that the highly popular, self-supporting farm and home loan project is treated as a public service enterprise and carried in the budget appendix.

Expenditures for support of the Department of Public Health will amount to \$6,876,000 in 1958-59. With the exception of new responsibilities in connection with the alcoholic rehabilitation program, no major changes are contemplated in the operations of this agency.

Subventions for public health in 1958-59 will total \$19,184,000, a decrease of \$962,000 from the current year. Increases are provided in the programs for care and treatment of crippled children (growing in the number of cases as well as in the cost of care) and in payments for support of local health departments. Expenditures for tuberculosis control are estimated to be only slightly more than during the current year—the result of increasing hospitalization expense, but a declining incidence of this disease. The above increases are more than offset by a decrease of \$2,307,000 for hospital construction. Under a policy established in 1955, the State now matches Federal allocations for this program on a year-to-year basis, and 1958-59 requirements show a sharp drop from the unusually large total of the current year.

Payments to local governments for old age security, assistance to the blind, aid to needy children and other welfare activities will total \$185,718,000, an increase of \$10,770,000. As indicated above, this change is traceable to three factors: (1) the medical care features added to existing assistance programs in 1957; (2) the plan for aid to needy disabled adopted last year; and (3) normal growth, compounded by an increase in unemployment which is certain to affect the need for aid to children. Benefits to the needy disabled are estimated at \$643,000 during this initial year of the program and \$2,730,000 during 1958-59. The medical care plan is expected to require \$11,317,000 in the current year, and \$15,287,000 during 1958-59. California is one of the few states which participate in the inter-country adoption program inaugurated last fall by the Federal government. Under this plan State personnel investigate adoption applications for children from foreign countries, meeting the need of both the children abroad and the adoptive parents here. These latter amounts are included in the total program costs shown in the table below.

Mental Hygiene and Corrections—\$158,455,000

Although different in many respects, State agencies operating in the fields of mental hygiene and corrections have a common objective: the treatment, rehabilitation and return to productive life of persons committed to their care—whether as patients, prisoners or juvenile wards. These agencies are concerned with alleviating conditions which produce mental illness and crime and with the successful transition by their patients and inmates from institutional to normal life. In all, approximately 125,000 people will be

served directly under the State's various programs, a majority of them within institutions but a substantial number under supervision outside institutional walls.

MENTAL HYGIENE

The modern attack on mental illness is made on four basic fronts—treatment, training of personnel, research and prevention. By far, the greater part of past increases in the scope and quality of mental health activities has been directed toward improving the treatment programs, chiefly by providing additional physicians, therapists and other personnel. Next year the emphasis will be placed upon the other three phases of the attack—research, training and community development of mental hygiene resources.

Expenditures for administration of the Department of Mental Hygiene, operation of the fourteen State hospitals, maintenance of clinics and other activities during the 1958-59 fiscal year total \$103,194,000, an increase of \$7,515,000 over the comparable figure for the current year. Among the principal items contributing to this increment are the general and merit salary adjustments for employees, expenses of operating new facilities brought into the hospital system, more complete filling of presently authorized positions, and additional allowances for research and employee training. In addition to the \$103.2 million for State operations, \$1,900,000 will be provided in assistance to city and county governments for community mental health services under legislation adopted in 1957.

For the first time in many years it is possible to omit recommendations for the construction of additional bed capacity. The present hospital plant, together with new facilities to be completed and placed in operation during the next two years, will be sufficient to meet prospective needs and to eliminate overcrowding by the end of the 1959-60 fiscal year, under present population forecasts. While no additional bed capacity is proposed in this budget, a number of other major projects are included. They provide necessary service facilities, equipment for projects nearing completion, and essential improvements at the various hospitals. Capital outlay expenditures in the coming fiscal year are estimated at \$7,614,000, of which \$4,213,000 will be provided from current resources and \$3,402,000 will be derived from bond funds. This represents a decrease of \$10,581,000 from the current year capital outlay expenditures at mental hospitals, divided between current revenues and bond money as shown in the accompanying table.

CORRECTIONS

The State's correctional agencies will be charged with the custody, rehabilitation, and supervision on parole of an average of 35,970 individuals during the coming fiscal year. The primary objective of these agencies is protection of the public not only by imprisoning those convicted of crimes against society, but also by preparing these offenders for a return to civilian life through rehabilitation programs, and providing adequate supervision while on parole. In discharging this responsibility the State will spend \$44,191,000 on current operations and \$30,994,000 for capital outlay, including \$29,115,000 of bond money. In addition, \$3,080,000 will be provided to assist the counties in construction and operation of juvenile

homes and camps for wards of the court who might otherwise be committed to the Youth Authority.

Basically, the State's approach to the problems of custody and correction involves the classification and segregation of offenders into groups of similar characteristics and treatment needs. Felons and the older, more recalcitrant juveniles are placed under the jurisdiction of the Department of Corrections which operates eight prisons ranging from minimum security to maximum security. An extensive camp system is operated in conjunction with four of the institutions. Facilities of Department of Corrections will house an estimated average population of 17,425 during 1958-59. Expenditures for support of the correctional facilities for adults, including administrative expenses and parole supervision, are budgeted at \$31,287,000, or \$2,476,000 above the corresponding figure for the current year. This increase is almost entirely due to the operation of new facilities required to meet the continued pressure of increasing prison population and to reduce overcrowding. During the budget year, a new 1,200-man addition to one of the prisons, six additional forestry camps, and reactivation of temporary barracks will provide added capacity.

Juvenile offenders are committed by the courts to the Youth Authority which operates two reception centers, four schools for boys and two for girls, and three forestry honor camps. The average daily population of these facilities during the coming year is estimated at 2,870—an increase of 116 over the current period. Expenditures of the Department of the Youth Authority—including administrative costs, a delinquency prevention program, parole supervision and institution operations—will total \$12,904,000, or \$744,000 more than during 1957-58. Principal factors in this increase are the expenses incidental to full-year operation of expanded facilities, the growing workload and contemplated salary adjustments for employee personnel.

Conservation and Development of Natural Resources—\$123,620,000

The activities of several State agencies responsible for the development, protection, and conservation of natural resources are included in this classification. These entail services to the agricultural, oil, gas and

mining industries, conservation and propagation of fish and game, wild life management, operation of park and beach areas, timber and watershed protection, utilization of water resources, flood control, and support of agricultural fairs. Combined expenditures during the fiscal year 1958-59 for these broad activities amount to \$123,620,000, a decrease of \$25,866,000 from the current year.

Responsibilities regarding water problems and water resource development are centered largely in the State Department of Water Resources. Recognition of the vital importance this element will play in California's future resulted in the establishment of this agency as a major department of State government in 1956. Since that time much of its effort has been directed toward the accumulation of a technical staff capable of discharging the Department's new and expanded duties. Undoubtedly the largest single change in State operations during 1958-59 will occur in this sector. Preparations for the Feather River Project, the San Luis Reservoir, the aqueducts and other facilities essential to phases of the water plan immediately ahead will require the addition of 549 positions to the Department's personnel. Operating expenses will increase by approximately \$3,000,000 with the result that this and other water resource agencies will spend a total of \$13,383,000, exclusive of capital outlay and assistance to local governments for flood control.

Although major appropriations in furtherance of the Feather River Project are held in abeyance pending agreement upon fundamental water policy, expenditures related to right-of-way activities and other preliminary work, progress on other projects, and flood control will result in capital outlay of \$12,751,000 for water purposes during the coming fiscal year.

Operating plans for the Department of Natural Resources reflect primarily a continuation of presently authorized programs, including the new Division of Small Craft Harbors. Provisions have been made in the Division of Forestry budget to meet increased workloads for fire control and to augment the number of forestry camps operated jointly with the Department of Corrections. Outlays for forest protection will decline from the unusually large total of the current year, but plans call for expenditures over \$1,500,000 for further development of fire stations, camps, district offices and other installations.

Gradual enlargement of the park system and growth in the number of park visitors necessitates additional staff for the Division of Beaches and Parks and provision has been made to add 120 new positions, largely in the operation and maintenance section. Development of the beach and park system will go forward with the allocation of \$11,575,000 for the acquisition of recreational areas and historical monuments and \$3,888,000 for improvement of new or existing parks, roadside rests and historic ships.

Operations of other resource conservation and development agencies, such as the Departments of Agriculture and Fish and Game, will continue at existing levels, adjusted only for changes in workload and added duties. In accordance with legislation adopted last year, major construction will be undertaken at the new site for the California State Fair near Sacramento. The sum of \$7,500,000 has been earmarked for this purpose.

It is anticipated that the State's financial obligations in connection with major construction for the 1960 Winter Olympics will be liquidated this year and no further appropriation is contemplated for this purpose.

Fiscal Affairs—\$32,868,000

Approximately two-thirds of the expenditure for fiscal affairs represents the cost of collecting State taxes; one-third is required for management activities—budgeting, disbursing, accounting, auditing and otherwise safeguarding the handling of public funds, but including as well centralized purchasing, operation of State buildings, organizational studies and other auxiliaries to management. Operational costs of this function during the coming year will total \$32,630,000—up \$1,065,000, with a little less than two-thirds of the rise related to tax collection and a little more than one-third to fiscal management.

Virtually all of the change anticipated for the coming period derives from the salary adjustment recommendation. The over-all increase in personnel amounts to 28 positions, or 0.5 percent more than the present number. There is, however, a slight reduction of staff by the Board of Equalization in sales and highway tax operations and a fractional increase in the personnel of other agencies.

Capital outlay recommendations for State office buildings total \$16,099,000, of which \$1,049,000 will be financed from bond funds, \$14,813,000 from State trust funds, and \$238,000 from current revenue. The office building program—financed primarily by trust fund borrowing—is getting under way in the current year with an estimated expenditure of \$4,361,000 to start construction in San Francisco, Los Angeles, Oakland and Fresno. The proposed 1958-59 program includes continuation of the above projects and initial work on new buildings in Sacramento, San Diego and San Jose, and on the Los Angeles garage.

Other Expenditures—\$182,516,000

Many activities of State government do not fall within any of the foregoing six broad functional categories. For convenience they have been combined in this miscellaneous group of unrelated subjects which includes legislative, judicial, executive, administrative, regulatory and other agencies, but dollarwise comprises mainly the distribution of vehicle license fee and liquor permit receipts to city and county governments. Of the \$182,516,000 total, \$128,898,000 represents the return of State-collected revenue and other assistance to local agencies.

Among the items of special interest in the cost of State operation is the reversal of a long-term decline in requirements for bond interest and redemption. Issuance of securities for building construction during the current year will mark the first use of general purpose bonds in nearly thirty years. The servicing of these obligations and other borrowing will add approximately \$1,500,000 to the State's miscellaneous costs.

Printing of ballots for the 1958 election is the chief item in the relatively large percentage increase in general administrative expense, while workload adjustments and the proposed three percent general salary increase are the principal factors contributing to the advance in expenditures of regulatory agencies.

Construction and improvements at fourteen National Guard armories operated by the Department of Military Affairs will require an expenditure of \$1,761,000 by the State and \$2,167,000 in Federal money (shown in the budget detail but not included in the totals). An unallocated sum of \$7,125,000 has been provided to cover contingencies in the general building program, with \$6,500,000 of this to be taken from the proceeds of bond sales.

Postwar Trends In State Operations

Several factors determine the cost of government, whether the jurisdiction is a city, a state or a nation. One of these is the number of people served; another is the price of elements entering into these services—including the compensation of employees as well as the cost of supplies, equipment and other items. A third is the scope and quality of services provided, while a fourth is the efficiency of operation. In order to observe the underlying trend of governmental expenditures in a rapidly expanding economy such as California's, it is necessary to isolate the effects of growth. When prices rise as rapidly as they have during the postwar period, these differences must be excluded also.

For the most part, increases traceable to population growth can be eliminated by reducing total expenditures to per capita amounts. Changes due to inflation can be erased through the use of price indexes computed from representative salary and wage rates, travel allowances, utility rate schedules, equipment quotations, and the cost of supply items—each weighted according to its importance in the expenditure programs of the operating agencies. Adjustment of per capita amounts by the applicable price index shows the residual trend in expenditures arising by reason of an extension in the scope of service, such as emphasis upon rehabilitation rather than mere custody of prison inmates, or an improvement in quality, such as better meals at mental hospitals. Broadening of scope may also take the form of providing the same service to an increasing proportion of the total population. For example, in 1947-48 609 people per 100,000 population attended the University and State colleges. It is estimated that this ratio will reach 684 per 100,000 next year. An adjustment of University and college expenditures for total population growth and price differences does not eliminate the effects of such an increase in attendance ratios.

Quality of service may also take a number of different forms: a branch office to meet the needs of a growing community, or more intense vigilance in public health problems. In fact, enhanced service does not necessarily mean increased costs. Greater efficiency and new methods often make it possible for agencies to realize their goal of better service at lower unit costs.

Higher Per Capita Costs *

During the last eleven years operating expenditures of State agencies have increased more than three fold—from \$188,191,000 in 1947-48 to \$601,796,000 projected for 1958-59. In this interval the State's population has expanded from 9,948,000 to just over 15,000,000 in prospect for the January midpoint of the next fiscal year. Thus, per capita expenditures have

* This analysis is limited to the State operations section of the California budget. It is hoped that price indexes for capital outlay and local assistance can be developed in coming months and that a similar analysis of total expenditures in terms of constant dollars per capita can be presented at a later date.

EXPENDITURES FOR STATE OPERATIONS

risen from \$18.91 eleven years ago to \$40.09 in the budget allotments for the coming fiscal period. The State's "cost of living" has risen approximately 55 percent, through higher salary and wage scales for its employees and increased cost of services, equipment and supplies. In terms of constant dollars with a purchasing power at the average level of the three fiscal years 1947-49, per capita costs have risen from \$18.67 eleven years ago to \$25.52 in the projected operations for 1958-59—an increase of 37 percent, or an average of 3.3 percent a year. The trend of total expenditures for State operations since 1947-48 is traced in the upper line of the accompanying chart. Per capita amounts for each year are indicated in the middle line of this chart, while per capita figures in constant dollars are shown by the lower and more stable of the three lines.

The increase in real[†] cost of State operations is concentrated in expenditures for higher education, mental hygiene and corrections. Although these are the functions which have received increasing attention during the postwar period, it is somewhat surprising to find that nearly 90 percent of the increase occurred in these three areas.

In real terms, expenditures for support of the University have increased from \$2.07 per capita of *total population* eleven years ago to \$4.16 in the recommended program for 1958-59, an increase of 100 percent. The \$2.09 rise represents almost one-third of the total increase in real cost for all operations. However, the appropriation for the University in 1947-48 was materially affected by the influx of veterans whose tuition was paid by the Federal government. It is difficult to adjust accurately for this situation, since there is no way of knowing how many veterans would

[†] For convenience, the term *real* is used here to indicate per capita expenditures measured in dollars of constant purchasing power—in this case the same purchasing power as in the three fiscal years 1947-1949.

EXPENDITURES FOR SUPPORT OF EDUCATIONAL CENTERS AND ADMINISTRATION OF EDUCATIONAL ACTIVITIES

have attended in the absence of GI benefits. Assuming that all would have done so and that the State appropriation for University support would have been greater by the \$5,776,000 received from veterans' fees, the per capita cost in constant dollars during 1947-48 would have been \$2.65; the rise to 1958-59 would have been \$1.51; and the ratio of increase would have been 57 percent.

Expenditures for support of State colleges eleven years ago amounted to \$0.83 per capita of *total population* in terms of 1947-49 dollars. The comparable figure for next year is \$2.08, representing an increase of 150 percent and accounting for 18.2 percent of the total increase in real cost of government. The adjustment for veterans' attendance in 1947-48 is not necessary in the case of State colleges, since the expenditures reported for that year include payments arising by reason of the GI bill. However, an adjustment of college data is necessary because of a change in accounting practice. Student fees, which were included in State expenditure figures for 1947-48, are now excluded. Adjustment to eliminate these items from the earlier year shows a 1947-48 real per capita cost of \$0.80, an advance of \$1.29 to 1958-59, and an increase of 161 percent.

Improvements in the scope and quality of services at State-supported centers of higher education cannot be fully detailed here. They include new courses of study, together with greater emphasis upon research and graduate work. New institutions have been founded and older centers have been expanded to serve growing communities. These and other important developments in adapting the University and State college systems to present day educational needs are all elements in the rising basic trend of expenditures for education.

The recommendation for support of activities in the field of mental hygiene represents the equivalent of \$4.41 per capita in terms of 1947-49 values. Compared with \$2.67 per capita eleven years ago, the increase in this item of cost has been \$1.74, or 65 percent. Thus, one-fourth of the increase in aggregate real expenditures has occurred in connection with

mental health. Again, the change is traceable to many factors: new concepts of care and treatment, new drugs, research into the causes of mental illness, preventive programs, post-treatment care and an expansion of facilities which finds fourteen hospitals throughout the State today against eleven during 1947-48.

Parallel developments in the field of corrections have raised the real cost of activities for this purpose from \$1.21 per capita in 1947-48 to \$2.05 in the 1958-59 program. Second only to education in the relative rate of growth, the increase in constant dollar expenditures falls just short of 70 percent. Developments in modern penal science which stress classification of offenders, segregation into relatively homogeneous groups, vocational training, rehabilitation and closely supervised parole are the chief factors in the uptrend.

EXPENDITURES FOR SUPPORT OF MENTAL HYGIENE AND CORRECTIONS

For the most part, trends in real expenditures for other functions of government have been in marked contrast to those for education, mental hygiene and corrections. Support appropriations for the conservation of natural resources in 1958-59 are projected at \$3.03 per capita, against \$2.65 in comparable values during 1947-48—a 14 percent increase. Among the components of this total, expenditures for development of water resources are up 38 cents (209%) per capita in real terms, operation of beaches and parks costs 17 cents more (118%), while support of fish and game activities has advanced 5 cents (13%). Maintenance of agricultural services, forest protection, and supervision of mining, oil and gas operations all cost slightly less today than eleven years ago. Contributions for support of the State and district fairs have declined 16 cents (38%) to reach 27 cents per capita in the projection for 1958-59.

Expenditures for support of the Highway Patrol are more than twice the level of eleven years ago in terms of constant values. In 1947-48 this activity required 61 cents per capita; the recommended sum for 1958-59 represents the equivalent of \$1.34. Traffic safety and vehicle law enforcement have been stressed. The 1958-59 plan contemplates one uniformed officer for every 2,900 vehicles, compared with 3,900 in 1947-48.

OPERATING EXPENDITURES FOR OTHER MAJOR GOVERNMENTAL FUNCTIONS

An increase of roughly one-half has occurred in real expenditures of the Department of Motor Vehicles, but other support activities related to highways—chiefly maintenance—have dropped moderately, with the result that total cost in the highway and motor vehicle field has increased from \$3.74 in 1947-48 to \$4.59 projected for next year.

Real expenditures for support of agencies related to welfare and health are slightly below the 1947-48 level, due mainly to a decline in expenditures for veterans' affairs. Assistance to veterans has fallen approximately 8 cents, measured in terms of a constant population and price level, largely because the readjustment problems of early postwar years are no longer an important factor in the veterans' program. At an adjusted level of 29 cents per capita for next year, health services have shown an increase of one cent, while payments for administration of social welfare programs have declined by the same amount. Support of industrial welfare activities at 41 cents has advanced approximately 14 percent.

Expenditures by fiscal agencies of the State have decreased approximately 23 cents per capita in real terms since 1947-48. Control and management units will spend about three cents less, but tax collecting departments have reduced their constant-value amounts 20 cents per capita.

The trends among the miscellaneous group expenditures vary. The real cost of operating the Legislature has shown an increase, but the extent is difficult to determine due to the varying lengths of the budget and regular sessions. Support of the judiciary system is 25 percent less than in the earlier year, while real expenditures for general administration remains unchanged. Regulatory and licensing agencies require proportionately more under present practices—83 cents vs. 63 cents in 1947-48. As a group, the expenditures for miscellaneous activities are less today than they were eleven years ago, but the decrease is traceable to lower amounts for bond interest and redemption.

Price Indexes

Operating programs vary widely among the several agencies of State government and, where feasible, this variation has been reflected in the preparation of cost indexes. Five patterns have been recognized in this work and a separate index has been compiled for each:

1. Mental hospitals and other agencies substantially concerned with problems of care and treatment of individuals.
2. Correctional institutions in which the security, feeding and clothing of inmates represent a primary operating problem.
3. University of California.
4. State colleges.
5. Miscellaneous agencies without custodial responsibilities—chiefly office and field operations.

It is recognized that additional categories could have been used, but in all probability the price differ-

entials would not have been sufficiently great to justify the extra work required to prepare separate price indexes.

Several representative job classifications were selected within each of these groups and compensation rates were traced for each classification from 1946 to date. Similarly, price quotations were obtained for materials, supplies, utility services, equipment items and other factors of cost. In some cases wholesale or consumer price indexes were used for this purpose; in other instances—e.g., rental rates and food costs—data were obtained from State records.

Weights were assigned to each group of costs in accordance with importance in the expenditures of each of the five categories of operations. The weighted costs were reduced to index numbers with the period 1947-49 as a base, i.e., average costs in that period were taken as 100 and other years were expressed as

percentages of that average. An over-all index was computed by dividing the sum of the adjusted figures into the sum of the expenditures in actual dollars.

The index series for each group and for total expenditures are shown in the following table.

PRICE INDEXES FOR STATE OPERATIONS
(1947-49 = 100)

Fiscal Year	Mental Hygiene	Corrections	University of California	State Colleges	Other Agencies	Total

a Savings includes undistributed employees' retirement contributions of \$1,262,742.

b Savings includes the following proposed deficiency appropriations:

Assistance to counties for care of crippled children, \$482,888.

For local inspection of homes for caring for aged and children, \$246,396.

Reimbursements to counties for construction of juvenile homes and camps, \$55,000.

Assembly Contingent Fund, \$1,000,000.

Legislative Printing Fund, \$352,000.

c No estimate is made for emergencies for the State Highway Fund, whereas no allocation is made and the actual cost is not determined.

d No estimate is made for emergencies from special funds. This is the total allocation included in agency budgets.

e No estimate is made for allocations for capital outlay from special funds.

f Due mainly to projects estimated to be expended in previous years.

g Due to flood control projects estimated to be expended in previous years.

**STATEMENT OF BONDED DEBT OF THE STATE OF CALIFORNIA
AS OF NOVEMBER 30, 1957**

This statement does not include bonds issued under authority of state instrumentalities, such as the Toll Bridge Authority, Water Project Authority, Board of State Harbor Commissioners, World Trade Center Authority, and state colleges and the University of California, which bonds are not general obligations of the State.

¹ There is \$617,180 in the Sacramento State Building Interest and Sinking Fund in excess of the amount necessary to retire all outstanding bonds.

² Money was transferred from the General Fund to the Bond Sinking Fund of 1943 to pay the principal and interest on these issues to final maturity; however, \$5,000,000 was loaned to the Highway Fund for the Golden Gate Bridge and Highway District. This loan will not be repaid until after final maturity of the bonds.

³ There is \$9,174 in the Olympic Bond Fund in excess of the amount necessary to retire all outstanding bonds.

⁴ Money is transferred from the Motor Vehicle License Fee Fund to the General Fund in the amount to meet the annual interest and redemption payments.

⁵ Money was available to the School Bond Retirement Fund to pay part of the annual redemption requirements on the School Building Bonds. In addition, repayments from school districts and interest earned on the bond funds is available to pay part of the interest and redemption payments. In accordance with the provisions of Chapter 1073, Statutes of 1957, the balance in this fund will be transferred to the General Fund in July, 1958.

⁶ The servicing of these bonds is primarily the responsibility of the San Francisco Harbor Improvement Fund and the Veterans Farm and Home Building Fund; however, in the last analysis they are general obligation bonds.

⁷ Callable on or after January 2, 1951, in the amount available in the Sinking Fund.

⁸ Callable on or after January 2, 1955, in the amount available in the Sinking Fund.

⁹ \$500,000 callable on or after March 1, 1971.

¹⁰ Callable on or after January 2, 1941, in the amount available in the Sinking Fund.

¹¹ An additional \$20,000,000 subject to Section 7910.1, Chapter 28, Statutes of 1952, is unsold and not available for State School Building Aid Program as it was restricted by surplus requirements of the General Fund as of June 30, 1953.

¹² Chapter 2238, Statutes of 1957, provides for the San Francisco Port Bond Law of 1958 whereby a bond issue of \$50,000,000 to be used by the San Francisco Port Authority for improvement of San Francisco Harbor shall be submitted to the people of the State of California for their ratification at the next general election to be held in the month of November, 1958.

8									
9									
10	GENERAL ANALYSIS								
11									
12	Objectives								
13									
14	To provide legal assistance to Legislature and state officials in drafting legislative measures, and to give legal advice, act as counsel								
15	for committees of the Legislature, and represent the Legislature and legislators in litigation. To maintain indexes, tables, and								
16	digests of all legislative measures, and to edit, compile and index for the State Printer state legal publications.								
17									
18	Program and Performance								
19									
20	The Legislative Counsel acts as the legal adviser to the Legislature. Legal services furuished include opinions, bill drafting, counsel-								
21	ing and attendance as counsel at meetings of committees of the Legislature. The attorney-client relationship is maintained, and								
22	all work is confidential.								
23	The number of bills introduced since 1951 has increased 29 percent; the number of interim committees has increased 35 percent;								
24	and the total number of requests handled by the agency has increased 57 percent. Since there has been no increase in staff since								
25	1951, 3 counsel positions and 3 clerical positions are proposed to meet this increased workload.								
26	In addition, the office maintains an Indexing Section, which indexes all bills introduced, maintains a statutory record, and acts as								
27	editor and compiler of all state-published codes and the official publication of the statutes. The work of this section during								
28	sessious is published as the Interim Subject List, Table of Sections Affected, and Fial Subject List. The number of codes and								
29	statutes remaining to be indexed will require an additional law indexer position.

17	GENERAL ANALYSIS							
18	Objectives							
19	This commission examines the law to discover defects and recommends needed changes, receives proposed changes in law recommended by other bodies, recommends changes in the law necessary to modify or eliminate obsolete or unconstitutional provisions and reports proposed studies to the Legislature.							
20	Program and Performance							
21	Provision is made for the estimated needs to accomplish a program which will include research on approximately 40 topics and publication of reports on 15 of these topics in the 1957-58 Fiscal Year. The remaining 25 reports are to be published in the 1958-59 Fiscal Year.							
22	An additional intermediate stenographer-clerk position has been provided for the increased workload connected with the increased number of reports.

COMMISSION ON UNIFORM STATE LAWS

Office at San Francisco

SUMMARY

24	TOTAL EXPENDITURES							
25	Support (General Fund)-----				\$3,146	\$5,450	\$5,450	—

GENERAL ANALYSIS

In conjunction with other states the commission drafts and presents to the Legislature uniform laws deemed desirable and practicable by the National Conference of Commissioners on Uniform State Laws. The commission is composed of 5 members appointed by the Governor, and of 2 legislators. The program is maintained at the same level as previously authorized.

9								
10	The Supreme Court reviews cases including appeals in cases of equity, cases at law involving title or possession of real estate, taxation and probate matters, and death penalty cases. It also has original jurisdiction to issue writs of habeas corpus, mandamus, prohibition, and certiorari. The court admits to the bar. Bailiff positions are provided in lieu of police contractual service for more efficient operation.

15	GENERAL ANALYSIS					
16						
17	The Judicial Council surveys the condition of business in the courts with the view of simplifying and improving the administration of justice. Suggestions are submitted to the courts for expediting business and helping to secure uniformity. The chairman also equalizes the work of judges by making assignments to courts with heavy dockets. The council also collects and compiles statistics on all courts and makes many special studies looking to the improvement of the administration of justice, some of which are required by the Legislature and others voluntarily undertaken. The increased workload of the courts will require one additional research technician for analysis of statistical information.

GENERAL ANALYSIS

Objectives

This section of the Governor's Office has been assigned the responsibility for planning and co-ordinating a statewide program for emergency relief in the event of natural or war-caused disaster, as provided in Chapter 1, Division 7, of the Military and Veterans Code.

Program and Performance

This office has been organized with a central administrative staff and a group of specialists who are responsible for specific services that would be required during an emergency operation. The State has been divided into 3 regions with a co-ordinator in charge of the operations in each. The regional coordinators, with their assistants, provide advice and consultation to local disaster organizations. They act as liaison between the various local jurisdictions, integrating the individual mutual aid and disaster plans into the statewide plan. The service specialists render technical advice and assistance through the regional co-ordinators to the local agencies.

The responsibilities of this office were expanded by Chapter 56, Statutes of 1956, First Extraordinary Session, to include planning and co-ordinating a program for relief in the event of natural as well as war-caused disasters and on April 30, 1957, the Federal Government discontinued the dissemination of alert information by type of alert which requires the interpretation and dissemination of alert signals by the State Disaster Office. 10 additional positions were added to the 1957-58 Budget to provide the required staff for the 2 changes in responsibilities stated above. Chapter 2335, Statutes of 1957, further augmented the staff by 3 assistant regional co-ordinators to provide additional assistance to local disaster officials. 1 additional clerical position is proposed in 1958-59 to provide stenographic services for those additional positions that have been assigned to the Los Angeles Office.

Under authority of Public Law 655, 84th Congress, which added civil defense to the programs eligible to receive federal surplus personal property, the director of this agency has been designated as the state officer responsible for supervising the acquisition of such property for civil defense purposes by all state and local agencies within this State. This supervision requires the review and approval of all requests for items to be acquired under the new legislation. Approved items are certified to the State Educational Agency for Surplus Property which has been designated the agency primarily responsible for distributing all federal surplus property donated for use within the State. 1 additional clerical position is proposed for processing the additional paper work resulting from this activity.

The radiological safety program involves supplying radiation detection instruments, both federal- and state-owned, and laboratory facilities to local jurisdictions for training monitors and for use in the event of an emergency. A staff of radiation specialists conduct training courses to train instructors who in turn train volunteers at the local level. The staff also makes environmental tests for radioactivity in water and air samples collected by other state agencies and maintains the technical equipment involved. It is anticipated that 5,000 instruments, 95 radiological trailers and 16 mobile laboratories will be assigned to the field by July 1, 1958. These assignments represent substantial increases over the number on July 1, 1957. 1 additional technician position is proposed to assist with the additional maintenance work.

The Federal Civil Defense Administration has contracted with this office to resurvey and develop a new operational survival plan for the State which will encompass individual plans for the 3 critical target areas and 6 target areas. The entire cost, which has been set at a maximum of \$346,403, will be reimbursed by the Federal Government.

GENERAL ANALYSIS

In the absence of the Governor from the State, the Lieutenant Governor must assume the duties of the chief executive. He presides over the State Senate during its sessions. He is a Regent of the University of California, member of the State Toll Bridge Authority, State Lands Commission, and Commission on Interstate Co-operation. Offices are maintained in both Sacramento and Los Angeles for the convenience of the public.

GENERAL ANALYSIS

Objectives

The primary purpose of the State Employees' Retirement System is to provide for the orderly retirement of employees who reach an age, or condition of disability, such that they cannot normally be expected to discharge their responsibilities with the desired proficiency, and to provide further that the retirement compensation offered be sufficient to attract and retain personnel of the required caliber. The Board of Administration also administers the Legislators' Retirement System.

Program and Performance

Members of the State Employees' Retirement System, numbering about 188,000, consist of state employees (including most University employees) and employees of approximately 360 local governmental jurisdictions, participating on a contractual basis. Members of the Legislators' Retirement System consist of legislators and elective state officials who elect membership.

The administration of the retirement systems involves determination of membership; computation, collection, and recording of employer contributions and member contributions, service and compensation; computation and payment of withdrawals of member contributions, and death and retirement benefits, including retirement for service, ordinary and industrial disability, and industrial death; the control and investment of funds; preparation of periodic and special valuations; and the preparation of annual and special reports.

Major increases in the total expenditures during 1957-58 are the salary increases granted to employees on July 1, 1957; the increased workload due to the normal growth of the membership of the system; the addition of the noncertificated employees of the Los Angeles City School System; occupancy of new quarters; conduct of the board member election; the quadrennial valuation, and new legislation.

Major increases in the costs during the 1958-59 Fiscal Year will result from the normal growth of the system; conversion of the member and employer contribution accounting to punched card methods, and new legislation. The conversion to punched card methods will require the creation of 14 additional positions on July 1, 1958, but will ultimately result in the elimination of 33 positions on December 31, 1958, for a net reduction of 19 positions. The elimination of 33 positions on December 31, 1958, is reflected as a reduction of 16.5 man-years in the 1958-59 Fiscal Year budget.

Temporary help—other services is used to perform unusual or nonrecurring operations which do not fall within the scope of normal, routine transactions. All projects are carried on and completed by temporary help under the direction of permanent staff.

^a Composed of savings in salaries and wages, \$2,205; operating expenses, \$658; and equipment, \$960.

^b Composed of savings in operating expenses.

1	GENERAL ANALYSIS—Continued						
2							
3							
4	Program and Performance—Continued						
5							
6	Chapter 2342, Statutes 1957, provided for an increase in retirement allowance being paid to retired state employees and retired						
7	employees of certain contracting public agencies. The increase applied only to those retired on or before July 1, 1956, and was						
8	effective as of October 1, 1957. Approximately 8,000 allowanees were recalculated.						
9	In the 1957-58 Fiscal Year, preliminary work on the quadrennial actuarial investigation and valuation required by Section 20127						
10	of the Government Code will be begun. The actuarial investigation and valuation for the state members will be completed in						
11	the 1958-59 Fiscal Year.

18	GENERAL ANALYSIS				
19	Objectives				
20	This commission formulates proposals for co-operation with other states and the Federal Government and participates in the regional and national councils of state governments.				
21	Program and Performance				
22	The principal item of expenditure by the commission is California's proportionate share of the cost of operation of the National Council of State Governments. This council is a research and service agency which assists the various interstate associations of state officials consisting of representatives from the several states. Travel expenses are provided for commission members to attend conferences.

52							
53							
54	RECRUITMENT AND FIELD SERVICES						
55							
56	Objectives						
57							
58	The primary functions of the division are to attract qualified applicants to compete for positions in the state service; to provide						
59	information to the general public and to veterans concerning state employment; to administer continuous testing programs; and						
60	to provide assistance in personnel matters to state agencies in Los Angeles and San Francisco.						
61							
62	Program and Performance						
63							
64	The division has programs designed to provide direct and continuing contact with employment sources; such as colleges, labor unions,						
65	placement services, technical and professional associations and other organizations, to create favorable long-term interest in state						
66	employment as a career in schools and colleges, and to advertise and personally recruit at sources of labor supply. Its function						
67	of attracting well qualified applicants to the state service is made difficult by manpower shortages in many occupations and						
68	by the organized competition faced by the State for available personnel. Workload has increased with the rise in the number						
69	of examinations and the increase in the number of authorized positions in state departments. Recent increases in the staff and						
70	funds available for medical and engineering recruiting appear to be producing results in these areas. For these and other occu-						
71	pations the division is attempting to measure the effectiveness of various recruitment media and techniques. It is hoped to in						
72	part offset workload increases and improve recruiting by effecting closer co-operation with operating departments and their field						
73	offices throughout the State and through extension of the practice of recruitment through employees.						
74	Proposed positions are based on increased workload.

24	Totals, Standards and Surveys Division				\$186,422	\$246,179	\$256,772
25	OFFICE SERVICES DIVISION						
26	Objectives						
27	This division performs clerical work; processes applications; arranges, administers, scores, and processes examinations; establishes eligible lists and maintains statistical data and employee roster; and conducts certification activities.						
28	Program and Performance						
29	The highest examination workloads in the agency's history have imposed great burdens on the processing sections. With a record number of persons employed by the State and a high turnover of personnel, referrals of eligibles, appointments, separations and list clearances are setting new highs each month.						
30	Processing and operating procedures are constantly being reviewed in order to simplify and improve them. For example, certification by telephone is being used to speed the giving of eligible list information to hiring agencies. Various activities have been decentralized to branch offices and to other departments. Increased use of mechanical aids such as punched cards, mechanized files, photographic reproduction, offset duplication, and microfilming has speeded production. Requirements for additional personnel, space and operating expense are thereby kept to a minimum.						
31	The new positions proposed are based upon actual workload increases after taking into account any economies expected through improved procedures.						
32	SALARIES AND WAGES

1	TRAINING DIVISION						
2	Objectives						
3	The training division carries out duties delegated to the State Personnel Board by the Government Code. This is done by working						
4	with agencies in the conduct of employee training programs so that the quality of service rendered by persons in the state civil						
5	service may be continually improved.						
6	Program and Performance						
7	To carry out the division's duties, a program has been designed to improve (1) morale, (2) work methods, (3) communications, and						
8	(4) public relations. Agencies are assisted in attaining greater management efficiency through a careful program of organization						
9	development. Division follow-up activities further motivate state administrators to utilize training as a framework for action.						
10	Developmental activities carried on by the division provide state supervisors with aids, methods, and devices needed to improve the						
11	quality of service rendered by persons under their jurisdiction.						
12	In addition the state safety coordinator is assigned to stimulate interest among state agencies in employee safety and accident pre-						
13	vention. An effective safety program can contribute immeasurably to the reduction of accident and injury costs.						
14	No increase in positions is proposed in the budget year.

34	CO-OPERATIVE PERSONNEL SERVICES						
35	Objectives						
36	This division provides personnel services to local agencies on their request and on a contract basis by which all costs are reimbursed.						
37	Program and Performance						
38	An increasing trend in local government to employ staff through merit selection methods has led to this program serving more than						
39	100 agencies and giving over 1,100 examinations for such agencies last fiscal year. These agencies find this service more effective						
40	and economical than providing their own testing service. Methods are being reviewed constantly to lower these costs with-						
41	out sacrifice of quality.						
42	The proposed positions are based on increased requests by local agencies for services. With 1 exception these 8 positions are for the						
43	same level of service as presently being provided. The proposed associate personnel analyst is due to requests by the local agen-						
44	cies for work in developing training programs and personnel management surveys. These are presently not being covered by the						
45	division. However, since all costs of this division are reimbursed by the agencies being served these increases do not add to the						
46	amount of the Personnel Board budget.

GENERAL ANALYSIS

Objectives

Examines and files articles of incorporation and amendments thereto; exercises general supervision of elections; maintains the Archives of the State and the Central Records Depository; attests the official acts of the Governor and Legislature; licenses and supervises collection agencies.

Program and Performance

Before a corporation can operate in California, its articles must first be reviewed, and if approved, filed with the Secretary of State. Likewise all amendments to corporate articles, as well as dissolutions, agreements of merger and consolidations must be filed with this office. In the 1956-57 Fiscal Year there were 31,767 corporate documents reviewed. Of this total 26,298 were filed of which 17,204 represented filed articles for new corporations in California. During the past year there was a slight decrease in the number of documents processed. However, it is anticipated that the continued movement of industries to the west coast and the continuing increase in the population of California will result in slight but steady increases in the number of documents processed. In 1955 changes in the laws governing notaries public resulted in substantial increases in the number of applications processed for notary public commissions. Increases in workload for both the current and budget years are expected to continue to a moderate degree for all phases of work mentioned under the objectives of this office. The proposed increase in temporary help in 1958-59 is provided to notify all persons who registered trademarks before 1939. Legislation introduced at that time provided that all trademarks hereafter must be renewed every 20 years. This will provide help for the re-registering the large number of trademarks which were blanketed in under the legislation for a 20-year period. It is anticipated that this work can be absorbed by the present staff after the initial processing.

During the 1955-56 Fiscal Year, all records pertaining to active corporations were microfilmed as part of an overall records management program. A continuing microfilming program has further been instituted. The program materially aided this office in the solving of an acute office space problem by making available for office personnel use first-class office space which had been occupied by filing cabinets. A second phase of the program consisted of decentralizing records pertaining to inactive corporations by moving them to the low-cost Records Center. The movement of records to the Central Records Depository made possible the release of considerable space in the basement of the Capitol for use by other agencies. Through the microfilming and records decentralization programs, it was possible to further release for use by other state agencies filing equipment which would have cost approximately \$29,500 if purchased in the form of new equipment. The program further makes it possible for this office to annually realize added savings due to reduced purchases of filing equipment and less need for additional office space. Minor changes in office forms and procedures has enabled the administration function to process increased workloads with the addition of only 1 clerical position in the current year and 1 proposed for the 1958-59 Fiscal Year.

An additional counsel position with stenographer was authorized in the 1956-57 Governor's Budget due to anticipated workload in articles of incorporation filings. However, because the workload did not increase to the extent estimated at the time the 1956-57 budget was prepared, and improvements in procedures the Secretary of State did not establish the 2 positions and they have been dropped from the budget.

Under the provisions of Chapter 2309, Statutes of 1957, the Secretary of State is required to publish and distribute at cost a compilation and index of all laws of this State governing and relating to the publishing business and to publishing generally. The compilation is to be made by the Legislative Counsel. It is anticipated that this project will be completed during the current year.

The publishing and distribution of election pamphlets occurs in alternating fiscal years. This document is distributed prior to each general election and therefore no expenditure is required in the odd-numbered calendar years. As a result of this alternating pattern there is a large fluctuation in the budget for this office from year to year. Practically the entire amount of the increase in this budget is attributable to the \$175,000 proposed in 1958-59 for this item.

30	CENTRAL RECORDS DEPOSITORY						
31	Objectives						
32	This bureau has receipt and custody of all records required or permitted by law to be deposited in the Office of the Secretary of State.						
33	Program and Performance						
34	The Central Records Depository was established in the Secretary of State's Office in 1947 for the purpose of establishing uniform systems and procedures for the preservation of valuable state records required or permitted by law to be filed or deposited in the Office of the Secretary of State. Modern equipment and the proper use of record center systems, procedures and techniques enable the Central Records Depository to, in many instances, service records and furnish information therefrom more rapidly than it could have been secured if the records had remained in the depositing agencies inactive record files. Through the transfer of inactive material to the record center, depositing agencies are able to effect economies due to reduced purchases of filing equipment and the need for less office space for records retention.						
35	1 additional position is proposed to assist with receipt and processing of the increasing volume of records being transferred by agencies to the depository.

20	Objectives							
21	This division licenses and supervises collection agencies in accordance with the provisions of Sections 6850 to 6956 of the Business and Professions Code.							
22	Program and Performance							
23	The State Collection Agency Board consists of 5 members appointed by the Secretary of State. The Secretary of State with the concurrence of the board may establish and enforce such rules and regulations as may be reasonably necessary for the examination and licensing of applicants, for the conduct of licensees in the protection of the public. In 1956-57 there were 774 licensed collection agencies. In the current year there were 769 continuation licenses issued, indicating a slight decrease. However, it is anticipated that the budget year will reflect slight increases in both the number of continuation licenses issued and in the number of applicants requesting permission to take the collection agency license examination.

18					
19	GENERAL ANALYSIS				
20					
21	Objectives				
22					
23	The work of the department is of a regulatory and service nature. It deals with the protection of plants and animals from infectious				
24	diseases, pest animals, weeds and injurious insects, and with prevention of the introduction and spread of crop and livestock				
25	pests and diseases. The department administers programs designed to assist in the marketing of agriculture products, and to				
26	protect the public by assuring quality controls and preventing fraud and deception.				
27					
28	Program and Performance				
29					
30	The department operates through 4 divisions. It is headquartered in Sacramento and has offices, field crews, advisers and				
31	consultants operating throughout the State. A major portion of the departmental responsibility is accomplished in co-operation				
32	with the 53 offices of county agricultural commissioners. The department gives technical assistance, co-ordinates various				
33	county programs and surveys, and assists in training field personnel.				
34	During the budget year provision is made for additional border quarantine stations because of highway improvements and realign-				
35	ments which would permit inspection-free entry routes if the additional stations were not established. Bovine brucellosis				
36	indemnities, accelerated by Chapter 2299, Statutes of 1957, are increased to provide a full year program. Expansion of the				
37	bee industry has reached the point where another supervisor is required, primarily in the field of training of local inspectors.				
38	Assistance to counties in field surveys and eradication programs is increased to maintain the minimum work standards extended				
39	when the service was established, and the laboratory staff for insect identification is augmented to eliminate delays on requested				
40	identifications. Changing conditions in eradication programs will require permanent employees in lieu of temporary help. Other				
41	minor increases are discussed under the respective divisions.				
42					
43					
44					
45	Summary of proposed increase				Annual cost
46	Border quarantine stations (9 personnel man-years) -----				\$37,374
47	Field survey and laboratory analysis (2 personnel man-years) -----				10,820
48	Apiary inspection and local training (1 personnel man-year) -----				7,032
49	Local assistance in pest detection and eradication (2 personnel man-years) -----				17,564
50	Insect identification (1 personnel man-year) -----				5,982
51	Additional bovine brucellosis indemnities -----				180,000
52	Standardization of county crop estimate (1.5 personnel man-years) -----				9,000
53	Objective sampling of cling peach crop -----				15,000
54	Poultry plant sanitation inspection (5 personnel man-years) -----				39,955

^a Grants from Federal Government and expenditure therefrom are not included in the overall budget totals.

1	DEPARTMENTAL ADMINISTRATION						
2	Objectives						
3	The director and his assistants establish the departmental policy, channeling the efforts of the operating divisions to achieve adequate						
4	and proper administration of the agriculture laws.						
5	Program and Performance						
6	The office of administration provides agricultural and related economic information for the Governor and the Legislature. In addition						
7	it maintains co-operative relations with federal, state and county agencies and institutions. This office administers all fiscal						
8	matters of the department relating to budgets, accounts, collections, payrolls and disbursements, through the accounting office.						
9	The personnel office conducts job classification studies, salary surveys, and investigates cases requiring disciplinary action. For						
10	the counties, and with their co-operation, the personnel office examines applications and certifies those eligible for appointment						
11	by county boards of supervisors to those positions directly related to the agriculture program.						
12	No program or workload changes are anticipated in this budget.

DEPARTMENT OF AGRICULTURE—Continued

General Fund Activities

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)			
1	DIVISION OF PLANT INDUSTRY						
2	Objectives						
3	This division works with the farmer to minimize the losses which might result from the introduction and spread of new crop pests.						
4	This includes interception of harmful pests at the border, surveys throughout the State for new pest infestations, and develop-						
5	ment of procedures to suppress or eradicate pests should they become established. Further assistance is extended through regu-						
6	latory pertinent to agriculture chemicals.						
7	Program and Performance						
8	The first line of defense against the introduction of plant pests and diseases consists of agriculture inspection stations maintained						
9	at 17 border locations for the purpose of inspecting vehicular traffic and enforcing plant quarantine regulations. Stations are						
10	also maintained at San Francisco, San Pedro, and San Diego to inspect ships and airplanes. Quarantine enforcement at interior						
11	points, consisting largely of the inspection of freight, express and mail shipments, is carried out by county agriculture com-						
12	missioners.						
13	Leadership, co-ordination, and technical assistance are supplied the counties. Field surveys are conducted in co-operation with the						
14	counties to determine the distribution of plant infestations present, but not yet widely distributed in the State. Particular atten-						
15	tion is given to the detection of new infestations, including those known only outside of California but which might have eluded						
16	quarantine and inspection barriers. When they are discovered, particularly in incipient stages, suppressive and eradica-						
17	tive measures are initiated.						
18	This division provides identification and classification of unusual pests and diseases intercepted during surveys or quarantine						
19	inspections.						
20	Co-operative programs are developed with local governments and landowners to control noxious weeds and rodents and predatory						
21	animals harboring diseases transmissible to humans.						
22	Fruits and vegetables, as well as hays, and fodders, are sampled and analyzed to determine whether they contain deleterious spray						
23	residue which would be injurious to persons, animals, or crops, other than pests or vegetation which it is intended to destroy.						
24	During the budget year it will be necessary to establish a border station near Twentynine Palms. Part-time inspection of State						
25	Highway 187 has been maintained for several years. Increased traffic now requires full-time coverage. 5 permanent positions						
26	will be established January 1, 1959. Construction of the station, included in the capital outlay program for 1958-59, will also						
27	be completed on January 1, 1959. 4 additional positions are necessary at the Truckee station because of the completion of						
28	a new section of freeway on U.S. 40, which necessitates the maintenance of 2 border stations. The highway and new border						
29	inspection station will be completed by January 1, 1959. 1 additional permanent position will be established at Hornbrook						
30	to replace an equivalent amount of seasonal inspector time which has now increased to a year around need. In the Bureau of						
31	Plant Pathology an additional position is included to assist and co-ordinate county survey and eradication programs. A clerical						
32	position is added to the laboratory staff to prepare correspondence relative to specimens submitted to the laboratory for analysis						
33	and identification. Additional temporary help is provided for survey and eradication of yellow hud mosaic in peach trees which						
34	appears to be spreading out from the original control area, and for broomrape in tomatoes and pear tree decline which have						
35	been identified in some areas of the State.						
36	In the Bureau of Entomology an assistant supervisor of apiary inspection is included to assist in colony registration, disease diag-						
37	nosis, and training of county inspectors. An entomologist for insect identification is added because of additional identifications						
38	resulting from survey activities. 2 entomologists are included to assist local survey activities in pest detection and eradication.						
39	7 field assistants are proposed as permanent positions in lieu of seasonal help.						
40	ADMINISTRATION

General Fund Activities

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)			
1	DIVISION OF ANIMAL INDUSTRY						
2	Objectives						
3	This regulatory activity maintains the high standards of quality for all dairy products and many dairy by-products offered for sale in California. This division also maintains a program of general livestock and poultry disease prevention, both eradication and control, accomplished by means of inspection, diagnosis, quarantines and laboratory findings. Slaughtering of animals and preparation of meat food products including poultry plant sanitation and the inspection for wholesomeness of poultry and rabbit meat is supervised by this division.						
4	Program and Performance						
5	There are approximately 2,000 milk processing plants requiring constant supervision over production methods and sanitation. Five thousand employees of the dairy industry are licensed by this function. It also supervises the activities of local approved milk inspection services and the production of milk and cream for manufacturing purposes as regards to processing methods and sanitation.						
6	The welfare of livestock and poultry is dependent to a great extent upon the control and prevention of communicable diseases. Veterinarians stationed in various districts become familiar with conditions and problems in their areas. In addition to supervising bovine tuberculin testing, they are readily available to investigate other infectious diseases or troubles causing livestock losses and are able to start control measures promptly. There is close co-operation with federal, state, county, and city health officials and practicing veterinarians to discover and prevent spread of animal pests or pathological conditions. To assist in the diagnosis of livestock and poultry diseases, laboratories are maintained in San Gabriel, Lancaster, Petaluma, Sacramento, Turlock, and Fresno.						
7	The inspection of animals and meat products in slaughtering and meat processing establishments is accomplished for protection of the public from unwholesome or otherwise objectionable meat products. Such operations may be carried on only in establishments operating under federal, state or state-approved inspection. Wholesomeness of poultry or rabbit meat is accomplished by state-approved inspectors. This division arranges for the training of inspectors, conducts examinations, and licenses the inspectors. State inspectors enforce plant sanitation.						
8	During the current year the bovine brucellosis control program was substantially increased by Chapter 2299, Statutes of 1957. This program provides for creation of disease-free areas by vaccination and slaughter. Contract vaccination for the current and budget years will increase over the past year because of increased cost of vaccine. Indemnities of \$320,000 during part of the current year will increase to \$500,000 in the budget year. It is estimated that the State will reach a modified certified brucellosis-free status by July 1, 1960, there will have been 41,200 reactors slaughtered, and \$1,511,000 spent for indemnities.						
9	5 additional poultry plant sanitation inspectors are included to increase plant inspections to 1 inspection per plant per week.						
10	No other program changes are anticipated in this division.

38	DIVISION OF MARKETING						
39	Objectives						
40	This service and enforcement function assists in the profitable marketing of crops, develops estimates on farm commodities and prevents marketing of commodities in deceptive packages, inspects the classification and marketing of poultry meat and certifies to the accuracy of weighing and measuring devices used commercially within the State.						
41	Program and Performance						
42	Marketing orders and programs originate upon request of grower or handler groups. This function assists these groups in the drafting of an acceptable form of the marketing order and conducts hearings on such orders. Surveys of the marketing and distribution problems of various agriculture industries of the State are carried on to develop new and larger markets and to expand sales. This service reports current information covering marketing of agricultural commodities in intrastate, interstate and foreign markets. Reports are prepared and published daily, semiweekly, weekly, or at other intervals, depending upon specific needs. Such information gathered in California and in other states and by federal offices is quickly interchanged principally by means of leased wire systems connecting all such services.						
43	Because of the magnitude and diversity of interest in California's agricultural industry, this unit develops, prepares and publishes estimates of the acreage, production, and value of all major crops of the State. The statistical data and related factual information contained in the reports are widely used by producers, processors, dealers, banks, and other financial agencies, public carriers and educational institutions. This function also engages in certain research projects in methodology for estimating crops, mainly by means of objective sampling projects. These activities are carried on for the purpose of improving the many forecasts and estimates.						
44	The enforcement efforts of this division include standards relating to fruits, nuts, vegetables, honey, eggs, and poultry meat products and are for the purpose of maintaining and improving the reputation of California products in our own markets as well as in markets throughout the Nation, and to protect the consumer from fraud, mislabeling and deception. It also includes all commercial weighing devices, commercial measuring devices, tanks, and hottles. Supervision of these activities is accomplished in co-operation with the county agriculture commissioner, county sealers, deputy state sealers and state employees.						
45	During 1958-59 1 additional permanent position with part-time clerical assistance is added to the statistical operation to review the techniques of gathering and preparing various county crop estimates. This ultimate program would be uniform estimates based on standard techniques. Additional temporary help is included to effect the objective sampling in connection with estimates of cling peaches.

		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)				
1	FEDERAL CO-OPERATIVE MARKETING RESEARCH							
2	Objectives							
3	The matching funds marketing service work being carried on by State Department of Agriculture, under the authority of the Agri-							
4	cultural Marketing Act of 1946, has these aims: To help marketing agencies at each level of distribution to put into use the best							
5	known marketing practices as they are brought to light by research under the act and by other agencies, both private and public,							
6	to provide more timely and better marketing information, and to increase the consumption of farm products.							
7	Program and Performance							
8	Projects in marketing research are conducted by 4 bureaus in co-operation with the United States Department of Agriculture on a							
9	matching basis under provisions of Public Law 733 (79th Congress) and Section 1286 of the Agricultural Code.							
10	Activities are concerned with checks of bearing and nonbearing acreages of fruits and tree nut crops and surveys of the acreages and							
11	production of minor crops. 1 survey covers improvement of marketing efficiency, overcoming obstacles to distribution and sales,							
12	achieving market stability, expanding markets and effecting improvements in quality, packaging, and methods of sales promotion.							
13	Another project is directed toward the development of maturity standards, studies of containers, and packaging methods. Studies							
14	concerned with the development of a methodology for certification that fruit and nut tree and vine nursery stocks are free of							
15	serious virus diseases are also carried on.

17	TOTALS, DIVISION OF PLANT INDUSTRY				\$1,000,040	\$1,117,939	\$1,146,745
18	DIVISION OF ANIMAL INDUSTRY						
19	Objectives						
20	The primary mission of the Special Fund function of the Division of Animal Industry is the protection of the public from the sale						
21	of poor quality dairy products and the protection of cattle owners through inspection and brand registration.						
22	Program and Performance						
23	The inspection of market milk producers and processing plants, standards and quality determinations on market milk, market cream,						
24	ice cream and butter are accomplished by specialists in this field to insure against the manufacture and sale of unwholesome or						
25	adulterated dairy products. The grading of butter at the consumer level and the testing of glassware used for making deter-						
26	minations of milk fat content in milk and cream is a further responsibility of this division. Administration of an established milk						
27	inspection service is also included, a service which is now extended to 26 counties. Visits to dairy farms for the purpose of						
28	collecting or making samples totaled 7,949 during 1956.						
29	The protection service to the livestock industry is accomplished through the assignment of inspectors to strategic points throughout						
30	the State to inspect cattle for identification of ownership, to assist in locating owners of stray animals, and to assist in theft						
31	investigation and prosecution of law violators. Any brands used for the purpose of establishing or indicating ownership of cattle,						
32	horses, mules, burros, or sheep must be recorded with the department. A further function is the inspection of cattle or horses						
33	at the point of origin or the destination. All cattle shipped to stockyards, sales yards or slaughterhouses which are not inspected						
34	at the point of origin must be inspected at the destination. A total of 5,869,787 inspections were made during 1956. The han-						
35	dling of lost, strayed or stolen cattle is an important responsibility of this division. Whenever a stray animal is found, a report						
36	is made to the local brand inspector or the local sheriff. This information is relayed to the Sacramento office for incorporation						
37	in a weekly estray bulletin published by the department. Theft investigations in co-operation with law enforcement agencies and						
38	the collection of beef promotion fees are administered by this division.						
39	The current level of operation is proposed during the 1958-59 Fiscal Year with no significant increases in expenditures.

DIVISION OF MARKETING

Objectives

This division assists farmers and handlers of farm produce in the solution of their agricultural marketing problems, regulates the market milk industry for the mutual protection of the producer and the consumer, certifies the quality of tomatoes for canning and seed potatoes for production quality. This division will grade and certify the condition of fruits and vegetables for any financially interested party.

Program and Performance

Surveys of the marketing and distribution problems of various agricultural industries of the State are carried on to develop new and larger markets, and to expand the sales of California agricultural products. Closely allied with this function is the market enforcement program. Licensing of all persons who deal in farm products to insure adherence to a strict code of fair practices is the responsibility of this division. Administrative review is given any suspected violator with an aim towards correcting unfair practices. During 1956 the department received 1,072 complaints and conducted 136 administrative hearings. This section is headquartered in Sacramento with branch offices at San Francisco and Los Angeles.

The Director of Agriculture fixes the minimum retail and wholesale prices for each of the marketing areas of the State. Preliminary studies followed by public hearings are necessary before a price change is effected. Approximately 98 percent of the fluid milk sold in California is subject to established prices. Further responsibilities involve the licensing and regulation of dairy produce exchanges and the investigation of any verified complaints. The regulation of the business activities of manufacturers, distributors and retail stores with regards to dairy products is also undertaken. The broadening of the definitions of dairy products has increased the workload of this division.

A continuing program of promotion and sales stimulation of dairy products is carried on in co-operation with the Dairy Industry Advisory Board.

During 1956, 2,000,000 tons of canning tomatoes were inspected for quality and maturity. Closely allied with this function is the certification of seed potatoes to provide California potato growers with disease-free stocks of seed which will produce more tons per acre of high quality commercial potatoes. Stations maintained at Bakersfield, Stockton and Tulare with administration from the Sacramento headquarters were responsible for the inspection of 5,970 acres of seed potato plants in 1956.

47 different commodities were inspected at shipping points throughout the State. This service is furnished at the request of growers, shippers and other financially interested parties. Advice and assistance are given the grower and packer in connection with harvesting, handling, grading, sizing, and packing operations, in order that they may meet any desired standard of grade, size and pack. Certificates are used as the basis for sales F.O.B. at shipping point and in claims involving perishable shipments of commodities. Fees are paid by the applicant. In the main seasonal help is utilized to perform this service with permanent personnel acting primarily in a supervisory capacity.

The regulation, inspection and control of automotive fuel, antifreeze and brake fluid registration is administered by this division. Advertising media, dispensing outlets and labeling are carefully watched to insure compliance with the provisions of the Business and Professions Code. Before a permit to sell antifreeze or brake fluid in the State of California can be issued, the applicant must furnish the department with a sample of the product which is analyzed to insure that it contains no materials which might be injurious to the components of any vehicle. Public weighmasters are licensed by this division. Their weighing devices are inspected and the licensee is instructed in the proper service to be rendered as a public weighmaster.

No increase in the current level of expenditures is proposed for the budget year.

10	GENERAL ANALYSIS				
11					
12	Objectives				
13	The California Dairy Industry Advisory Board provides the means for the dairy industry to develop, maintain, and expand markets				
14	for California dairy products.				
15					
16	Program and Performance				
17	The board, made up of industry representatives, acts in an advisory capacity to the Director of the Department of Agriculture, who				
18	is designated as the administrative and enforcement officer for duties outlined in Division 4, Chapter 14, of the Agricultural Code.				
19	The use of dairy products throughout the State is encouraged by providing health education materials to schools and carrying on				
20	advertising and research programs. The cost of this program is defrayed entirely from fees paid by producers and handlers				
21	of dairy products. The 1958-59 Fiscal Year expenditures and revenue are projected on the same basis as the current year.

GENERAL ANALYSIS

Objectives

The Poultry Improvement Commission provides California's poultry industry with accurate production data on the various types and strains of chickens and turkeys.

Program and Performance

The work of this commission is divided into two distinct areas, the chicken project which is located near Modesto and the turkey project which is located near Keyes. Specific tests, requested by the poultry industry, are conducted as a means whereby commercial poultrymen may judge the merits of available strains of chicks and poults. A representative sample, randomly collected, of each entrant's stock, is raised on the testing grounds and periodic reports are made to breeders, hatcherymen, poultrymen, and the general public. Measurements of the productivity and efficiency of each sample are biometrically compared with similar data of all entrants and the results recorded and distributed.

One poultry assistant is proposed for the 1958-59 Budget to provide necessary maintenance for the chicken project which was expanded with a capital outlay project completed in the 1957-58 Fiscal Year.

DEPARTMENT OF CORRECTIONS-Continued

GENERAL ANALYSIS

Objectives

The protection of society is the primary purpose of the Department of Corrections. Since 98 percent of the prisoners are eventually released, adequate protection not only includes segregation from society by imprisonment but also preparation for release and adequate supervision while on parole. To be most effective, the correctional process must continue throughout both the institutional and parole periods. The aim is rehabilitation of the person in the shortest period possible and restoring him to a constructive life in the community.

Program and Performance

The Department of Corrections, established in 1944, is presently composed of the Director of Corrections, Adult Authority, Board of Trustees, California Institution for Women, Correctional Industries Commission, and Board of Corrections.

The Director of Corrections is the chief administrative officer of the department. He is directly responsible for management of the state prisons and for the custody, care, treatment, training, discipline, and employment of the prisoners. He is likewise responsible for administration of the Division of Adult Paroles which supervises adult male parolees.

The Adult Authority is responsible under California's indeterminate sentence law for determining the sentences of male prisoners and granting or revoking parole. Like responsibility for women prisoners is placed in the Board of Trustees, California Institution for Women.

The Correctional Industries Commission recommends industrial and agricultural enterprises to eliminate prison idleness by providing work and training. Such enterprises may be started only when authorized by the commission after a public hearing.

The Board of Corrections is composed of the Director of Corrections, members of the Adult Authority, members of the Youth Authority, members of the Board of Trustees, California Institution for Women, and 2 public members appointed by the Governor. It is responsible for the correlation of the State's correctional programs, the study of the entire subject of crime, inspection of jails and the provision of advisory services to cities and counties regarding jail and detention facilities.

In 1944, when the correctional agencies for adults were reorganized and the Department of Corrections created, there were 3 prisons for adult males and 1 prison for adult females; 6,000 inmates were overcrowded in facilities for 4,000. During 1958-59, the department will be faced with caring for an estimated average population of 17,425 inmates including 1,120 male Youth Authority wards over 18 and 718 women, with the balance adult males. This prison population will be confined in 7 institutional facilities for males, highway and forestry honor camps, and an institution for women. Capacity of these facilities and camps will be 16,475. Thus, at year end an excess of 1,350 inmates will be handled by overcrowding existing facilities.

Persons under parole supervision in 1944 numbered about 4,300. This included over 4,200 males and under 100 females. During 1958-59, an average of 7,326 males and 625 females will be under parole supervision.

The increase in the prison and parole population during the past 14 years is primarily a reflection of the increase in the civilian population of the State rather than an increase in the crime rate.

To date the department has accomplished the development of additional institutions and camps to comprise a diversified correctional system. This means facilities with a planned capacity to allow for varying degrees of custodial control of inmates, providing for special and general programs of training and treatment for different types of prisoner groups.

As maintaining persons under control in prison while treating them until evaluated safe for release is the goal for protection of the public, it is essential to know what the characteristics of these people are, how to control and treat them, and what facilities are required.

The prison population for 1958-59 will represent the most serious behavior problems among the State's felons, since only 25-30 percent of the persons convicted of felonies are committed to the department. The balance serve county jail terms or are granted probation. The prison population may be described in general in terms of the "average" inmate: A white male between 25-29 years old with a prior juvenile, jail or prison record, with about 10 years residence in California, with only a sixth grade education but normal intelligence, lacking in work skills, and having a serious personality difficulty. In addition to the "average" inmate, groups requiring specialized custody and treatment are included such as the aged, the psychotic, the sex deviate, the tuberculous, the physically defective, the chronic behavior problems, and condemned cases.

The program for handling 25,376 individuals daily either in prison or on parole during 1958-59 will include:

Diagnosis: Study of each prisoner upon receipt to recommend an individualized program for his control and treatment.

Classification: Designation of a degree of custodial control, educational assignment, medical care, psychological therapy, religious training, and avocational training for each inmate.

Care: All inmates must be fed and clothed. A basic food ration is maintained in all institutions under the general supervision of the departmental food administrator. Rations are modified to meet age, activeness and health needs of the inmates. Clothing is now being controlled also on a ration or formula basis in several institutions based on recorded usage and actual experience. Control of housekeeping supplies through a ration system is the subject of a current survey and will be initiated on much the same basis as the food and clothing control.

Treatment: Programs with staff to effect the treatment process. Treatment involves the integrated activities of a number of sub-sections. Together, and in co-operation with effective custodial control, the treatment programs make possible the operation of a productive correctional process during the time the man is confined and prepared for release. The major activities are as follows:

Academic and Vocational Education: 10,000 inmates are in educational programs during the year. Academic education is provided through high school courses and vocational training is available in approximately 30 trades; classes are conducted by certificated teachers and vocational instructors. Educational services include library programs used extensively by inmates.

Medical Care: Hospital facilities exist at all institutions. Any medical or surgical problems can be handled within the department. Complicated surgical procedures are generally performed at San Quentin due to the availability of specialists.

Psychiatric Treatment: Specialized psychiatric service is provided principally at California Medical Facility, secondly, at San Quentin. Psychiatric positions are also authorized at the 6 other institutions and the Parole Outpatient Clinic. Psychiatric treatment includes ward management of psychotics and other highly disturbed persons. Extensive programs for individual and group psychotherapy for more than 2,000 inmates are also provided under psychiatric direction.

Counseling Services: Professional staff of correctional counselors at each institution deal with social and personal problems of inmates and families and prepare progress reports for the Adult Authority. 3 specialized units of correctional counselors are engaged in pilot programs of intensive counseling with small caseloads. More than 8,000 inmates currently participate in weekly group counseling sessions conducted by custodial, educational and maintenance staff employees who receive inservice training in counseling.

DEPARTMENT OF CORRECTIONS—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

Religion: The religious program includes full-time Catholic and Protestant chaplains at each institution together with part-time services for the other faiths. In addition to conventional religious activities, chaplains participate in case counseling and in total classification and treatment activities of the institution.

Recreation: Programs of physical and interest-type recreational activities are maintained at each facility under the leadership of persons trained in recreation. Balance is maintained between spectator and participation programs. Such programs boost morale, encourage constructive use of off-duty time, and teach sportsmanship and teamwork.

Employment: The constructive employment of as many inmates as possible is one of the keys to the total treatment program. Prisoners work in factories, maintenance and culinary sections, offices, farms, and camps, providing diversified work experience. Constructive use of inmate assignments has economic benefit to the institution and carry over value for work placement after release. Idleness, on the other hand, results in low morale, mental and physical degeneration.

Release Procedures: Each of more than 4,000 inmates to be released during 1958-59 will participate in preparole instruction classes to prepare for adjustment after prison. In addition, each release will be interviewed regarding release plans and a report prepared to assist with employment and living placements.

Parole Procedure: Of the total number released from the institution, about 80 percent will be released under parole supervision. The institutional treatment process, which is directed toward successful adjustment on release, is continued in the parole program. In addition, the jurisdiction of the Director of the Department of Corrections is maintained while the parolee is serving the remainder of his term as a productive member of society.

Additional Facilities: The North Facility "Satellite" at Soledad, 1,200 capacity, is scheduled for completion by July, 1958. During the 1958-59 Fiscal Year, 600 Youth Authority male wards over 18, and 600 young adults will be placed in this new facility. A major part of the department's new positions for this fiscal year will be to staff this new unit.

Additional state forestry camps scheduled for activation during 1958-59 include:

Chiuo: 2 camps—160 inmates

Folsom: 2 camps—90 inmates

Sau Queutin: 2 camps—160 inmates

With these additional 410 inmates in camps, the department will have an average population of 1,225 in year-round camps, plus about 200 in summer United States Forest Service camps.

The 1958-59 Capital Outlay program includes major construction projects to reduce overcrowding and idleness and to allow for programs of treatment. The facilities proposed include: auxiliary structures for completion of the new medium security institution, 1,200 capacity, Men's Colony; additional farm unit, 72 capacity, Folsom; additional 150 capacity, Southern Reception-Guidance Center, 100 capacity hospital, additional laundry and sewage capacity, dairy facilities, California Institution for Men; administration building annex, California Institution for Women; industries building, cell building water closets, warehouse, vocational shops, California State Prison at Soledad.

MAJOR PROGRAM AUGMENTATION AND COSTS

The following summary by program accounts for the greater part of the proposed increase of \$2,591,845 (8.8%) over the 1957-58 expenditures. These increases provide for the necessary adjustments to meet population changes at the presently recognized standards of staffing and supply. In addition, a relatively minor improvement is proposed for the group counseling program.

Additional personnel for staffing new facilities:

a. North Facility, State Prison at Soledad (179.2)	\$663,207
b. Reactivated barracks, Institution for Men, Chino (9.8)	43,160
c. New State Forestry Camps (16)	50,850

\$757,217

Additional personnel for increased intake of inmates (7.2)

33,257

Additional personnel for population growth (22)

86,400

Additional personnel for expansion of group counseling program (9)

54,540

Additional personnel for change in custodial classification of inmate psychiatric patients and to provide adequate custodial coverage (21)

93,616

Additional personnel for increased number of parolees (22)

58,286

Additional personnel for increased workload in Departmental Administration (6)

23,340

Additional positions including psychologist, medical technical assistants, bookkeeping machine operator, senior typist-clerk, women's correctional supervisor (laundry) and stationary engineer (7.2)

33,546

Net increased cost in authorized positions due to full year costs of positions authorized during the current year, improved employment conditions, and salary changes

498,774

Increase in Operating Expenses and Equipment:

a. Increases primarily in feeding, clothing, education and utilities for price and population changes, and new facilities	\$802,843
b. Moving expenses of employees, initial inventory of supplies and initial complement of clothing for inmates, North Facility, State Prison at Soledad	103,700
c. Decrease in equipment	—19,722
d. Increase in reimbursements	—160,240

\$726,581

Increase in inmate pay-work projects for population growth and increased camp operations

53,237

Increase in costs of returning fugitives from justice from outside the State, transportation of prisoners in State, court costs, and county charges

14,700

Increase in contributions to State Employee's Retirement Fund

158,351

DEPARTMENT OF CORRECTIONS—Continued

STATE PRISONS AND OTHER CORRECTIONAL FACILITIES

NEW POSITIONS

The following 271.4 new positions totaling \$1,058,576 for the prisons and other correctional facilities represent standard classes used in all facilities and are, therefore, discussed by program or function.

Correctional Officer Personnel

Institution and Reception-Guidance Center Staffing:

2 Correctional sergeants	\$9,960
33 Correctional officers	145,313

\$155,273

20 positions are included for the Medical Facility. Of these, 1 sergeant and 11 officers are proposed for adequate wing and segregation yard coverage due to change in custodial and treatment classification of inmate patients. 1 officer position is included for adequate corridor and laundry coverage and 0.5 position is provided to handle additional mail and parole transportation on weekends resulting from the addition of the Reception-Guidance Center. 1 sergeant position and 5.5 officer positions are included for the required relief.

13 positions are provided at Chino. 6.4 posts are required to reactivate barracks and to reactivate 1 work crew for population growth. 2 posts are provided in the Reception-Guidance Center for corridor coverage necessitated by increased population. 4.6 positions are included for the required relief.

1 position is included at Folsom to increase No. 8 tower to a 10-hour post, including necessary relief. This has been found to be necessary for proper custody due to the time schedule of activities in the immediate area.

1 position is provided for the mail room at San Quentin for increased workload due to population growth in excess of that previously budgeted.

Camp Staffing:

2.5 Correctional lieutenants	\$9,620
12.5 Correctional officers	36,250

\$45,870

\$201,143

15 positions are provided for the usual staffing at new forestry camps. 9 positions are provided at Folsom including 6 for the year-round camp at Plum Creek, Tehama County, and 3 for the 6-months camp at Folsom Lake, Placer County. 6 positions are included at San Quentin for the year-round camp at Chamberlain Creek, Mendocino County.

Group Counseling Program Co-ordinators

9 Correctional classification officer III	\$54,540
---	----------

1 position each for Folsom, Deuel, Men's Colony, Chino, Tehachapi, Soledad (North Facility), Corona and 2 positions for San Quentin are provided for this expanding program. Results to date indicate that the value of an increased program outweighs the relatively minor increased cost involved. The program has been staffed almost entirely by volunteer employees who for the most part have limited background for counseling. The program is the largest in the department and it is estimated that 9,200 inmates will participate in 1958-59. The volunteer employees require professional supervision and guidance in order that the best results may be achieved.

The group counseling program provides an excellent means of encouraging self-examination and improvement by the inmates meeting in a group of their peers exploring their own personality and emotional problems. This is regarded as a major advance in achieving the objective of inmate rehabilitation. Additional benefits derived include reduced inmate tensions, thus reducing possibilities of expensive riots, disturbances, escapes, work stoppages and property damage. Studies at Folsom and Soledad indicate that group counseling has also reduced disciplinary actions.

Reception-Guidance Center Personnel

1 Correctional classification officer II	\$5,496
1 Clinical psychologist II	6,672
1 Intermediate stenographer-clerk	3,540
1 Intermediate typist-clerk	3,456

\$19,164

2 positions each are provided for Chino and Deuel to handle the estimated increased intake of prisoners based on established standards.

Classification and Parole Personnel

4 Correctional classification officer I	\$20,928
16 Intermediate typist-clerk	55,296

\$76,224

1 position is provided at Medical Facility, 2 at Men's Colony, 2 at Chino, 1 at Tehachapi, 7 at Folsom, 4 at San Quentin, and 1 at Soledad based on established standards to handle the increases in population and inmate movement. 2 positions are provided at Corona to partially bring the Institution for Women to the standards established for the institutions housing men and to correct present inadequacies in this program.

Adjustment Center Personnel

1 Clinical psychologist II	\$6,672
----------------------------	---------

1 position is provided for Soledad to work with the more seriously disturbed inmates which have been transferred from San Quentin due to demolition of the isolation and segregation unit. Individual and group psychotherapy will be carried out to allow these inmates to gain better insight into their problems, to relieve their strong, usually hostile feelings toward authority and thereby grow in self-control. Although this may be considered a part of the usual staffing, such a position was not included at San Quentin as there were no facilities for professional counseling or therapy in the antiquated cell block which is being demolished.

Administrative Office and Business Services Personnel

1 Bookkeeping machine operator I	\$3,456
0.1 Temporary help	300

\$3,756

1 position is provided at the Medical Facility to handle increased workload in connection with the inmate trust accounts. These have increased significantly due to the increased inmate population and movement with the addition of the Reception-Guidance Center. The temporary help position is proposed at Deuel to reduce the clerical overtime required in the superintendent's office.

DEPARTMENT OF CORRECTIONS—Continued

STATE PRISONS AND OTHER CORRECTIONAL FACILITIES—Continued

NEW POSITIONS—Continued

Laundry Personnel

- 1 Women's correctional supervisor I----- \$4,404
 1 position is provided at the Institution for Women to partially correct present deficiencies in handling the laundry for both this institution and School for the Deaf, Riverside, and partially for increased workload due to population increases at both facilities. This will be the second position for the laundry. This is regarded as minimum staff for proper custody, laundry operation, and instruction of the inmate workers.

Maintenance Personnel

- 1 Stationary engineer----- \$5,232
 1 position is proposed for Soledad for the preventive maintenance of expensive and complicated equipment in the kitchen, commissary and laundry. Preventive maintenance of these installations has been nonexistent for a period of 6 years resulting in undue wear and many costly breakdowns.

Medical Care Personnel

- 2 Medical technical assistant----- \$8,808
 1 Senior typist-clerk----- 4,092
 \$12,900
 1 technician is provided at the Medical Facility to handle increased workload in the outpatient clinic. 1 is provided at Soledad to correct a deficiency in the number of relief positions for the nurses and medical technicians in the present authorized post assignment, plus full relief for the supervising nurse.
 1 clerical position is provided for the hospital at Folsom to provide clerical assistance for the physicians and the psychiatrist. Also this will correct the situation of inmates handling confidential medical records for personnel and both medical and psychiatric records of inmates.

Education and Religion Personnel

- 1 Instructor in typewriter repair----- \$5,772
 0.1 Overtime—motion picture projection----- 582
 \$6,354
 1 instructor position is proposed at San Quentin to partially aid in reducing the inmate idleness resulting from forced overcrowding due to population growth. Also, this will provide vocational training in a field with apparently good employment opportunities. Overtime amounting to 0.1 position is proposed at Corona to handle the 200 hours required annually for motion picture projection. This will correct the situation of requiring maintenance personnel to perform this function and then take compensating time off from the maintenance program.

Camp Supervision Personnel

- 1 Supervising cook II----- \$4,980
 This position is proposed for Folsom to handle increased workload related to the camp feeding program in the additional camps. This position provides the necessary assistance to camp lieutenants in the supervision of the feeding programs in the camps. There are no civil service cooks budgeted for these camps. All cooking and serving is handled by inmate cooks. This position will assist in ration control, making arrangements with local vendors, training inmate cooks, menu planning, maintaining sanitary standards, maintaining kitchen and dining room equipment and facilities in good repair, ordering food and supplies, and budgeting.
 It will handle the workload for all the camps administered by Folsom including 4 year-round and 2 six months State Forestry Camps and 3 seasonal Federal Camps. This will also permit the presently authorized position at San Quentin to be relieved of the workload of the Folsom camps in order to handle the increased workload due to additional camps at San Quentin including one additional year-round State Forestry Camp and one seasonal Federal Camp.

North Facility, State Prison at Soledad

- 179.2 Positions----- \$669,267
 179.2 positions are proposed in the areas of custodial and personal care, classification and parole, medical care, education and religion, food preparation, clothing distribution and laundry operation, plant maintenance, business services, and prison administration. Positions are budgeted on the basis of approved staffing formulas, comparability to staffing authorized for similar functions at other prisons, and if not based on either of these, minimum requirements due to considerations of physical plant, type of inmates, and organizational relationship to the central facility. The top administrative structure for independent units of this size usually includes one superintendent, one associate warden-custody, and one associate warden-care and treatment. This facility is not independent to the same extent since it is under the direction of the superintendent of the central facility and receives many services from the central unit including inmate hospitalization, isolation, and segregation, and business services, including feeding and utilities. In this case only one associate warden position is proposed at this time during the period of population build-up. This position, together with the proposed deputy superintendent, will share the duties normally assigned associate wardens custody and care and treatment in a typical independent unit under a separate superintendent. As the population and workload increases and actual operating experience is gained, it may become necessary to add the second associate warden. If so, this will be by administrative action subject to subsequent legislative review.
 The effective dates of the new positions are based on the scheduled completion of the north facility in July, 1958, the receiving of inmates in October, 1958, and the estimated population buildup to capacity in June, 1959. Generally, the positions have been phased to permit 1 month for recruitment, orientation, and training prior to the arrival of the inmates.

OPERATING EXPENSES

Standardized Inmate Clothing Ration-----

- \$3,045
 It is proposed to extend the standardized inmate clothing ration to Medical Facility, Men's Colony, and the Tehachapi brand, Institution for Men, Chino. The remaining institutions not yet included are the Institution for Men, Chino, and the State Prison at Folsom. The management benefits to be derived from extending the ration to the 3 facilities this year outweighs the relatively minor cost involved. In the basic ration a modest increase in the safety factor from 10 percent to 15 percent for parole and discharge clothing is included to meet the requirements based on experience.

GENERAL ANALYSIS

The director is responsible for the establishment and co-ordination of policies and programs to achieve the objectives of the department. These objectives are primarily the confinement and rehabilitation of persons committed to it by the courts. The Board of Corrections and Adult Authority act in an advisory and co-ordinating capacity in policy formulation. The Departmental Administration is organized primarily to provide the required staff assistance to carry out the established policies and programs. This is accomplished through the activities of the executive and 3 major staff groups. These are the Classification and Treatment Division headed by a chief, Business Services headed by the deputy director-comptroller, and Special Services with the deputy director as ex officio chief. These groups are under the supervision of the deputy director of the department. In addition, chief of research and a special assistant to the director report to the Director of Corrections.

The Classification and Treatment Division includes staff responsibility for medical services, education, inmate classification, group counseling, records, and the chaplaincy programs. Each of these is a major treatment activity at the institutional level. During the past year major progress has been made in laying the foundation for more objective evaluation of the treatment programs of the department. Much of this will be accomplished through the Intensive Treatment Program and allied activities. Similarly, the Group Counseling Program has been developed and expanded as far as possible with time and staff available.

In Special Services there is a correctional facilities planning specialist, administrative analyst, personnel officer, training officer, information officer, and field representative performing the functions in their specialized fields. The correctional facilities planning specialist has only recently been added. The activities of this position will result in improved prison planning. Recent accomplishments of this group include the establishment of an organizational plan for the North Facility at Soledad, development of continuous testing for correctional officers, and implementation of the department's information program.

The Business Services staff is responsible for departmental construction and maintenance supervision, the feeding program, budget preparation and control, accounting, and equipment inspection and control. Steps are being taken to improve and standardize institutional maintenance activities and to develop improved budgetary and accounting practices.

The chief of research, a new position in 1957-58, heads a program aimed at program evaluation and research in corrections treatment. The special assistant to the director is responsible for fostering the development of trade advisory committees composed of representatives of labor and management.

5 new positions are included in the 1958-59 Fiscal Year: 1 professional position is proposed for increased workload due to urgent needed management studies; 1 clerical position is included for the increased workload in the Personnel Office; and 3 positions are included in the Records Office for increased workload due to population growth and inmate movement. These positions are discussed in the General Analysis, Departmental Summary.

1	DIVISION OF ADULT PAROLES [†]						
2							
3							
4	GENERAL ANALYSIS						
5	Objectives						
6							
7	The Division of Adult Paroles supervises all adult males released from state prisons to parole programs in California; and, in						
8	addition, supervises, on a co-operative basis, adult male felons released from other states to parole programs in California. The						
9	supervision of such persons is to provide for the continuation of the correctional treatment program as begun in the institutions						
10	and to protect society. The division also administers the program planning for California releasees who are going to parole						
11	programs in other states. Pursuant to the provisions of Chapter 2019, Statutes of 1957, the Division of Adult Paroles was						
12	transferred from the Adult Authority to the Department of Corrections effective September 11, 1957. In the interests of clarity						
13	and comparability, expenditures for the full 1957-58 year are reported in the Adult Authority budget rather than dividing the						
14	fiscal year as of September 11, 1957.						
15							
16	Program and Performance						
17							
18	The Division of Adult Paroles includes a headquarters office and 16 field offices. These field facilities are staffed by parole officers						
19	with an actual caseload of 71 parolees per officer. For administrative reasons, the State is divided into 2 parole regions, the						
20	Tehachapi Mountains being the approximate dividing line between the southern and northern regions.						
21	The division maintains a psychiatric outpatient clinic in Los Angeles to provide therapy to those parolees whose previous prison						
22	treatment history and program indicate a need for continuing such treatment on an outpatient basis.						
23	At the present time each of the districts, with the exception of Santa Rosa and Santa Barbara, is staffed with officers working						
24	under the Special Intensive Parole Unit. This function is the continuation of the research program designed to test the value						
25	and results of giving closer and more intensive supervision to parolees. The final phase of this project, beginning in July,						
26	1958, will emphasize determination of an optimum average parole caseload size for budget purposes. It is anticipated that each						
27	district will be staffed with such officers in the 1958-59 Fiscal Year. In order to provide this complete statewide coverage by						
28	S. I. P. U. officers, 2 additional positions are proposed in this budget. These positions will supervise 70 parolees; thus, 1 ad-						
29	dditional position would be required under the regular parole staffing formula if these parolees were not to be included in this						
30	research project.						
31	Parole officers are budgeted on the basis of an overall ratio of 55 parolees per officer. All parole officer positions except the Chief,						
32	Division of Adult Paroles, the deputy chief, and the interstate unit are included in this ratio. Since administrative and super-						
33	visory positions and several specialists not carrying actual caseloads are included in this overall ratio, the actual average						
34	caseload supervised by the parole officer I in the field is approximately 71 parolees. The parole officers assigned to the Special						
35	Intensive Parole Unit are budgeted for an actual caseload of 35 parolees per field officer.						
36	It is estimated that an average of 7,356 adult male parolees will be supervised in California in the 1958-59 Fiscal Year. The number						
37	supervised at the end of the fiscal year is estimated to total 7,740, an increase of 765 parolees over the 1957-58 Fiscal Year.						
38	This indicates a substantial increase in caseload when compared to the 1956-57 and 1957-58 year end populations of 6,932 and						
39	6,975, respectively. A total of 18 positions are proposed to appropriately staff for this increased caseload on the basis of the						
40	overall ratio of 55 parolees per officer.						
41

50							
51	SPECIAL STUDY COMMISSION ON JUVENILE JUSTICE						
52							
53	Objectives						
54							
55	The study, evaluation and the making of constructive recommendations concerning all matters related to juvenile justice and the						
56	protection of minors is the objective of the Special Study Commission on Juvenile Justice.						
57							
58	Program and Performance						
59							
60	The commission was created by an executive order of the Governor September 23, 1957, which pointed out, among other factors, that						
61	there has been no comprehensive revision of the juvenile court laws since 1913, while the demands for services and facilities con-						
62	cerned with minor children have been intensified at every level of government by California's phenomenal population growth.						
63	The commission consists of 5 outstanding citizens appointed by the Governor. This group gives policy direction to a full-time profes-						
64	sional staff named by the Chairman of the Board of Corrections.						
65	The commission will determine the priority to be given to the many facets of the problem. It will make such recommendations as are						
66	indicated by staff studies, expert advice and testimony at public hearings.						
67	Partial or interim reports may be issued by the commission. A final report with recommendations to the Board of Corrections is						
68	scheduled for submission to the Board of Corrections by June 30, 1959.						
69	1 clerical position is included in the 1958-59 Fiscal Year for increased workload. This position is discussed in the general analysis,						
70	departmental summary.						
71							
72	g Totals included for comparative purposes. Expenditures for the Division of Adult Paroles are reported in the Adult Authority Budget						
73	for the 1956-57 and 1957-58 Fiscal Years.

32							
33	SPECIAL STUDY COMMISSION ON CORRECTIONAL						
34	SERVICES AND FACILITIES						
35							
36	Objectives						
37							
38	The Special Study Commission on Correctional Facilities and Services was established by the Governor's Executive Order of July 9,						
39	1955, to study, evaluate and make recommendations concerning correctional programs within the State. By extension of the						
40	executive order and budget provisions, the work of the commission continued into the 1957-58 Fiscal Year. The commission itself						
41	was terminated June 30, 1957. The staff continued for an additional 3 months on the final preparation of reports.						
42							
43	Program and Performance						
44							
45	The major results and activities of the commission have been legislation, administrative recommendations, publications, and public						
46	hearings.						
47	1. Legislation						
48	22 bills were presented to the 1957 Legislature, of which 18 passed. These included some major changes in correctional organ-						
49	ization on both state and county levels. In addition, this legislation introduced new correctional activity consistent with						
50	findings of the commission.						
51	2. Administrative Recommendations						
52	Analysis of activities of the Adult Authority, Youth Authority, and Board of Trustees, C. I. W., resulted in recommenda-						
53	tions concerning board hearing procedures, some of which were adopted to increase efficiency in paroling and term setting.						
54	Study of county jails and probation culminated in recommendations for local operations, a number of which have been placed						
55	into effect by counties.						
56	3. Publications						
57	Publications of the commission include First and Second Interim Reports to the Legislature, Special Report on Probation,						
58	and Final Report including description of the Department of Corrections. An additional report prepared was a compilation						
59	of laws relating to county jail operation.						
60	4. Public Hearings and Advisory Committees						
61	5 major public hearings held in different parts of the State involved correctional and law enforcement personnel, local and						
62	state officials. Advisory committee structure included participation from judiciary, state bar, probation and parole, law						
63	enforcement, medical and health personnel, and representatives from the League of California Cities and California Super-						
64	visors Association. In addition to receiving valuable advice and assistance, the use of advisory committees resulted in stimu-						
65	lation of interest by these representatives in improving quality of correctional services. Work of the commission is having a						
66	continuing impact on local interest in the field.

GENERAL ANALYSIS

Objectives

The Medical Facility is the psychiatric diagnostic and treatment center of the department. It confines and treats adult male felons who are mentally ill or who have severe mental and emotional disorders. These include psychotics, psychopaths, sex offenders, and narcotics addicts. A small number of recalcitrant tuberculars are housed here also.

A reception-guidance center in facilities adjoining the main institution receives adult male felons from the 47 northern counties for diagnosis, classification, and recommending institutional placement. It also receives male parole violators returned to prison.

Program and Performance

Established in 1950 in temporary rented quarters at the United States Prison Facility, Terminal Island, the Medical Facility was moved in 1955 to new permanent facilities located in Solano County on a 900-acre site near Vacaville.

Construction of reception-guidance center facilities was completed in the spring of 1957 and began receiving prisoners in July, 1957. This facility will process 3,020 cases during 1958-59.

Group psychotherapy is the major treatment method at the Medical Facility. Programs of academic and vocational education, plant maintenance work and training, medical and dental care, library, recreation, and religion are offered to all inmates to the degree to which they can participate.

The prison population in 1958-59 may be described in general as follows: Median age, 33 years; 47 percent prior prison commitments, 20 percent prior escape records; offense groupings will include 24 percent sex offenders, 16 percent burglary, 13 percent robbery, 13 percent forgery in checks, 8 percent narcotics.

This prison population may also be described in terms of medical classification by men. These are in general: tuberculars 50, psychotics 320, homosexuals 120, severe emotional and mental disorders, 875.

Population and release of men from this institution are as follows:

	1956-57	1957-58	1958-59
Medical Facility:			
Average population-----	1,350	1,410	1,415
Paroled and discharged-----	292	295	320
Reception-Guidance Center:			
Average population-----	—	425	425
Intake for processing-----	2,907 b	2,850	3,020

A total of 23 proposed new positions is included in the 1958-59 Fiscal Year. 1 clerical position is provided for increased accounting workload; 1 sergeant and 3 correctional officers are included for isolation-segregation unit (Wing W) to meet minimum custodial requirements; 2 correctional officers are included for the homosexual unit (Wing K) for the required custodial management; 2 correctional officers each are provided for Wings P and Q to handle the increased number of psychotic inmates; 2 correctional officers are included for the segregated wing yards to meet custodial requirements for handling psychotic and effeminate homosexuals; 1.5 correctional officer positions are included to provide minimum custody for the corridor and laundry operations and weekend relief for the required Sally Port coverage; 1 sergeant and 5.5 correctional officers are included for the required relief; 1 medical technician is proposed for the outpatient clinic; and 1 clerical position is for increased classification and parole workload. These positions are discussed in the General Analysis, Departmental Summary.

13					
14					
15	GENERAL ANALYSIS				
16					
17	Objectives				
18					
19	The Men's Colony protects the public by confining aged, infirm, and other handicapped male felons and by so treating and training				
20	them that they can be safely released, many of them to become self-sustaining members of their community.				
21					
22	Program and Performance				
23					
24	The Men's Colony (California Medium Security Prison) was authorized by the Legislature in 1949. It was established in 1954 in				
25	temporary facilities on a 220-acre site in the hospital area of Camp San Luis Obispo. The post office address is Los Padres.				
26	The institution will house an average of 1,250 men in 1958-59.				
27	The correctional program is designed primarily for the retraining, rehabilitation, and replacement in civilian life of the elderly and				
28	infirm offender. The institution's 1958-59 population may be described in general by the following characteristics: median age				
29	about 55 years, 63 percent with prior prison commitments, 6 percent serving life sentences; offense groupings will include about				
30	25 percent sex offenses, 21 percent forgery and checks, and more than 11 percent homicide. Some will be blind, paralyzed, senile,				
31	or lacking limbs.				
32	Permanent medium security facilities of 2,400 capacity have been designed for erection on an adjoining site. These are the first				
33	designed to combine the economy of large institutions with the efficiency of small ones by creating a central unit to serve				
34	surrounding housing and treatment units constructed as needed. The first units will house 1,200 men and are scheduled for				
35	completion in January, 1961. The remaining units for the additional 1,200 inmates will be completed in July, 1961.				
36	Population and release of inmates from the Men's Colony are as follows:				
37		1956-57	1957-58	1958-59	
38	Average population-----	1,087	1,170	1,250	
39	Parole and discharges-----	348	350	400	
40					
41	3 new positions are proposed for 1958-59. 1 professional position is included for the expanded group counseling program; 1 profes-				
42	sional position and 1 clerical position are included for the increased workload in the classification and parole program. These				
43	positions are discussed in the General Analysis, Departmental Summary.

30					
31	GENERAL ANALYSIS				
32	Objectives				
33					
34	The Institution for Men has as its objective the protection of the public by confining for training and treatment the more tractable				
35	young male offenders—the majority under minimum custody.				
36	Institution for Men is composed of the main institution at Chino, a Reception-Guidance Center, a branch institution at Tehachapi,				
37	and an extensive honor camp system.				
38					
39	Program and Performance				
40					
41	This institution was established in 1941 on a 2,500-acre tract south of Chino in San Bernardino County. Both temporary and per-				
42	manent facilities of the main institution will operate at a capacity load of 1,480 inmates during the 1958-59 Fiscal Year.				
43	The Reception-Guidance Center at Chino, established in 1951, with a design capacity of 400, receives all male new commitments from				
44	the southern counties. It will operate at 450 capacity, or a forced overcrowding of 50, during 1958-59, processing approximately				
45	2,780 cases.				
46	The Tehachapi branch was opened in 1955 after the earthquake-damaged facilities formerly used for the Institution for Women were				
47	repaired. It is designed for 300 men, but by double bunking it will house an average of 500 men in 1958-59.				
48	Correctional treatment at the main institution is designed primarily for carefully screened young male offenders capable of profiting				
49	by the program and accepting its responsibilities. It covers a broad field of vocational and academic instruction, plus a wide				
50	variety of industrial activities, including an extensive agricultural program. A large number of medium security men, however,				
51	are held at the Tehachapi branch, a minimum custody facility by design. That this has been successfully accomplished is attrib-				
52	uted in large part to the group counseling program which is particularly emphasized at the Tehachapi branch.				
53	The main institution population, excluding camps, in 1958-59 may be described in general by the following characteristics: Median				
54	age 29 years; 27 percent prior commitment records; offense groupings will include about 24 percent forgery and checks, 22 per-				
55	cent burglary, 21 percent robbery, and approximately 13 percent narcotics.				
56	The Tehachapi branch population in 1958-59 may be described in general by the following characteristics: Median age 32 years;				
57	offense groupings will include about 23 percent burglary, 22 percent forgery and checks, 17 percent robbery, and 15 percent				
58	narcotics.				
59	The institution at present also administers 5 year-round honor camps, 4 with the State Division of Forestry, and 1 with the State				
60	Division of Highways. 2 additional 80-man camps will be activated in 1958, bringing the year-round camp population total to 510.				
61	Population and release of men from this institution are as follows:				
62					
63	Average Population:	1956-57	1957-58	1958-59	
64	Institution, including camps -----	1,673	1,700	1,930	
65	Tehachapi -----	470	500	500	
66	Reception-Guidance Center -----	429	450	450	
67					
68	Totals -----	2,572	2,650	2,880	
69	Paroles and Discharges:				
70	Institution -----	811	1,110	1,365	
71	Tehachapi -----	235	240	250	
72					
73	Totals -----	1,046	1,350	1,615	
74	Reception-Guidance Center:				
75	Intake for processing -----	2,661	2,700	2,780	
76					
77	A total of 20 additional positions are proposed for the 1958-59 Fiscal Year. 11 correctional officer positions are provided for reactiv-				
78	ated facilities to house increased population and 2 are included for corridor coverage in the Reception-Guidance Center; 2				
79	professional positions including 1 at the Tehachapi branch are related to the expanding group counseling program; 3 clerical				
80	positions including 1 for the Tehachapi branch are provided for the Classification and Parole program; and 1 professional posi-				
81	tion as well as 1 clerical position is included for the Reception-Guidance Center processing function. These positions are discussed				
82	in the general analysis, departmental summary.				
83					
84	^a Excludes cost of operating reception-guidance center, but includes cost of feeding, housing, medical, and other expenses of the inmates				
	being processed therein.

20							
21	GENERAL ANALYSIS						
22							
23	Objectives						
24							
25	The State Prison at Folsom protects the public by confining those chronic criminals requiring maximum custody and by so treating						
26	them as to permit their safe release to the community. A camp program is operated separately from the main prison to provide						
27	useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.						
28							
29	Program and Performance						
30							
31	This institution was established in 1880 on a 1,700-acre site in Sacramento County. Designed to house 1,900 men, the institution is						
32	expected to confine an average of 2,400 in 1958-59.						
33	Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training						
34	plant maintenance work and training, group counseling, medical and dental care, religious, library, and recreational activities						
35	Because of the forced overcrowding of the institution some idleness will exist during 1958-59.						
36	A special unit, the 138-capacity adjustment center, provides control and treatment of the department's most severe behavior problem						
37	cases.						
38	The institutional population in 1958-59 may be described in general by the following characteristics: median age 38; 90 percent prior						
39	prison commitments; 30 percent prior escape records; 9 percent serving life sentences; offense groupings will include over 7 per						
40	cent homicide, over 24 percent robbery, over 21 percent burglary, and over 10 percent narcotics.						
41	In addition, the prison is responsible for the administration of 3 year-round and 1 6-month State Forestry Camps. 2 additional						
42	80-man camps, including 1 year-round and 1 6-month camp, will be activated during 1958, which will bring the 1958-59 average						
43	camp population to 309. 4 permanent year-round and 2 6-month camps will be in operation by December 1958. A 56-man seasonal						
44	United States Forest Service Camp will be operated in the summer of 1958. These camps, manned by specially selected minimum						
45	custody inmates, serve the public by conservation of the State's natural resources through fire fighting and reforestation work						
46	This provides a valuable work and training experience for the inmates.						
47	Population and release of men from this institution and its camps are as follows:						
48							
49		1956-57	1957-58	1958-59			
50	Average population, including camps-----	2,366	2,530	2,709			
51	Paroles and discharges-----	681	715	870			
52							
53	A total of 20 new positions are included in the 1958-59 Fiscal Year. 1 correctional officer is provided for increased guard tower coverage						
54	and relief; 1 professional position is related to the expanded group counseling program; 1 clerical position is for the medical and						
55	psychiatric department; and 2 professional positions and 5 clerical positions, are for the classification and parole program. 1						
56	camp operations, 1 culinary position is provided in the camp supervision function and 9 correctional officers are included for the						
57	1 full year and the 1 6-month camp operated in conjunction with the State Division of Forestry. All these positions are dis						
58	cussed in the general analysis, departmental summary.

GENERAL ANALYSIS

Objectives

The State Prison at San Quentin protects the public by confining adult male felons under close-medium security and by so treating them as to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

San Quentin was established in 1852 on a 400-acre site in Marin County. Designed to house 2,700 men, the institution is expected to confine an average of 3,915 in 1958-59. Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training, plant maintenance work and training, group counseling, medical and dental care, religious, library, and recreational activities. Because of the forced overcrowding of the institution some idleness will exist during 1958-59.

A special unit at San Quentin provides custody of inmates sentenced to death and provides for execution of the death penalty. The institutional population for 1958-59 may be described in general by the following characteristics: Median age 29.5; about 50 percent prior prison commitments, about 25 percent prior escape records, about 6 percent serving a life sentence; offense groupings will include over 9 percent homicide, about 24 percent robbery, about 17 percent burglary, and about 15 percent narcotics. In addition, San Quentin is responsible for the administration of 4 year-round road and forestry camps in the 1957-58 Fiscal Year. 2 new 80-man State Forestry Camps will be activated in the fall of 1958 bringing the year-end camp population to 425. A 31-man seasonal United States Forest Service Camp will be in operation during the summer of 1958. These camps, manned by specially selected minimum custody inmates, serve the public by aiding in the conservation of the State's natural resources through fire fighting and reforestation work. The highway road camp inmates perform highway maintenance and construction work in remote areas of Northern California. This provides valuable work and training experience for the inmates.

^a Composed of savings in salaries and wages, \$18,629; operating expenses, \$14,572; equipment, \$8,482; inmate pay-work projects, \$12,082; and loss in reimbursements, \$33,530.

^b Excludes cost of operating reception-guidance center, but includes cost of feeding, housing, medical, and other expenses of the inmates processed therein.

GENERAL ANALYSIS

Objectives

The State Prison at Soledad protects the public by confining male prisoners under medium custody, and by so treating them as to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

This institution was established in 1945 and activated in 1946 at its present 936-acre site in temporary military type barracks. These will remain in use in 1958-59. When materials became available, construction was started on the permanent facilities which were completed in 1951. The new North Facility with 1,200 capacity will be completed in July, 1958, and will start receiving inmates in October, 1958. It will house 600 Youth Authority wards and 600 Department of Corrections inmates in the the younger age group. By the end of the fiscal year the entire institution will be operating at capacity with 3,150 inmates.

Correctional treatment planned for inmate rehabilitation includes vocational and academic education programs, industrial work, plant maintenance training, and 1 of the largest agricultural enterprises in the department. Group counseling, religious programs, and recreational activities also play an important role.

A cell wing was converted into an adjustment center in the early part of the 1957-58 Fiscal Year to house inmates with severe behavior problems. Most of these were transferred from the San Quentin isolation and segregation unit which has been demolished to permit new construction.

Institution population in 1958-59 may be described in general by the following characteristics:

Adult Felons:

Median age 28 years; around 34 percent prior prison commitments; 20 percent prior escape records; offense groupings will include 23 percent robbery, about 21 percent narcotics, less than 20 percent burglary, and 12 percent forgery and checks.

a Composed of savings in salaries and wages, \$56,669; operating expenses, \$107,234; equipment, \$4,880; inmate pay-work projects, \$5,836; and loss in reimbursements, \$17,669.

b Excludes employees' moving expenses and cost of increased inventory in 1958-59 Fiscal Year.

2					
3					
4	Program and Performance—Continued				
5					
6	Youth Authority Wards:				
7	Median age over 20 years; 89 percent prior commitments; offense groupings will include 30 percent robbery, 23 percent burglary, around 10 percent auto theft, and over 10 percent narcotics.				
8	In addition, the institution is responsible for the administration of 3 year-round State Forestry honor camps with a total permanent camp population of 150. A 31-man seasonal honor camp will be operated in the summer of 1958 for the United States Forest Service. These camps, manned by specially selected minimum custody inmates, serve the public in the conservation of the State's natural resources through fire fighting and reforestation work. This provides valuable work and excellent training experience for the inmates.				
9	Population and release of inmates from this institution are as follows:				
10					
11					
12					
13					
14					
15					
16	Average Population:	1956-57	1957-58	1958-59

17					
18	GENERAL ANALYSIS				
19					
20	Objectives				
21					
22	The Deuel Vocational Institution provides custody, care, industrial, vocational, and other training, guidance, and reformatory help				
23	for young men too mature to be benefited by the programs of correctional schools for juveniles and too immature in crime for				
24	confinement in prisons.				
25					
26	Program and Performance				
27					
28					
29	This institution was created in 1945 as the California Vocational Institution. In 1951 the Legislature changed the name to the				
30	Deuel Vocational Institution. The institution originally operated at Lancaster in temporary military facilities and moved to the				
31	present permanent 780-acre location at Tracy in 1953. A reception-guidance center for Youth Authority wards is operated within				
32	the institution.				
33	Treatment is designed to rehabilitate young offenders committed both to the Youth Authority and the Department of Corrections.				
34	Academic and vocational instruction, industrial work, and training are emphasized. A research study is being conducted by the				
35	Pilot Intensive Counseling Organization (PICO) to determine scientifically the results of intensive counseling. A special pro-				
36	gram for young men with severe behavior problems is operated in the adjustment center.				
37	Institution population in 1958-59 may be described in general by the following characteristics:				
38					
39	Adult Felons				
40	22 percent under 21 years of age; median age 24 years; 6 percent serving life sentences; 35 percent prior prison commit-				
41	ments; offense groupings will include 25 percent robbery, 20 percent forgery and checks, 17 percent burglary, and				
42	over 10 percent narcotics.				
43					
44	Youth Authority Wards				
45	Median age approximately 19.5 years; 68 percent prior commitments; offense groupings will include over 25 percent bur-				
46	glary, approximately 22 percent robbery, 14 percent auto theft, and about 10 percent narcotics.				
47					
48	Population and release of inmates from Deuel Vocational Institution are as follows:				
49					
50	Average Population:	1956-57	1957-58	1958-59	
51	Adult felons -----	419	435	460	
52	Youth Authority -----	649	570	560	
53	Reception-Guidance Center (Youth Authority)-----	165	205	180	
54					
55	Totals -----	1,233	1,210	1,200	
56	Paroles and Discharges:				
57	Adult felons -----	164	160	180	
58	Youth Authority -----	745	760	725	
59					
60	Totals -----	909	920	905	
61	Reception-Guidance Center (Intake for processing)---	1,094	1,335	1,335	
62					

Proposed new positions total 3.1 for 1958-59. 1 professional position is included for the expanded group counseling program; 1 professional position and 1 clerical position are included for the reception-guidance center processing function. Temporary positions totaling 7.3 authorized for the Pilot Intensive Counseling Organization are continued until June 30, 1959, pending the completion of the study. All the proposed positions are discussed in the general analysis, departmental summary.

^a Excluding cost of operating reception-guidance center, but includes cost of feeding, housing and other expenses of the inmates being processed therein.

46	GENERAL ANALYSIS				
47	Objectives				
48					
49	The Institution for Women receives and confines all types of female prisoners committed to the Department of Corrections and so treats them as to permit their safe release to the community.				
50					
51	Program and Performance				
52					
53					
54	The Institution for Women was established in 1933 near Tehachapi, in Kern County, and in 1952 moved to its permanent 120-acre site in San Bernardino County northwest of Corona. The present institution is designed to house 650 inmates. The average population in 1958-59 is estimated to be 718.				
55					
56	Correctional treatment designed to rehabilitate the inmate includes courses of academic and vocational instruction, group psychotherapy and counseling, medical and dental care, religious, library, and recreational activities. There is also an active industrial program, mainly the manufacturing of garments, plus such sewing projects as designing, dressmaking, alterations, and tailoring.				
57					
58	Institution population in 1958-59 may be described in general by the following characteristics: median age 32 years; 25 percent prior prison commitments; 3 percent serving life sentences; offense groupings will include 33 percent forgery and checks, 25 percent narcotics, over 11 percent homicide, and over 10 percent thefts other than auto thefts.				
59					
60	Population and release of women from this institution are as follows:				
61					
62					
63					
64					
65		1956-57	1957-58	1958-59	
66	Average population-----	613	670	718	
67	Paroles and discharges-----	279	275	315	
68					
69	A total of 4.1 new positions are included in the 1958-59 Fiscal Year. 1 professional position is provided for the expanded group counseling program; 2 clerical positions are related to the Classification and Parole Program; and 1 women's correctional supervisor position is included for the laundry operation. These positions are discussed in the general analysis, departmental summary.				
70					
71	^b Composed of savings in salaries and wages, \$21,053; operating expenses, \$10,275; inmate pay-work projects, \$524; and excess reimbursements, \$1,944.				
72	^c Composed of savings in inmate pay-work projects.

GENERAL ANALYSIS

Objectives

The Adult Authority consists of 7 members, each of whom is appointed by the Governor, with the advice and consent of the Senate, for a term of 4 years.

The Adult Authority is the term-setting and parole-granting agency under the Indeterminate Sentence Law of California for the adult male felons serving terms in the state penal institutions. They are fundamentally concerned with the correctional treatment and rehabilitation of adult male felons.

They serve as members of the State Board of Corrections and as an advisory pardon board to the Governor on matters of executive clemency. In their regularly scheduled meetings with the Director of Corrections, the Adult Authority advises and recommends general and specific policies and procedures related to the diagnosis, classification and treatment of prisoners.

Program and Performance

The Adult Authority meets at each of the state prisons regularly and conducts hearings by dividing into three panels meeting simultaneously, to set terms, grant parole, to consider determination and forfeiture of credits, and restoration of civil rights to inmates.

The Adult Authority meets weekly to consider reports and recommendations from the Division of Adult Paroles and makes decisions as to revocation of parole and return to prison, restoration of civil rights, reinstatements, and refixing of terms.

The total number of cases reviewed by the Adult Authority for the Fiscal Year 1956-57 was 10,661, well over 11,000 cases during the 1957-58 Fiscal Year and approximately 12,000 cases in 1958-59.

18	DIVISION OF ADULT PAROLES ^d						
19							
20	GENERAL ANALYSIS						
21							
22	The Division of Adult Paroles supervises all adult males released from state prisons to parole programs in California; and, in addi-						
23	tion, supervises, on a co-operative basis, adult male felons released from other states to parole programs in California. The						
24	supervision of such persons is to provide for the continuation of the correctional treatment program as begun in the institutions						
25	and to protect society. The division also administers the program planning for California releasees who are going to parole pro-						
26	grams in other states. Pursuant to the provisions of Chapter 2019, Statutes of 1957, the Division of Adult Paroles was trans-						
27	ferred from the Adult Authority to the Department of Corrections effective September 11, 1957. In the interests of clarity and						
28	comparability, expenditures for the full 1957-58 year are reported in the Adult Authority budget rather than dividing the fiscal						
29	year as of September 11, 1957.

21	GENERAL ANALYSIS				
22	Objectives				
23	The Board of Trustees, California Institution for Women, is responsible under the Indeterminate Sentence Law for fixing the terms of adult female felons and the granting or revoking of parole to such women. The board is also responsible for administration of the Women's Parole Division which supervises all adult female felons released on parole from the Institution for Women and those women released from other co-operating states to parole programs in California. It also may advise the Director of Corrections on general policies for the maintenance and operation of the California Institution for Women and the care, custody, treatment, training, discipline, and employment of women confined at the institution. The objective of the board is the protection of society by the setting of appropriate terms, careful selection of those women to be released on parole and their proper supervision while on parole.

28					
29					
30					
31					
32	Program and Performance				
33	The Board of Trustees consists of five members appointed by the Governor, three of whom shall be women. They are appointed to 4-year terms. The board maintains its office in Los Angeles. Its parole bureau has offices in Los Angeles and San Francisco. The board meets regularly at the institution, reviewing each of the individual cases and studying the histories of the women prisoners. The ever-increasing workload of the board is reflected in the mounting population of the Institution for Women which has risen from an average of 613 in 1956-57 to 670 in 1957-58 and is estimated to be 718 in 1958-59.

DEPARTMENT OF THE YOUTH AUTHORITY

GENERAL ANALYSIS

Objectives

The objectives of the Youth Authority are first, the protection of society more effectively by substituting for retributive punishment, methods of training and treatment directed toward the correction and rehabilitation of young persons declared wards for delinquent causes or found guilty of public offenses; and second, prevention of the occurrence of delinquency. In addition, the Department encourages improvements in juvenile law enforcement and probation and increased use of county juvenile homes and camps.

Program and Performance

The present Department of the Youth Authority was originally conceived as the Youth Correction Authority by the Legislature in 1941. Amendments to the original law in 1943 created the present Department of the Youth Authority and gave it responsibility for the administration of the State's correctional schools and parole program for youths. The law also provided that commitments could be made to the Youth Authority by judges of the superior court sitting in juvenile court or in criminal court and judges of the municipal court after they had determined that the ward was under 21 years of age at the time of apprehension, and that there was no program at the county level to meet the special needs of the individual.

The Director of the Youth Authority is the chief administrative officer of the department and Chairman of the Youth Authority Board. He is directly responsible for the management of the state correctional schools, reception center-clinics, Youth Authority camps for boys, and for the operation of the field services and its branch offices. He is responsible for the custody, care, treatment, training, discipline, welfare, and supervision of wards committed to the Youth Authority, whether in the institutions or on parole in the community.

The Youth Authority Board is concerned with acceptance or rejection of wards committed to the Youth Authority, with parole, and discharge of wards, and with the director in formulation of policies concerning classification, transfer, training, and treatment of wards.

The years between 1941 and 1943 gave the Youth Authority time to develop a plan of organization and a pattern for diagnosis, training and treatment, and community organization. The 3 institutions transferred to the Youth Authority in 1943—Preston School of Industry, Fred C. Nelles School for Boys, and the Ventura School for Girls—have grown to 6 institutions, 2 reception center-clinics, and 3 Youth Authority camps for boys. A new institution for older boys is scheduled for completion and occupancy in 1959. This new institution, the California Youth Training School, will be located near Ontario. A new Ventura School for Girls is also planned to replace the present school which was constructed in 1917 as a temporary institution.

The Department of the Youth Authority centralized the parole services by shifting the operation from the 3 original institutions into a separate bureau responsible for continuing the treatment and supervision of the ward after his release from the correctional school and return to the community. Branch offices have been opened in the larger cities to better serve the communities of the State and to provide for more economical operations. Institution and parole operations are carefully co-ordinated in the maintenance of 1 continuous program of rehabilitation and training for each ward.

During 1958-59 the facilities of the Department of the Youth Authority will have an estimated average daily population of 2,870. These facilities include 2 reception center-clinics, 4 schools for boys, 2 schools for girls, and 3 Youth Authority camps for boys. In addition, an average of 1,120 wards will be in Department of Corrections facilities. Also, during 1958-59 the Youth Authority will supervise an estimated average parole caseload of 7,724 as compared with 6,545 during 1956-57.

The Bureau of Probation and Delinquency Prevention has a program to develop an awareness of the value of local delinquency prevention programs and the need for adequate community services and assists in improving them. Training programs are provided for probation officers, counties are assisted in developing plans for new camps and juvenile halls, the Interstate Compact for Juveniles is administered, and publications are directed towards improving the quality of local services.

The Department of the Youth Authority's institutional program for handling the wards committed to it by the various counties include:

Diagnosis: A diagnostic study and evaluation is made of each ward committed to the Youth Authority. This study and evaluation, made during the ward's stay in a reception center-clinic, is for the purpose of diagnosing the cause of the ward's delinquency, and recommendations are made for a program of individualized education and treatment to correct the ward's behavior pattern. This study and evaluation results in a recommendation of the degree of custodial supervision required, educational needs, medical and dental care, psychological or psychiatric therapy needed to treat the ward's mental and emotional needs, religious training, and other programs that will aid in the ward's return to society as a useful citizen.

Treatment: The program carried on in the institutions and on parole enables the Youth Authority to treat the causes of delinquent behavior and to guide the ward in the development of good moral standards.

Special Treatment Program: The 1957 Legislature gave the Youth Authority the responsibility for the custody and treatment of a group of wards who have severe emotional and behavioral problems who are in need of professional, psychiatric-type treatment. The department has not previously been equipped to handle the special needs of both a custodial training program and psychological and psychiatric therapy services. Staff was authorized for the Diagnosis and Treatment Division for the planning, control, and supervision of this program. The Preston School of Industry and the Los Guilucos School for Girls have been authorized staff to start the first treatment units in temporary quarters. Permanent treatment buildings designed to handle this special type of ward are scheduled for completion during the 1959-60 Fiscal Year.

Facilities being completed during the 1957-58 year include projects for additional population and to reduce overcrowding as follows: Northern California Reception Center and Clinic—a 20-bed segregation unit and a 50-boy dormitory are to be completed in January, 1958; Fricot Ranch School for Boys—2 additional classrooms and a 20-boy segregation-administrative building were completed in September, 1957; Fred C. Nelles School for Boys—a 30-boy admissions unit-control center was completed in September, 1957; Paso Robles School for Boys—2 50-boy dormitories are to be completed in March, 1958.

During the 1958-59 Fiscal Year a 50-boy dormitory will be completed at Preston School of Industry. Presently funded facilities to be completed in 1959-60 include the following: Preston School of Industry—100-boy special treatment unit; Los Guilucos School for Girls—a 40-girl special treatment unit; Youth Training School—the initial 400-bed increment of this new school.

The 1958-59 Capital Outlay program includes major construction projects as follows: Northern California Reception Center and Clinic—a new administration building to permit remodeling of the existing building to provide more hospital space and increased offices and dental units for the increasing number of wards being processed; Preston School of Industry—rehabilitation of kitchen to eliminate operating deficiencies and health hazards; Youth Training School—part of the equipment required for the new institution in anticipation of its completion in September, 1959, and the completion of facilities not included in the first phase of the initial 400-boy increment; Ventura School for Girls—construction of a 200-capacity school to replace existing 186-girl school; Fred C. Nelles School for Boys—construction of a perimeter fence for increased security.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

GENERAL ANALYSIS—Continued

Other Departmental Programs Are:

Assistance to Counties for Maintenance of Juvenile Homes and Camps—This Youth Authority administered program provides for the State to share in the cost of operating the county juvenile homes and camps, caring for and treating wards that would otherwise be sent to the State. At the end of 1958-59 it is expected that there will be 37 county-operated camps caring for in excess of 2,500 individual wards annually.

Assistance to Counties for Construction of Juvenile Homes and Camps—The 1957 Legislature, in order to encourage the construction and operation of county juvenile camps, provided for the State to reimburse the counties for one-half of the cost of construction, with the provision the State's share would not exceed \$3,000 per bed. The camps are restricted to a maximum capacity of 100 wards. The Youth Authority is charged with responsibility for establishment of standards and the administration of this state aid.

MAJOR PROGRAM AUGMENTATION AND COSTS

The following summary accounts for the \$747,970 (6%) increase in 1958-59 expenditures over 1957-58. Increases are mainly for additional workload due to operation of new facilities, full-year operation of the special treatment program in temporary facilities, and increased parole caseload.

Additional custodial personnel for population growth and new facilities (13)	\$39,251
Parole positions for increased parole population (14)	44,274
Education, religion, and counseling staff for increased population (4.6)	20,029
Other additional positions including food service, housekeeping, plant operation, and administration (6)	21,945
<hr/>	
Additional personnel for new Youth Training School (11.6)	\$125,499
Net cost of authorized positions due to full-year operation of new facilities, merit salary adjustments, and improved employment conditions	48,170
Changes in Operating Expenses and Equipment:	487,279
a. Increases in feeding, medical care, education, and utilities primarily due to population increases and new facilities	146,000
b. Various other items of operating expenses	20,988
c. Decrease in equipment	144,160
Increase in reimbursements	13,676
Increase in contributions to State Employees' Retirement Fund	63,070
Other current expenses reflecting increased number of parolees	14,800

SUMMARY OF PROPOSED NEW POSITIONS

The following 49.2 proposed new positions at a cost of \$173,669 are included in the various school budgets and Departmental Administration. They are discussed here in the functional groupings in which they are to be used.

Custodial Personnel

1 Senior group supervisor	\$1,185
12 Group supervisor	38,066
<hr/>	
13	\$39,251
1 Senior group supervisor and 7 group supervisors are proposed to staff a new 50-boy dormitory and for an increase in population in the receiving company at Preston.	
3 Group supervisors at Preston and 2 group supervisors at Los Guilueos are proposed to provide 1 additional post coverage for dormitories housing special treatment wards. The program for special treatment of wards with serious personality problems or in need of psychiatric therapy was placed in operation in temporary quarters during the current year with completion of permanent facilities not anticipated until 1959-60. 5-post coverage is necessary because of extra custodial problems expected with this group of wards.	
Parole Services:	
2 Parole officer III	\$6,672
1 Parole officer II	4,580
8 Parole officer I	27,032
3 Intermediate stenographer-clerk	5,990
<hr/>	
14	\$44,274

These positions are proposed for the Bureau of Paroles to provide for increased parole caseload in accordance with currently authorized caseload ratios.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Education and Religion Personnel

1	Instructor in landscape gardening	\$4,980
2	It is proposed that 1 instructor in landscape gardening position now in the Waterman High School of the Lone Union High School District be added to the Preston School of Industry budget since landscape gardening is essentially an institution maintenance operation.	
3	Classes are conducted by the Waterman High School for Preston wards in addition to the educational program provided by institution personnel. These boys are included in the school district A.D.A. reported for apportionment of state aid.	
4	In accordance with past legislative action taken in connection with the education of inmates in the Department of Corrections whereby it was made necessary that the state agencies' support budgets finance their own educational programs, it is proposed that a similar procedure be followed at Preston. This legislation prohibited school districts from including such inmates in their average daily attendance and provided that the cost of services the districts provided would be reimbursed by the Department of Corrections.	
5	It is proposed to seek legislation in the 1959 Regular Session permitting the Preston School of Industry to contract with the school district for teachers' salary costs plus retirement, supervision, and a percentage of overhead costs. This will result in the full cost of the education program being reflected in the institution's budget, and will be consistent with methods used in providing these services for other correctional agencies.	
6	1 Youth Authority teacher	\$4,980
7	0.5 Intermediate stenographer-clerk	1,815
8	The increase in population will require 1 additional teacher in accordance with established staffing ratios, as well as 0.5 intermediate stenographer-clerk for school transcripts at the Preston School of Industry. Preston at the present time is unable to provide necessary information to the public schools for wards returning to school and has a backlog of transcripts requested by the Bureau of Paroles and the Public School System.	
9	1 Chaplain	\$6,360
10	It is proposed to increase 2 half-time chaplains at the Northern Reception Center and Clinic to full time in order to provide religious summaries for almost every ward. The number of cases processed has increased during the past several years so that it is possible to interview less than half the wards.	
11	0.1 Pianist	\$520
12	This intermittent position is needed at Fred C. Nelles School for Boys because volunteer help is no longer available for religious services.	

Classification and Counseling Personnel

1	Parole officer II (effective April 1, 1959)	\$1,374
2	This position is proposed for Preston School of Industry to meet the anticipated workload increase due to population growth in accordance with the current staffing formula.	

Food Service and Housekeeping Personnel

1	Food service assistant	\$2,916
2	An additional food service assistant is proposed at the Southern California Reception Center and Clinic so that, together with positions now authorized, it will be possible to provide 12 hours per day single coverage in the boys' dining room and the same coverage for one assignment covering both the girls' and employees' dining rooms. The only other feeding personnel available will be 1 cook on each shift and 1 supervising cook and 1 baker without any relief. This will provide the same number of food service assistants as now authorized for the northern clinic.	
3	1 Janitor	\$3,294
4	1 janitor is proposed for Paso Robles for additional building area of approximately 10,000 square feet. Ward help is used wherever possible; however, close supervision is required in certain areas such as the hospital, administration building, and academic school. A total of 2.8 positions will be available for 35,099 square feet requiring janitorial service. This includes the aforementioned buildings plus the auditorium.	

Plant Operation Personnel

1	Electrician	\$5,232
2	This position is proposed for Fricot Ranch School for Boys. The completion of additional facilities in recent years has created workload for an electrician position. Recent electrical breakdowns combined with the relatively isolated location of this institution and a costly rehabilitation project have emphasized the need for this position. The electrical maintenance problem has been reviewed by the Division of Architecture which recommends this position as the most economical solution.	

Administration Personnel

1	Intermediate typist-clerk	\$3,456
2	1.5 Intermediate file clerk	5,142
3	0.5 Intermediate stenographer-clerk	1,905

The Youth Training School was authorized by Chapter 303/1949, and is planned for completion and occupancy of the initial 400-bed increment in September, 1959. The proposed positions are to be established in phases in accordance with the need for staff to prepare for the opening of the new institution.

The following work must be accomplished during the 1958-59 Fiscal Year:

1. Detailed operating plans for custody, education, and administration.
2. Staff recruitment.
3. Ordering, receiving, placing, and accounting for all new equipment needed to furnish the kitchen, dormitories, classrooms, hospital, maintenance, administration, and other buildings.
4. Preparation of the budget and establishment of the administrative and accounting systems.

^a Effective January 1, 1959.

^b Effective April 1, 1959.

GENERAL ANALYSIS

This division includes provision for the Youth Authority Board, director, administrative services, and supervision of the diagnosis and treatment, special treatment, and departmental research programs.

The Youth Authority Board is concerned with acceptance or rejection of wards committed to the Youth Authority and with classification, length of institutional training and treatment, parole, and advice and formulation of policies concerning wards. Membership of the board was increased from 5 to 6 members at the 1957 Regular Session largely because of the increased caseload of wards committed to the Youth Authority. This caseload increase has continued and during the current year emergency financing was authorized in order that the Youth Authority could accelerate the acceptance of cases and reduce the number of wards committed to the Youth Authority and waiting in county detention facilities.

The executive group is composed of the director, who is chairman of the Youth Authority Board, and his staff. The director is the administrative head of the department and is charged with those duties and responsibilities of the department in carrying out its objectives not specifically assigned to the Youth Authority Board.

The Youth Authority clerk and records office maintains the master files on all wards committed to the Youth Authority. This office is also responsible for recording actions taken and for orders issued by the Youth Authority Board. The workload of this office grows with any increase in commitment rate, institution bed capacity, or in the number of wards on parole. 1.5 additional clerical positions are proposed to handle increases anticipated during the budget year.

The Research Unit is responsible for research programs being undertaken by the department. Basic research is planned in the fields of human behavior and in the specific field of delinquency, its causative factors, treatment and prevention.

Administrative services are furnished in the fields of accounting, budgeting, personnel management, food administration, maintenance and construction, and general administration. This function operates as the link between the department and the other state agencies concerned with the financial and management services of the State Government. Temporary help is proposed in 1958-59 for accounting services to be performed for the Youth Training School during the initial planning period.

The diagnosis and treatment group is responsible for supervision and operation of the department's reception centers, institutions, and forestry camps. This responsibility includes the training and treatment program in the institutions, as well as reception, diagnostic evaluation, and transportation of wards between institutions. It also includes supervision and operation of the department's special treatment program which was started during the 1957-58 year. Central direction for this program is provided by a psychiatrist. It is designed to meet the needs of special problem delinquents, who because of emotional disturbances or other severe personality problems do not fit into, nor benefit materially from, the regular treatment program.

1	DIVISION OF FIELD SERVICES						
2							
3							
4	GENERAL ANALYSIS						
5							
6	The Field Services Division is composed of the Bureau of Probation and Delinquency Prevention Services and the Bureau of Paroles.						
7	The Bureau of Probation and Delinquency Prevention Services provides assistance, leadership and guidance to the counties and cities of the State in studying youth problems and encourages them to provide effective programs to meet their needs. It is concerned with the encouragement of improved juvenile law enforcement and probation. It also administers the Interstate Probation Compact and the Interstate Compact on Juveniles as well as the 2 state aid programs for construction and maintenance of juvenile homes and camps.						
8	The Bureau of Paroles provides direct supervision and casework counseling for wards of the Youth Authority who are on parole. Parole officers make use of all available local services that can be of help in directing wards toward a normal life in the community.						
9	The integration of these 2 Youth Authority functions into the Field Services Division is recognition of the close relationship between delinquency prevention and rehabilitation, as well as the primary importance of the community in all phases of this work.						
10	The increase in parole caseload will require 14 new positions which are proposed to be established, as the increase is realized, in accordance with the overall ratio of 55 parolees per parole officer. Actual parole population for 1956-57 and the estimated caseload for the 2 years thereafter is as follows:						
11					1956-57	1957-58	1958-59
12	Average parole population-----				6,545	7,079	7,724
13	Parole population end of year-----				6,629	7,380	7,980
14							
15	A new program of testing parolees for narcotics use is included at the cost of \$5,000. This is pursuant to the provisions of Chapter 1894, Statutes of 1957, which permits the state parole boards to make periodic submission to tests by means of the use of synthetic opiate antinarcotics a condition of parole.

17					
18	GENERAL ANALYSIS				
19	Objectives				
20	The Northern California Reception Center and Clinic is a reception and diagnostic center for boys and girls committed to the Youth				
21	Authority from Northern California. The purpose of the reception center is to receive, examine, and classify boys and girls for				
22	transfer to the training and treatment program best suited to correct the causes of their delinquency.				
23					
24	Program and Performance				
25	This institution's program is centered in the reception and diagnostic evaluation of boys and girls committed to the Youth Authority.				
26	A diagnostic study is made on each boy and girl to determine his delinquency characteristics, mental attitude, and abilities.				
27	Recommendations based on such study are made to the Youth Authority Board regarding type of training, treatment, and custo-				
28	dial program best suited to correct the causes of delinquent behavior and to return the boy or girl to society as a useful citizen.				
29	Remedial medical, dental, and initial psychiatric treatment is provided if necessary. Wards from nearby Youth Authority institu-				
30	tions are transferred to this facility for major surgical and limited psychiatric treatment. Limited use is made of ward help in				
31	the reception center because of the short length of stay and the intensive diagnostic evaluation program.				
32	A 50-bed dormitory and a 20-bed segregation unit are scheduled for completion during the 1957-58 year. The number of wards to be				
33	processed will increase with this additional number of beds.				
34	Ward movement and average population at this institution are as follows:				
35					
36	Average Daily Population:	1956-57	1957-58	1958-59	
37	Boys-----	102	135	160	
38	Girls-----	44	45	45	
39					
40	Totals-----	146	180	205	
41					
42	Parole Releases and Processed Cases Transferred:				
43	Boys-----	969	1,250	1,350	
44	Girls-----	273	335	335	
45					
46	Totals-----	1,242	1,585	1,685	
47					
48	The addition of a file clerk to the clinical clerical pool and an increase in chaplain services from 2 half-time to 2 full-time positions				
49	are proposed to provide for increases in workload. These positions are discussed in the General Analysis, Departmental Summary.

GENERAL ANALYSIS

Objectives

The Southern California Reception Center and Clinic is a reception and diagnostic center for boys and girls committed to the Youth Authority from Southern California. The purpose of the reception center is to receive, examine and classify boys and girls for transfer to the training and treatment program best suited to correct the causes of their delinquency.

Program and Performance

This institution's program is centered on the reception and diagnostic evaluation of boys and girls committed to the Youth Authority. A diagnostic study is made on each boy and girl to determine his delinquency characteristics, mental attitude, and abilities. Recommendations based upon such study are made to the Youth Authority Board regarding type of training, treatment, and custodial program best suited to correct the causes of delinquent behavior and to return the boy or girl to society as a useful citizen. Remedial medical, dental, and initial psychiatric treatment is provided if necessary. Wards from nearby Youth Authority institutions are transferred to this facility for major surgical and limited psychiatric treatment. Limited use is made of ward help in the reception center because of the short length of stay and intensive diagnostic evaluation program.

Ward movement and population at this institution are as follows:

Average Daily Population:	1956-57	1957-58	1958-59
Boys-----	287	300	300
Girls-----	42	45	45
Totals-----	329	345	345
Parole Releases and Processed Cases Transferred:			
Boys-----	1,900	1,925	1,925
Girls-----	309	335	335
Totals-----	2,209	2,260	2,260

1 additional food service assistant position is proposed to provide 12-hour coverage of the kitchen and dining room areas. This position is discussed in the General Analysis, Departmental Summary.

a Composed of savings in salaries and wages, \$26,205; operating expenses, \$529; equipment, \$229; and loss in reimbursements, \$911.

21	GENERAL ANALYSIS				
22	Objectives				
23					
24	The Youth Authority camps for boys are forestry honor camps operated jointly by the Youth Authority, for the rehabilitation of the				
25	older delinquent boy and the Division of Forestry, for suppression of forest fires, reforestation, road construction and general				
26	maintenance of the State's forests. Selected boys primarily in the 17 to 21 age group are sent to these camps as an intermediate				
27	step between training in an institution and return to society. These wards include both criminal court commitments from				
28	Denel Vocational Institution and juvenile court commitments from Youth Authority facilities.				
29					
30	Program and Performance				
31					
32	Three camps are operated emphasizing a work program both in the forest and in the camp. A few boys are held in each camp for				
33	operation of the kitchen, dining room, laundry, general housekeeping and building maintenance. A recreation program is con-				
34	ducted after working hours including activities ranging from sports to arts and crafts. A counseling program to aid in				
35	removing the causes of delinquent behavior is conducted concurrently with the work and recreation program.				
36	The camps are Pine Grove, located east of Jackson; Ben Lomond, in the mountains north of Santa Cruz; and Mt. Bullion, near				
37	Mariposa. Mt. Bullion is a new camp which was completed and occupied during 1957. It replaced the camp at Coarsegold.				
38	3 small 20-boy spike camps are operated as branches of the main camps. 1 is operated from the main camp at Pine Grove and 2				
39	from Mt. Bullion.				
40	Ward movement and average population are as follows:				
41					
42		1956-57	1957-58	1958-59

GENERAL ANALYSIS

Objectives

The Fricot Ranch School for Boys is a correctional school for rehabilitation of delinquent boys primarily between 8 and 13 years of age. The purpose of the school is to provide a residential treatment center for the youngest and most immature boys committed to the Youth Authority designed to return them to society as useful citizens.

Program and Performance

The Fricot Ranch School for Boys was established in temporary buildings on the Fricot estate near San Andreas, Calaveras County in July, 1944. The first units of permanent construction were occupied in 1951. A combination administration-segregation building was occupied in the fall of 1957, completing currently authorized major construction. This institution places major emphasis upon a program of academic education and counseling. Minimum custodial standards are maintained as part of the treatment program. Because of its location in the mountainous Mother Lode country the school is able to carry on a program of scouting, hiking, and outdoor living as part of its total rehabilitation program.

Ward movement and average population at this institution are as follows:

	1956-57	1957-58	1958-59
Average daily population-----	156	168	168
Paroles-----	127	125	135

A half-time intermediate stenographer-clerk for the business office and an electrician are proposed in this budget. These positions are discussed in the General Analysis, Departmental Summary.

^a Composed of savings in salaries and wages, \$7,842; operating expenses, \$7,033; equipment, \$775; inmate pay-work projects, \$2,254; and excess reimbursements, \$359.

^b Composed of savings in operating expenses.

13	GENERAL ANALYSIS						
14							
15	Objectives						
16							
17	The Fred C. Nelles School for Boys is a correctional school for the rehabilitation of delinquent boys, primarily between 13 and 16						
18	years of age. The purpose of the school is to return the youths to society as useful citizens.						
19							
20	Program and Performance						
21							
22	The Fred C. Nelles School conducts a program of education, training and treatment designed to guide the delinquent youth into						
23	accepted behavior patterns. The educational program covers the elementary and lower high school grades and is remedial in						
24	nature. Academic and general shop programs similar to public school programs are conducted to enable the ward to return to						
25	the Public School System at the grade level commensurate with his age. A small farm and garden project is conducted to train						
26	youths who will benefit from this training. The farm program supplies fresh vegetables to the school as well as to the Southern						
27	Reception Center and Clinic.						
28	Wards are used to help in the operation of the kitchen, dining room, and laundry, and work in the maintenance program. Training						
29	and supervision are given in these areas as a part of the total training program.						
30	The poultry unit was discontinued during 1957-58 because it was becoming too expensive a unit to operate for the value received						
31	in both production and in training. The group supervisor position formerly assigned to this program has been transferred to a						
32	new program oriented to train wards for full or part-time employment in gardening.						
33	Ward movement and average population at this institution are as follows:

GENERAL ANALYSIS**Objectives**

The Paso Robles School for Boys is a correctional school for the rehabilitation of delinquent boys primarily between 15 and 17 years of age. The purpose of the school is to rehabilitate these boys and return them to society as useful citizens.

Program and Performance

The Paso Robles School for Boys was established in temporary buildings on the old Estrella Army Air Base in 1947. The first units of permanent construction were occupied in 1954. Two 50-bed dormitories, vocational shops and other related buildings are scheduled for completion and occupancy during the 1957-58 year. This will complete currently authorized expansion at this institution.

The rehabilitation process is carried out through a program of education, training, counseling, and treatment designed to guide boys into acceptable behavior patterns. The education program is both academic and prevocational. It is remedial in nature and covers junior and senior high school subjects with provision for graduation from high school for those who successfully complete the required courses. The prevocational phase of the program will be expanded during 1957-58 with completion of shop units now under construction.

A small farm and garden operation is conducted as part of the education program to train boys interested in this field. The farm program furnishes eggs, poultry, and pork to the school as well as a limited amount of fresh vegetables. Boys are used to help in operation of the kitchen, dining room, laundry, shoe repair, and maintenance of the institution. Training and supervision is given in these areas by tradesmen as part of the total rehabilitation program.

Ward movement and average daily population at this institution are as follows:

	1956-57	1957-58	1958-59
Average daily population-----	335	370	435
Paroles-----	533	753	690

An additional janitor is budgeted for proper cleaning of new buildings to be completed in 1957-58. This position is discussed in the General Analysis, Departmental Summary.

^b Composed of savings in salaries and wages, \$8,719; operating expenses, \$7,582; equipment, \$1,702; and loss in reimbursements, \$2,122.

GENERAL ANALYSIS

Objectives

The Preston School of Industry is a correctional school for the custody, training and treatment of delinquent boys, primarily between the ages of 17 and 21 years. The purpose of the school is to rehabilitate these youths and return them to society as useful citizens.

Program and Performance

The Preston School of Industry conducts an educational program in three general areas. These are:

1. Academic instruction for wards that are educationally retarded from 3 to 5 years behind the educational level commensurate with their chronological age. The program is of elementary and high school level, including graduation from high school for those successfully completing the necessary courses.
 2. Vocational training program giving training in various trades, such as, printing, auto mechanics, cabinet work, electrical work, sheet metal, and others.
 3. Farm program with basic education in operations of a dairy, poultry unit, hog ranch and field crops.
- Wards are used to help in the operation of the kitchen, dining room, laundry and maintenance program. Training and supervision are given in these areas as a part of the total program.
- A program of counseling to understand and remove the causes of delinquent behavior is conducted concurrently with the education and custodial program.
- A program for special treatment of wards with serious personality problems or in need of psychiatric-type therapy was placed in operation in temporary quarters during the 1957-58 Fiscal Year. Permanent quarters including 2 special treatment dormitories are scheduled for completion during 1959-60.

Average ward population and paroles at this institution are as follows:

	1956-57	1957-58	1958-59
Average daily population-----	663	695	725
Released on Parole-----	1,071	1,602	1,420

New positions include 8 custodial positions, 1 teacher, 1 classification counselor, and 1 half-time stenographer related to population increase; 3 custodial positions to provide extra coverage for dormitories housing special treatment program wards and 1 instructor in landscape gardening for transfer of a class from the local school district to the institution budget. These positions are discussed in the General Analysis, Departmental Summary.

9					
10	GENERAL ANALYSIS				
11	Objectives				
12					
13	The Youth Training School is planned as a correctional school for the older delinquent boys, primarily of the 18- to 21-year age				
14	group. The purpose of the school is to provide custody, care, vocational and other training, guidance and reformatory help for				
15	young men too mature to be benefited by the programs of correctional schools for juveniles and too immature for confinement in				
16	prisons.				
17					
18	Program and Performance				
19					
20	This new institution will be located near Ontario. The first 400-boy increment is scheduled for completion in September, 1959, with				
21	occupancy shortly thereafter. The ultimate planned capacity is 1,200.				
22	A program of vocational training is planned to prepare boys for employment. The teaching of good work habits will be emphasized				
23	in a program generally consisting of one-half day of vocational training in the shops and one-half day related work experience.				
24	The custodial nature of this facility would prohibit the boys involved from acquiring any concurrent related work experience				
25	outside the institution; therefore, work experience will be related to maintenance and operation of the institution.				
26	The 10.4 positions proposed for 1958-59 will be concerned with preliminary planning for opening the institution as explained in the				
27	general analysis, departmental summary.

GENERAL ANALYSIS

Objectives

The Los Guilucos School for Girls is a correctional school for the rehabilitation of the younger delinquent girl. The school resident population includes girls between the ages of 10 to 17. The purpose of the school is to rehabilitate these girls and to return them to society as useful citizens.

Program and Performance

The Los Guilucos School for Girls was established in October 1943 in The Pythian Home for the Aged near Santa Rosa. This was a wartime expedient with plans for a permanent campus to be located eventually on this site. The first increment of permanent construction was occupied in May 1952. Construction and remodeling is still in progress at the school. Special Treatment Program Units are being constructed with completion and occupancy scheduled in July 1959.

The program is primarily educational and stresses academic instruction, home economics, and arts and crafts. A counseling program to remove the causes of delinquent behavior is conducted concurrently with the education and custodial program. The academic course is remedial in nature and includes elementary, junior high and high school subjects, with provision for graduation from high school for those who successfully complete the required courses.

Girls are used to help in operation of the kitchen, dining room, hospital, and dental unit as part of the total program. Girls are responsible for housekeeping in the dormitories and also assist the housekeepers in maintenance of less critical areas of the school.

Organization and operation of a Special Treatment Unit Program to treat girls suffering from severe personality disturbances or in need of psychiatric-type therapy was authorized for the current year. The treatment staff is to be housed in temporary quarters during construction of permanent units.

Average ward population and releases at this institution are as follows:

	1956-57	1957-58	1958-59
Average daily population -----	217	224	220
Parole releases -----	195	200	220

A remodeling program to increase dayroom sizes and to add dining rooms to dormitories will cause a slight reduction in population during the budget year.

2 additional custodial positions are proposed in this budget to provide 5-post coverage for the dormitory being used as the temporary special treatment unit. These positions are discussed in the general analysis, departmental summary.

GENERAL ANALYSIS

Objectives

The Ventura School for Girls is a correctional school for rehabilitation of the older delinquent girls, primarily in the 16 to 21 age group. The purpose of the school is to rehabilitate the girls and to return them to society as useful citizens.

Program and Performance

The Ventura School for Girls conducts a program of educational training and counseling to treat the causes of delinquent behavior. The education department offers a remedial program at the junior and senior high school level, with graduation from high school for those who successfully complete the required courses.

A vocational training program is emphasized to prepare girls for employment when paroled. Training is given in practical nursing, laundry operation, production sewing, stenography, accounting and related clerical work. A program of vocational counseling is being used on a trial basis to determine if it will help girls to secure employment and make better adjustments upon their return to society. The final report on this experiment will be completed during the fall of 1958.

The girls at this school live in cottage-type dormitories which are equipped with individual kitchens and dining rooms instead of the central kitchen standard in other Youth Authority institutions. The present plant is old and in very poor condition requiring continuing and extensive maintenance. Custodial costs are high because of the poor design and relatively small capacity of the dormitories. Construction of a new institution is in the planning stage.

Paroles and average ward population at this institution are as follows:

	1956-57	1957-58	1958-59
Average daily population-----	182	182	182
Paroles -----	239	240	240

a Composed of savings in salaries and wages, \$7,785; operating expenses, \$13,968; equipment, \$143; and excess reimbursements, \$38.

GENERAL ANALYSIS

The State Department of Education, under the direction of the State Board of Education, seeks to insure that all children of the State have an opportunity to attend the Public School System, and that once enrolled, they receive adequate instruction by qualified teachers. The department also operates a statewide system of colleges to offer qualified students instruction leading to careers in teaching and vocations. Preliminary training in the professions is also offered. Physically handicapped children and adults may receive an education, physical rehabilitation services or sheltered employment through the special schools and institutions operated by the department.

The department also administers joint federal-state programs dealing with the distribution of surplus commodities for educational purposes as well as administering jointly financed educational programs.

In carrying out these functions the Department of Education employs, as of November 30, 1957, 1,399 persons on the departmental staff, 6,566 persons in the state college system and 838 persons in the special schools.

The department is divided into 5 divisions to handle specific areas of responsibility. The program of each division is discussed in conjunction with its detailed budget presentation.

DIVISION OF DEPARTMENTAL ADMINISTRATION

GENERAL ANALYSIS

The primary function of the Division of Departmental Administration is to furnish executive, accounting research, personnel, and legal services to the Department of Education, and to administer the program of teacher certification for the public schools. The Division of Departmental Administration is administered by a Deputy Superintendent of Public Instruction.

All applicants for credentials must file fingerprints with this division, and reports are furnished by the Bureau of Criminal Identification on those people who have an arrest record. This record is reviewed by a field representative to determine if the applicant's record is such that he cannot hold a California credential. Since the reports generally only indicate the arrest record of the applicant, it is necessary to secure reports of the disposition of the case. The following table sets forth the workload of this office:

	FINGERPRINTS PROCESSED	ARRESTS REPORTS	COMPLETED INVESTIGATIONS
1956-57 actual -----	25,421	944	805
1957-58 estimated -----	25,000	875	696
1958-59 estimated -----	25,000	875	696

The Accounting Office of the Division administers certain trust funds, and provides the usual budgetary, purchasing, and internal auditing services. The volume of these services, as measured by the number of claims processed, is expected to increase by 12 percent by the budget year. The accounting functions for the state colleges, special schools and California Industries for the Blind centers are performed by these respective agencies. The expenditures of the State Board of Education are included in and administered through the departmental budget. In order to provide for the workload increases in this unit 0.5 clerk for the Claims Audit Section and 0.5 clerk for the Shipping Section are being added to the budget.

The Personnel Office administers the personnel program of the Department of Education. That section of the Personnel Office dealing with the state colleges and special schools is staffed at a level of 1 clerk per 1,500 employees. It is expected that the number of employees in the schools and colleges will reach 9,000 by January 1, 1959. This unit exercises central control of personnel transactions to insure the application of uniform standards and practices and renders services in connection with classification, salary levels and areas of recruitment. That section of the Personnel Office dealing with the department is staffed at a ratio of 1 clerk per 183 employees. This unit has the responsibility for the selection and placement of employees, the improvement and the evaluation of work performance, the keeping of personnel records and the execution of policy and administrative decisions on personnel matters. To provide for projected workload increases it will be necessary to add 3 clerical positions to this unit.

The Administrative Adviser's Office acts as legal adviser to the Superintendent of Public Instruction and his staff, the State Board of Education, and to the staffs of the state colleges, special schools and special service agencies in the department. It represents these agencies and officers in disciplinary actions, both contested and uncontested, involving disciplinary action against public school teachers and employees of the department and the state colleges. During general sessions of the Legislature, this office prepares departmentally-sponsored legislative bills, follows some 500 to 600 legislative bills, and prepares recommendations to the Governor on those bills of concern to the department. It drafts and passes on the legal adequacy of contracts, including those for the purchase of state-adopted textbooks for the Public School System, deeds, leases, easements, and probate documents affecting the department and the agencies under its jurisdiction and acts as the liaison agency between the department and the Attorney General.

^a Expenditures from bond funds not included in budget totals.

6							
7	The Bureau of Education Research is responsible for studies in the evaluation of public school curriculum, educational measure-						
8	ments, and in the areas of school administration, such as finance, salaries, school buildings, teacher preparation, class size, en-						
9	rollment data. It also furnishes consultant services to school districts in advising and planning test programs for the public						
10	schools. The tabulating machine section renders service to the various divisions and bureaus of the department. In the annual						
11	school apportionment, the bureau assumes the responsibility for the mechanical computations for the school apportionment.						
12	During the budget year the bureau will co-operate in the study required by the Legislature to be made of the estimated finan-						
13	cial needs of the schools and the State's responsibility in meeting these needs.						
14	The credentials office evaluated 112,291 applications for credentials during 1956-57. It is estimated that 122,000 evaluations will be						
15	made during 1957-58 and 128,000 evaluations will be made during 1958-59. This office is staffed with credential technicians at						
16	a rate of 1 technician per 6,000 evaluations. The clerical staff is also determined by formula based on evaluations.						
17	Based on the estimated increase in evaluations and the accepted workload standards, 1 credential technician and 1.7 clerical posi-						
18	tions have been added to the budget.

DIVISION OF PUBLIC SCHOOL ADMINISTRATION

GENERAL ANALYSIS

The Division of School Administration assists school districts by rendering assistance in noninstructional areas. The services furnished include school planning, school district organization, school lunch, free textbooks, surplus federal property, the child care program, approval for veterans' training and advisory service in school finance and attendance.

The Administrative Services Bureau advises school districts on financial and administrative matters including child care centers. The program for the budget year is predicated on furnishing the same level of service to school districts as in the current year.

The Bureau of School Apportionments and Reports verifies reports of school districts and compiles data for use of the public schools. Apportionments are made in 5 major stages to local jurisdictions by this unit. The amount of the apportionment is shown in local assistance section of the budget. Although a considerably larger sum of money is apportioned and the laws governing the apportionment are more complex, better procedures have enabled the work to be done with the same staff as in 1953-54.

The School Lunch Program is a federal grant-in-aid program in which cash reimbursement and commodities are allocated to participating schools. Participation in the school lunch program grew about 10 percent in both number of schools participating and an average number of lunches served per day during 1956-57. It is anticipated that this rate of growth will continue. A special milk program is also administered by this agency. While the number of participating schools increased 10 percent in 1956-57, there was a 23 percent increase in the quantity of milk consumed. The expenditures in the School Lunch Program are as follows:

Year	SCHOOL LUNCH PROGRAM			SPECIAL MILK PROGRAM	
	Federal Cash Disbursements	Local Matching Funds	Federal Commodities	Federal Cash Disbursements	
1955-56 -----	\$3,344,536	\$36,434,826	\$6,155,474	\$4,018,680	
1956-57 -----	4,308,842	41,767,554	9,094,800	5,397,681	
1957-58 est. -----	4,364,196	Not available	Not available	6,010,650	
1958-59 est. -----	4,400,000	Not available	Not available	6,000,000	

Simplification of the procedures required by the Federal Government in the Special Milk Program has enabled the staff to absorb the additional workload caused by the growth of the program.

The Bureau of Textbooks and Publications is responsible for the editorial policy of all department bulletins and for administration of the free textbook program.

2	DIVISION OF INSTRUCTION						
3							
4	GENERAL ANALYSIS						
5							
6	The Division of Instruction is the operating division through which the Department of Education co-ordinates the instructional program of the State's Public School System. In addition the department's services for upgrading and improving the statewide instructional program are provided through this division. Although the two major functions of this unit are the co-ordination and improvement of instruction, its functions in specific fields of education vary widely. In the field of adult education, the division, as required by law, approves all adult courses offered by local districts. In connection with special education programs and in certain vocational fields the division provides classroom supervision services and in 2 programs, police officer training and fire training, division staff members regularly organize and conduct classes.						
7	The addition of a consultant in secondary education and a clerk has been included in the budget in order to complete a report of the State Central Committee on Social Studies to the Curriculum Commission. The positions will terminate June 30, 1959.						
8	The Bureau of Elementary Education is responsible for the co-ordination and improvement of instruction in the elementary grades of the 1,560 elementary and unified school districts in the State. The efforts of the bureau staff are concentrated on working with key persons in state and regional meetings and on the preparation of instructional materials such as teachers' guides and similar publications. Each bureau staff member spends an average of 51 working days each year on the preparation of manuscripts and materials, 40 days in participating in State and regional meetings, and 39 days in working with State and regional curriculum committees and councils. No staff time is required for programs of inspections and approvals, for accreditations, or for direct instructional services.						
9	The Bureau of Secondary Education is assigned responsibility for the co-ordination and improvement of instruction in high schools and in this capacity works with the county superintendents and the 329 high schools and unified school districts maintaining junior, senior, and 4-year high schools. In addition the bureau is required by law to approve the courses of study of all secondary schools. It collects and analyzes annual reports from high schools, and represents the department in the accreditation of high schools. Members of the staff average 34 working days per year in programs of inspections and approvals, 30 days in working with reports, 25 days in working with professional organizations, and 20 days in working with State and regional curriculum committees and councils.						
10	To continue and strengthen the program of accrediting high schools, which was started in 1957, 1 additional consultant and a half-time clerical position are proposed.						
11	The Bureau of Junior College Education was established July 1, 1957, and is now in its first year of operation. The work of this unit formerly was carried on by the Bureau of Secondary Education. The bureau is the unit through which the division co-ordinates and improves the instructional programs of the public junior colleges.						
12	The Bureau of Adult Education has the responsibility for co-ordinating and improving programs of adult and continuation education. In addition this unit is required to approve more than 20,000 adult classes annually and to approve forum and lecture series, continuation high schools, and special day and evening classes and summer sessions in elementary schools. Staff members spend an average of 127 working days per year on programs of inspections and approvals, 18 days in meeting with state and regional groups, and 17 days in preparing manuscripts and materials.						
13	The Bureau of Audio-visual Education has the responsibility for co-ordinating and improving programs of audio-visual education in counties and school districts. The bureau also is a service unit for the department and for other state governmental agencies and maintains materials and equipment to be used on a loan basis by staff members of the department and of other state agencies not supplying this service through their own facilities. Bureau staff members spend 52 working days each year in work with professional organizations on the average, 41 days in participating in state and regional meetings, and 27 days in the preparation of manuscripts and materials.						
14	The Bureau of Guidance is responsible for the co-ordination and improvement of guidance programs in counties and school districts and represents the department in working with other state agencies, such as the Department of Employment and the Department of Mental Hygiene, that provide services related to the guidance and placement of school pupils. Members of the staff average 87 working days annually in participating in state and regional meetings, 51 days in the preparation of manuscripts and materials, 28 days in research and evaluation activities, and 23 days in working with professional organizations.						
15	The Bureau of Physical Education, Health Education, and Recreation is assigned the responsibility for co-ordination of physical education, health education, and school recreation programs in counties and districts. This includes responsibility for school athletic programs, school health services such as medical and nursing services, and school district co-operation in community recreation programs of various types. Each bureau staff member averages 83 working days in the preparation of manuscripts and materials, 37 days in participating in state and regional meetings, and 22 days in working with state and regional curriculum committees and councils.						
16	The Bureau of Special Education is the unit through which the department co-ordinates, improves, and supervises the various programs for pupils with special needs. These include programs for pupils with speech difficulties, hearing losses, sight limitations, and crippling conditions. Because such programs carried on by counties and school districts must meet specific requirements in order to qualify for special state reimbursements, this bureau has certain responsibilities for program approvals. Since many counties and districts are unable to provide qualified supervisors for such specialized programs, members of the bureau staff engage in a certain amount of classroom supervision. Also instructional materials available to blind pupils through the American Printing House for the Blind are requisitioned and made available to California school districts through this unit. Bureau staff members average 54 days per year in work associated with programs of inspections and approvals, 37 days in the preparation of manuscripts and materials, 22 days in specialized teacher training activities, and 16 days in working with professional organizations.						
17	Chapter 2287, Statutes of 1957, authorized 2 positions of Counselor for the Blind to work with blind children in both the elementary and secondary schools in the State. A senior clerk was authorized by Chapter 2269, Statutes of 1957, to aid for the distribution of Braille books and other blind student materials. These positions are continued in the budget year.						
18	4 bureaus responsible for carrying on the joint federal-state program of vocational education constitute a section of the Division of Instruction under the administration of an assistant division chief who is also State Director of Vocational Education. These units are the Bureau of Agricultural Education, the Bureau of Business Education, the Bureau of Homemaking Education, and the Bureau of Industrial Education. Most of the financial support for these 4 units comes from the special vocational education budget. However, certain of the general co-ordination activities in the fields of industrial arts and business education cannot be financed with federal funds and 2 positions on the vocational staff are included in the general support budget. These staff members work in the "nonvocational" industrial arts and business education fields and spend most of their time in working with state and regional curriculum committees and councils, in preparing manuscripts and instructional materials, in research and evaluation, and in activities related to teacher training.

5	GENERAL ANALYSIS						
6							
7	The primary functions of the Division of State Colleges and Teacher Education are: (1) to provide headquarters administrative serv-						
8	ices and co-ordination for the 12 state college campuses, 3 off-campus centers, the 2 new state college campuses, and 2 new sites						
9	authorized by the 1957 Legislature; (2) to provide leadership to all teacher education institutions of the State, both public and						
10	private, in the preparation of more and better qualified teachers; (3) to carry forward through the specialist in higher education						
11	and joint staff member the planning and reports necessary to the development of an adequate but economical system of higher						
12	education in California; and (4) to provide administrative services to the California Maritime Academy, whose policies are deter-						
13	mined by its own board of governors.						
14	The Division of State Colleges and Teacher Education is administered by an associate superintendent as division chief. The staff pro-						
15	vides central administrative services to the State College System employing over 6,000 persons and serving 41,582 full-time and						
16	30,501 part-time students in fall, 1957. This division provides predominantly administrative rather than consultant services to						
17	the state colleges, but through the office of the specialist in teacher education leadership and consultant services are provided to						
18	the 38 public and private teacher education institutions presently accredited by the State Board of Education. Assistance is also						
19	given to institutions which seek accreditation for the first time. The acute need for large numbers of teachers in California justi-						
20	fies a significant state interest and participation in the recruitment activities of this office.						
21	Within the division there is provision for participation in the study of the immediate and long-range problems of higher education in						
22	California. The specialist in higher education is the Department of Education's representative on the Joint Staff of the Liaison						
23	Committee of the California State Board of Education and the Regents of the University of California. The 2 joint staff mem-						
24	bers continuously appraise, study, and document California's present and future needs in higher education. Their reports and						
25	recommendations are presented to the University Regents, the State Board of Education, and the Legislature and they have						
26	made a significant contribution to the orderly and efficient development of public higher education as expressed in numerous legis-						
27	lative and board actions.						
28	The balance of the staff functions of the division are co-ordinated by the assistant chief of the division. These functions are grouped						
29	under 4 offices.						
30	(1) The educational planning office, in charge of the specialist in state college curricula, assists state colleges to develop educa-						
31	tional programs, curricula, instructional standards, and in other related matters.						
32	(2) The Facilities Planning Office under the direction of a specialist in college facilities planning assists state colleges and special						
33	schools to plan campuses and buildings; to develop building space, utilization, and maintenance standards; to prepare						
34	budgets for Capital Outlay projects for the State College System and the special schools.						
35	(3) The fiscal officer is responsible for reviewing all fiscal matters affecting the State College System and to insure operational						
36	adherence to approved expenditures, divisional standards, and conformance with good business practice. The total 1957-58						
37	support budget for the State College System is almost \$47,000,000. With the addition of dormitory facilities totaling 7,600						
38	beds in the State College System, the responsibilities of the Fiscal Office will be considerably increased. The 1958-59 Budget						
39	contains provision for the addition of a housing officer and a clerk to co-ordinate the large residence hall program authorized						
40	by the 1957 Legislature.						
41	(4) Proper administration of both the Division of State Colleges and the State College System is based on the assembling,						
42	analyzing, and interpreting of reliable and appropriate data. The Administrative Planning Office provides such data to other						
43	units of the division, the state college administrators, the joint staff, Department of Finance, Legislative Analyst, and the						
44	Legislature. With the addition of a research technician and clerical position as proposed in this budget, it will be possible to						
45	perform these functions more completely and accurately.

		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)			
1	DIVISION OF SPECIAL SCHOOLS AND SERVICES						
2	GENERAL ANALYSIS						
3							
4							
5							
6	The Division of Special Schools and Services provides administrative and educational supervision for the state residential schools						
7	for the deaf, blind and cerebral palsied children and directs the programs of the California Industries for the Blind, Field Re-						
8	habilitation Services for the Adult Blind, the Opportunity Work Centers for the Blind, the Oakland Orientation Center for the						
9	Blind, and the Bureau of Vocational Rehabilitation.						
10	The statistics for the state residential schools, the California Industries for the Blind and the Oakland Orientation Center are						
11	shown in that section of the budget containing the detail of their requests.						
12	The item of "Diagnostic Clinic Costs" which was budgeted in total here in 1957-58 will be budgeted hereafter by the Department						
13	of Public Health.						
14	The Field Rehabilitation Services for the Blind acquaints blinded adults with the services available and assists such persons to						
15	become oriented to their condition. Instruction is given in crafts, braille, typing, travel training, personal grooming, and						
16	homemaking. This service is available to all blind adults who request assistance from the field rehabilitation staff.						
17	During 1956-57, the field workers of the Field Rehabilitation Services for the Blind made 14,656 calls. The workers gave 7,110						
18	home lessons, 5,126 class lessons and 6,031 counseling sessions. The number of clients at July 1, 1956, was 1,393. Clients added						
19	during 1956-57 totaled 506 and those dropped totaled 701. The number of clients at June 30, 1957, was 1,198. The drop in client						
20	load was due to cancellation of certain craft classes and adjustment of field workers' territories in June, 1957. As of October 1,						
21	1957, the average caseload per worker was 58 clients with a total of 534 clients served in the rural area, 622 in the urban						
22	areas for a total of 1,156 clients under instruction. No services were given from Sonoma north to Oregon or from Chico to the						
23	Oregon line.						
24	The opportunity centers for the blind exist to give work opportunities of nonstandardized type to the blind. The co-ordinating Council						
25	on State Programs for the Blind recommended in March, 1957, that only productive workers be retained in the California In-						
26	dustries for the Blind workshops and that less productive workers should be given work opportunities in the opportunity centers.						
27	This budget proposes the establishment of 1 center in Oakland. This new center, together with the 3 already established, will						
28	require supervision separate from the Field Rehabilitation Services. A position of coordinator is proposed in this budget to						
29	head this program. His responsibility will be to work with and develop sponsorships, to assist in creating sales outlets, make						
30	recommendations on worker placement and to maintain liaison with other agencies furnishing aid and services to the blind.						
31	The staffing for the New Opportunity Work Center will include a handicraft supervisor, an account clerk and a part-time janitor						
32	position. The cost of the center is offset in the California Industries for the Blind budgets by a transfer of a number of posi-						
33	tions from General Fund to Manufacturing Fund support.						
34	The program of vocational rehabilitation is to assist disabled persons to achieve the maximum degree of self-support. It is based						
35	upon a co-operative plan between the State Department of Education and the United States Office of Vocational Rehabilitation						
36	and is administered by the Bureau of Vocational Rehabilitation through its 2 regional, 9 district and 14 branch offices. The						
37	total program is financed by state and federal funds. Expenditures for this program are reported in the budget for vocational re-						
38	habilitation.

GENERAL ANALYSIS

Objectives

The purpose of vocational education is to provide training to develop skills, attitudes, working habits, and to impart knowledge and information needed by workers to enter and make progress in employment on a useful and productive basis.

Program and Performance

The vocational education program for California is based on a plan, co-operatively approved and financed by local school districts, the State Department of Education, and the United States Office of Education. The available funds are expended for supervision and teacher training at the state level and as reimbursements to those local districts which meet the established qualifications of the approved program. These reimbursements are based on the magnitude of the excess costs to the school districts in meeting the prescribed standards.

Federal funds available for vocational education under the Smith-Hughes and George-Barden Acts must be matched on an equal basis by local or state funds. The George-Barden funds may be used for the reimbursement of salaries, travel expense and instructional equipment while the Smith-Hughes funds allow for reimbursement of salaries only.

In addition to an administrative unit the state agency for vocational education is divided into 4 services which offer assistance and guidance to the local districts. These services include:

1. Agricultural education which assists persons who are planning to enter, or have already entered the occupation of farming. In 1957-58 a total of 19,428 persons have enrolled in such courses.
2. Industrial education designed to help the person who is contemplating entering a trade or has already done so. The 1957-58 enrollment in this activity totals 119,853.
3. Homemaking education which operates a program of helping local school districts to assist persons engaged in the duties and responsibilities of the home. Enrollment in these courses for 1957-58 totals 131,062, the largest of the 4 services.
4. Business education deals only with the distribution occupations phase of business education. This program is limited to part-time and evening classes but the 1957-58 enrollment totals 61,053.

A summary of the 1957-58 enrollments in each phase of the program is shown in the table below.

	EVENING	PART-TIME	ALL DAY	TOTAL
Agricultural education -----	6,564	—	12,864	19,428
Business education -----	57,052	4,001	—	61,053
Homemaking education -----	72,704	16,363	41,995	131,062
Industrial education -----	70,009	26,642	23,202	119,853
Totals -----	206,329	47,006	78,061	331,396

In addition to the basic vocational education program, there are 2 state-financed programs which augment the joint federal-state local program. These are the Fire Training Program and the Apprenticeship Instructional Materials Program. In the Fire Training Program, there are 8 itinerant instructors to provide service to local departments by inservice training. In addition, several institutes are held each year as a means to train officers in modern fire fighting techniques. During 1956-57, 5 institutes were held and in the classes taught by itinerant instructors 4,583 men were registered. A total of 4,116 class hours of instruction were given.

The Apprenticeship Instructional Materials Program prepares instructional materials for use by apprentices in trades where there are a minimum of 100 apprentices. There are currently 27 such trades. The materials prepared include, in addition to textbooks, such instructional aids as examinations, progress charts and teacher handbooks. These publications are sold to the apprentice at a price calculated to recover the direct costs of such publications.

The 1958-59 program is extended at the same general level as that shown above.

20					
21	GENERAL ANALYSIS				
22					
23	Objectives				
24					
25	The Bureau of Vocational Rehabilitation encourages and assists physically and mentally handicapped persons to achieve the maximum degree of self-support.				
26					
27	Program and Performance				
28					
29					
30	The bureau offers vocational guidance and placement services throughout the entire State. In many cases this takes the form of corrective surgery, the furnishing of prosthetic devices as well as psychological tests and placement. Other specialized activities include the business enterprise program for the blind which sets up vending stands for qualified blind persons, a research program on the rehabilitation of the industrially injured and a federally reimbursed program dealing with incapacitated persons under the Social Security Law.				
31					
32					
33					
34					
35					
36	Administration				
37					
38	Central program direction and housekeeping functions are carried on by this unit. All increases in this function are caused by rises in price of services and commodities.				
39					
40	Vocational Guidance and Placement				
41					
42	This unit comprises the main body of the program. It is divided into 9 district and 14 branch offices throughout the State.				
43	For several years the emphasis on cases accepted has been those most clearly in need of services and those whose rehabilitation represents the greatest social and economic benefit to the State. Other priority cases include the industrially injured worker and referrals from the Federal Old Age Survivors Insurance program.				
44					
45	In line with this general priority an effort has been made to reach and rehabilitate handicapped recipients on the public relief rolls who have a good opportunity to become self-supporting for a number of years after treatment. In the 4 years since this priority was emphasized more than 3,200 persons have been rehabilitated with an estimated annual savings of \$4,000,000. Approximately 30 percent of the staff time is devoted to this area and 40 percent of the referrals are from public relief agencies.				
46					
47	A general tabulation of workload indicates that the disabilities treated are as follows:				
48					
49					
50					
51					
52					
53	Blind -----	10%	Psychiatric -----	15%	
54	Tuberculous -----	10%	Other -----	65%	
55					
56	The following table presents the movement of the active caseload during the years 1954-55 through 1956-57.				
57					
58		1954-55	1955-56	1956-57	
59	Active caseload at beginning of year-----	4,886	5,316	4,919	
60	Accepted for service in year-----	3,426	3,225	3,787	
61					
62	Total Active Caseload-----	8,312	8,541	8,706	
63	Closed, rehabilitated-----	1,618	1,724	1,567	
64	Closed after rehabilitation plan initiated-----	569	640	507	
65	Closed before rehabilitation plan initiated-----	809	1,258	1,078	
66					
67	Total Closures-----	2,996	3,622	3,152	
68	On Hand, End of Year-----	5,316	4,919	5,554	
69					
70	While the number of rehabilitations accomplished by the California Bureau of Vocational Rehabilitation is numerically low compared to results in other states, an explanation of the California philosophy is included below in a statement by the Chief of the Bureau of Vocational Rehabilitation.				
71					
72	Evidence indicates that in many states the emphasis is placed upon serving only those disabled applicants who may be brought to employment most quickly and cheaply, often at the expense of more severely involved cases which have a greater need for service. The past experiences of the California program, when primary emphasis was placed on numbers served, created a condition where all staff efforts were directed toward bringing into the caseload persons whose needs were superficial and who might have been served through agencies such as the public employment service, community health services, and the like.				
73					
74	It is apparent that in the absence of any uniform standards of acceptance, of determining what is a "rehabilitated case," or other means of bringing some uniformity to the national picture, comparative statistics between states on numbers of cases served become meaningless. California's program gives priority to those cases whose need, broadly defined, is greatest and who, without assistance from the State would become permanent public charges. Although such a policy is incompatible with the present national trend of serving large numbers of undifferentiated cases, the ultimate returns to this State are much greater.				
75					
76					
77					
78					
79					
80					
81					
82					
83	a Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.				
84					
85

Department of Education

VOCATIONAL REHABILITATION—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	GENERAL ANALYSIS—Continued			
2				
3				
4	Vocational Guidance and Placement—Continued			
5				
6	The staff for the bureau has been provided on a formula of 1 rehabilitation counselor for each 130,500 population in the State for the			
7	base program. On this basis the bureau would require 4 additional counselors in the budget year. In 1956-57, 9 clerical positions			
8	were allowed as an offset against 5 future counselor positions justified on a population basis. 4 counselors were applied against			
9	this allowance in 1957-58. The remaining 1 man-year is applied in 1958-59 making an allowance of 3 additional positions in the			
10	budget. An additional 3.5 clerical positions are allowed on an accepted ratio of 0.6 clerical positions to each counselor position.			
11	Other expenditures in the area of case services have been increased to reflect advancing costs of materials and medical services.			
12				
13	Business Enterprise Program for the Blind			
14				
15	This program assists qualified blind persons to become self-supporting by providing equipment for the establishment of vending stands			
16	snack bars and lunch rooms in office buildings and industrial plants. Assistance and advice is also furnished by a staff of			
17	business enterprise officers to see that they are properly established and operated.			
18	The bureau has established a maximum allowance of \$4,000 of bureau funds to install such a stand. The program anticipates that			
19	20 new stands will be established during 1958-59, requiring \$80,000. No additional staff is included.			
20				
21				
22	Industrially Injured Project			
23				
24	Chapter 1738, Statutes of 1955, provided funds for the purpose of conducting research and demonstration projects in connection			
25	with problems relating to the rehabilitation of disabled workers. For the past 2 years the bureau has been carrying on this			
26	project but if the findings are to be significant it will be necessary to extend this program for at least 2 more years.			
27	The present level of service is being maintained for the budget year.			
28				
29	Disability Freeze Program			
30				
31	This program is completely financed from the Federal Social Security Trust Fund. It involves the disability certification program			
32	connected with the Old Age and Survivors Insurance.			
33	While the budget for 1958-59 proposes 29 new positions to be added to the staff, these positions were authorized by the Social			
34	Security Administration after the 1957-58 Budget was approved by the Legislature. The program for 1958-59 is at the same			
35	level as in the current year.

9							
10							
11	GENERAL ANALYSIS						
12	Objectives						
13							
14	The State Library has several responsibilities in addition to maintaining a collection of books. These include: furnishing basic reference						
15	services to the State Legislature and the executive branch of the State Government; assisting and stimulating the development of						
16	public library facilities throughout the State; and representing the interests of the State in the accumulation and preservation of						
17	historical material regarding the State.						
18							
19	Program and Performance						
20							
21	The State Library is composed of 3 operating bureaus, in addition to the Administration Section. These are Field Services, Reader						
22	Services, and Technical Services.						
23	The Field Services Bureau is responsible for the stimulation and development of public library facilities and service throughout the						
24	State and certain delegated responsibilities in relation to supervision of the county libraries.						
25	In 1956-57 assistance was given by the field office staff to county and municipal libraries in the field of management improvement. In						
26	addition to the normal advisory activities, special assistance has been given to 8 libraries in Northern California, 8 in Central						
27	California, and 11 in Southern California.						
28	In the same year this bureau also planned and carried out an institute of public library buildings attended by 79 librarians, architects,						
29	and officials representing 50 libraries. The proceedings of this meeting have been printed and will constitute a source of up-to-date						
30	authoritative information for use by architects and librarians.						
31	The Field Services will continue its program of workshop and advisory services, aiming at recently adopted national standards for						
32	public libraries. The entire field program has been accelerated by the enactment in 1956 of the Federal Library Services Act						
33	through which 5 completely reimbursed projects are demonstrating improved library services and systems in these rural areas:						
34	Butte County; Amador County; Santa Barbara County; Lassen and Plumas Counties; and 15 Northern California counties in						
35	which 11 libraries or systems will have their books cataloged and prepared for use at a co-operative processing center.						
36	In 1956-57 the Reader Services Bureau made several improvements in its procedures to provide more efficient and economical service.						
37	These improvements include the processing of overdue notices, the more rapid processing of government publications, and a revision						
38	of exchange and retention policies.						
39	The current budget carries on the program of the 1956-57 Budget with some important additions. In 1957-58 a professional position						
40	was added to the California Section. With the help of this position the reviewing and processing of valuable Californiana is						
41	proceeding at a more rapid rate. The Administrative Legislative Reference Service through the addition of a professional position						
42	is providing research service to the State Legislature. The Law Section with the addition of an intermediate typist-clerk is						
43	classifying the law collection for more efficient use by the public and the staff.						
44	The budget for 1958-59 carries on these activities with the addition of 1 librarian position and 1½ clerical position for 1 year only to						
45	meet special work in the government publications and law sections.						
46	The microfilming of California newspapers, a responsibility of the Technical Services Bureau has been speeded up by means of a						
47	contract with a commercial firm and through changing the emphasis of the microfilming program in the State Library. An						
48	extensive study of the State Library's microfilming program and other libraries' programs of newspaper microfilming was						
49	completed prior to entering into this contract to insure that the State Library would not duplicate the microfilming which is being						
50	done elsewhere.						
51	The only other new position recommended is a half-time clerk in the Administrative Section due to increased workload.

GENERAL ANALYSIS

Objectives

The 11 state colleges, located strategically throughout the State, offer 5-year programs in teacher education, occupational, technical and preprofessional curricula. 10 of the colleges are regional institutions and, consequently, offer programs that are oriented to meet the need of the regions they serve. California State Polytechnic College is a statewide institution and offers technical programs in agriculture and engineering designed to meet the needs of the entire State.

The California Maritime Academy, controlled by an autonomous board of governors, is also a technical-vocational institution of higher education. The Maritime Academy, supported in part by the Federal Government, trains merchant marine and naval reserve officers.

Program and Performance

Teacher Education

The State Colleges are the most important source of trained teachers in the State of California. The following table illustrates the pre-eminence of the state colleges in the field of teacher education.

Comparison of Percent of Teaching Credential Candidates Supplied by Various Accredited Institutions in California

	State colleges	University of California	Private colleges and universities
1951	40.50%	25.84%	33.66%
1952	42.38%	26.08%	31.54%
1953	46.10%	22.84%	31.06%
1954	50.16%	23.59%	26.25%
1955	56.49%	24.66%	18.85%
1956	56.47%	19.49%	24.04%

Assuming the same relationships that have existed in the past, it can be shown that the state colleges will continue to provide large numbers of teachers for the public schools.

Year	Estimated total teachers to be supplied in California	Estimated teachers to be supplied by state colleges	% of teachers supplied by the state colleges
1957	11,289	6,293	55.7%
1960	14,162	7,387	52.2%
1965	19,524	10,318	52.8%
1970	28,571	17,296	60.5%

It is apparent from this that a large portion of the program of the state colleges is oriented toward teacher training. This is further corroborated by a comparison of total state college graduates with the total graduates receiving credentials. This is shown below:

Year	Total grads.	Total grads. with credentials	% of total grads. with credentials
1954	4,953	2,035	41%
1955	6,127	2,489	40.6%
1956	7,475	2,675	35.8%

^a Student enrollment for colleges represents full-time equivalent students, which are computed on the basis of 15 semester units of instruction representing 1 student equivalent.

^b Includes contributions to State Employees' Retirement Fund. Does not include student fees or other reimbursements.

Department of Education

STATE COLLEGES—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

Teacher Education—Continued

A recent development in the teacher training programs of the state colleges is the establishment of off-campus centers for the offering of teacher education courses for residence credit in areas remote from a state college. Three centers have been established, at Bakersfield, at Santa Ana in Orange County, and at Santa Rosa. The popularity of these centers is reflected in the enrollment growth. This is illustrated by the following table:

	FTE ENROLLMENT OFF-CAMPUS CENTERS		
	1956-57	1957-58	1958-59
Bakersfield -----	123	152	200
Orange County -----	—	75	130
Santa Rosa -----	71	115	140

The number of teachers produced is only one facet of the role of the colleges in the field of teacher training. The colleges are also constantly alert to the development of new techniques in teaching. This is evidenced, in part, by the recently approved programs in closed circuit television and the growth in the use of audio-visual materials, both of which point to the fact that the large number of teachers trained by the state colleges are exposed to the latest and best teaching techniques available.

Science and Engineering

Measured by the demands of industry and the current emphasis on technological achievement, science and engineering are among the most important occupational offerings in the state colleges. These programs are also important from the standpoint of enrollment, for approximately 22 percent of the total enrollment in the state colleges can be attributed to them.

Science programs in the state colleges have 2 basic objectives: first, to prepare science teachers and second, to meet the need of the industries of California for people trained in the sciences. The 2 objectives are inseparable in the statistical data available. The role of the state colleges in producing personnel trained in the sciences can be seen in the number of graduates produced. The total number of science graduates, as compared to total graduates, is shown below.

YEAR	TOTAL GRADS.	SCIENCE GRADS.	SCIENCE GRADS. AS % OF TOTAL
1954	4,953	400	8.1%
1955	6,127	372	6.1%
1956	7,475	452	6%

8 of the state colleges are approved to offer engineering programs. These include California State Polytechnic College, Chico, Fresno, Long Beach, Los Angeles, Sacramento, San Diego, and San Jose. California State Polytechnic College, with approximately 1,180 full-time equivalent students, has the largest undergraduate enrollment in engineering of any single campus in the State of California. The program at Long Beach State College was approved in July, 1957, and will be implemented with funds provided in the 1958-59 Budget.

The number of engineering graduates from the state colleges, compared with total graduates, is shown below.

YEAR	TOTAL GRADS	SCIENCE GRADS	ENGINEERING GRADS AS % OF TOTAL
1954	4,953	137	2.8%
1955	6,127	241	3.9%
1956	7,475	444	5.9%

Agriculture

3 of the State Colleges, California State Polytechnic, Chico, and Fresno offer degree programs in agriculture. The total enrollment in these programs is approximately 900 FTE; the support expenditures approximate \$2,500,000. The degrees granted in agriculture, compared to total degrees, is shown below.

YEAR	TOTAL GRADS	AGRICULTURE GRADS	AGRICULTURE GRADS AS % OF TOTAL
1954	4,953	260	5.2%
1955	6,127	292	4.8%
1956	7,475	309	4.1%

Other Programs

The State Colleges grant degrees in over 140 areas of concentration. Some of the more important programs not listed above include business, government, industrial arts, international relations, journalism, mathematics, music, nursing, occupational therapy, police science, psychology, and social science. At Humboldt State College there are also unique programs in fish and game management and in forestry.

Department of Education

STATE COLLEGES—Continued

MAJOR PROGRAM AUGMENTATIONS AND COSTS

The total increase in 1958-59 over amounts budgeted for the state colleges in 1957-58 is \$7,552,425, or 17.5 percent. The major portion of this increase results from increased workload arising from enrollment growth and plant expansion. There are, however, several items of expenditure which cannot be attributed solely to workload growth. All major changes in the expenditures for the state colleges are itemized below.

Salaries and Wages:

Additional teachers

a. For enrollment growth in accordance with accepted staffing standards	\$1,118,070
b. For new curricula	390,870
c. For the change in the staffing standard for science laboratory teachers	296,940
Administrative, technical and clerical personnel for enrollment growth in accordance with accepted staffing standards	1,494,330
Maintenance personnel for new facilities in accordance with accepted staffing standards	804,169
Extension of 1957-58 part-year positions and salary adjustments for the full 1958-59 school year	2,237,159
Decrease in estimated salary savings	—60,405

Operating Expenses:

a. For the implementation of Chapter 2321, Statutes of 1957, which authorized the payment of moving and traveling expenses to facilitate recruitment for positions for which there is a shortage of applicants	35,470
b. For price increases, growth of enrollment, growth of staff, and the opening of new facilities	1,025,662

Equipment:

a. Furniture for new positions	257,756
b. Purchase of IBM accounting and sorting machines which were formerly leased	165,269
c. Decrease in support equipment needs due to capital outlay expenditures for equipment	—84,169
Increase in contributions to State Employees' Retirement Fund	398,862

Included in the above tabulation are the expenditures resulting from the opening of a downtown center by San Francisco State College, and the additional expenditures resulting from the creation of a separate state college from the San Fernando campus of Los Angeles State College. The total expenditures for the downtown center are \$102,367. However, a large portion of this amount would be necessary even if the programs to be carried on in the downtown center were housed on the main campus. The increased expenditures incurred because of separate college status for the San Fernando Valley campus cannot be defined. The rapid enrollment growth at the campus and the opening of new buildings would have necessitated a large increase in the budget without the separation from Los Angeles State College. The only expenditures which can be safely related to the formation of a separate college are those necessitated by the addition of 11.5 administrative positions at a cost of \$89,808. The total gross increase in expenditures listed above is offset in part by an increase in reimbursements of \$424,504.

Proposed New Positions:

The budget includes a total of 932 additional permanent and temporary positions. The following table shows the distribution of these positions by college and by principal function.

PROPOSED NEW POSITIONS FOR STATE COLLEGES

COLLEGE	TEACHERS (Class instruction only)			PROFESSIONAL CLASSES			CLERICAL AND TECHNICAL		Health services	Off-campus center	Maintenance and operation of plant	College farm	Total positions

Department of Education

STATE COLLEGES—Continued

PROPOSED NEW POSITIONS FOR STATE COLLEGES—Continued

1. Teachers—these include only those teaching positions which carry an instructional load.

a. Change in staffing standard for science teachers.

In 1957-58 a start was made to reduce the teaching load of laboratory teachers in the sciences. Under the previous standard, a science laboratory instructor was required to carry a 24-class-hour load per week. This left 12 hours for class preparation, grading papers, student advising, etc. The change in the formula drops the weekly class load to 18 hours. This not only recognizes the workload involved in preparing for a laboratory class, but also enhances the competitive position of the state colleges in recruiting science faculty. The additional 58.8 positions fully implements the change in the staffing standard.

b. Teachers for new curricula

The 77.4 additional teachers for new curricula are needed to implement curricula that have had prior approval by the State Board of Education. The need for the teachers has been justified by application of the approved faculty staffing formula. The various curricula to be implemented are described in the individual college budgets.

c. Teachers required because of increased enrollment

The need for additional teachers because of enrollment growth is determined by application of a faculty staffing formula which was first adopted as a budgeting tool in 1953-54. The formula, which recognizes both instructional and noninstructional load, shows a need for 221.4 additional teachers.

2. Other Professional Classes

a. Instructional Supervision

These positions include such titles as division chairman, curriculum supervisor, and curriculum co-ordinator. The positions all have the responsibility of supervising various aspects of the instructional program. The need for division chairman is measured by the number of teaching positions within a homogeneous grouping of curricula. Curriculum supervisors are fractional teaching positions released from instructional responsibility in order to develop a new curricula or supervise the offerings in a large existing curriculum. Curriculum co-ordinators, also fractional teaching positions released from instructional responsibility, supervise students doing internship work away from the college. These are used primarily for the supervision of practice teachers.

b. Administration

Since the 1957-58 budget included a major augmentation in administrative staffing, the positions included in this category are only those required to meet the demands of increased workload. The large number of positions for San Fernando Valley State College are necessitated because of the separation from Los Angeles State College.

c. Library

The librarians included in this category are required either because of increased acquisitions or because of additional public service points added by new facilities. The need for these positions is determined by the application of an accepted formula.

3. Clerical and Technical

Without exception, these are workload positions allowed in accordance with accepted standards. The positions categorized under instruction also include clerical and technical help needed for the libraries.

4. Health Services

Including doctors, nurses, laboratory technicians and clerks, these positions are required by increased enrollments. Chico State College has acquired a health service building and will, therefore, implement a full health service program in 1958-59.

5. Off-campus Center

These positions include teachers and clerks needed because of increased enrollment.

6. Maintenance and Operation of Plant

During 1958-59 a total of 32 new buildings will be put into operation at the various state colleges. This large increase in physical plant requires a concomitant increase in staffing to maintain the buildings. The largest portion of the staffing can be attributed to custodial positions. These are allowed on a ratio of 1 to 15,000 square feet. Los Angeles State College is opening a complete complement of permanent buildings which contain approximately 625,000 square feet. This necessitates an addition to the maintenance staff of 96 positions.

7. College Farm

The slight increase in staffing for the 4 college farms reflects the small enrollment growth in agricultural programs. The positions at Chico State College are needed because of the farm the college will put into operation in 1958-59.

24					
25	GENERAL ANALYSIS				
26					
27	Objectives				
28					
29	Chico State College is a five-year, fully accredited college, with programs in teacher education, occupational and preprofessional				
30	curricula designed to meet the needs of seven counties in the upper Sacramento Valley and in the contiguous mountain regions.				
31					
32	Program and Performance				
33					
34	Chico State College, second oldest of California's state colleges, has as a primary responsibility the providing of teacher training.				
35	As a secondary function the college provides training in liberal arts and occupational and preprofessional subjects. The best				
36	measure of the college's success in fulfilling these obligations is the number of credentials issued and the degrees conferred				
37	by the college. This information for the years 1954-55 through 1956-57 is shown in the table below:				
38					
39		1954-55	1955-56	1956-57	
40	Students securing teaching credentials-----	168	204	202	
41	Degrees granted -----	149	177	223	
42					
43	It is apparent from the above table that Chico State College is still primarily a teacher training institution. Approximately 60 percent				
44	of the students are working toward a teaching credential.				
45	Other programs which occupy an important place in the offerings of the college include business, industrial arts, nursing and social				
46	science. Approximately 45 percent of the graduates in 1955-56 received degrees for concentrations in these areas. Chico was one of				
47	the first state colleges to offer a degree program in nursing.				
48	Of future importance among the offerings of the college will be the degree program in agriculture. Chico offered a two-year terminal				
49	program in agriculture until 1957-58. In that year they began to offer a full four-year degree program. As a consequence of				
50	this, the college facilities will be augmented in 1957-58 by a 700-acre farm with the necessary animals and equipment to operate				
51	it. This land area, with the addition of buildings and other necessary facilities will permit agricultural offerings for approxi-				
52	mately 500 FTE. This added program has the effect of increasing the workload in all of the administration functions. In 1958-59,				
53	4.5 positions are added to operate this program.				
54	Other new programs, for which 2 additional teachers are included in the budget, are a masters of science program in business and				
55	bachelor degree programs in social welfare and agricultural business.				
56	In 1957-58 a start was made to reduce the teaching load of laboratory teachers in the sciences. This program is continued in 1958-59				
57	to bring the teaching load to an acceptable level and to enhance the competitive position of the state colleges in recruiting science				
58	faculty. This will require 3.2 additional teachers.				
59	The remaining increases in the budget are due to increased workload caused by the acquisition of an additional site, the completion				
60	of new buildings and increased enrollments. In one site acquisition project the college acquired a building suitable for a full				
61	student health program. To implement the student health program it was necessary to add 5.4 positions. The cost of the added				
62	service is partially offset by a \$4 increase in student fees.				
63	The college also acquired approximately 50,000 square feet of space which must be used temporarily for classroom and office space.				
64	Provision is made for the maintenance of these facilities. The college will open a new classroom building in 1958-59 for which				
65	additional maintenance personnel are required.				
66	All additions to the 1958-59 budget have been made on the basis of established and accepted formulas.

GENERAL ANALYSIS

Objectives

Fresno State College is a 5-year, fully accredited college, with programs in agriculture, teacher education, and occupational and pre-professional curricula designed to meet the needs of the counties in the San Joaquin Valley.

Program and Performance

Fresno State College, established in 1911, will be moved completely during the 1958-59 year from its original campus near downtown Fresno to a new 1,100-acre site on the outskirts of the city. At this new site the college will continue to carry out its traditional function of teacher training and will also continue to expand its programs in agriculture and other occupational and preprofessional curricula.

The performance of the college in fulfilling its responsibilities toward the area it serves is best illustrated by the number of successful teacher training candidates produced by the college and the number of degrees conferred. This is shown below.

	1954-55	1955-56	1956-57
Students securing teaching credentials-----	306	273	381
Degrees Granted:			
General and professional-----	426	545	606
Agriculture -----	50	71	73

While the agriculture program at Fresno carries a very high cost per student, the single most important program at Fresno State College, from the standpoint of enrollment, is teacher education. Approximately 30% of the total enrollment of the college can be attributed to teacher education programs.

Other programs of significance in the total offerings of the college include accounting, biology, business, engineering, physical education, and physics. Approximately one-third of the degrees granted in 1956-57 were granted to students who concentrated in these areas.

Of future importance among the offerings at the college will be the recently approved bachelor degree programs in nursing and recreation and the masters degree programs in psychology, business, and physics. An additional 3.5 teachers are included in the budget to implement these programs.

Fresno State College is one of the three state colleges which has been authorized to conduct an off-campus resident center. The off-campus center administered by Fresno is located in Bakersfield and offers programs for resident credit in teacher education only. The enrollment anticipated at the center for 1958-59 is 200 F.T.E. In the coming year the center will be required to rent facilities that were previously provided by the junior college.

^a Does not include employees' retirement or pro rata charges for administrative services performed on the Fresno Campus.

FRESNO STATE COLLEGE—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59			
1	GENERAL ANALYSIS—Continued						
2							
3							
4	Program and Performance—Continued						
5							
6	In 1957-58 a start was made to reduce the teaching load of laboratory teachers in the sciences. This program is continued in 1958-59						
7	to bring the teaching load to an acceptable level and to enhance the competitive position of the state colleges in recruiting science						
8	faculty. This will require 3.7 additional teachers.						
9	Increases in the budget that have not been enumerated above can be attributed to rising enrollments and the opening of new build-						
10	ings. Buildings to be opened in 1958-59 include the art-homemaking building, the home management house, the speech-little						
11	theatre building and classroom building No. 2. To maintain this expanded plant, an additional 5 positions are included in the						
12	budget. The remaining 35.1 positions are required because of increased enrollment. These include 2.7 administrative positions,						
13	16.3 teachers, and 16.1 technicians and clerks.

GENERAL ANALYSIS

Objectives

Humboldt State College is a five-year, fully accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of the northwestern counties of the State.

Program and Performance

Humboldt State College was established to carry out the primary function of teacher training. The success of the college in performing this function is seen in the number of teaching credential recipients the college has produced. Its total performance in educating the youth of California is best measured by the number of degrees conferred by the college. A tabular representation of this performance is as follows:

	1954-55	1955-56	1956-57
Students securing teaching credentials-----	75	80	105
Degrees granted-----	61	98	106

Among its occupational curricula, Humboldt State College, because of its unique location, has offerings in fish and game management. These programs occupy an important place in the offerings of the college. In 1954-55, 15 percent of the total degrees granted were to students majoring in either fish or game management. In 1956-57, the total was 25 percent. Of future importance will be the recently approved program in forestry for which 1.4 additional teachers are included in this budget.

The college was also recently approved to offer a degree program in nursing, and 1.8 teachers have been added to the budget for this purpose.

In 1957-58 a start was made to reduce the teaching load of laboratory teachers in the sciences. This program is continued in 1958-59 to bring the teaching load to an acceptable level and to enhance the competitive position of the state colleges in recruiting science faculty. This will require 2.3 additional teachers.

The remaining increases in the budget are due to expanding enrollments and the opening of new buildings. These increases result in 12 additional teachers, 12.3 technical and clerical positions and 12.5 positions for the maintenance of new buildings including the speech arts, field house and natatorium buildings.

^h Composed of savings in salaries and wages, \$54,364; operating expenses, \$45,021; equipment, \$2,446; and loss in reimbursements, \$24,542.

ⁱ Composed of savings in salaries and wages, \$1,666; operating expenses, \$9,049; equipment, \$2,069; and loss in reimbursements, \$1,581.

GENERAL ANALYSIS

Objectives

Long Beach State College is a 5-year, full-accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of Orange and south Los Angeles Counties.

Program and Performance

One of the newest of the State Colleges, Long Beach State College was established in 1949 to meet the demand for a teacher training institution in the Long Beach area. Since its establishment, Long Beach has grown to one of the largest of the State Colleges and now offers a variety of courses, not only in teacher training, but also in occupational and preprofessional fields. The performance of the college in meeting the needs of the area it serves is best illustrated by the number of teacher training candidates produced by the college and the number of degrees conferred. This is shown below.

	1954-55	1955-56	1956-57
Students securing teaching credentials -----	279	358	388
Degrees granted -----	474	551	758

Though a relatively new college, Long Beach State has already developed areas of emphasis in occupational programs. These areas include biological science, business, English, industrial arts, music, physical education, social science, and sociology. Of the graduates produced in 1955-56, 48 percent received degrees in these areas of concentration.

Of future importance will be the newly approved program in engineering. An additional 3 teachers are included in the budget for implementation of this program.

The only other increase in instructional staffing not directly related to enrollment growth is the change in the staffing standard for laboratory science teachers. In 1957-58 a start was made to reduce the teaching load of laboratory teachers in the sciences. This program is continued in 1958-59 to bring the teaching load to an acceptable level and to enhance the competitive position of the state colleges in recruiting science faculty. This will require 4.1 additional teachers.

In 1957, the Legislature authorized Long Beach to operate an off-campus residence center in Orange County. Such a center has been opened in the City of Santa Ana. As in the case of the centers operated by Fresno and San Francisco State Colleges, residence credit is offered for courses in teacher education only. It is anticipated that the enrollment will nearly double in 1958-59. To accommodate this enrollment, an increase of \$33,595 is included in the budget.

The college will open 3 new buildings during the 1958-59 year. These include a library addition, a science building, and a home economics building. These additional facilities require 26.6 additional positions for maintenance and 12.5 additional positions for staffing the library.

The remaining 61.6 positions can be attributed to an increased enrollment. These positions include 3.4 positions in administration, 28 teachers, and 30.2 technicians and clerks.

19	GENERAL ANALYSIS				
20	Objectives				
21					
22	Los Angeles State College of Applied Arts and Sciences is a 5-year, fully accredited college with programs in teacher education,				
23	occupational, and preprofessional curricula designed to meet the needs of Los Angeles County.				
24					
25	Program and Performance				
26					
27	Los Angeles State College, with 1,212 students expected to receive teaching credentials in 1958, has the largest teacher training				
28	program of any single institution in the State. Established in 1947, the college was given the double responsibility of training				
29	students to become teachers and training students for gainful occupations in the arts and sciences as related to business and				
30	industry. The extent to which the college has fulfilled these responsibilities can be seen in the number of teaching credential				
31	recipients the college has produced and the number of degrees conferred by the college. This is shown below:				
32					
33					
34	Students securing teaching credentials -----	1954-55	1955-56	1956-57	
35	Degrees granted -----	482	769	725	
36					
37					
38	A unique aspect of the occupational programs at Los Angeles State College is the work-study program. In order to provide training				
39	which relates practical work experience with classroom instruction, co-operative arrangements with business and industry have				
40	been established to give a student the opportunities for work experience in his major.				
41	Other than teacher education, important programs at the college include business, English, government, music, nursing, police science,				
42	psychology, social science, and sociology. Approximately 52 percent of the 1955 graduates received degrees in one of these areas				
43	of concentration.				
44	In 1958-59, Los Angeles State College will, for the first time, be completely housed on its own campus rather than on the campus of				
45	Los Angeles City College. All of the major buildings on the San Bernardino Freeway campus are scheduled for completion by				
46	the fall of 1958. The new buildings include a cafeteria, administration building, science building, library, music-speech building,				
47	industrial arts and engineering building, fine arts building and gym. This is an addition of 665,000 square feet. Additions to				
48	the budget resulting from these increased facilities include:				
49					
50	95 maintenance positions -----				\$363,180
51	1.5 library positions -----				4,856
52	Increased Operating Expense:				
53	Maintenance -----				50,000
54	Utilities -----				106,780
55	Moving expense -----				7,500
56	Total -----				\$532,316
57					
58	This additional cost is partially offset by a decrease in rental of instructional facilities and bus transportation of \$131,570. Therefore,				
59	the net increase is \$400,746.				
60	Another major change in the college which is reflected in the 1958-59 budget is the implementation of legislation which makes the San				
61	Fernando Valley Campus a separate college in July of 1958. This results in a decrease in the Los Angeles College budget of				
62	approximately \$500,000.				
63	The remaining additions to the Los Angeles State College budget, with one exception, can be attributed to rising enrollments and				
64	increased workload. The one exception is the change in the staffing standard for science laboratory teachers. In 1957-58 a start was				
65	made to reduce the teaching load of laboratory teachers in the sciences. This program is continued in 1958-59 to bring the teaching				
66	load to an acceptable level and to enhance the competitive position of the state colleges in recruiting science faculty. This will				
67	require 1.5 additional teachers.				
68	Enrollment and workload increases result in the addition of 2.3 administrative positions, 43.5 teachers, and 14.9 clerical and technical				
69	positions.

GENERAL ANALYSIS

Objectives

Sacramento State College is a five-year, fully accredited college, with programs in teacher education, occupational and pre-professional curricula designed to meet the needs of the 13 counties in the South Sacramento Valley and Central Mountain regions of California.

Program and Performance

Sacramento State College, established in 1947, has as a primary responsibility the providing of teacher training. The success of the college in carrying out this responsibility is seen in the number of teaching credential recipients the college has produced. As a secondary responsibility the college provides training in liberal arts and technical subjects that meet occupational and pre-professional needs. The single best measure of the performance of the college in fulfilling these responsibilities is the number of degrees conferred by the college. A tabular representation of the performance of the college is shown below.

	1954-55	1955-56	1956-57
Students securing teaching credentials-----	201	226	249
Degrees granted -----	245	470	723

Of special importance among the occupational offerings at Sacramento State College, is the program in business administration. In 1955-56, 16 percent of the degrees granted by the college were to students majoring in business administration. The recently approved programs in recreation, engineering and nursing should be of future importance. Three additional teachers and a part-time curriculum supervisor are included in the budget for the nursing program.

Sacramento, like some of the other state colleges located in large urban areas, has a large evening program. This results in a large number of individuals for each full-time equivalent student. The total individual enrollment anticipated for 1958-59 is 6,257. Of this number, 3,125 or 49.9 percent are limited students (those taking fewer than 7 units). This disproportionately high concentration of limited students creates a need for staffing in the student personnel area that is not reflected in the full-time equivalent enrollment figures. An additional 2.5 positions are included in the budget to meet this workload.

In 1957-58 a start was made to reduce the teaching load of laboratory teachers in the sciences. This program is continued in 1958-59 to bring the teaching load to an acceptable level and to enhance the competitive position of the state colleges in recruiting science faculty. This will require 2.5 additional teachers.

Other items of increase are those required by the opening of the new library (9 positions), the expansion of audio-visual facilities (1.5 positions), and general workload increase (13 positions).

14	GENERAL ANALYSIS				
15					
16	Objectives				
17					
18	San Diego State College is a five-year, fully accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of the Southern Counties of the State.				
19					
20	Program and Performance				
21					
22	San Diego State, first established in 1897, has a long history of providing teachers for the public schools of the State of California.				
23	More recently it has met the needs of the southern counties for people trained in various occupational programs. The performance of the college in fulfilling these responsibilities is best illustrated by the number of successful teacher training candidates produced by the college and the number of degrees conferred. This is shown below.				
24					
25					
26					
27					
28		1954-55	1955-56	1956-57	
29	Students securing teaching credentials-----	316	390	445	
30	Degrees granted -----	573	689	812	
31					
32	Perhaps more than any other state college, San Diego is moving away from the traditional characterization as a teacher training institution for only 25 percent of the student body has the objective of a teaching credential.				
33	Other than teacher training, the important offerings at San Diego include accounting, business administration, liberal arts, physics, psychology and social science. One third of the graduates in 1955-56 received degrees for concentrations in these majors. Of increasing importance are the graduate programs in chemistry, physics and mathematics. The college was recently authorized to grant master degrees in these areas, and 6.5 positions are added to the budget to implement these programs.				
34	In 1957-58 a start was made to reduce the teaching load of laboratory teachers in the sciences. This program is continued in 1958-59 to bring the teaching load to an acceptable level and to enhance the competitive position of the state colleges in recruiting science faculty. This will require 6.8 additional teachers.				
35	San Diego is a college characterized by rapid growth and expansion. In 1958-59 three additional buildings will open. These include the fine arts building, the library addition and the administration building addition. A total of 15 additional positions are included in the budget for staffing and maintaining these new buildings.				
36	The remaining 22.7 additional positions can be attributed to general workload increases.

GENERAL ANALYSIS

Objectives

San Fernando Valley State College, as of July, 1958, will offer programs in teacher education, occupational and preprofessional curricula designed to meet the needs of the San Fernando Valley portion of Los Angeles County.

Program and Performance

San Fernando Valley State College, as the result of Chapter 2265, Statutes of 1957, will become a separate state college on July 1, 1958. Until that time it will continue to be operated as a campus of Los Angeles State College of Applied Arts and Sciences. The 139.1 positions shown as now authorized are transferred from the budget of the Los Angeles State College of Applied Arts and Sciences.

Located in one of the fastest growing areas of the State, the college can be expected to experience rapid growth. Some evidence of this is already apparent in the doubling of enrollment in the 2 years the college was operated as a campus of Los Angeles State College. In 1956-57 the enrollment was 646 FTE; in 1957-58 the enrollment is estimated to be 1,167 FTE. An enrollment of 1,750, an increase of 583 FTE is estimated for 1958-59.

Like the other state colleges, this college will emphasize teacher training, and will also offer occupational and preprofessional programs. The budget includes 5 additional teaching positions for the implementation of new curricula. These include education, safety and business.

The only other increase in instructional staffing not directly related to enrollment growth is the change in the staffing standard for laboratory science teachers. In 1957-58 a start was made to reduce the teaching load of laboratory teachers in the sciences. This program is combined in 1958-59 to bring the teaching load to an acceptable level and to enhance the competitive position of the state colleges in recruiting science faculty. This will require 0.4 additional teachers.

One large area of increase in the budget results from budgeting positions for workload that was formerly absorbed by Los Angeles State College. These positions are mandatory for the separate operation. They are inseparable from those needed because of enrollment growth. The two factors taken together require 13.8 administrative positions, 35.6 teachers, and 21.9 technicians and clerks. There are also 2.6 positions included for summer session and extension programs. These are fully reimbursed from student fees.

The remainder of the additional staffing is required because of new buildings. These include a boiler plant, a 95,000-square-foot library that will also serve as temporary quarters for administration, and additional temporary buildings. The additional positions include 21.5 maintenance positions and 5 positions to operate the new library.

^a Composed of savings in salaries and wages, \$41,311; operating expenses, \$17,844; equipment, \$1,583; and loss in reimbursements, \$11,698.

^b Expenditure and other statistical data for the current and past actual year are included in the Los Angeles State College budget.

GENERAL ANALYSIS

Objectives

San Francisco State College is a 5-year, fully accredited college, with programs in teacher education, occupational and preprofessional curricula designed to meet the needs of the counties in the San Francisco Bay and peninsula area.

Program and Performance

San Francisco State College, originally established in 1899 at the San Francisco State Normal School, has been operating on its new Lake Merced Campus since 1954. This college, like the majority of the state colleges, has three principal responsibilities. The first is the providing of teacher training; the second is the offering of preprofessional and occupational programs; the third is the offering of general liberal arts programs. The success of the college in fulfilling these responsibilities is seen in the following:

	1954-55	1955-56	1956-57
Students securing teaching credentials -----	681	747	955
Degrees granted -----	847	928	1,156

SAN FRANCISCO STATE COLLEGE—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	CHANGE FROM 1957-58
1	GENERAL ANALYSIS—Continued				
2	Program and Performance—Continued				
3	Of the state colleges that have had full, 5-year programs, San Francisco State College has granted the largest number of masters				
4	degrees. In 1956-57, the college granted 259 masters degrees. This was 21 percent of the total of such degrees granted by the				
5	state colleges.				
6	San Francisco State College is also unique in its development of programs for the training of teachers of exceptional children. In				
7	1956-57, a total of 18 graduates received degrees in exceptional child education. The budget includes an allocation of \$200,000				
8	received from the Federal Government for the development of programs for training teachers of the mentally retarded. The college				
9	has the additional advantage of being located adjacent to the School for Cerebral Palsied Children—Northern California, which				
10	serves as a laboratory school for the training of special credential candidates.				
11	The college has also assumed leadership in programs in art, biological science, business, English, industrial arts, music, physical edu-				
12	cation, psychology, social science and social welfare. Approximately 45 percent of the degrees granted in 1956-57 were granted to				
13	students who concentrated in these areas.				
14	Of future importance will be the newly approved programs in nursing, junior college credential, actuarial science and rehabilitation				
15	counseling. The budget includes 5.9 teachers for implementation of these new curricula.				
16	Another program which will be implemented by this budget is the operation of a downtown center. San Francisco State College				
17	recently acquired the University of California's Extension center on Powell Street in San Francisco. In exchange for this build-				
18	ing the University was given the former San Francisco State College Campus. The Powell Street building is to be used by the				
19	state college as an administrative center for its extension programs and as a teaching center for the School of World Business.				
20	The initial cost to the General Fund for implementation of this program is approximately \$100,000. Of this amount, \$20,000 is				
21	for an initial complement of equipment. This will be repaid to the General Fund from extension reimbursements. A total of 19.5				
22	positions are included for the operation of the center.				
23	The college also operates an experimental program in Santa Rosa, California. This center is designed to offer residence credit for				
24	courses in teacher education only, and is projected for an enrollment of 140 FTE in 1958-59.				
25	Other than the foregoing, increases in the budget for San Francisco State College can be related to increased enrollments and the				
26	opening of new buildings. The one exception to this is the change in the standard for science laboratory teachers.				
27	In 1957-58 a start was made to reduce the teaching load of laboratory teachers in the sciences. This program is continued in 1958-59				
28	to bring the teaching load to an acceptable level and to enhance the competitive position of the state colleges in recruiting science				
29	faculty. This will require 3 additional teachers.				
30	In 1957-58, the college will open 4 new buildings: a fine arts addition, a library addition, an administration addition and a classroom				
31	building. This requires an increase in maintenance staffing of 16.2 positions, and an increase in library staffing of 4 positions.				
32	The remaining positions caused by increased workload include 3.2 administrative positions, 35.6 teaching positions, and 24.8 technical				
33	and clerical positions.

13	GENERAL ANALYSIS							
14	Objectives							
15								
16								
17	San Jose State College is a five-year, fully accredited college with programs in teacher education, occupational, and preprofessional							
18	curricula designed to meet the needs of Monterey, San Benito, Santa Cruz, Santa Clara, and San Mateo Counties.							
19								
20	Program and Performance							
21								
22	San Jose State College, established as the California State Normal School in 1862, was the first institution for higher education							
23	established by the State and was given the responsibility "of teaching of such citizens of this State as may desire to engage as							
24	teachers in the public schools * * *"							
25	While still retaining its importance in the field of teacher education (the college now prepares candidates for 22 different creden-							
26	tials for public school service), the college can no longer be characterized as solely a teacher training institution. The college							
27	now has some 25 departments offering programs in various occupational and preprofessional curricula suited to the needs of							
28	the area it serves.							
29	The performance of the college in carrying out its responsibilities is best illustrated by the following:							
30		1954-55	1955-56	1956-57				
31	Students securing teaching credentials-----	639	767	856				
32	Degrees granted -----	1,059	1,270	1,369				
33								
34	As measured by graduates in 1955-56, important programs at San Jose State College include business administration (332 gradu-							
35	ates), engineering (59 graduates), industrial arts (50 graduates), journalism (27 graduates), music (25 graduates), occupational							
36	therapy (36 graduates), police science (24 graduates), psychology (36 graduates) and social science (42 graduates).							
37	With nearly 470 FTE, the Engineering Department at San Jose State College is the second largest in the State College system and							
38	the sixth largest in the State. Funds have been added to the budget to permit accreditation of the program by the Engineering							
39	Council for Professional Development. This accreditation would be on the basis of existing programs and policies regarding							
40	engineering education in the state colleges and would not involve a change in philosophy or courses. Additional engineering							
41	facilities are being planned for the San Jose Campus that are estimated to cost nearly \$7,000,000. In the 1958-59 school year,							
42	the college will inaugurate a program in Mechanical Engineering. Five teachers have been added to the budget for this purpose.							
43	Other new programs for which additional teachers are included in this budget include nursing (5 teachers), master of science degree in							
44	sociology (1.5 teachers), and guidance and counseling credential (.75 teachers).							
45	In 1957-58 a start was made to reduce the teaching load of laboratory teachers in the sciences. This program is continued in 1958-59							
46	to bring the teaching load to an acceptable level and to enhance the competitive position of the state colleges in recruiting sci-							
47	ence faculty. This will require 11.2 additional teachers.							
48	The remaining 45.85 additional positions are included in the budget on established staffing formulas because of increased workload,							
49	primarily in the business office and instructional area. The health service program is also augmented because of increased							
50	enrollment.

33					
34	Objectives				
35	California State Polytechnic College is a 4-year fully accredited college with programs in agriculture, engineering, liberal arts and				
36	teacher education. Because of the unique programs offered by the college and the location of the 2 campuses, the college is				
37	considered to be a statewide institution.				
38					
39	Program and Performance				
40					
41	The camps of California State Polytechnic College at San Luis Obispo has the largest agriculture and engineering program of				
42	any of the state colleges. These programs are designed to meet the needs of the entire State and emphasize the learn-by-doing				
43	approach. The Kellogg-Voorhis Campus has similar programs. Throughout its occupational education, the college uses the				
44	"upside down" curriculum in which the student begins work in his major department in his freshman year and is given				
45	instruction in the practical phases of his field of specialization during the first 2 years of his course.				
46	The performance of the college can be demonstrated by the number of degree and credential recipients in the various areas of				
47	specialization. This is shown below.				
48					
49	Degrees Granted:	1954-55	1955-56	1956-57	
50	Agriculture -----	210	221	236	
51	Engineering -----	96	132	194	
52	Other -----	61	71	216	
53	Students securing teaching credentials-----	35	34	59	
54					
55	Unlike most of the other state colleges, California Polytechnic also provides 2-year technical programs in all agricultural fields.				
56	Recently approved programs at the San Luis Obispo campus include technical arts and home economics. An additional 1.5 teachers				
57	are included in the budget for implementation of these programs. The home economics curriculum reflects the recent enrollment				
58	of women students.				
59	New buildings recently completed on the Kellogg-Voorhis campus will permit the implementation of a variety of programs. Included				
60	among these are a 4th year of agricultural management and sales, a 2d and 3d year of engineering, a 3d year of biological				
61	science, and the first 3 years of teaching majors in several fields. An additional 29.9 teachers are included in the budget to				
62	implement these expanded offerings.				
63	The only other increase in instructional staffing not directly related to enrollment growth is the change in the staffing standard for				
64	laboratory science teachers. In 1957-58 a start was made to reduce the teaching load of laboratory teachers in the sciences.				
65	This program is continued in 1958-59 to bring the teaching load to an acceptable level and to enhance the competitive position				
66	of the state colleges in recruiting science faculty. This will require 19.5 additional teachers.				
67	Other increases in the budget can be attributed to an estimated enrollment increase of 416 FTE at the San Luis Obispo campus				
68	and 456 FTE at the Kellogg-Voorhis campus and to the opening of new buildings.				
69	At the San Luis Obispo campus a new student health service building will be opened. At the Kellogg-Voorhis campus new buildings				
70	include the agricultural production units, the engineering building and the business classroom building. These buildings require				
71	an additional 0.5 positions at San Luis Obispo and 18.2 positions at Kellogg-Voorhis.				
72	General workload increases require the addition of 3.1 administrative positions, 14.2 teachers and 31.2 technical and clerical positions.

14					
15	GENERAL ANALYSIS				
16	Objectives				
17					
18	The Maritime Academy trains qualified young men to become licensed officers in the Merchant Marine. The course is three years and leads to the Bachelor of Science degree in nautical science with specialization in either a deck or an engineering course.				
19					
20					
21	Program and Performance				
22					
23	The three-year training program at the Maritime Academy is culminated by the U. S. Coast Guard examinations for licenses as third mates or third assistant engineers. The student must pass the examination before he can receive a degree.				
24					
25	The program at the academy is supplemented by a training course of three months duration aboard the Golden Bear, a merchant ship loaned to California by the Federal Maritime Administration. In 1957-58 the academy first inaugurated a cruise cycle for the three-year program. The schedule is as follows:

19	GENERAL ANALYSIS				
20	Objectives				
21					
22	This school provides for the education of blind children in order that they may gain knowledge of, and the confidence to cope with their environment.				
23					
24					
25	Program and Performance				
26					
27	This residential school offers general education to blind, partially blind, and deaf-blind children through the elementary and high school levels. Besides special teaching methods and techniques, special equipment such as Braille writers, Braille books, embossed maps and globes, geometric models, models for nature study, audio and various types of other equipment are also used.				
28	The Helen Keller deaf-blind unit is the only one in the Western United States where these doubly handicapped children may receive an education.				
29	In addition to the residential aspects, field service is available for preschool blind children, graduates, and ex-pupils. The school also administers reader service for blind college students.				
30	During the Fiscal Year 1958-59 the program will provide general education for 175 resident children, field services for 170 preschool children, guidance services for approximately 50 former pupils, and reader service for approximately 60 blind college students.

18					
19	GENERAL ANALYSIS				
20					
21	Objectives				
22					
23	This residential school educates mentally normal deaf children from elementary through high school grades with special emphasis				
24	language concepts.				
25					
26	Program and Performance				
27					
28	The school offers a curriculum similar to that found in public day schools. Special speech instruction is available for all students using				
29	oral techniques as well as lip reading and finger spelling.				
30	Within the curriculum is a vocational education program which offers the students a certificate of proficiency in any one of the fol-				
31	lowing fields: Printing, cabinet making, shoe repair, baking, business techniques, commercial art and home economics.				
32	The school offers a college preparation course for students to compete for entrance at Gallaudet College in Washington, D. C. This				
33	is the only college in the United States that provides collegiate instruction for deaf people. Of the 42 California students attending				
34	Gallaudet College 36 of them are graduates of this school.				
35	While academic subjects constitute the principal program at this school, the problem of teaching these handicapped children to adjust				
36	to society and everyday problems is met to a large extent by the use of psychologists and counselors.				
37	In 1958-59 an additional custodian is recommended on a workload basis as a new wing to the classroom building is to be occupied				
38	during the year.

17	GENERAL ANALYSIS				
18					
19	Objectives				
20					
21	This residential school educates mentally normal deaf children from elementary through high school grades with special emphasis on language concepts.				
22					
23	Program and Performance				
24					
25					
26	The curriculum of this relatively new school is similar to that found in public day schools but with special instruction for students using oral techniques as well as lip reading and finger spelling.				
27	The vocational education program is an important part of the curriculum. A student may receive a certificate of proficiency in any one of the following fields: home economics, commercial art, printing, cabinetmaking, body and fender repair, spotting and pressing, business education, baking, electric motor rewinding and electric appliance repair.				
28	The school also offers a college preparatory course for students to compete for entrance in Gallaudet College in Washington, D. C.				
29	10 students from this school are expected to attend Gallaudet College in 1958-59.				
30	In addition to the academic and vocational programs offered, the problem of teaching these handicapped children to adjust to society and its everyday problems is met to a large extent by the employment of psychologists and counselors.				
31	The capacity of the school will be increased during 1958-59 by the occupancy of 2 new dormitories with a capacity of 32 each, and 2 new classroom buildings. The staffing for this increased capacity accounts for the major portion of the increase in the budget for 1958-59.

14	GENERAL ANALYSIS				
15	Objectives				
16					
17	This is a residential school designed for the diagnosis and treatment and the determination of an educational program for children from				
18	Northern California afflicted with cerebral palsy or other similar handicaps. It serves also as a demonstration laboratory school				
19	for the training of teachers of handicapped children for the education department of the San Francisco State College.				
20					
21	Program and Performance				
22					
23	The children enrolled at this school are primarily referred from the Crippled Children Services of the Department of Public Health				
24	and from local school districts of the Northern California counties. The students are enrolled for an average of 5 months depending				
25	upon the severity of the handicap, the degree of difficulty in establishing an educational, medical, occupational and therapy				
26	program, and the response of the child's family to parent education and counseling. Upon completion of the residential program,				
27	the child is either returned to his local community for continued medical supervision, treatment, special education or vocational				
28	placement, or is referred to a state hospital for the mentally retarded. During 1956-57 a total of 93 children were				
29	enrolled. In addition to the services to the child, the school provides clinical experience to 6 or more physical therapists per year,				
30	25-30 teachers in training per year, as well as a number of occupational therapists, and psychologists.				
31	No increase in enrollment is anticipated for the budget year. Unit costs are expected to rise slightly due to wage and price increases,				
32	but the same general level of service will continue.

14	GENERAL ANALYSIS				
15	Objectives				
16					
17	This is a residential school designed for the diagnosis and treatment and the determination of an educational program for children				
18	from Southern California afflicted with cerebral palsy or other similar handicaps. It serves also as a demonstration laboratory				
19	school for the training of teachers of handicapped children for the educational department of Los Angeles State College of				
20	Applied Arts and Sciences.				
21					
22	Program and Performance				
23					
24	The children enrolled at this school are referred primarily from the Crippled Children Services of the Department of Public Health				
25	and from the local school districts of the 13 Southern California counties. The students are enrolled for an average of 1 year				
26	depending upon the severity of the handicap, the degree of difficulty in establishing an educational, medical, and therapy pro-				
27	gram, and the response to parent education and counseling. Upon completion of the residential program, the child is either re-				
28	turned to his local community for continued medical supervision, treatment, and special education, or is referred to a state hospital				
29	for the mentally retarded. During 1956-57 a total of 57 children were enrolled with 27 discharged to their local school districts.				
30	Formerly the school served as a diagnostic center for Southern California. This function has been taken over as a part of the				
31	Crippled Children Service of the Department of Public Health.				
32	In 1956-57 Los Angeles State College of Applied Arts and Sciences taught 5 courses at the school during the summer session in				
33	which a total of 44 students were enrolled.				
34	No increase in enrollment is anticipated for the budget year. Unit costs are expected to rise slightly due to price and wage increases				
35	but the same general level of service will continue.

16					
17	GENERAL ANALYSIS				
18	Objectives				
19					
20	The Oakland Orientation Center for the Blind serves a dual purpose: a permanent home for those persons in residence in 1951;				
21	a training center for the orientation of newly blinded adults.				
22					
23	Program and Performance				
24					
25	In relation to the residence aspects of the program the number of permanent residents is decreasing slowly and no new persons have				
26	been admitted for permanent residence since 1951.				
27	The training of the newly blinded persons is becoming the major portion of the work of the center. This is the function which prom-				
28	ises the most lasting benefits.				
29	The training provided includes the techniques of daily living, traveling, physical conditioning, and instruction in Braille. Social and				
30	vocational diagnostic testing, instruction in business principles and methods are also provided. A close liaison is maintained				
31	between the center and the Bureau of Vocational Rehabilitation as well as the home teacher and field service program.				
32	Several criteria predicting the success of the orientation training have been developed. These indicate that success is more likely with				
33	young persons rather than old, the newly blinded rather than those blind for long periods of time, those blinded from localized				
34	eye disease or accident rather than a general systemic disease, the more intelligent rather than the less intelligent, the more				
35	stable rather than the less stable. It is estimated that with proper selection 70% to 80% of the students between the ages of				
36	16 and 50, trained in the center, will be prepared to engage in a remunerative occupation.				
37	While the average number of students is shown as 33 for 1958-59, more than this number will be trained during the year. The indi-				
38	vidual training period varies from 2 to 9 months, depending on the person's response to the training offered. The workload for				
39	1958-59 is being absorbed within the existing staff and the increases in costs are due to price rises and salary increases.

GENERAL ANALYSIS

Objectives

This center provides sheltered employment to blind, visually handicapped, and physically handicapped persons in the Los Angeles area to enable them to contribute to their own support.

Program and Performance

This center is the largest of the three Blind Manufacturing Centers and has the most diversified manufacturing program. This program includes the manufacture of mattresses, pillowcases, brooms, and innumerable small items.

Subcontract assembly-type work is also done at this center and this phase of the program is being currently expanded. The following table illustrates the manufacturing activities of the center for the years 1953-54 through 1956-57. These activities are supported from the California Industries for the Blind Manufacturing Fund while the overhead is supported by the General Fund.

Year	Sales	Total wages paid to blind and handi- capped workers	Total other operative costs	Net profit
1953-54 -----	\$1,037,000	\$253,452	\$755,268	\$28,279
1954-55 -----	806,000	195,431	588,263	22,306
1955-56 -----	987,660	202,705	729,665	55,290
1956-57 -----	944,019	239,509	659,051	45,459

In keeping with recommendations of the Co-ordinating Council on State Programs for the Blind an attempt is being made to make the California Industries for the Blind more competitive. This will be done by placing some of the less productive workers in state supported opportunity work centers. In return, all storekeepers and stock clerks, formerly financed from the General Fund, will be transferred to the Manufacturing Fund to more equitably distribute costs between the two funds. This arrangement will transfer three positions from the General Fund to the Manufacturing Fund at the Los Angeles Center and accounts for the decrease in expenditures for this function at this center. Otherwise the program is at the same general level as in 1957-58.

GENERAL ANALYSIS

Objectives

This center provides sheltered employment to blind, visually handicapped, and some physically handicapped persons in the Oakland area and enables them to contribute to their own support.

Program and Performance

This center specializes in the manufacture of domestic and industrial brooms. Other products such as pillow cases, brushes and rubber mats are also manufactured at this center. An expansion of the subcontract or assembly type manufacturing is proposed for this center during the current and budget year. The following chart illustrates the manufacturing operations of this center for the past 4 years, 1953-54 through 1956-57. These operations are supported by the California Industries for the Blind Manufacturing Fund while the overhead costs are borne by the General Fund.

Year	Sales	Total wages paid to blind and handi- capped workers	Total other operative costs	Net profit
1953-54 -----	\$717,000	\$189,236	\$571,130	—\$43,366
1954-55 -----	\$65,000	209,174	625,877	29,949
1955-56 -----	712,624	200,967	489,587	22,070
1956-57 -----	909,452	228,263	649,579	31,610

In keeping with recommendations of the Co-ordinating Council on State Programs for the Blind, an attempt is being made to make the California Industries for the Blind more competitive. This will be done by placing some of the less productive workers in state supported opportunity work centers. In return, all storekeepers and stock clerks, formerly financed from the General Fund, will be transferred to the Manufacturing Fund to more equitably distribute the costs between the 2 funds. This arrangement will transfer 2 positions from the General to the Manufacturing Fund at the Oakland Center and accounts for the decrease in expenditures for this function at this center. Otherwise the program is at the same general level as in 1957-58.

a Composed of savings in salaries and wages, \$2,166; operating expenses, \$3,036; and equipment, \$186.

15	GENERAL ANALYSIS				
16					
17	Objectives	This center provides sheltered employment to blind, visually handicapped, and some physically handicapped persons in the San Diego area and enables them to contribute to their own support.			
18					
19					
20					
21					
22					
23	Program and Performance	This center specializes in the manufacture of wet and dry mops and related janitorial supplies. There is a limited amount of assembly-type production and a possible expansion of this type of production is being explored. The following table illustrates the financial operations of this center which is the smallest of the 3 blind manufacturing centers. The California Industries for the Blind Manufacturing Fund is charged with the production costs and the General Fund is charged with the overhead costs.			
24					
25					
26					
27					
28					
29					
30					
31	Year	Sales	Total wages paid to blind and handicapped workers	Total other operative costs	Net profit
32	1953-54-----	\$441,671	\$50,998	\$348,559	\$42,114
33	1954-55-----	474,465	54,261	407,265	12,939
34	1955-56-----	641,698	68,107	535,240	38,351
35	1956-57-----	650,549	69,346	525,284	55,919
36					
37	As in the case of the Los Angeles and Oakland centers, the storekeeper and stock clerk positions have been removed from General Fund support and transferred to the Manufacturing Fund. This accounts for the decrease in the budget for 1958-59. Otherwise the program is a continuation of that followed in 1957-58.

GENERAL ANALYSIS

Objectives

The State Scholarship Commission administers a statewide system of competitive scholarships that enables a group of qualified students to attend the college of their choice. These students, because of financial considerations, would be unable to attend the particular college without the scholarship assistance. The program terminates on July 1, 1962.

Program and Performance

The program provided 640 scholarships in 1955-56, 1,280 in 1956-57, 1,920 in 1957-58. A total of 2,560 is authorized for 1958-59 and thereafter. The tests are given and the awards made in the spring of each year while the payment of the awards is made after July 1 and is a charge against the subsequent fiscal year. In 1958-59 tests will be given and awards made for 2,560 scholarships, payments for which will be made in 1959-60, while the payments in 1958-59 will be for awards made in 1957-58. The awards are made both on the basis of scholastic ability and the need for financial assistance for the student to attend the college of his choice. This is done by means of a standardized aptitude test administered by the Educational Testing Service and an evaluation of financial need, by teams of analysts employed on a temporary basis by the commission. For administrative purposes it is necessary to have a much larger number of semi-finalists than award winners. To process and account for the increasing number of applicants and award winners it is proposed to increase the staff of the commission by the addition of a clerical position in 1958-59.

Year	Applicants	Semi-finalists	Authorized	Enrolled award winners
1955-56-----	2,700	1,250	0	0
1956-57-----	5,260	1,900	640	602
1957-58 (Estimated)-----	7,000	2,250	1,280	1,280
1958-59 (Estimated)-----	9,000	2,500	1,920	1,920

The major increase in the 1958-59 budget (\$324,000) is due to the increased number of scholarships awarded in 1957-58.

^a Composed of savings in salaries and wages, \$343; operating expenses, \$105; and equipment, \$383.

17					
18					
19	GENERAL ANALYSIS				
20	Objectives				
21					
22	The function of this system is to provide monthly allowances to public educational personnel who are qualified to retire for service				
23	or disability in accordance with the provisions of the Teachers' Retirement Act and policies established by the State Teachers'				
24	Retirement Board.				
25					
26	Program and Performance				
27					
28	The system maintains personal records for each member of the system and accounts for member, employer and State contributions				
29	and for the investment of such contributions which are kept in trust to finance the accumulation of member credits.				
30	On July 1, 1957, there were approximately 190,000 members of the Retirement System, of whom 17,500 were retired, with a sub-				
31	stantial but undetermined number qualified to retire. The rapid growth in membership is due to the increasing number of profes-				
32	sional personnel required in the public school system. In the past year 20,000 new members were added to the rolls. This number				
33	was unusually large because of an amendment to the law effective July 1, 1956, which now permits all part-time teachers to				
34	become members. It is anticipated that the system will continue to grow at the rate of about 10 percent of the active membership				
35	per year for the next several years.				
36	Because of the unprecedented expansion in membership and legislative action during the 1957 session, it has been necessary to provide				
37	5 additional man-years of temporary help during the 1957-58 Fiscal Year which were financed from the Emergency Fund. In				
38	order to maintain the flow of anticipated workload of the system, it will be necessary to provide 11 additional clerical positions,				
39	2 of which are converted from temporary help, for 1958-59.

8					
9					
10					
11	GENERAL ANALYSIS				
12	Objectives				
13					
14	The commission is charged with the responsibility of making a study of all public libraries in the State as to present organization				
15	and services and to make recommendations regarding improvements in these areas. The commission must also make recommendations				
16	as to whether there is a need for state participation in the financing of local public libraries.				
17					
18	Program and Performance				
19					
20	The commission was created for a two-year period by Chapter 2328, Statutes of 1957, which also contained an appropriation of				
21	\$25,000 for support of the commission in 1957-58. The commission is composed of 9 persons, appointed by the Governor, and				
22	4 members of the Legislature, who also comprise a Joint Legislative Investigating Committee. An organizational meeting has been				
23	held but no staff has been appointed. An amount similar to that already appropriated is proposed for 1958-59 to complete the				
24	work of the commission.				
25	The commission staff will be continued until August 31, 1958, when the major portion of the study and investigation will be com-				
26	pleted. From that point until December 31, 1958, the Research Director and clerical support will be preparing the report for the				
27	commission, and for the remainder of the fiscal year the director will be available to give the Legislature assistance in consider-				
28	ing the findings and proposal of the commission.

63	a Lump sum provisions subject to allocation (for salary increases, academic promotions, contingencies, etc.).				
64	b Current funds available for general and specific purposes, including endowments and donations for support of continuing activities;				
65	does not include funds for services under contracts. Neither the revenues nor the expenditures of University funds are included in				
66	the overall budget totals.				
67	c Net current expenditures (including contributions to the State Employees' Retirement Fund), after deducting current revenue from				
68	sources other than state appropriations. Excludes expenditures, income, and enrollment, if any, for the following activities and				
69	functions, together with the proportionate amount of general administration, general expense, maintenance and operation of plant,				
70	and statewide expenditures attributable thereto:				
71	1. Summer sessions, extension, vocational education.				
72	2. Organized research activities, such as the Agricultural Experiment Station, the Scripps Institution at La Jolla, Lick Ob-				
73	servatory, the Institute of Experimental Biology, etc. However, expenditures for research and investigation carried on				
74	by academic personnel under departmental auspices are included; these are particularly significant in the medical centers				
75	at San Francisco and Los Angeles.				
76	3. Auxiliary enterprises, such as dormitories and dining halls.				
77	4. Organized activities of educational departments, such as the University Creamery at Davis, and the Optometry Clinic				
78	at Berkeley, which are supported out of their own income. However, teaching hospital expenditures in excess of their				
79	income are included in computing expenditures per student.				
80	5. Student aid.

GENERAL ANALYSIS—Continued

Program and Performance

In keeping with these general purposes admission requirements at the University of California are more selective than those of the junior colleges and state colleges, even though the content of introductory courses at the freshman and sophomore levels may be closely comparable for students planning to go on to a bachelor's degree, by transfer or otherwise. The program of the University of California develops greater differences in the upper division, and goes on to levels of professional or general scholarly training not duplicated in other public institutions.

The University operates on 8 major campuses and a number of experiment stations. Major campuses are situated at Berkeley, San Francisco, Davis and Mt. Hamilton in northern California, and at Los Angeles, La Jolla, Riverside and Santa Barbara in southern California. Its full-time resident enrollment has been the largest in the country for a number of years. It reaches the people directly in all parts of the State through its Agricultural Extension Service, including 4-H Clubs, and through University Extension classes, correspondence courses and conferences. It maintains off-campus services through which practicing doctors, lawyers, dentists, engineers, etc., may renew and deepen the value of their services to the public throughout life; a University Press for the publishing and distribution of scholarly books; and diagnostic and treatment centers to which doctors may refer citizens of the State suffering from particularly dangerous or obscure ailments.

In carrying out these programs the University has attained a ranking that places it among the greatest institutions of learning in the world. As a natural part of this development the University has tended to devote its energies to advanced studies and large amounts of fundamental research. As a consequence the student body is heavily weighted in the upper division and graduate schools. One measure of this is the number and type of degrees granted. The table below shows the number of degrees granted in 1950-51 and 1956-57. This table also illustrates the growing trend toward the more advanced types of work. Whereas in 1950-51, 16 percent of the degrees granted were in graduate schools. In 1956-57 this had risen to 21.6 percent.

YEAR	UNDERGRADUATE DEGREES	GRADUATE DEGREES
1950-51	%	%
1956-57	84	16
	78.4	21.6

Another measure of this shift to advanced standing and graduate work can be shown by considering the composition of the enrollment. The table below shows the trend for the years 1954-55 through 1958-59.

	1954-55	1955-56	1956-57	1957-58	1958-59
Lower Division	35.1	34.9	33.3	32.6	32.2
Upper Division	40.8	41.4	42.2	40.5	40.2
Postgraduate	24.1	23.7	24.5	26.9	27.6

The budget for 1958-59 contains provisions in recognition of these trends in enrollment both as to size and composition. The allowances for academic positions at Los Angeles and Berkeley have been made on the basis of a weighted teacher-student ratio which recognizes the differences in requirements for instructing at the lower division, upper division and graduate level. The weighting so used is an interim standard that will be reviewed upon the development of additional information. It is an advance in budgeting for academic personnel and it is expected that continuing studies carried on by the Office of Operational Studies will further refine this standard.

The budget is a continuation of the present level of service and provides for workload increases. Not appearing in the budget but submitted by the regents is the City of Berkeley request that the university reimburse for a pro rata share of police and fire protection and ambulance services rendered by the city to the university. It is a new unauthorized service and as such has not been included in the budget.

Further details concerning the budgetary provisions are contained in the discussions of the various campuses below.

Revenue to the University is estimated to increase \$2,464,564, or 8.5 percent, bringing the total to \$31,535,191 in 1958-59. The major items of increase are summarized in the table below.

Student fees, regular session	\$243,954
This increase reflects the anticipated growth in enrollments as the incidental fee is continued at the present level, \$50 per semester. While this fee was increased early in 1957 and made effective in the fall of 1957 it does not cover the costs of student services traditionally covered by these fees. Such services include health and counseling services, the bureau of occupations, supervision of off-campus housing, recreation facilities, diplomas and laboratory costs. In line with this accepted policy of having the fee pay for the service the budget has been reduced to eliminate the estimated \$458,754 subsidy to these activities. The regents have consistently maintained these fees at a level sufficient to cover the costs of these services. Restoration of the increased level of student services would be appropriate if fee income is sufficient to cover the costs.	
Extension fees	\$490,000
This increase reflects increases in regular extension fees, \$475,000, and receipts of \$15,000 from the operation of the Lake Arrowhead training center.	
Sales and service	\$354,899
This increase is caused by fuller utilization of the hospitals and medical clinics, which account for \$236,989 of the total while the balance is attributable to miscellaneous income.	
Auxiliary and service enterprises	\$897,889
Income from residence halls and dining halls are responsible for \$258,613 of this increase. The balance is from parking operations and the new students union at San Francisco.	

STATEWIDE

This part of the budget includes the statewide and administrative expenditures for the University as a whole. In addition, it also contains the operating budgets for units which function on several campuses or outside of the jurisdictions of chief local administrative officers. These include statewide Agricultural Sciences, Public Health, Graduate Division, University Extension, etc. The statewide budget is also the temporary resting place for miscellaneous lump-sum provisions for contingencies and salary changes, which will later be allocated to appropriate detailed budgets on the various campuses.

More than one-half of the \$2,723,727 increase in the statewide budget, namely \$1,630,974, is for miscellaneous lump-sum provisions budgeted at the outset each year under statewide, but transferred during the year of operations to appropriate campuses and departmental budgets as specific costs are ascertained. Included are sums for contingencies and emergencies, for unallocated statewide endowment income, for promotions and merit increases, for continuation of salary and wage scale adjustments made during the previous year, etc. The increase in 1958-59 largely represents the estimated cost of 1958-59 merit increases and promotions and the fact that continuation of the September 1, 1957, academic salary range increases involves 12 months' cost next year versus only 10 months this year.

UNIVERSITY OF CALIFORNIA—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	
1	STATEWIDE—Continued				
2					
3					
4	The remaining increase in statewide budgets, amounting to \$1,092,753, is slightly below the comparable figure for the University as				
5	a whole.				
6	The principal components of this increase are:				
7	General Administration: \$64,822 for departments and officers of the Regents; \$38,838 for personnel offices on all campuses;				
8	\$75,000 for long-term operational studies; \$28,716 for other offices serving the President; and \$16,684 for the Office of the Vice				
9	President—Business Affairs. These are offset to the extent of \$317,150 by transfer of local purchasing and inventory offices				
10	from statewide to campus budgets.				
11	Pensions and Retiring Annuities: \$144,568, the net increase in Regents' contributions resulting from staff additions and recently				
12	adopted compensation rates applicable for a full year in 1958-59.				
13	General Institutional Service and Expense: \$58,813, reflecting cost increases and greater workloads in occupational health, radia-				
14	tion safety, sanitation, official publications of the University, scholarly publications of the University Press, and the Office of				
15	Relations With Schools. Closely related to these is \$26,909 for school and college placement, the admissions offices at Berkeley				
16	and Los Angeles, junior college examinations, etc.				
17	Organized Research: \$17,061 to provide much-needed supplements for cancer research, marine resources, etc.				
18	Departments of Instruction and Research: \$69,021, of which \$27,465 is required by the graduate divisions, north and south, to meet				
19	the demands of mounting postgraduate enrollment; \$18,406 for agricultural field stations; and \$23,000 for augmentation of the				
20	sabbatical leave replacement fund, and for payment of removal expenses in recruiting new faculty members.				
21	University Extension: \$557,060, as an increase in the budget for regular operations, of which \$475,000 will be obtained from fees on				
22	expanded services to groups and individuals not now being served. The ready-to-serve administrative costs are increased in the				
23	amount of \$132,060, which includes \$54,000 for increased rental and amortization costs on the Hill Street Building, Los				
24	Angeles, and the new Extension Center in San Francisco; \$28,060 for the administrative costs involved in the newly expanded				
25	program; and \$29,651 to make up an existing deficit in administration which is being met by diversion of fees from educational				
26	operations. The remainder will provide a sum for improving equipment and developing new programs. The proposed budget also				
27	includes \$50,000 to initiate television programing centers at Berkeley and Los Angeles, to serve the various campuses.

		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)				
1								
2								
3								
4								
5	In physical size this is the largest of all campuses of the University. On it are housed the College of Agriculture, the School of Veter-							
6	inary Medicine, an agricultural experiment station and a college of letters and science.							
7	The research responsibilities connected with the Agricultural Experiment Station has a larger influence on activities and costs than							
8	on any other campus.							
9	Despite the heavy emphasis on research and correlated agricultural public service, teaching responsibilities are an important factor in							
10	the increases requested. It is estimated that enrollment will increase 8.4 percent in lower division, 22.2 in upper division, and 7.5							
11	in postgraduate instruction.							
12	Of the total increase of \$627,769, or 6.2 percent, the departments of instruction and research account for \$431,647, with \$273,586 for							
13	the College of Agriculture, \$118,790 for the College of Letters and Science, and \$39,271 to the School of Veterinary Medicine. It							
14	is difficult to distinguish instructional costs from research costs because most of the resident teaching staff, including that of six							
15	of the departments of the College of Letters and Science, is also engaged in research for the experiment station.							
16	General administration costs will decline slightly in 1958-59, and general institutional services and expenses show a paper drop of							
17	\$48,205, but this is almost entirely a result of a special, non-recurring expenditure of \$48,000 in 1957-58 for replacement and							
18	additions to the microscope pool to eliminate a cumulative equipment deficit. There will also be a small decline of \$3,504 in expend-							
19	itures for Extension and Public Service.							
20	Aside from these items, the increases at Davis reflect the same pattern of factors found on other campuses, with maintenance and							
21	operation of plant jumping \$90,511, while the library will require only a nominal addition of \$9,173, or 3 percent, to enable it to							
22	carry a 12.7 percent greater student load.							
23	Organized activities of educational departments are relatively greater in importance at Davis than elsewhere, and expansion of the							
24	Dairy Industry Department Creamery for teaching purposes will involve an operating budget increase of \$41,000. Similarly							
25	farm operations incidental to research and instruction will increase \$33,493. Both of these increases are offset by gains in income.							
26	Increases within departments of instruction and research are fairly evenly scattered, except for major augmentations of \$42,803 for							
27	pesticide residue research to meet new federal requirements, and \$22,256 to bolster the attack on the plant nematode problem.

73								
74	The La Jolla campus has for many years been a center for research in oceanography. The 1957-58 Budget contained provision to							
75	establish a graduate program of science and technology. Since that time the regents have adopted a program of establishing							
76	a full scale instructional campus.							
77	The increase in the La Jolla budget, \$214,310 or 13.3 percent, provides for a further development of the technology institute							
78	(\$176,790) but does not provide for the inauguration of a complete undergraduate program.							
79	The amount that can be utilized is limited by currently available space on the La Jolla campus for new staff members and the							
80	administrative, planning, teaching and research activities that are involved. Approximately 61 postgraduate students are ex-							
81	pected at La Jolla in 1958-59.							
82	The remainder of the increase for La Jolla, amounting to \$37,520, or 2.3 percent, provides for needed staff augmentation in							
83	purchaseing, allows \$5,365 for maintenance and operation of plant, \$30,000 additional for ship operation, and \$4,000 for							
84	lectures.

39								
40								
41								
42								
43	The Los Angeles campus has the second highest enrollment in the University. Projections of enrollment indicate that the compo-							
44	sition of the enrollment will be more heavily weighted to the upper division and graduate level even than Berkeley. In 1958-59							
45	it is estimated that 29 percent will be lower division students, while 43 percent and 28 percent will be upper and graduate							
46	division students respectively.							
47	An increase of \$1,472,355 is proposed for the Los Angeles campus including \$262,343 for the Medical Center and \$1,210,012 for							
48	the general campus.							
49	Increases recommended for departments of instruction and research in the School of Medicine are \$60,332, or an average of less							
50	than \$4,000 for the 16 departments concerned. 3 of the departments will show slight decreases in the budget. The hospital							
51	budget will increase an estimated \$174,574, but of this \$80,278 will be covered by additional income. The School of Nursing							
52	is budgeted for an increase of \$21,086.							
53	Increases in other departments of instruction and research including the College of Agriculture, the College of Applied Arts, the							
54	School of Business Administration, the School of Education, the College of Engineering, and the College of Letters and Science							
55	total \$511,145. It is believed that these amounts, well distributed through departments, will meet the needs for instruction and							
56	research. These increases are based on the application of a weighted teacher-student ratio as discussed earlier. The libraries							
57	are budgeted for a 4.1 percent increase.							
58	Organized research concerned with statewide problems of public concern also goes on independently of teaching loads, and an							
59	increase of \$87,871 is proposed to cover additional needs in seawater conversion, numerical analysis, fisheries, organic reaction							
60	mechanisms, governmental problems, and archeological surveys.							
61	Los Angeles general administration is recommended for an increase of \$165,022, almost all of which, \$147,962, represents a							
62	transfer of the expenditures for local inventory and purchasing offices from the statewide section of the budget to the local							
63	campus budget. A similar change has been made at Berkeley.							
64	General institutional services are budgeted for \$227,217, which is \$4,000 below the budget for the current year.							
65	Increased costs at Los Angeles for maintenance and operation of plant must be met without regard to fluctuating estimates of							
66	student enrollment a year from now, since an additional 120,292 square feet of building space is scheduled for use that year,							
67	and costs per square foot are estimated to increase by 2.2 cents. The combined effect is an increase of \$138,725 in the budget							
68	for this function.

MOUNT HAMILTON

Mount Hamilton is the center for the astronomical research of the University. The increase of \$26,036 or 9.4 percent is recommended to continue this internationally recognized research program on the stellar universe at the Lick Observatory on Mount Hamilton. It is expected that the new 120-inch telescope, second largest in the world, will be completed and ready to put into use in 1958-59. The increase proposed will provide an additional position of astronomer. At the same time it will provide a nonacademic position of a senior maintenance man as night assistant on the new telescope, and additional supplies and expense to cover the program of the new telescope and its related laboratory and measuring room building. A decrease in the amount requested for special items brings the total augmentation for educational and general purposes to \$26,036.

RIVERSIDE

The College of Letters and Science, the newest instructional campus of the University, has a permanent location on the Citrus Experiment Station which has been located at Riverside for many years. Of the total budget increase of \$223,726 proposed for Riverside, \$92,986 is earmarked for the Citrus Experiment Station and Agricultural Reference Library. This amount will provide for increased research work in entomology, horticulture, irrigation and soils, plant biochemistry, plant nematology, plant pathology, soils and plant nutrition, and vegetable crops. There will also be established a needed research adjunct, a biometrical laboratory. The remainder of the increase, \$130,740, will go toward the operation and maintenance of the central campus, and the support of the College of Letters and Science.

1								
2								
3								
4	RIVERSIDE—Continued							
5	As is true on other campuses, additions to the physical plant and increased costs of operation and maintenance constitute major							
6	causes of increased expenditure at Riverside for 1958-59, notably for utilities, steam heat, building maintenance, repairs and							
7	alterations, and grounds maintenance, for a total of \$50,240 or 11.9 percent.							
8	The College of Letters and Science expects an increase of 11.3 percent in lower division enrollment, and of 8.6 percent in upper							
9	division enrollment for 1958-59. While the college is staffed to absorb a considerable increase in students in most areas, enroll-							
10	ments do not always come in the fields where they can easily be accommodated. Consequently, a few additions must be made							
11	to relieve teaching overload but with the projected student-teacher ratio showing a favorable increase. The increases for depart-							
12	ments of instruction and research total \$56,210 reduced to \$51,921 by decreases in provision for laboratory equipment and							
13	special items.							
14	Increases of small dollar amount are needed in general administration, student services, organized research, public service, libraries,							
15	and miscellaneous.							
16	Riverside College now offers 25 majors, about normal for a small college, and it should be prepared to accept a continuing increase in							
17	student enrollment for some time without major expansion of the academic staff.

61								
62	SAN FRANCISCO							
63	San Francisco has long been the major medical education campus of the University. It still is larger than the relatively new medical							
64	center at Los Angeles. This campus contains the Schools of Dentistry, Medicine, Nursing, and part of the School of Public Health							
65	as well as the College of Pharmacy and the Hooper Foundation for medical research.							
66	An increase of \$1,216,603 in educational and general expenditures is proposed for the San Francisco Medical Center in 1958-59.							
67	While this increase, amounting to 9.8 percent is not out of line with the estimated increase of 12 percent in student enrollment							
68	for the year 1958-59, it is magnified by a number of important factors:							
69	(1) In 1958-59 preclinical training will be moved back to San Francisco where it was until 1906, and entering classes of the							
70	Medical School will be increased about one-third, to 100 students; (2) physical education facilities will become available at							
71	the Medical Center for the first time, with the completion of the Union Building; and (3) the operation and maintenance							
72	costs of the physical plant will markedly increase with the completion of Medical Sciences Increment II and the opening of							
73	the new Student Union.							
74	Budget increases for the School of Dentistry, School of Nursing, and School of Pharmacy, are in line with estimates of student							
75	enrollment, and are less than the average budget increase throughout the University.							
76	The transfer of preclinical instruction to San Francisco will increase the Medical School budget by \$375,123, partly offset by							
77	savings in Berkeley.

SAN FRANCISCO—Continued

Maintained building area will increase, in round figures, 150,000 square feet, in 1958-59, and costs of operation and maintenance will rise 2.3 cents per square foot, about the same as the average throughout the University. To meet these increases in space and cost the budget for maintenance and operation of plant at San Francisco must go up \$139,616 or 28.9 percent.

Under general institutional services, chiefly as a result of new building areas to be covered in mailing service, and increasing volume of work in the receiving office, a budget increase of \$10,955 is proposed.

Under departments of instruction and research the Medical School, in addition to the 3 new departments transferred from Berkeley, will need substantial strengthening in a number of areas to take care of the 100 student first-year class and 84 student second-year class, and generally increasing costs. The amount involved is \$159,317.

A number of changes in organized research will occur, with increases for 7 projects and decreases for 8. The major increases will be \$17,942 in the cancer program, and \$31,641 in the cardiovascular program, offset in part by transfer to the hospital budget of \$15,000 in bed costs for arthritis research.

Organized activities of educational departments will increase by \$334,859, but this is a relatively small percentage of current volume, and the amount is covered to the extent of \$181,877 by estimated income from the activities involved: the Herbert C. Moffitt Hospital, the College of Dentistry Clinics, and miscellaneous other clinics and laboratories.

SANTA BARBARA

The Santa Barbara College was acquired from the State College System in the immediate post-war years. While it is a part of the University system, it has retained a greater emphasis in teacher training. In 1956-57 there were 1,040 students enrolled in the teacher-training curricula compared to 671 in the School of Education at Los Angeles and 482 at Berkeley.

In 1958-59 an increase of \$355,730, or 9.8 percent, is proposed for Santa Barbara College. This increase reflects the fact that enrollment passed the 2,000 mark in 1956-57, moved to 2,408 this year, and is apparently headed for another 10.8 percent increase in 1958-59, with a new campus still depending on many temporary structures, in process of rapid development.

The major areas of increase are:

Maintenance and Operation of Plant: \$71,620, including provision for 120,296 square feet of new building space, though in this case the per square foot cost is expected to be 2.1 cents lower in 1958-59 than in the current year. The cost will probably decline again as temporary buildings and their high cost of upkeep are eliminated.

Departments of Instruction and Research: \$128,125. There are no new programs contemplated. All departments will be strengthened as needed in accord with student enrollment and maintaining the same student-teacher ratio as budgeted in 1957-58. The major increases will occur in the social sciences, the physical sciences, the biological sciences, and English. The purpose is to carry on the established level of work for a larger enrollment.

The library will require an additional \$12,806, chiefly for books, binding, and some general assistance.

Other additions to the budget are nominal in amount, or in the case of \$15,728 for summer sessions, will be covered by income and reserves.

GENERAL ANALYSIS

Objectives

Hastings is a fully accredited institution offering systematic and thorough instruction in those branches of law which will best prepare the student for the practice of the profession of law.

Program and Performance

Hastings College of Law is the largest publicly supported law school in California. While it has its own board of directors, it is designated by statute as the law department of the University of California, and degrees are issued in the name of the Regents of the University of California.

The college was founded in 1878 by S. C. Hastings with a grant of \$100,000 to the State through the Regents of the University of California. By stipulation in the original agreement the State must pay to the school the sum of 7 percent interest on the grant or repay the \$100,000 in full to a Hastings heir.

For several years following World War II the \$7,000 payment was the only state appropriation received by the college. During the immediate postwar years a large reserve had been built up from the nonresident fees paid by resident veteran students. The main support of the college was paid from this source. Since 1954-55 additional appropriations of \$42,000 have been made each year to cover the expenses of operating the new building which houses the college.

In 1958-59 complete state support of the college must be inaugurated. The budget is prepared on the basis of full state support. Heretofore the college has established and administered its program without reference to state budgetary requirements. A series of changes will be necessary to bring it into conformity with state operating procedures. It is planned that the studies necessary to accomplish this will be undertaken prior to July 1, 1958.

One of the noteworthy parts of the program at Hastings is the "Sixty-five Club." Practically all members of the instructional staff are superannuated in terms of retirement requirements in most institutions. Many faculty members are former deans of other law schools or are distinguished teachers who have been obliged to retire upon reaching retirement age. A very distinguished faculty has been assembled at Hastings by employing these men.

The 1958-59 program calls for the addition of 1 clerical position and the offering of the fourth year courses as has been the practice in alternate years.

b Includes only such donations on hand or firmly pledged which support continuing activities. Other donations for restricted current use received in 1956-57 amount to \$4,816,060.

9					
10	GENERAL ANALYSIS				
11	Objectives				
12	The board makes rules and regulations governing the presentation and auditing of claims relating to the amount and methods of				
13	traveling on official business of the State, and relating to the making of merit awards. Other functions include considering, audit-				
14	ing, and recommending to the Legislature claims against the State for which no appropriation has been made, and hearing appeals				
15	in accordance with the purchasing procedure under the provisions of Section 13391 of the Government Code.				
16					
17					
18	Program and Performance				
19	Each year the board considers approximately 800 claims arising because no fund or appropriation is available or because the settle-				
20	ment of the claims was not otherwise provided for by law. Claims approved by the board are, with the sanction of the Governor,				
21	referred to the next session of the Legislature with a recommendation that an appropriation be made in payment thereof. The				
22	board subsequently pays all claims for which funds have been provided and the Governor has approved. The board meets semi-				
23	monthly to conduct business, consider appeals, establish rules and regulations concerning state travel and per diem expenses,				
24	and hear claims.				
25	The board appoints members to the Merit Award Board on a 2-year basis and monthly considers the recommendations for awards				
26	of that board.				
27	The \$15,000 reduction reflects a change in financing the costs of auditing claims for refunds of taxes requiring approval of the Board				
28	of Control. The cost of such auditing has been included in this budget with a corresponding reimbursement in the budget of the				
29	Audits Division, Department of Finance. This procedure is being discontinued in order to simplify accounting procedures.

GENERAL ANALYSIS

Objectives

The State Controller is the accounting and disbursing officer for the State, maintaining the accounts of all funds and appropriations, determining the legality of all payments and receipts of moneys due the State and disbursing all moneys withdrawn from the Treasury. He supervises the administration of state inheritance and gift taxes; collects the motor vehicle fuel license tax, motor vehicle transportation license tax, and petroleum and gas assessments; administers the tax refunds to nonhighway users of motor vehicle fuel; administers laws concerning county budget procedures; reports state, county, city, district, and street and highway financial transactions; supervises general procedures concerning delinquent property taxes and administers property tax-deeded to the State; administers unclaimed property laws; and field audits expenditures by local governments under the state school building aid programs, social welfare and public health subventions, and the local postwar construction programs.

Program and Performance

The Controller's general administrative staff includes the deputy controllers, administrative adviser, administrative assistant and accounting officer and his staff. They are responsible for administering and supervising the work done by the entire Controller's Office, and for staff services in assisting the Controller in respect to the 16 boards and commissions on which he serves.

In addition to the Administration Division, there are 7 other major divisions which assist the Controller in carrying out his duties and responsibilities as State Controller:

1. Accounting Division maintains the control accounts, unclaimed property and makes financial analyses and prepares the annual report of the Controller.
2. Audits Division makes field audits and all claim audits. They have a branch office in Los Angeles.
3. Disbursements Division handles the actual disbursements, payroll system and the electrical machine accounting work tabulations. There are branch offices in Los Angeles and San Francisco.
4. County Budgets and Reports Division prescribes forms for county budgets, is responsible for reviewing and reporting on the use of state gas tax funds, consolidates and publishes the annual reports of county, municipal and district officials' financial reports. This division has a branch office in Los Angeles.
5. Tax Collection and Refund Division: Through this division the Controller carries out tax collections for 4 different taxes and the refunding of fuel taxes paid for off-highway use of fuel. There are branch offices in Los Angeles, San Francisco, and Fresno.
6. Inheritance and Gift Tax Division has branch offices in Los Angeles and San Francisco. Through centralized supervision, this division administers inheritance and gift tax laws and controls the flow of inheritance and gift tax moneys into the state treasury.
7. Tax-deeded Lands Division. Under the law, tax-delinquent land becomes the property of the State. This division works with local officials to return tax-delinquent property to the local tax rolls. They supervise tax sales and redemptions and maintain a property-management program.

The 16 additional positions proposed in this budget are primarily required for increased workload with the exception of 4 positions for centralization of warrant mailing and 1 for payroll deductions for employee association dues and charitable contributions. These 5 positions are added to the Disbursements Division. The 16 proposed new positions are distributed as follows:

Division	Number of positions
Disbursements Division -----	11
Inheritance and Gift Tax Division -----	3
County Budgets and Reports Division -----	1
Tax Collection and Refund Division -----	1
Total -----	16

a Expenditures from bond funds not included in overall budget totals.

34							
35							
36	AUDITS DIVISION						
37							
38	Objectives						
39							
40	This division audits all claims against the State for correctness, legality, and for sufficient provisions of law for payment. It field						
41	audits expenditures by counties, cities, and other local governmental agencies, under the State School Building Aid Programs,						
42	Social Welfare and Public Health Subventions, and Postwar Construction Programs, to determine the State's share of the costs						
43	of the programs.						
44							
45	Program and Performance						
46							
47	The Audits Division workload is expected to increase in the 1958-59 Fiscal Year. However, it is anticipated that the increased work-						
48	load, which is the equivalent of several positions, will be absorbed through streamlined procedures which have been or will be						
49	installed, and no additional personnel is proposed.						
50	The auditing activity is divided between the Claim Audit Bureau and the Field Audit Bureau. The Claim Audit Bureau audits claims,						
51	contracts, and verifies claims against contracts. Audit activity is expected to increase in the Field Audit Bureau with the new						
52	Community Mental Health Service Program (Chapter 1989, Statutes of 1957). The act provides for state financial assistance to						
53	local governments in the establishment and development of mental health services. While this program will result in increased						
54	workload and the program will be under way in 1958-59, it is anticipated that the impact of the full audit workload will not be						
55	felt until the 1959-60 Fiscal Year.						
56	The postwar public works projects are terminating, but will continue through the 1958-59 Fiscal Year.						
57	There will be an increase in audit activity in the flood control projects as the Department of Water Resources has indicated that 6						
58	additional counties will need field audits of their flood control projects during 1958-59. Another increased workload factor will be						
59	the construction of juvenile camps for the California Youth Authority (Chapter 2403, Statutes of 1957) which, like the Mental						
60	Health Program, will affect this division in 1959-60.						
61

19							
20	DISBURSEMENTS DIVISION						
21							
22	Objectives						
23							
24	This division issues the controller's warrants drawn on the State Treasury and maintains the records of outstanding warrants; ad-						
25	ministers the Uniform State Payroll System including the United States Savings Bond deduction program; and provides electrical						
26	machine accounting service for the maintenance of the State's central control accounts and the treasury trust accounts.						
27							
28	WARRANT WORKLOAD DATA						
29					Total Warrants	Percent Increase Over	
30	Fiscal Year				Issued	Preceding Year	
31	1955-56 -----				2,459,147	3.0	
32	1956-57 -----				2,663,196	8.3	
33	1957-58 (Est.) -----				2,930,030	10.0	
34	1958-59 (Est.) -----				3,129,000	6.8	
35							
36	Program and Performance						
37							
38	The payroll functions are divided between 3 disbursing offices: Sacramento, Los Angeles, and San Francisco. The United States						
39	Savings Bond deduction program is administered by the Los Angeles disbursing office.						
40	In division headquarters 1 accounting tabulating machine supervisor II previously on a limited term basis is now proposed perma-						
41	nently for procedures and planning, particularly to supervise programming for electronic data processing and to supervise						
42	clerical help in division headquarters.						
43	The San Francisco and Los Angeles disbursing offices will each require an additional clerical position because of increased workload						
44	resulting from normal growth of the payroll program and the additional operations in connection with the payroll deductions						
45	for dues in employees' associations and charitable contributions.						
46	2 additional positions are proposed for anticipated workload in the Sacramento disbursing office primarily for the cardatype and						
47	auxiliary services sections. An increase in temporary help of one man-year is proposed for use by all 3 disbursing offices. This is						
48	based on the workload increases in payroll work and is preferred to the establishment of another permanent position at this time.						
49	Provision is made in this budget for centralizing the mailing of approximately 1,661,000 warrants to vendors, retired persons and						
50	other payees, except employees. This proposal would strengthen the internal control in State disbursing procedures. It provides						
51	the physical separation of payment authorization and approval from actual disbursement of moneys. The proposed procedure						
52	has been recommended by Price, Waterhouse and Company, the State Auditor General, and the Organization and Cost Control						
53	Division. Centralizing this function reflects consolidated expenditures in the amount of \$81,257 of which \$56,885 for postage						
54	and envelopes will be saved by individual agencies. Included in the cost of the new procedure are 4 additional clerical positions,						
55	2 of which are proposed for 1 year to permit establishment of procedures and to carry the impact of the large volume of work-						
56	load during the first year of activation. It is anticipated that all 4 positions would not be required permanently. 1 man-year						
57	has been eliminated as a direct offset of the cost of this program in the State Teachers' and State Employees' Retirement Sys-						
58	tems. Although it is not possible to eliminate the fractional employees time saved in other agencies, the elimination of the						
59	warrant handling will permit absorption of limited additional workload without additional staff.

39							
40	INHERITANCE AND GIFT TAX DIVISION						
41							
42	Objectives						
43							
44	This division administers the state inheritance and gift tax laws.						
45							
46	Program and Performance						
47							
48	The staff in this division works out of offices in Sacramento, San Francisco, and Los Angeles. Their basic functions are to represent						
49	the State's interests at the local level and, through centralized supervision, to control the flow of inheritance and gift tax moneys						
50	into the State Treasury. This division affords the taxpayer an opportunity to have his case heard at home in the local courts.						
51	1957 legislation enacted provisions under which clerks of probate courts will send this division copies of court orders fixing the amount						
52	of tax. The law became effective in September, 1957. It is anticipated that in the remaining 9 months of the fiscal year at least						
53	18,000 (annual volume is 24,000) of these orders will be received. This is a new program and temporary help money for the						
54	current year has been increased to permit the employment of extra help equivalent to one-half unit of personnel for 9 months.						
55	Also, a similar provision has been made in the amount for temporary help for the 1958-59 Fiscal Year.						
56							
57					1955-56	1956-57	1957-58
58	WORKLOAD DATA				Actual	Actual	Estimated
59	Gift tax returns-----				4,771	5,401	6,200
60	Inheritance tax returns-----				18,480	19,810	21,197
61							22,681
62	There has been an overall workload increase in this division. Along with the growth in number of returns, inheritance tax revenues has						
63	increased 22.4 percent from 1951-52 to 1956-57.						
64	In Sacramento, there was a backlog of 5,179 gift tax returns as of July 1, 1957, which is a 26 percent increase over the prior year. 1						
65	additional accountant-auditor position is required for processing gift tax returns.						
66	In San Francisco, there have been no additions in auditor staffing since 1951-52, and they are proposing an additional accountant-						
67	auditor for increased workload.						
68	The Los Angeles office proposes an additional file clerk to assist them in handling existing backlogs.						
69

44							
45	COUNTY BUDGETS AND REPORTS DIVISION						
46							
47	Objectives						
48							
49	This division administers the laws relating to county budgets and the reporting of county, city, and district financial transactions,						
50	and provisions of the Collier-Burns Highway Act requiring local jurisdictions to report street and highway financial transactions.						
51							
52	Program and Performance						
53							
54	This division's staff gathers the data and reports on the financial transactions of counties, cities, school and special districts,						
55	irrigation districts, and street and roads of California. The Controller prescribes forms for the use of county auditors in						
56	compiling county budgets. County municipal and district officials send their financial reports to the Controller, who consolidates						
57	and publishes them annually.						
58	Under the Collier-Burns Highway Act of 1947, the Controller is responsible for reviewing and reporting on the use of state gas						
59	tax funds apportioned to local government to insure an adequate accounting from the cities and counties. Twice a year, the						
60	division makes a settlement of financial accounts between the State and the counties. Assisting the division is a 7-man advisory						
61	committee. Members, all of whom represent local government, serve without pay.						
62	The accounting technician position which was budgeted in temporary help on a half-man-year basis in the 1957-58 Budget is pro-						
63	posed as a permanent position due to the workload that now exists in this function.

14	Motor Vehicle Fuel Fund -----				131,832	150,741	155,178
15	TAX COLLECTION AND REFUND DIVISION						
16	Objectives						
17	This division enforces the collection provisions of the Motor Vehicle Transportation License Tax Act, the Motor Vehicle Fuel Li-						
18	cense Tax Act, the tax on insurance companies, and the petroleum and gas production assessments; and administers the refund						
19	of motor vehicle fuel license taxes to nonhighway users, collecting, in the process, state and county sales and use taxes on the						
20	purchases subject to such taxes.						
21	Program and Performance						
22	Through this division, the Controller carries out 2 major functions:						
23	1. Collecting 4 major classes of revenue to the State which are assessed by other agencies—the motor vehicle fuel license						
24	tax and the motor vehicle transportation license tax, assessed by the State Board of Equalization; the insurance com-						
25	panies tax, assessed by the Board of Equalization based upon data received from the Insurance Commissioner; petro-						
26	leum and gas assessments, levied by the Department of Natural Resources. Under these tax laws, the Division of Tax						
27	Collection and Refund enforces the collection provisions, keeping an account with each individual taxpayer. The motor						
28	vehicle fuel license tax is the 6 cents per gallon gasoline tax imposed on distributors. This revenue is earmarked for						
29	construction of state highways and roads.						
30	2. Refunding fuel taxes paid for off-highway use of fuel. This unit investigates the supporting records of claimants and						
31	carries on a program of education and enforcement. In processing such refunds the amount of sales tax on the gasoline						
32	involved is computed and deducted therefrom on behalf of the Board of Equalization.						
33	The division's 80 employees are employed in Sacramento, Los Angeles, Fresno, and San Francisco.						
34	The Fresno office has been sharing stenographic service with the Tax-deeded Lands Division. Workload conditions have reached the						
35	point where each division requires its own stenographer due to the size of staff. This service had been furnished on a half-time						
36	basis from Tax-deeded Lands and the additional half year will be reflected for each of the 2 divisions.

27	TAX-DEEDED LANDS DIVISION						
28							
29	Objectives						
30							
31	This division administers the general procedures for tax sales, tax deeds, and redemptions of lands sold or deeded to the State for						
32	nonpayment of taxes; administers property tax-deeded to the State; advises county officials regarding the levying and collection						
33	of taxes on property, and renders services to the counties relative to delinquent tax accounting.						
34							
35	Program and Performance						
36							
37	The program of the division will continue at the same approximate level in 1958-59 as in 1957-58. The transactions over the last						
38	5 years do not show a particular trend in either direction. Indications from county tax collectors are that there is an increasing						
39	number of tax delinquencies in prospect which may eventually result in additional workload for this division.						
40	Tax-deeded lands have shared joint stenographic help with the Tax Collection and Refunds Division in the Fresno office. Conditions						
41	have reached the point where each division requires its own stenographer due to the size of the staff, and the need to separate						
42	the staffs of the 2 divisions due to space requirements. The position has been budgeted in this division with one-half of the						
43	cost reimbursed by the Tax Collections and Refunds Division. Therefore, the increase in this division is shown as a reduction						
44	in reimbursements. This division has branch offices in Los Angeles, Riverside, Fresno, Oakland, and Eureka.

GENERAL ANALYSIS

Objectives

The State Board of Equalization administers the following General Fund revenue sources: the sales and use taxes, the alcoholic beverage excise taxes, and the private car tax. It participates in the administration of the insurance company taxes. It administers three Highway Users Fund revenues—two, the motor vehicle fuel (gasoline) license tax and the motor vehicle transportation license tax with assistance from the Controller, and the third, the use fuel (diesel) tax in its entirety. It licenses and regulates itinerant merchants. It hears appeals from the Franchise Tax Board on personal income and bank and corporation franchise taxes. In addition, it administers or assists in administration of the major local government revenues—the property tax and sales and use taxes. Its local property tax responsibilities include the assessment of state-assessed properties, supervision of the assessment of all other locally taxable properties, and equalization of the average assessment levels in the counties.

Program and Performance

The board's administration of state taxes involves the licensing of 305,000 sellers of tangible personal property operating at 325,000 outlets, and of 36,000 highway-users and members of the petroleum products industry. Tax return forms are distributed to, and tax remittances are received from, these licensees and from 1,500 licensed manufacturers and wholesalers of alcoholic beverages. 45,000 taxpayers are audited each year, and collections are enforced when not voluntarily tendered (with assistance from the Controller in the case of the motor vehicle fuel license and motor vehicle transportation license taxes). The board appraises the railroad rolling stock of 100 car lines and other nonrailroad owners of cars, assesses this property, computes the tax rate that is applied to it, and collects the tax. It receives recommendations from the Insurance Commissioner for assessment of taxes on the State's 675 admitted insurance companies, makes the official assessments, and hears appeals from its actions. It handles over 50 appeals a year from actions of the Franchise Tax Board. Exclusive of the personal income and bank and corporation taxes, in which the board's participation is limited, these state taxes yielded \$992,000,000 in the last completed fiscal year.

In the local tax field, the board is now administering for 47 counties and 293 cities sales and use taxes that are yielding \$175,000,000 a year; it assesses property that produces property taxes and ad valorem special assessments amounting to \$200,000,000 a year; and it assists county assessors who are responsible for the distribution among property owners of an additional \$1475,000,000 of taxes and ad valorem special assessments. It also makes upwards of 10,000 appraisals of real and personal property holdings a year to test the assessment levels of approximately one-third of the counties and estimates the assessment levels of the remaining counties by reference to the results of prior-year appraisals.

Major increases in expenditures during 1957-58 resulted from general salary increases on July 1, 1957, increased responsibilities in the local sales and use tax field as the result of additional contracts to serve cities and counties under the Bradley-Burns Uniform Local Sales and Use Tax Act, and some enlargement of the intercounty equalization program.

A relatively small increase in expenditures during 1958-59 will result from normal growth of the agency's workload, salary increases for employees who have not yet reached the top steps of their salary ranges, and the higher level of rents and of materials prices. Increases in personnel needed to handle normal growth in the General Fund taxes will be approximately offset by a Highway Taxes Division personnel reduction that is designed to hold expenditures on the motor vehicle transportation license tax to an acceptable proportion of revenues in the face of a reduced tax rate.

A total of 38 permanent positions are being eliminated and 6 limited-term positions have been dropped in this budget as a result of changes in the laws relating to highway users taxes improved procedures, and centralized telephone services in Los Angeles. These reductions are reflected in the Retail Sales Tax Division and the Division of Highway Taxes.

The 9 additional positions proposed in this budget are in the Tabulation Section of the Service Division. 2 of these positions are extensions of temporary positions authorized for the current year. These positions are necessary to meet the heavy workload demands of administering the uniform local sales and use tax law and to assist with the development of new machine procedures as well as processing additional work which cannot be done on machines now due to current workload. Much of the current work must now be processed on an overtime basis as the additional positions cannot be of use until the additional equipment, now on order, has been delivered.

21	SERVICE DIVISION						
22							
23	Program and Performance						
24							
25	The principal functions of this division include cashiering, mailing, supply, tabulating, duplicating, and other general services. The						
26	increase for the 1958-59 Fiscal Year provides for additional office space for the board's headquarters staff, increases in office						
27	rental rates, and for an expanded punched card operation. The continuation of 2 existing positions and the establishment of 7						
28	additional positions are proposed to meet the increased service requirements of the uniform local sales and use tax program						
29	administered by the Retail Sales Tax Division.

2	DIVISION OF ASSESSMENT STANDARDS						
3							
4	Program and Performance						
5							
6	This division acts as a general staff organization to co-ordinate the work of the assessors and to promote uniformity of assessments						
7	throughout the State, to develop the most efficient and acceptable procedures for the performance of the assessment task and to						
8	instruct, advise, and direct the assessors in the performance of this task.						
9	The board requested 11 additional positions to expand this service to county assessors at an additional cost of \$106,732. This						
10	program extension has not been included in the budget since further clarification of the needs and desires in this area are						
11	necessary before an objective evaluation can be made. If such additional information can be developed in the interim, any						
12	required expansion can be presented at the 1959 General Session of the Legislature.

39	RETAIL SALES TAX DIVISION						
40							
41	Program and Performance						
42							
43	This division administers the Sales and Use Tax Law and the Bradley-Burns Uniform Local Sales and Use Tax Law. The com-						
44	paratively slight increase in gross expenditures is due to salary increases and to the increased cost of materials and supplies.						
45	On January 1, 1958, 47 counties and 293 cities have contracted for the collection of the local tax. The State is completely						
46	reimbursed for this program.

Division of Highway Taxes

HEADQUARTERS

Program and Performance

This division administers the licensing and assessment provisions of the Motor Vehicle Transportation License Tax and the Motor Vehicle Fuel License Tax, the licensing, assessment, and collection of the Use Fuel Tax and the licensing of Itinerant Merchants. The 1957 Legislature changed the Motor Vehicle Transportation Tax Law by eliminating the weight fee credit and reducing the rate of the tax to $1\frac{1}{2}$ percent. As a result, reduced clerical workload and curtailment of the audit program will result in a reduction of authorized positions and operating expenses partially offset by normal salary and operating cost increases.

GENERAL ANALYSIS

The Department of Finance has general supervision over the business affairs of the State on behalf of the Governor. The director is immediately responsible to the Governor, acts as his adviser on fiscal matters, assists in the formulation of administrative policies, and is charged with responsibility for the execution of the State Budget. In addition, the department performs services for other state agencies, such as centralized purchasing, real property acquisition, automotive management, printing, and office building maintenance.

Under the executive office of the director, the department is organized into major divisions. 4 of these—Audits, Budget, Fairs and Expositions, and Local Allocations—supervise the expenditure of state funds, acting as staff agencies for the Director of Finance in the discharge of his responsibilities in the execution of the Governor's fiscal policies. 6 divisions—Administration, Buildings and Grounds, Communications, Organization and Cost Control, Property Acquisition and Purchasing—are essentially service units assisting other state agencies in such matters as procurement of property, equipment and supplies; building management and space utilization; organization and operating procedures; and other management matters.

During the current year 2 positions of assistant director are to be restored to the Executive Office to better meet the responsibilities of the director and facilitate the work of the department. The position of Chief, Administration Division is to be replaced by a fiscal officer.

The 1958-59 Budget provides the same level of service as in the current year. However, an increase in the workload of the service divisions makes necessary 15 new positions in the amounts shown below.

New Positions:				
Buildings and Grounds Division:				
Sacramento—6 positions -----				\$21,690
San Francisco—2 positions -----				5,232
Organization and Cost Control Division—2 positions -----				7,080
Property Acquisition Division—2 positions -----				7,884
Purchasing Division—3 positions -----				17,136
Totals—15 positions -----				\$59,022

EXECUTIVE OFFICE

Program and Performance

This unit is composed of the offices of the director, the administrative adviser, the insurance adviser, the investment adviser, and the local planning consultant. The local planning office was created by Chapter 33, Statutes of 1956 (First Extraordinary Session). The operating expenses and equipment of these offices has been included in the budget of the Administration Division. The budget continues the same level of services as in the current year.

1	AUDITS DIVISION						
2							
3							
4	Program and Performance						
5							
6	This division performs the internal audit functions. Its staff examines the accounts of every state agency, reports any irregularities or						
7	unsound practices, and makes recommendations for improvements. The division also makes special audits upon request and						
8	authorizes destruction of old records. Auditing processes and scope have been revised to conform to the intent of Chapter 1699,						
9	Statutes of 1955, which created the Auditor General. There is continuing co-ordination between the Audits Division and the						
10	Auditor General in order to avoid duplication.						
11	Reimbursements have been reduced by the amount formerly received for services performed for the State Board of Control. In order						
12	to simplify accounting procedures, charges for this service are being eliminated.

45							
46	BUDGET DIVISION						
47							
48	Program and Performance						
49							
50	The service and control functions affecting budgetary activities in all state agencies are performed by this division through its prepa-						
51	ration and administration of the annual budget. Each state agency prepares detailed estimates of proposed expenditures and						
52	anticipated revenues for the coming fiscal year which are analyzed by the division staff in terms of policies set by the Governor						
53	and the Director of Finance. After legislative action on the budget, this division continuously reviews and approves each agency's						
54	financial operations. The budgetary process and the operations of the division receive continuing management review from a policy						
55	viewpoint by a procedures unit established within the Budget Operations Section. The operations of the division have grown in						
56	size and complexity to the point where procedural changes are necessary to reduce the details of budget preparation and budget						
57	administration.						
58	Another unit of the division conducts economic and population research, prepares the budget estimates of revenue from major taxes						
59	and licenses, and provides the basic data on population and income essential for long-term financial planning. Beginning next						
60	July a new service will be extended to local governments under the provisions of Chapter 2345, Statutes of 1957. In lieu of spe-						
61	cial censuses, cities may request the Department of Finance to prepare estimates of population and pay the minor expenses inci-						
62	dental to this work. The resulting population estimates will be certified to the State Controller and used as a basis for future						
63	distribution of motor vehicle fuel and vehicle license fee revenue.						
64

21	BUILDINGS AND GROUNDS DIVISION						
22							
23	Program and Performance						
24							
25	This division maintains and protects about 50 state office buildings and grounds with a total floor space of approximately 5,000,000						
26	square feet. Over 40 acres of grounds are maintained by the division in Sacramento, San Francisco, Oakland, and Los Angeles.						
27	The division has shops and personnel equipped to handle building maintenance and operation, and provides protective services to						
28	state buildings. 8 additional positions are proposed for the budget year. These positions are based on increased workload due to						
29	additional physical facilities.						
30

17							
18	Program and Performance						
19							
20	This division provides general fiscal supervision of the district, county, and citrus fairs throughout the State; prepares a master						
21	premium list and approves the operating budgets and premium lists of the individual fairs; prepares claims for distribution						
22	of appropriated funds; and advises the Director of Finance and the State Public Works Board as to allocations of money						
23	from the Fair and Exposition Fund to fairs for Capital Outlay purposes. The division also assists local fairs with construc-						
24	tion problems. The 1958-59 Budget continues the same level of service as in the current year.

61	LOCAL ALLOCATIONS DIVISION						
62							
63	Program and Performance						
64							
65	This division serves as the technical staff to the Director of Finance and the State Allocation Board in the administration of several						
66	programs of state aid to local government agencies. The major programs are: to review and analyze applications for state aid						
67	and related documents to determine that eligibility requirements have been met; prepare reports and make recommendations to						
68	the Director of Finance and to the State Allocation Board in respect to these programs; maintain records of official actions of						
69	the Director of Finance and the State Allocation Board; administratively approves construction contracts and release of funds						
70	in accordance with the rules of the State Allocation Board, and performs other functions authorized by the Director of Finance.						
71	Due to a reduction in workload a total of 4 authorized positions were abolished during 1957-58.						
72	The 1958-59 Budget continues the same level of service as the current year.

55	PURCHASING DIVISION						
56							
57	Program and Performance						
58							
59							
60	Supplies and equipment in excess of \$25, which are required by all state agencies except the University of California are procured						
61	through the State's system of centralized purchasing administered by this division. In addition, the division is co-ordinating						
62	the purchase of surplus property so that state institutions can take full advantage of federal surplus property. There are many						
63	areas of the surplus property program that, if judiciously investigated by the State, can provide substantial savings in the						
64	equipping and maintaining of its eligible institutions. The proposed business service officer II position would co-ordinate the						
65	purchase of surplus property. The position has been authorized in the current year due to immediate need for such co-ordination						
66	The budget also proposes 2 buyer trainee positions based on increased workload.

10					
11	GENERAL ANALYSIS				
12	Objectives				
13					
14	This agency conducts the annual State Fair and Exposition and during the interim period makes full utilization of the grounds for other activities.				
15					
16					
17	Program and Performance				
18					
19	The Agricultural Code directs that the State Fair Board, subject to the approval of the Department of Finance, shall "Provide for and manage an annual fair or exposition at Sacramento of the industry and industrial products of this State and of the commercial products exported and imported through the ports of this State." There is a 12-day fair held for this purpose in the latter part of August and the first part of September each year.				
20	Since the inception of the State Fair in 1854 there has been continuous growth. At the present time exhibits are shown from 12 foreign countries and 41 of the State's counties. In addition these economic interests are represented: livestock exhibits, poultry, rabbits, dairy products, and other agricultural products, floriculture, forestry and lumber, textiles, minerals and mining, the arts, home economics, junior division, horse show, fashions, wines, horse racing, and many others. This fair portrays California as a whole and shows its economic, governmental, and social life and its relationship with the world.				
21	The use of the fair for interim activities is growing and conventions, dances, roller rink, auto racing, cattle sales, winter quartering of race horses, and storage use contribute to the fair's revenues and helps affect the maintenance and upkeep cost of the fair grounds.				
22	At the present time this fair is being held upon the 207-acre site that was established in 1909 in Sacramento. In 1950 a new site was acquired, totaling approximately 1,000 acres, in Sacramento County. Chapter 1071, Statutes of 1957, appropriated \$3,747,843 in 1957-58 and a like amount in 1958-59 from the General Fund and Chapter 1072, Statutes of 1957, authorized the State Public Works Board to issue either certificates or revenue bonds in the amount of \$6,500,000 annually for a period of 2 years to finance the construction of buildings and facilities on the new site. The projected date of the fair at the new site is 1960 and until that time the present site will be used to the fullest extent.				
23	In order to plan for and co-ordinate the overall planning for construction on the new site, a new position of co-ordinator has been established. It is proposed in 1958-59 to continue the development of the overall program for a new fair. This entails the hiring of personnel to develop the program and specialists to encourage private industry to invest in their own buildings at the new fair site. It is proposed in the 1958-59 Budget that the specialists visit the various large state fairs in the United States and Canada and the World Fair in Belgium to gather ideas on what buildings and programs should be encompassed in the new California State Fair. While the new fair is being planned for and built, the upkeep, maintenance, and capital outlay projects for the present site are being reduced to a minimum. Only essential maintenance necessary to run the fair will be done.				
24	The management has been able, by improved procedures, to eliminate 1 clerical position in administration department effective January 1, 1958. The cost of the night show for 1958 is \$40,000 less than the 1957 show and revenues from the night show are expected to offset this cost. The sew-it-yourself contest will be in its first year of operation and while certain promotional and printing funds were provided in the current year budget, additional funds are proposed to run this contest during the 1958 fair. This increase will be partially offset by revenues from contestants' entry fees.

GENERAL ANALYSIS

Objectives

Administers and maintains the California State Museum of Science and Industry in Exposition Park, Los Angeles, which contains outstanding permanent exhibits in the fields of industry and science with particular emphasis on the resources and industries of California as well as special temporary exhibits in these fields.

Also administers, maintains and operates approximately 104 acres of land in Exposition Park, Los Angeles, which is primarily under lease to the Coliseum Commission, the City of Los Angeles and the County of Los Angeles as well as 15 acres of parking lots operated primarily for the benefit of persons attending events in the Coliseum.

In addition, an annual Industrial and Trade Exposition which demonstrates and promotes the industrial progress and trade of California will be held for the first time during 1958-59.

Program and Performance

The Sixth District Agricultural Association was formed pursuant to Chapter 69, Statutes of 1880, in Los Angeles County. The association administers and maintains the California Museum of Science and Industry which contains permanent exhibits and temporary displays of the natural industries, industrial enterprises and resources of the State of California. The attendance at the museum has moved upward with a steadily increasing trend. During the 1956-57 Fiscal Year over one-half million persons visited the museum. Indications are that the attendance figure for the 1957-58 Fiscal Year will be 650,000 persons. During 1957-58, it is planned to install a new exhibit by the Pacific Telephone and Telegraph Company. Also plans are progressing rapidly on the aviation exhibit financed one-half by the industry and the other half by the State, which is scheduled to be installed during 1958-59. It is also planned to install a miniature steam engine which is being donated by the Santa Fe Railroad. Also, with the anticipated Industrial and Trade Exposition being assumed by the museum, it is necessary to have additional help to take care of and to plan all the permanent and temporary exhibits which will take place during the coming year.

The association owns approximately 104 acres of land in Exposition Park and approximately 15 acres of parking lot land adjacent to the park. The majority of the land within the park is leased to the Coliseum Commission, County of Los Angeles and City of Los Angeles for sports, recreational and cultural activities. On this property is located some of the best known structures in the west—the Coliseum, State Armory, County Museum, and the Municipal Swimming Stadium. The parking lot land is administered and maintained by the association and is primarily operated for Coliseum patrons. Approximately 10 more acres of parking land are presently being acquired to relieve the acute parking problem in the Exposition Park area and for the use of the new Sports Area patrons.

In addition, the association is planning to implement Chapter 2387, Statutes of 1957, by the holding of an annual Industrial and Trade Exposition to demonstrate and promote the industrial progress of the State of California. This will be the first fair-type function performed by the association, with the first exposition scheduled for the 1958-59 Fiscal Year.

^a Consists of \$250,000 allocation as provided by paragraph (i), Section 19622, of the Business and Professions Code, \$15,000 as provided by Section 19622.5 of the Business and Professions Code, and \$274,000 proposed by the Budget Act of 1958 from the remainder in the Fair and Exposition Fund allocated by Section 19626(c) of the Business and Professions Code.

18					
19	GENERAL ANALYSIS				
20					
21	Regional agricultural societies first received financial assistance from the State in 1861. After the adoption of the new Constitution				
22	of 1879, the regional agricultural societies were succeeded by district agricultural associations authorized by the Legislature of				
23	1880 as state agencies. Section 80 of the Agricultural Code fixes the boundaries of 52 agricultural districts. There are 51 dis-				
24	tricts organized and holding fairs in addition to the Sixth District which maintains a permanent exhibit in Los Angeles.				
25	Each of the district agricultural associations are state agencies administered by a board of 8 directors appointed by the Governor.				
26	The organization and operation of district agricultural associations are governed by Sections 80 to 93 of the Agricultural Code.				
27	District agricultural associations are subject to the laws and administrative regulations which apply to state agencies generally				
28	and to specific rules and regulations which apply only to district agricultural associations or to district and county fairs. Dis-				
29	trict fairs are conducted under budgets approved by the Department of Finance and practically every action taken by an agri-				
30	cultural association requires departmental approval. The Audits Division of the Department of Finance audits the premium				
31	awards made at the fairs and makes postaudits as well.				
32	Revenues received by the Sixth District Agricultural Association, Los Angeles, are deposited in a special fund in the State Treasury				
33	and this association operates out of this special fund under appropriations by the Legislature. This district does not receive an				
34	allocation under the provisions of Section 92 of the Agricultural Code.				
35	The 1-A District Agricultural Association, San Francisco, has been receiving 2 continuing appropriations from the State. An ap-				
36	propriation of \$100,000 per year for support was provided in Section 19622 of the Business and Professions Code. An annual				
37	appropriation of \$65,000 per year for the support of the Grand National Junior Livestock Exposition conducted by the 1-A Dis-				
38	trict was provided by Section 19626.6. Under the provisions of Section 19622, as amended by Chapter 2387, Statutes of 1957,				
39	these were combined into 1 appropriation of \$250,000 per year for support.				
40	The 48th District Agricultural Association has been receiving annual allocations under the provisions of Section 92 of the Agri-				
41	cultural Code, Chapter 2387, Statutes of 1957, which amended Section 19622 of the Business and Professions Code, provides				
42	a continuing appropriation of \$125,000 per year for support of the 48th District in lieu of the annual allocation under Section				
43	92 of the Agricultural Code.				
44	The remaining 49 district agricultural associations receive annual allocations on the basis of premiums paid at their respective fairs.

10	GENERAL ANALYSIS				
11	Objectives				
12	Classifies fairs receiving apportionments under the provisions of Section 92 of the Agricultural Code.				
13					
14	Program and Performance				
15					
16	This committee, created by Chapter 1717, Statutes of 1955, consists of the Director of Finance, the Chief of the Fairs and Expositious Division, and 7 elected members from areas designated in the statute.				
17	Traveling—in-state has been increased so that the committee may travel to the fairs, not only at the time of the fair, but during the interim as well so that each fair may be properly classified. Consultant services are provided to compile the necessary data to classify fairs in an equitable manner.

14					
15	Personnel man-years -----	93.7	96.9	100.3	3.4
16					
17					
18					
19	GENERAL ANALYSIS				
20	Objectives				
21	Administers the public lands belonging to the State, consisting of school land, swamp and overflowed land, salt marsh, tide and sub-				
22	merged lands, and other sovereign lands. Principal revenue-producing function is the leasing of the public lands for the extraction				
23	of oil, gas, and minerals.				
24					
25	Program and Performance				
26					
27	The State Lands Commission has jurisdiction over approximately 3 million acres of tide and submerged lands and approximately				
28	700,000 acres of school lands.				
29	Activities in the administration of state lands have increased tremendously in scope and value with passing time, ranging from the				
30	original activity of selling and leasing proprietary lands to the present expanded duties which include oil, gas, mineral grazing,				
31	agricultural, commercial and recreational leases and leasing for the use and occupancy of swamp, overflowed marsh, tide, and				
32	submerged lands.				
33	Chapter 1724, Statutes of 1955, which provided for issuance of lease on a cash bonus and a fixed royalty basis had major effects on				
34	the State Lands Division by opening the State's tide and submerged lands for unrestricted leasing. It created an acute interest				
35	on the part of the oil industry in offshore geophysical and geological exploration. Chapter 2166, Statutes of 1957, amended the				
36	original legislation to provide for leases to be let on either a cash bonus offered or a royalty bid factor whichever returns the				
37	greater revenue to the State.				
38	There are currently 671 oil wells in production of which 55 were added during the past year and the State Lands Commission has				
39	authorized the offering of an additional 55,000 acres of tide and submerged lands for bid.				
40	Under the provisions of Chapter 29, Statutes of 1956 (1st Extraordinary Session), the commission accounts for the oil and gas reve-				
41	nues derived from tide and submerged lands granted to the City of Long Beach. \$19,957,000 in oil and gas revenues were				
42	accounted from this source during the past fiscal year and it is estimated that the State will receive \$12,600,000 in the current				
43	year and a like amount in 1958-59. Included in the expenditures for 1957-58 is a special appropriation of \$50,000 from the Invest-				
44	ment Fund to determine the boundary line between the tide and submerged lands and lands belonging to the City of Long Beach				
45	so that revenues, which are now being impounded, can be distributed.				
46	Land sales and records activity has increased as the interest in vacant state and federal lands has increased the demand for this type				
47	of property over the past four to five years. In 1956-57 the revenues from the sales of these lands totaled \$1,244,000 compared to				
48	only \$99,100 in 1954-55.				
49	The commission is also involved in two large and complicated litigatory actions which involve title to millions of dollars in existing				
50	oil reserves. The present outlook is that these actions will cost the State \$150,000 by June 30, 1959.				
51	The 1956-57 budget authorized 2 positions for the development of the small craft harbor and waterways program and an additional 3				
52	positions for mineral leasing. The positions for the small craft harbor waterways program have been transferred to the Depart-				
53	ment of Natural Resources under the provisions of Chapter 2362, Statutes of 1957.				
54	The proposed 1958-59 budget includes the addition of 5 positions to provide for workload increases in activities as follows: litigation,				
55	1 position; clerical operations, resultant from offshore exploration, 1 position; oil, gas and mineral leasing, 2 positions; and sales				
56	of vacant lands, 1 position.

GENERAL ANALYSIS

Objectives

This agency receives all personal income, and bank and corporation franchise taxes, audits and assesses additional taxes where deficiencies occur, and collects delinquent taxes in accordance with the Bank and Corporation Tax Law and the Personal Income Tax Law. Members of the board are the State Controller, Director of Finance, and Chairman of the State Board of Equalization. Direction of the agency's affairs is assigned to the Executive Officer of the Franchise Tax Board.

Program and Performance

As a result of the reorganization during the 1956-57 Fiscal Year the Operations Division now includes all audit phases, compliance, and collection activities for both personal income tax and bank and corporation tax.

For a general comparison of staffing to overall workload it is noted that in 1956-57 the average number of returns per man-year was 3,642 as compared to an estimated average of 3,750 per man-year in 1957-58 and 3,961 in 1958-59. The basic assumption in preparing the budget is that the present upward trend in filings will continue for both personal income tax and bank and corporation tax purposes.

The proposed 1958-59 Budget provides for workload increases in the legal section, statistical section, additional out-of-state auditors for the Chicago and New York offices, and the conversion of temporary help to permanent positions to the extent that year around workload justifies.

The agency's current 3-year federal comparison project was renewed for an additional 3-year period in the 1957-58 Governor's Budget. This program has been worthwhile to date, both in terms of additional revenue and in obtaining future compliance. There are no new programs proposed in the 1958-59 Budget. However, it is proposed to expand the out-of-state auditing of corporation tax returns because of the lucrative results obtained in this program.

ADMINISTRATION DIVISION

Objectives

This division performs the cashing and accounting, the statistical analysis, bank tax computation, legal functions, hearings on appeals by taxpayers from staff decisions, special investigations as well as overall supervision of the activities of the board.

Program and Performance

The Statistical Section is charged with the responsibility of annually computing the tax applicable to banks and financial corporations. The number of corporation returns are now expected to increase 41.8% between 1956 and 1958 filings. An additional one-half man-year position is proposed for this workload.

The Legal Section is composed of the chief counsel and a staff of 6 attorneys in Sacramento and 1 in San Francisco who prepare briefs for cases on appeal, opinions and proposed measures to be submitted to the Legislature. To assist in elimination of the backlog now existing in the presentation of cases for hearings and drafting of legal memoranda, 1 additional counsel position is proposed. There have been no increases in the number of attorneys in the Legal Section since 1945. Amendments to laws have given rise to many new legal problems—loyalty oath requirements, illegal activities provisions, and the revisions to conform to the 1954 Internal Revenue Code. A temporary counsel position was authorized for the current year to eliminate confidential material from legal memoranda to permit their publication.

3 additional man-years of temporary help are proposed for increased workload in the cashing and accounting function.

35							
36	OPERATIONS						
37							
38	Objectives						
39							
40							
41	This division performs the line functions relative to the responsibilities of the board including the clerical processing of tax returns and related reports, desk and field auditing of such returns, and collection of delinquent taxes.						
42							
43							
44	Program and Performance						
45							
46	The Drawer Audit Section performs the general audit on personal income tax returns and trains new auditors. This section returns a net revenue of \$2.26 per dollar of cost. The in-State personal income tax field audit program recovers \$2.49 in increased assessments for each dollar spent. Other audits are made by the 599 unit, which involves comparison of employer information returns with the income reported by the respective employees, and the bank and corporation tax audit. These 2 activities returned a net revenue of \$3.25 and \$14.08 respectively for each dollar spent. Included in the bank and corporation tax audit program is the out-of-state auditing which includes 8 auditors and 2 clerks divided evenly between the Chicago and New York offices covering corporations within a 1,000-mile radius of each.						
47							
48							
49							
50							
51							
52							
53	The out-of-state audit program, which involves a field type audit of corporations' application of the income allocation formula in the taxpayers headquarters office, has proved to be a very high revenue producing activity. The average recovery over the past 5 years has been in excess of \$27 for each dollar of cost. 5 additional auditor positions are proposed to be added to each of the New York and Chicago offices for expansion of this profitable audit program.						
54							
55							
56							
57	The second 3-year federal comparison project is being started in the current year. The first federal comparison project resulted in a return of \$3.78 for each dollar of cost. This project has resulted in increased compliance in that those taxpayers who formerly failed to file a state return will be required to do so in the future.						
58							
59							
60	The Preliminary Examination Units check the computations and scan the personal income tax forms for completeness and those returns that need further review are referred to the Drawer Audit section or one of the branch offices for field review.						
61							
62	During the current year 20 man-years of temporary clerical help in the 599 unit and alpha files in headquarters and 4 man-years of temporary typist-clerk help in the Los Angeles regional office were converted to permanent positions, 8 additional man-years of temporary help are proposed to keep pace with the 1958-59 Fiscal Year workload.						
63							
64							
65	In addition to the headquarters office in Sacramento, this division maintains several field offices throughout the State for the convenience of taxpayers and to provide greater efficiency in field auditing of returns. The district offices are grouped and are under the supervision of 2 regional directors, 1 in each of the 2 regional offices which are located in Los Angeles and San Francisco.						
66

GENERAL ANALYSIS							
Objectives							
The State Treasurer is charged with the responsibility for the custody of all moneys and securities belonging to or held in trust by the State; investment of surplus General Fund moneys, other designated surplus funds together with funds of the State and public agencies deposited in court under condemnation proceedings; administration of the sale of state bonds, their redemption, and interest payments; and pays warrants drawn by the State Controller.							
^a Composed of savings in salaries and wages, \$37,914; operating expenses, \$8,738; and equipment, \$6,780.							
^b Trust and agency funds not included in overall budget totals.							

STATE TREASURER—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	
1	GENERAL ANALYSIS—Continued				
2					
3					
4	Program and Performance				
5					
6	The Treasury Deposit and Vault staff is engaged in trust activities in safeguarding securities deposited with the State of California to				
7	secure bank deposits plus those owned by the State which increased \$201,891,175 in the 1956-57 Fiscal Year. On June 30, 1957,				
8	these totaled \$1,973,240,994. On June 30, 1958, they are estimated to be \$2,223,000,000 and \$2,515,000,000 by June 30, 1959.				
9	Chapter 1703, Statutes of 1955, established the Pooled Money Investment Program which was in operation by the 1956-57 Fiscal Year.				
10	It is supervised by the Pooled Money Investment Board and administered by the Treasury cashier. During the first quarter of				
11	1957-58, interest earnings on pooled money investments was 135 percent greater than the same period in 1956-57 (\$2,410,328 in				
12	1957-58; \$1,022,660 in 1956-57). Also during the fiscal year 1956-57, total purchases of treasury bills was \$1,320,000,000 and sales				
13	were \$812,000,000. Marketing Trust activities have increased the internal workload and this workload has been further increased				
14	by the Coudemuation Deposit Fund established by Chapter 1851, Statutes of 1957. This activity will require 2 additional positions,				
15	an accountant and a stenographer-clerk, to develop information relative to cash receipts and cash needs for future periods in order				
16	that the overall planning of investments of funds can be scheduled to provide a maximum yield. Assistance is also needed in				
17	developing cost data for those funds whose investment authorizes reimbursement of expenses and in the preparation of reports.				
18	Redemption of warrants and checks issued by the State Controller and state agencies is estimated to increase from actual issuance in				
19	1956-57 of 3,251,588 to an estimated 3,531,881 in 1957-58 and 3,754,925 for 1958-59.

10	GENERAL ANALYSIS				
11	Objectives				
12	This regulatory department is directed toward permitting safe utilization of rural highways with a minimum of congestion and delay.				
13	Program and Performance				
14	The department is headquartered in Sacramento with 66 field offices and about 1,300 mobile units. Rolling traffic is observed by use				
15	of the mobile units and points of congestion are facilitated by dismounted traffic officers. Individuals jeopardizing the safety of				
16	other motorists are cited for their unsafe or illegal driving techniques or physically removed from the roadway. In addition to				
17	directing rolling traffic, the patrol monitors commercial vehicles as pertains to weight, brakes, height, width, and lights. They				
18	inspect school buses for operating safety and adequate markings and supervise pedestrian school crossing guards. Vehicle thefts				
19	in unincorporated areas are investigated.				
20	Field operations are supported by the Administration Division and the Technical Services Division. The administration division estab-				
21	lishes the policy to permit maximum effort of available manpower and equipment. This headquarters unit also accounts for funds				
22	and equipment and maintains the personnel program which includes individual personnel records, classification and salary surveys,				
23	disciplinary actions and workmen's compensation cases. Specifications for patrol automobiles are developed and cars are equipped				
24	with spotlights, radios, sirens and other police and emergency equipment. Field offices are equipped and supplied from a central				
25	warehouse supply unit.				
26	The Technical Services Division determines the distribution of uniformed strength throughout the State. Information officers develop				
27	and distribute education media, news releases, radio and television programs on safe and legal driving techniques. A training				
28	academy is maintained to train all new traffic officers as well as to provide periodic refresher training for all uniformed personnel.				
29	To intensify the State's network of vehicle law enforcement 264 additional positions are included for 1958-59. 4 new substations will				
30	be opened each requiring a clerk and a part-time janitor, and 7 clerks are provided for substations not previously provided with				
31	clerical assistance. The number of accidents and citations in Compton warrant an additional clerk, and a new scale and weight				
32	station at Red Bluff will require an additional clerk. 6 additional automotive servicemen are required to properly service the				
33	automobiles, and 3 clerks are required in Los Angeles to answer telephonic requests for road information. 2 janitors and a tele-				
34	phone operator are required for a new building in San Francisco.				
35	Additional supporting staff includes 2 clerks for the accounting staff to process increased automobile and traveling expense claims and				
36	2 personnel clerks to process personnel documents. 1 additional clerk is included to provide adequate supervision in the repro-				
37	duction unit. The expanding automobile fleet will require an additional mechanic and an electrician is included to repair alter-				
38	nators and generators. 2 stock clerks are provided to more adequately meet supply demands from the field offices.				
39	2 public information officers are provided, 1 for San Francisco and 1 for Sacramento, to increase public awareness to the need for				
40	safe driving procedures. 2 clerks are included for stenographic assistance to the information officers.				
41	The increasing number of accidents has necessitated the addition of 2 coders and 2 key punch operators in the statistical unit. Revision				
42	of enforcement manuals will necessitate a stenographer for the business service officer at the training academy.				
43	A private line teletype system was installed during the current year to facilitate communications between 37 larger offices and head-				
44	quarters.				
45	About \$70,000 has been added to field, general expense for fast copy paper. This technique of reproducing accident reports will reduce				
46	future requests for stenographic assistance. Accident report forms will be furnished to all local police units, as required by law,				
47	and the radios in the mobile units in Los Angeles and San Francisco will be modified to transmit and receive on 2 channels.				
48	During the next 2 years all radios will be so modified. Feeding costs at the academy are increased because of the expansion of				
49	the facility to 120 men. The first half year at the academy will be devoted to training new recruits while the second half will,				
50	generally, be devoted to refresher training. Air conditioning units are provided for automobiles operating in desert areas.				
51	The rapidly increasing cost per mile of automobile operation has made it necessary to allocate the \$100,000 contingency reserve for				
52	this purpose in order to insure maximum operating capacity.

DEPARTMENT OF INDUSTRIAL RELATIONS

Headquarters Office at San Francisco

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	CHANGE FROM 1957-58
1	SUMMARY				
2					
3					
4	TOTAL EXPENDITURES				
5	Support (General Fund)-----	\$7,063,996	\$8,684,820	\$9,348,361	\$663,541 (7.6%)
6					
7	Personnel man-years -----	905.8	1,024	1,087.9	63.9
8					
9	GENERAL ANALYSIS				
10	Objectives				
11					
12					
13	It is the objective of this department to promote and develop the welfare of the wage earners of the State, improve their working				
14	conditions, and advance their opportunities for profitable employment. The main office is in San Francisco, with 23 branch				
15	offices throughout the State.				
16					
17	Program and Performance				
18					
19	The department, through its 7 line divisions, negotiates with parties in disputes when a work stoppage is threatened; adjudicates				
20	claims under the Workmen's Compensation Law; establishes, enforces and promotes standards of safety for all phases of				
21	industrial activity; enforces labor laws and issues and enforces orders relating to men, women and minors; promotes oppor-				
22	unities for apprentices; and enforces laws relating to housing. The Divisions of Administration and Labor Statistics and				
23	Research service the line divisions.				
24	Further progress in the drive to reduce the work injury rate was made in 1956. Although the number of persons at work was the				
25	highest in history, the injury rate was lower than in any previous year except 1954. An additional 8 positions are proposed to				
26	maintain the State's position in this area. Recognizing that the use of atomic energy in industry would introduce greater hazards				
27	to employees, selected staff has received training in radiation hazards in order to meet this new problem.				
28	As a result of legislative determination, the State's housing program as administered by this department has been more clearly				
29	defined.				
30	A decline in the home building industry has seriously affected employment in several building and construction trades. In turn, since				
31	December, 1956, the total number of registered apprentices has not held up to the 1957-58 budget estimates.				
32	The expansion of additional industrial accident offices to meet the workload is continuing on the planned basis with 50 additional				
33	positions required in this area.				
34	The Industrial Welfare Commission has just completed revision of all orders. The new orders are more comprehensive and generally				
35	set higher standards than any other state. The most important single change was increasing the minimum wage from 75 cents				
36	to \$1 per hour for women and minors.				
37	The labor law staff collected for employees \$1,700,000 in unpaid wages.				
38	Various fees charged for inspection and the licensing of certain operations account for the major portion of the \$277,971 in revenues				
39	collected by the department in 1956-57. The balance collected consists of fines and penalties.				
40	The 1958-59 budget provides for the following changes:				
41					Cost
42	1. Enforcement of Trailer Coach Construction Standards (Chapter 2093, Statutes of 1957)-----				\$38,178
43	2. Administration, increased clerical workload-----				1,788
44	3. Ten industrial accident referee teams and related staff-----				411,662
45	4. Boiler safety inspection-----				39,920
46	5. Shipyards and waterfront safety inspections-----				8,956
47	6. Industrial welfare branch office clerical workload-----				3,540
48	7. Labor law, increased workload--Vallejo office-----				25,279
49	8. Research publication and statistical tables, increased workload-----				12,393
50	9. Statistical program not matched by Federal Government-----				12,444
51	10. Apprenticeship workload decrease-----				42,420
52	11. Purchase of tabulating equipment in lieu of rental-----				29,592

61	Objectives				
62					
63	To carry out the administration's policy and provide effective, economical administration of the laws affecting this department.				
64					
65	Program and Performance				
66					
67	This division performs policymaking, housing, procurement, accounting personnel and duplicating for the department. The efforts of				
68	the operating agencies are channeled through formulation and administration of the budget. The housekeeping services have				
69	increased in small increments each year for several years until it now requires an additional half a clerk.

23	DIVISION OF CONCILIATION						
24	Objective.						
25	To promote sound union-management relationships.						
26	Program and Performance						
27	This division adjusts labor-management disputes through conciliation, mediation and arbitration procedures; referees the conduct of representation elections; prevents critical disputes and work stoppages through investigation, and aids in the solution of labor problems which threaten curtailment of production or services. In 1956, 362 cases were served wherein work stoppages were threatened; only 13 cases actually became stoppages. As the Legislature granted 2 additional conciliator positions in the 1957-58 Budget to alleviate the extremely heavy workload, no significant change in expenditures is proposed for the year 1958-59.

		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)				
1	DIVISION OF INDUSTRIAL ACCIDENTS							
2	Objectives							
3	To see that the injured workman and his dependents receive promptly all of the benefits to which they are entitled under the law.							
4	Program and Performance							
5	The Industrial Accident Commission in its judicial function is a court of limited jurisdiction to adjust litigated cases arising under							
6	the workmen's compensation laws. A staff of 62 referees assists the commission in deciding claims brought before the commis-							
7	sion. Original decisions are made by the referees, except for a few special types of cases. If a party is dissatisfied with the							
8	referee's decision, he may then petition the commission or one of its panels for a reconsideration, or the commission, itself,							
9	on its own motion, may grant a reconsideration.							
10	The budget provides for 10 additional referee units in order to meet the increased caseload which is expected during the next 3							
11	years and still make significant decreases in the pending caseload. A pending case is defined as any undecided case which has							
12	not been taken off calendar; this includes cases filed but not set, cases set but not heard, and cases heard but not decided.							
13	The pending figure has increased during the past year. 1 clerk is needed for the clerical pool work increase.							
14	The median time between filing and decision for all cases as of March 29, 1957, was 4.1 months. Time limits between filing and							
15	decision will of necessity be reduced and more closely approximate statutory requirements as a result of a significant reduction in the							
16	pending caseload.							
17	New Filings, Decisions, Cases Pending:

* Projected on 7 percent increase annually.

The majority of cases coming before the commission involve medical problems which are evaluated by the medical staff. The additional requests for examinations, advisory opinions, determination of adequacy of compromises and releases will require the addition of 2 doctors and 3 clerks to the Medical Bureau for the 10 additional referee units.

Permanent disabilities are rated by the staff from a schedule, but because of the complexity and great variety of injuries it is possible to list only a small number of injuries. A rating for an unlisted disability requires studying the related factors and comparing with the listed disabilities in order to draw a conclusion. As a result of the 10 additional referee units the requests for permanent disability ratings and other functions of the Permanent Disability Rating Bureau will increase proportionately. 2 additional raters are proposed for the Northern Panel and 1 for the Southern Panel. In order to perform the increased clerical duties in the pretrial and screening functions, 1 additional clerk is necessary.

The legal staff acts as legal counsel for the commission and legal adviser for the director of the department.

11	DIVISION OF INDUSTRIAL SAFETY						
12	Objectives						
13	The primary purpose of this division is to steadily reduce work injuries.						
14	Program and Performance						
15	The division has jurisdiction over all employments—except for household domestics, federal employees, operating employees of inter-						
16	state railroads, and seamen—and it covers some 400,000 places of employment in such industries as agriculture, construction,						
17	mineral extraction, manufacturing, trades, services, transportation, and utilities. The division promulgates, after public hearings,						
18	standards of safety for all employments and conducts educational programs, including the preparation and distribution of edu-						
19	cational materials.						
20	The overall injury rate for 1956 was 34.6 lost-time injury per 1,000 workers employed. This is slightly under the 1955 rate of 34.8.						
21	However, the number of fatalities resulting from on-the-job accidents rose to 827 in 1956 from 767 in 1955. The division investi-						
22	gated 2,000 disabling or fatal work injuries; surveyed 78,632 employments for hazards and 87,849 corrections were issued with						
23	78,442 corrections made. Only 13 cases required legal prosecutions. 23,000 elevators and 115,000 pressure vessels, including nu-						
24	clear reactors, were inspected last year.						
25	The increased shipyard and waterfront activities with their high risk activity will impose an additional workload on the staff.						
26	The budget provides 1 additional inspector in order to reduce accidents in these 2 areas.						
27	In order to meet provisions of the law requiring field and shop inspection of pressure vessels the addition of 12 engineers and 3						
28	clerks is needed. Because of recruitment and training problems only 6 additional engineers and 1 clerk are provided in this budget.						
29	2 of the 6 were provided July 1, 1957 for 1 year, and are shown as proposed new for 1958-59.

		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)			
1	DIVISION OF INDUSTRIAL WELFARE						
2	Objectives						
3							
4	To protect the welfare of women and minor employees.						
5							
6	Program and Performance						
7							
8	Minimum wages, maximum hours, and minimum standards of working conditions for women and minors are established by the orders						
9	of the Industrial Welfare Commission. A wage board, composed of an equal number of employee and employer representatives						
10	of the particular industry or occupation, with a representative of the commission acting as chairman, makes recommendations						
11	to the commission on wage rates, hours of employment, and working conditions. The recommendations of the wage boards are						
12	discussed at public hearings and after due consideration of the findings, the commission enacts an order. Orders of the commission						
13	when promulgated in accordance with the provisions in the Labor Code have the same force as legislative acts.						
14	The division enforces the regulations which govern the minimum wage, maximum hours and working conditions for women and minors.						
15	In addition, the division licenses and regulates industrial home work for men and women; licenses and regulates the employment						
16	of handicapped women and minors at special wage rates; investigates requests for defense production permits and administers						
17	their operation; issues special exemptions from the Industrial Welfare Commission regulations and enforces the Equal Pay Law						
18	for Women. During the 1956-57 Fiscal Year, the division was able to clear 5,788 complaints, whereas 7,209 complaints were						
19	registered. \$72,605 was collected, representing minimum wages and penalty overtime pay under the hours regulations. Investi-						
20	gations and hearings totaled 13,117 for the fiscal year with the result that 19,717 violations were found and corrected. 137 home-						
21	work licenses were issued to employers and 1,615 permits to individual homeworkers. 767 special minimum wage permits and 96						
22	exemption permits were processed and issued.						
23	The division operates out of 13 offices throughout the State. Increased public demands have increased workload requiring that half-						
24	time clerks in 2 offices be increased to full-time clerks for 1958-59.						
25

50	Totals, Division of Industrial Welfare				\$337,439	\$452,490	\$423,272
51							
52	DIVISION OF LABOR LAW ENFORCEMENT						
53							
54	Objectives						
55							
56	To protect the rights of the employee under provisions of the Labor Code.						
57							
58	Program and Performance						
59							
60	This division has the responsibility for enforcement of all labor laws not specifically delegated to other agencies.						
61	Complaints during the first 4 months of the current fiscal year have been above those during the same period in the previous fiscal						
62	year, with an average increase for the 4-month period of approximately 4 percent. Investigations are made after reviewing						
63	complaints. In 1956-57 the division received 26,093 wage claims and collected \$1,765,492 in unpaid wages. Complaints in other						
64	categories totaled 4,765. 31,748 investigations for compliance with the Workmen's Compensation Insurance Law were made						
65	by the division in 1956-57. More than 10 percent of those investigated were found to be without the necessary insurance and						
66	were brought into compliance. 553 Child Labor Law complaints were investigated during the year and 1,969 permits were issued for						
67	employment of minors in theatrical occupations. The division issued 1,232 employment agency's licenses, heard and determined						
68	2,958 controversies relative to fees, and investigated 344 complaints, many of which had to do with misleading advertising, as						
69	well as issuing 1,384 licenses to farm labor contractors in 1956, continued its program of patrolling fields to detect unlicensed						
70	farm labor contractors, and investigated 152 violations of farm labor contractor laws.						
71	The increased reception-information activity as well as related work requires the addition of 2 clerks, 1 for Los Angeles and 1 for						
72	San Francisco. The complaint load in the area served by the Oakland office requires 1 additional deputy and 1 clerk.						
73	More effective service will be provided by establishing a Vallejo office to serve Contra Costa, Napa, and Solano Counties rather than						
74	adding to the Oakland office staff, which would continue to require extensive travel.

43	DIVISION OF APPRENTICESHIP STANDARDS						
44							
45	Objectives						
46							
47	To promote and develop apprentice training.						
48							
49	Program and Performance						
50							
51	The law provides for an apprenticeship council of 16 (2 ex officio) members representing labor, management, and the general public.						
52	The council sets standards and rules to improve the conditions of the apprentice and industry. The division, working under the						
53	voluntary provisions of the apprenticeship law, provides consultative service and assists employers, employees, and their organiza-						
54	tions.						
55	An unanticipated decrease in workload due to economic conditions resulted in an 8 position reduction in the 1957-58 budget, extended						
56	through 1958-59. However, the number of apprentices in certain trades has increased requiring divisional assistance in organizing						
57	30 to 40 new joint apprenticeship committees. The total number of apprentices remains between 19,000 and 20,000.						
58

21	DIVISION OF HOUSING						
22							
23	Objectives						
24							
25							
26	The division's objective is enforcement of state housing laws and related regulations.						
27							
28	Program and Performance						
29							
30	Consultative assistance is given to local officials, architects, builders, and interested groups in the enactment and enforcement of						
31	local building codes, investigation of substandard housing conditions, and organization of local housing rehabilitation and urban						
32	renewal programs.						
33	The 1957-59 program will emphasize:						
34	Inspection and reinspection coverage of approximately 8,000 labor camps of record, including camps accommodating workers under						
35	the Mexican national program.						
36	Construction supervision of auto courts, motels, and trailer parks. On July 1, 1957, 4,681 motels and 3,362 trailer parks were						
37	operating under division permit. The division is not initiating maintenance inspections except for labor camps.						
38	Construction supervision under provisions of the Earthquake Protection Law and State Housing Act in counties having no local						
39	enforcement agency.						
40	Increased efforts towards adoption and enforcement of city and county trailer park ordinances and building codes. As of Novem-						
41	ber 1, 1957, 30 of the 58 counties have building codes and 17 cities and 2 counties have adopted comparable trailer park						
42	ordinances.						
43	Adoption and enforcement of plumbing, electrical, and heating standards for trailer coaches sold in California after July 1,						
44	1958, in accord with Chapter 2093, Statutes of 1957. This is completely self-sustaining and will require 4 additional posi-						
45	tions to carry out the program.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	CHANGE FROM 1957-58
		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)				
1	DIVISION OF LABOR STATISTICS AND RESEARCH							
2	Objectives							
3	This division has legal responsibility for compiling employment statistics for the State, and also compiles administrative statistics for the department.							
4	Program and Performance							
5	The division compiles and publishes monthly statistics of employment, earnings, and hours, by industry, for California and 8 major metropolitan areas and, in co-operation with the Department of Employment, prepares monthly estimates of civilian employment and unemployment in the State. Employment, earnings, and hours statistics for nonagricultural industries are collected under a co-operative program with the United States Department of Labor, Bureau of Labor Statistics. Only 1 of 4 positions budgeted for 1957-58 for such a state-federal co-operative program has been matched by the Federal Government. The other 3 positions are removed from this budget. The division compiles statistics of work injuries to provide information for use in accident prevention work—to make known how, where, and why accidents occur. It makes studies and investigations in the field of industrial relations. Administrative statistics are compiled regularly for divisions of the department.							
6	Increases in the population and labor force of California have substantially increased the workload of the division. As the volume of work of other divisions of the department increases, the workload of the Division of Labor Statistics and Research increases in connection with the compiling of their administrative statistics and the performing of operating services. Much of this additional load has been carried on through greater utilization of punchcard and tabulating machine techniques. For 1958-59 the division's key punch and tabulating work is expected to increase beyond the capacity of the staff and will require 2 additional operators. Increased statistical table typing will require one-half of an additional temporary help man-year.

GENERAL ANALYSIS

Objectives

The principal function of the State Fire Marshal is fire prevention and protection. The headquarters office is in Sacramento with branch offices located in San Francisco and Los Angeles.

Program and Performance

A coordinated program for administering state fire safety laws and regulations has been established between the Office of the State Fire Marshal and local city, county, and district fire officials. This co-ordinated program was made possible by the creation of the State Fire Advisory Board in 1945. The State Fire Marshal, with the assistance of this board, develops fire safety standards and administers and enforces these standards. Through the board, it has been possible to develop uniform statewide standards of fire safety and provide for their administration and enforcement without creating overlapping authority and duplication of effort, and at the same time preserve local autonomy. It is the general policy of the Fire Marshal to administer laws and regulations on a consultative basis rather than by direct enforcement.

The Fire Marshal's program includes: general fire prevention work; inspection of hospitals, schools, public assemblies, fairs, and state institutions; and enforcement of laws pertaining to fireworks, flammable materials, and explosives.

Fire prevention and inspection work covers such matters as the height, area, and fire resistiveness of buildings for different types of occupancy; adequacy of exits; fire alarm and fire extinguishing equipment; availability of water supply for fire control; and fire hazards related to different types of occupancy. Reports are issued listing corrections, alterations, and additional protection needed to meet minimum standards.

The Fire Marshal has a laboratory to test various materials in order to set fire safety standards.

The 1958-59 Budget provides for the following increases:

	Number of positions	Cost
Explosives regulation -----	2	\$15,000
Workload Changes:		
a. Administration and clerical-----	4	23,900
b. Fire prevention and school plan checking-----	3	23,210

^a Composed of savings in salaries and wages, \$20,036; operating expenses, \$23,852; equipment, \$9,162; and loss in reimbursements, \$6,515.

OFFICE OF FIRE MARSHAL—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	
1	GENERAL ANALYSIS—Continued				
2	Program and Performance—Continued				
3	Chapter 1224, Statutes of 1957, gave the Fire Marshal responsibility for adopting and enforcing safety standards for the sale and				
4	transportation of explosives. 1 deputy and 1 clerk were added in the current year. These are shown as proposed new positions for				
5	1958-59. A position has been added in the current year to provide the Fire Marshal an assistant to share administrative responsi-				
6	bilities. This position is shown as proposed new for 1958-59. These responsibilities and clerical work generally have gradually				
7	increased with the additional duties and workload of the agency. Fire prevention and inspection work has increased significantly				
8	for hospitals, private welfare institutions, and dry cleaning plants. School plan checking work has increased due to increased				
9	construction and increased delegation of fire safety work from Division of Architecture to trained fire marshals.				
10	Last year the Fire Marshal's staff performed \$65,522 worth of inspection service for dry cleaning plants and \$5,242 for dry cleaning				
11	shops. The estimated cost of inspecting plants in 1957-58 and 1958-59 is \$76,234 and \$82,347; of inspecting shops \$5,682 and				
12	\$6,375.

15					
16	GENERAL ANALYSIS				
17	Objectives				
18					
19	The Department of Justice, and the Attorney General, is the senior law office of the State. They interpret laws, render opinions, and represent the State in civil and criminal proceedings. To assist in law enforcement, the department maintains a fingerprint file for identification purposes, compiles statistics pertaining to crime, assists peace officers in civil and criminal investigations, and participates in direct enforcement in use, possession, and sale of narcotics.				
20					
21					
22					
23					
24	Program and Performance				
25					
26	Under the direction of the Attorney General the Department of Justice provides legal advice and assistance to the various state departments, boards and commissions. The department passes on the constitutionality of each law passed by the Legislature for the final consideration of the Governor, and represents the State on all criminal matters before the Appellate and Supreme Courts. Another important function is the identification of criminals through current fingerprint and criminal record files and by related technical aid and assistance to local agencies. Closely allied with this service is the coordination of requests from local enforcement agencies, and assistance in the location of deserting parents.				
27	The State Narcotics Act is enforced through offices located in San Francisco, Sacramento, Los Angeles and San Diego. Agents operating from these offices investigate known and suspected persons for illegal possession, use, and sale of narcotics. Prosecution of violators is accomplished through the district attorney in each county.				
28	During the budget year new positions include 7 legal positions and 4 stenographers to provide adequate representation on civil and criminal cases. Additional clerical assistance is added in the accounting office in relationship to the additional personnel throughout the department. The charitable trust unit, activated in 1957, will require a clerical position in the budget year, and one statistical clerk is added because of increased arrests and paroles of juveniles. An unprecedented workload increase in the Bureau of Criminal Identification and Investigation has necessitated the addition of 9 positions during the current year. These 9 positions are shown as proposed new during the budget year and are included in the total of 37 new positions required during 1958-59 to process the projected workload.				
29	A narcotics office is proposed for Fresno and 3 additional positions are included to provide a complete complement of 4 inspectors and 1 clerk. 2 clerks are required to handle teletype messages in San Diego and Fresno where such service was formerly handled by the Department of California Highway Patrol.				
30	Operating expenses have been increased proportionate to additional personnel. Reimbursements for the 1958-59 Fiscal Year are decreased because of the withdrawal from the State Teletype System of the Department of California Highway Patrol. Equipment includes normal replacement and additions for new personnel. Electronic accounting machines, previously rented, are being purchased in those instances where it is more economical to own the machine. Miniature radio transmitters and receivers are provided to assist in narcotic enforcement. A decrease in estimated reimbursements from special fund agencies for services rendered, and the necessity for adding 9 positions in the Bureau of Criminal Identification and Investigation and related expenses to process the unexpected workload, required an augmentation from the Emergency Fund.

55							
56	DIVISION OF CRIMINAL LAW AND ENFORCEMENT						
57							
58	Objectives						
59							
60	This division insures criminal justice in California through periodic meetings with local law enforcement agencies. Prosecution is						
61	assumed when local enforcement is negated.						
62							
63	Program and Performance						
64							
65	The legal staff of this division represents the State on all criminal proceedings when appealed from trial courts and prepares docu-						
66	ments for extradition of fugitives and forfeiture of vehicles for violation of State Narcotics Act. The compilation of crime sta-						
67	tistics is a responsibility of this division. This is accomplished by a bureau located in Sacramento which maintains detailed						
68	statistics of all crimes committed in California, records of turnover rate of prisoners, and juvenile delinquency figures.						
69	This division functions as a clearing house for information concerning criminals and as a source of technical aid and assistance in the						
70	investigation of crime and the apprehension of criminals. Fingerprint files are maintained on a 24-hour basis to provide maximum						
71	service to local police jurisdictions. A laboratory and a staff of qualified technicians including specialists in the operation of the						
72	polygraph provide assistance to local agencies and other state agencies when requested. 4,793 scientific examinations and 220 court						
73	appearances were made by laboratory personnel during 1956-57.						
74	Special training is given local law enforcement personnel in the aspects of narcotic enforcement. Since this program was inaugurated						
75	this division has given basic training to over 9,000 enforcement personnel. Specially trained inspectors, operating under cover,						
76	contact known informers and purchase evidence or information leading to the arrest of narcotic users, and suppliers. Pharma-						
77	cist inspectors insure the legitimate use of drugs by professional people. This division has developed and promoted the "Nalline						
78	test" which enables doctors to detect the use of heroin within 3 days after the last injection.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)			
1							
2	DIVISION OF CRIMINAL LAW AND						
3	ENFORCEMENT—Continued						
4							
5	Program and Performance—Continued						
6							
7	During the budget year 3 attorneys are added to the staff in proportion to the number of arrests and convictions in the State. Unusual						
8	increases have occurred in automobile forfeiture, antitrust and charitable trust cases. 1 stenographer is added for 1 year to the						
9	charitable trust unit where it is estimated that 2,500 such trusts will file reports and be registered. The unit now has no clerical						
10	assistance. 1 statistical clerk is added because of increased admissions and paroles in the Youth Authority and juvenile referrals.						
11	One-half man-year of temporary help is required for peak loads in the key punching operation.						
12	A narcotics field office was established in San Diego on July 1, 1957, in order to give better enforcement near the Mexico border.						
13	Provisions for an office in Fresno are included in this budget to combat the increasing narcotic traffic in that area. 1 additional						
14	supervising inspector, 1 pharmacist inspector and 1 clerk are included to adequately staff the new office. 1 clerical position is						
15	added in each of the San Diego and Fresno offices during 1958-59 to accept and deliver administrative teletype messages pre-						
16	viously handled by the Highway Patrol.						
17	A key punch operator added during 1957-58 to process increased prescriptions written in San Francisco is shown as proposed						
18	new in 1958-59. The increased workload will continue at the current high level.						
19	The Bureau of Criminal Identification and Investigation has experienced an unusual rise in workload which began about January						
20	1, 1957. To provide the level of service needed by local law enforcement agencies it was necessary to add 9 permanent positions						
21	during 1957-58 in addition to 1 man-year of temporary help and some equipment. As it is anticipated that the request for						
22	services will continue during the budget year these positions are shown as proposed new. In addition, 28 more positions will be						
23	required to process the projected workload. The areas of increase are 7 positions for fingerprint identification, and 19 positions						
24	to record crime reports for modus operandi, reports on stolen, lost and pawned articles and firearm reports. 11 positions are						
25	required in the record section to conduct name searches through the Soundex and prepare manuscripts of criminal records or						
26	no-record replies for requesting law law enforcement agencies. Teletype requests have increased to a point where it is necessary						
27	to add an additional position to provide a qualified operator on weekends and holidays. This 24-hour service is now manned by						
28	3 qualified operators.						
29	Operating expenses are increased proportionate to the increase in personnel. Contractual auditing service is provided for review						
30	of an estimated 2,500 financial statements from charitable trusts. Audit service would be provided by the Department of						
31	Finance. Provision for equipment includes normal increases for replacement and new personnel and about \$31,000 for electronic						
32	accounting machines which have previously been rented. Miniature radio transmitters and receivers costing \$5,000 are included						
33	for narcotic investigative purposes where suspected violators, witnesses, and other persons are interviewed and where verbatim						
34	record of the person being interviewed is needed.

1	SERVICES RENDERED COLORADO RIVER BOARD							
2	GENERAL ANALYSIS							
3	Hearings before the special master appointed by the United States Supreme Court commenced during the 1956-57 Fiscal Year in							
4	San Francisco. Hearings are expected to continue through the budget year. Early in 1957 it was announced that hearings would							
5	be moved to New York City and the 1957-58 Budget was augmented to cover the additional cost. Transfer of the hearings did							
6	not materialize, resulting in the current year unexpended balance. Estimated expenditures for 1958-59 are based on hearings							
7	in San Francisco for the full year.

^a Both mentally ill and mentally retarded cared for in these hospitals.

DEPARTMENT OF MENTAL HYGIENE—Continued

Objectives

The objectives of the Department of Mental Hygiene are to care for, treat and rehabilitate mentally ill, mentally retarded and emotionally maladjusted patients in order that they may return to society as productive citizens, and to prevent mental illness through an active program to foster mental health.

Program and Performance

The Department of Mental Hygiene was established as such in 1945, and has developed a diversified program of care and treatment, research and training, and mental health education. The program that today provides treatment specifically designed for the clinic patient, the mentally retarded patient and the mentally ill patient has been a gradual and uphill process, in which the old custodial concept has been abandoned.

In the 3 hospitals for the mentally retarded, the program is based on the knowledge that mental retardation alone does not produce a socially unacceptable person, and that many of the mentally handicapped can be integrated into society. With treatment, habit and character training in this controlled environment, the patient develops to the fullest of his intellectual capacities, and many are capable then of returning to their homes and communities as self-supporting, or partially self-supporting citizens.

The progress in the treatment programs in the 10 hospitals for the mentally ill has shown a marked emphasis on active therapy, bringing more treatment to more patients. In modern receiving and treatment units, newly admitted acutely ill patients are provided the intensive treatment most effective during the onset of mental illness. Increasingly, active therapy has reached the so-called "back wards."

Juvenile units at Camarillo and Napa State Hospitals provide the special type of care needed by children suffering from mental disease or severe behavior disorders. They also operate as facilities for observation and treatment requested by the State's juvenile courts or Youth Authority.

Special treatment and facilities for tuberculous patients, as well as special treatment for alcoholics and drug addicts are also provided in the hospitals. Patton State Hospital has been designated as the special tuberculosis center for Southern California, and Napa for Northern California. Sonoma State Hospital is the center for mentally retarded patients with tuberculosis. Alcoholics and narcotics addicts are provided special treatment throughout the hospitals for the mentally ill. Great care is taken to correctly diagnose both these types of patients since their difficulty is frequently symptomatic of some more deep-seated disorder.

Special treatment for the rehabilitation of sexual psychopaths is maintained at Atascadero State Hospital. Persons diagnosed as criminally insane are also committed to this maximum security hospital. Some of the patients at Atascadero are committed for observation by the courts.

The 1957-58 Budget approved by the Legislature made possible several important improvements in the overall program. The provision of funds for added staff, the largest percentage of the important ward level, increased the level of care to 90 percent of the department standard.

The department's new continuous research program developed rapidly, with its first budget allocation for research projects supplemented by almost a million dollars in federal funds granted by the National Institute of Mental Health. The state allocation for research, recognized as part of the "efficient start" originally recommended to the Legislature, is being divided equally between hospital level and project support phases to insure a comprehensive program that includes both applied and basic research. A research team at each of the hospitals is ultimately called for, and the nuclei of the first three teams are being formed. All hospital research teams would both carry out their own research projects in the hospital and assist other staff members with their investigations. The balance of the funds will be used to support research investigations undertaken by departmental, hospital, and clinic staff personnel.

Results of the department's public information program continued to be apparent in growing public interest in the field of mental health. The educational program uses almost every communication medium: newspapers, television, speakers, films, public meetings and forums, exhibits, pamphlets, magazine articles, publications and reports. The section also acts in an advisory capacity to community groups when requested.

One of the important developments in the mental health program was legislation establishing the Short-Doyle Act for community mental health services, making California the second state in the Nation with such a law. Under the act, cities and counties can set up local programs with practical assistance from the State that includes reimbursement on a matching basis for local money expended. 10 counties and 1 city have already taken official action to set up local programs. Ultimately, these local mental health services are expected to prevent large numbers of citizens from ever having to leave their home communities because of mental illness or handicap.

A significant development indicative of a sound dollars and cents investment toward the cure of mental patients became clear in the past year. The number of mentally ill patients treated and released has increased to a point of balance with admissions. The end of fiscal 1957 saw the first small but significant drop in patient population (15) in the hospitals for the mentally ill. This occurred despite the increasing rate of general population in the State, and increasing admissions to the hospitals. These factors are a measure of the total performance of the department and are set forth in tabular form as follows:

MENTALLY ILL HOSPITAL POPULATION MOVEMENTS PER FISCAL YEAR

	1951-52	1952-53	1953-54	1954-55	1955-56	1956-57	Estimated 1957-58	Estimated 1958-59

The all-out modern attack on mental ills is made on 4 basic fronts—treatment, training, research and prevention. By far the greater part of past increases in the department budget, that is, increases other than those necessary just to keep up with state population growth, have of necessity gone into improving the treatment program, essentially by providing additional numbers of physicians, therapists, social workers, nurses, technicians and psychologists, food personnel and others. This year a realistic appraisal of the financial position of the State has indicated that available moneys could be more wisely expended on the other 3 methods of attacking the problem—research, training and community development of mental hygiene resources. It is these 3 areas that account for the major changes in the program of the department. They are discussed in detail in the appropriate sections of the budget.

b Previously hospitalized in a California State Hospital for Mentally Ill.

DEPARTMENT OF MENTAL HYGIENE—Continued

The major construction capital outlay program reflects the leveling-off of the mentally ill patient population in the hospitals, and no funds for any additional capacity are included. The main items in the construction program are for planned treatment facilities for Fairview to serve the population of this new hospital, a new administration building for Agnews State Hospital and increases in administrative facilities at Patton and Stockton State Hospitals, addition to the laundry building at Sonoma State Hospital, and equipment for facilities now under construction. The other projects are primarily for utility and service facilities. The new ward buildings, with 1,600-bed capacity for mentally ill, at Metropolitan State Hospital will be completed near the end of the current year, and will receive patients beginning July 1, 1958. Ward nursing positions were provided in the latter part of the current year for these facilities in order to permit a training period, and the balance of the necessary staff is included in this budget. The 700-bed capacity new ward buildings for mentally retarded at Sonoma State Hospital will receive patients beginning May 1, 1958, and the balance of the staff necessary to operate these facilities is also included in this budget. Fairview Hospital at Costa Mesa, the fourth hospital for the mentally retarded, continued under construction, and is expected to activate its completed portion and begin admitting patients in January of 1959. The Neuropsychiatric Institute at the University of California at Los Angeles, which will serve as an advanced center for teaching and research, also continued under construction, and is scheduled for completion in the 1959-60 Fiscal Year. Langley Porter Neuropsychiatric Institute at San Francisco continued construction for a new 4-story addition.

MAJOR PROGRAM AUGMENTATIONS AND COSTS

The following summary by program accounts for the greater part of the proposed increase of \$7,577,228 (7.7 percent) over the 1957-58 expenditures. These increases provide the workload adjustments required to meet population and price changes at presently recognized standards of staffing and supply; also, they provide for improvements in the level of service primarily in the areas of research, training, pharmacy and drugs.

Additional personnel (other than nursing) for staffing new facilities:		
a. The new Fairview State Hospital (180.2)	\$408,957	
b. The 1,600 beds, 16 wards at Metropolitan State Hospital (112)	423,936	
c. The 700 beds, 6 wards at Sonoma State Hospital (16)	77,776	
		\$910,669
Additional personnel (other than ward nursing) for workload changes:		
a. Proposed new positions (64)	\$286,004	
b. Positions to be abolished (—64)	—456,636	
		—170,632
Additional personnel for training and pharmacy (17.4)		111,060
Additional ward nursing personnel to provide for staffing of new facilities and for hospital ward reclassification resulting from changes in type of patients and prescribed treatment:		
a. Proposed new positions (537)	\$1,096,268	
b. Positions to be abolished (—423)	—1,263,924	
		(114)
		—167,656
Increased cost in authorized positions for salary adjustments and for the full-year cost of those positions delayed in establishment until the latter part of the current year to coincide with the availability of new facilities which they will operate		3,366,473
Additional man-years of personnel from fuller employment in authorized positions (408.3)		1,038,870
Increase the staffing for Neuropsychiatric Institute at U. C. L. A. and Langley-Porter Neuropsychiatric Institute (14)		102,660
Additional departmental and central office personnel:		
a. Proposed new positions (23)	\$107,710	
b. Positions to be abolished (—12)	—41,532	
		(11)
		66,178
Increase in operating expense and equipment:		
a. Increases primarily due to population and price changes	\$681,133	
b. To provide consultative service for new training program	217,816	
c. Increases for regular and special (tranquilizing) drugs	279,031	
d. Recruiting—moving and travel expense	14,000	
		1,191,980
Additional funds for expansion and rate change of family care program		351,101
Increase in funds for research		380,000
Increase in contributions to State Employees' Retirement Fund		349,695

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED
EXPANDED PROGRAMS

In attacking the problem of mental illness, it was decided that available funds could best be spent this year in the areas of research and increasing the efficiency and effectiveness of the professional staff through training. Experience has also indicated that additional pharmacy personnel, regular drugs and medical supplies and special drugs including tranquilizers were needed. Each program is explained in detail in the paragraphs that follow.

Departmental Training Program ----- \$339,842

It is proposed to expand the training program of the department, with emphasis placed on training the professional staff in psychiatric treatment techniques. While a minimum amount of training is now available for these positions, the current training program has been primarily for the ward nursing personnel.

An intensive study has been made of the critical training needs by a departmental committee during the past year. It was found that 2 out of every 3 physicians assigned to treat psychiatric patients in the state hospitals have had no previous psychiatric training. Also, it was evident that there was a need to orient many of the professional staff to psychiatry and to professional practice in a large state hospital, and that a method was needed to assure that the latest methods and skills in the field of psychiatry are made available to the treatment staff. A comprehensive program designed to meet these needs has been outlined. It includes (1) a basic in-service training structure and (2) a career residency program. This budget provides for a substantial step in implementing the in-service training structure, and will enable the department to firmly establish the program and gain experience in its operation.

All hospitals will participate in the increased training activities. It is proposed to obtain the leadership of the program by reclassification of an authorized psychiatrist position, rather than request additional staff. This method appears practical because of the shortage of trained psychiatrists that now exists. Consultant funds are included to hire, on a part-time basis, psychiatric specialists from universities, private practice, research laboratories, psychoanalytic societies and other sources. They will be capable instructors as well as being expert in such fields as individual psychotherapy, group therapy, neurology, psychosomatic medicine, psychiatric social work and diagnostic testing. It is believed that this is the most effective and economical way of obtaining the highly specialized and technical teaching staff needed. Additional technical books and periodicals and a nucleus of audio-visual and other training aids are provided each hospital. A summary of estimated expenditures is as follows:

Chief of professional education (reclassification of 13 psychiatrist II) -----	\$31,200
Stenographer-clerk (13) -----	53,196
Consultant funds -----	217,816
Books and journals -----	14,430
Training aids and equipment -----	23,200
Total -----	\$339,842

Psychiatric Research ----- \$540,000

The 1956-57 Budget provided funds for the employment of a chief of research only, and \$200,000 was appropriated in the 1957-58 Budget for research projects. This has proved to be an efficient approach to the program as it is now well established and in a position to expand. Examples of projects under way or to be undertaken are evaluation of specific therapeutic techniques; studies of causative factors in mental illness; biochemical and biological studies; physiological studies; research in emotional problems of the geriatric group, as well as sociological aspects of mental disease. Much of the research will be carried out at the state hospitals, at the hospital aftercare clinics and at field offices of the Bureau of Social Work. Some projects will be conducted in co-operation with other state departments and groups in order to more fully utilize the resources available. The appropriations for this program are for a 3-year duration, and a summary of estimated expenditures for the current and budget year is as follows:

	1957-58	1958-59
Research teams -----	\$60,000 (2)	\$120,000 (5)
Chief research psychologist and 2 editorial research assistants -----	12,000	60,000
Pilot projects -----	35,000	60,000
Projects (6-18 months' duration) -----	53,000	90,000
Projects (over 18 months' duration) -----	-	210,000
Totals -----	\$160,000	\$540,000

Increase in Regular Drugs and Medical Supplies ----- \$167,372

An increase of \$3.50 per patient for regular drugs and medical supplies is proposed, and was arrived at after careful study by the department. The present hospital annual per capita allowances are \$12.50 for the mentally ill and \$17.50 for the mentally retarded. Considerable increases in medical and nursing staff have been authorized, and the present allowances are now unable to provide the drugs and medical supplies necessary to keep pace with the overall increases in the treatment program. In order to insure proper administration of the funds for drugs and medical supplies, each institution superintendent has appointed a committee of physicians to administer the purchase of drugs; established a formulary in the pharmacy; and instituted suballotment controls on the various types of drug and medical supply expenditures involved.

Increase in Special Drugs ----- \$111,659

It is proposed to provide special drugs such as tranquilizers for an additional 5 percent of the mentally ill population. The amount now authorized is based on an average patient participation of 10 percent for the mentally ill and 15 percent for the mentally retarded. The increase will provide a more adequate program in recognition of the usage requirements of the newer drugs for mentally ill patients, and is based on favorable medical experience with this type of treatment.

Pharmacists ----- \$26,664

A total of 4.4 additional pharmacists positions are proposed. This will provide a second full-time position at Agnews and Metropolitan State Hospitals serving the mentally ill, and a second position at the 3 mentally retarded hospitals (Pacific, Porterville, and Sonoma). Less than 1 full position is needed at these hospitals as fractional positions are currently budgeted for vacation, holiday, and sick leave relief. These proposed positions will provide a comparable staff at all mentally ill hospitals with a patient population of 3,800 or more, and for all mentally retarded hospitals except Fairview State Hospital which is not yet in full operation.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED—Continued

EXPANDED PROGRAMS—Continued

Pharmacists—Continued

Experience has indicated that 2 pharmacist positions are needed at the larger mentally ill hospitals to adequately dispense and control drugs during the weekdays and to provide coverage of the pharmacy on Saturday as well as for vacation, holidays, and sick leave. The increased use of drugs warrants careful management and extensive use of formularies, and these positions will aid in this regard.

The pharmacy of the mentally retarded hospitals administers a drug allotment that is about 40 percent higher than that provided for the mentally ill. In addition, they have the problem of drugs for the control of enteric disease. While the patient population is somewhat lower than 3,800 at 2 of these hospitals, the actual workload is comparable to the larger mentally ill hospitals due to the additional drugs involved as mentioned above.

NEW POSITIONS

The following 439.6 additional new positions totaling \$683,441 for the mentally ill and mentally retarded hospitals represent standard classes used at all of the hospitals and are, therefore, discussed functionally as groups. They are also reflected in the budgets of the various hospitals, but are not explained there. Most of the classes of positions are budgeted on accepted workload formulas, primarily related to the overcrowding of patients, the number of patients admitted and/or the estimated year-end population. Due mainly to a substantial decrease in overcrowding, and changes in admissions and year-end populations at the various hospitals, 487 presently authorized positions are being discontinued. These are explained below both in chart and narrative form. The new positions to activate Fairview State Hospital on January 1, 1959, are included in the discussion of each functional group below as appropriate. A complete list of these positions, together with their effective dates, can be found in the hospital's budget.

— Psychiatrist II	—\$13,800
4 Clinical psychologist II	18,348
—3 Senior dentist	—37,105
—3 Dental assistant	—11,287
— Clinical laboratory technician	—2,490
1 Assistant microbiologist	4,545
—1 Total	—\$41,789

The foregoing schedule indicates the staffing adjustments necessary to maintain the presently authorized level of service in accordance with existing workload standards as applied to the patient population estimates forecast for the various state hospitals. The decrease in amounts shown for those classes with no position count is due to the cost of the full-year abolished positions at the various hospitals being greater than the cost of the partial-year new positions included for Fairview. Significant position adjustments are noted at Metropolitan, Stockton, and Fairview. Additional positions are included for Metropolitan because of the activation of the new ward buildings of 1,600 beds on July, 1958. Stockton shows a loss of authorized positions because of a decrease in resident population of 457 patients as well as a decrease in patient admissions of 562. Additional positions are included for Fairview because of the activation of the new hospital; the first patients are planned to be admitted on January 1, 1959, with a total resident population of 600 estimated by June 30, 1959. The net decrease shown for the psychiatrist II class reflects the cost of the reclassification of 13 psychiatrist II to chief of professional education as well as workload changes.

4.4 Pharmacist	\$26,664
The pharmacist positions are proposed at Agnews, Mendocino, Pacific, Porterville, and Sonoma. The detail justification for the positions is explained in the "expanded program" portion of the summary.	
2 Surgical nurse I	4,512
1 Nurse-anesthetist	2,748
1 Physical therapist	2,616
1 X-ray technician	3,120
1 EEG technician	2,046
6 Total	\$15,042

The 6 positions are all proposed for the activation of Fairview. The various position classes and the number requested are comparable to those provided the other state hospitals.

* Activation of new facility.

STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED—Continued

NEW POSITIONS

Other Treatment Personnel

—2	Occupational therapist	—\$11,622
1	Recreational therapist	2,256
—1	Total	—\$9,366
—1	Supervising psychiatric social worker I	—6,060
3	Senior psychiatric social worker	5,496
2	Total	—\$564
The above positions indicate the net adjustments, by class, necessary to maintain the presently authorized level of service in accordance with existing workload standards as applied to the patient population estimates forecast for the various state hospitals. The individual position adjustments by hospital are shown above on the "Schedule of Workload Adjustments in Major Position Classifications."		
1	Barber shop manager	\$975
1	Beauty shop manager	975
1	Librarian II	2,370
0.2	Motion picture operator (part-time)	1,050
3.2	Total	\$5,370
The 3.2 positions are all proposed for the activation of Fairview. The various position classes and the number requested are all comparable to those provided the other state hospitals.		

Nursing Personnel

Ward Staffing:

10	Senior psychiatric nurse	\$26,310
36	Psychiatric nurse	79,044
13	Senior psychiatric technician II	18,414
23	Senior psychiatric technician I	26,350
455	Psychiatric technician trainee	946,150
—423	Psychiatric technician trainee	—1,263,924
114	Total	—\$167,656

This budget includes additional ward staffing to correspond with anticipated workload increase and maintains the currently authorized department-wide level of service. Fairview State Hospital will be activated in January, 1959. Staffing of this new hospital for the mentally retarded with positions on a staggered basis starting in September, 1958, and adjustments for ward classification and overcrowding changes require a net total of 114 additional positions.

NURSING PERSONNEL—WARD STAFFING

SCHEDULE OF ADDITIONAL POSITIONS PROPOSED FOR NEW AND EXISTING FACILITIES

Hospital	NEW 1958-59 FACILITIES					Adjustments for ward classification changes and overcrowding at the authorized state-wide level of service	Total additional positions to continue authorized level of service

Hospital Nursing Administration

2	Supervising psychiatric nurse	\$9,592
1	Supervising psychiatric technician	4,345
3	Total	\$13,937

To provide Fairview with the positions necessary to conduct an in-service training program. A psychiatric nursing education director is presently authorized and these additional positions will make an operating unit comparable to that provided other state hospitals.

^a Staffing provided in the 1957-58 Fiscal Year for training purposes.

^b Patient buildup at rate of 100 per month starting January, 1959.

^c Staffing provided in the 1957-58 Fiscal Year for initial ward coverage and training purposes.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED—Continued

NEW POSITIONS

Area Supervision

4	Supervising psychiatric nurse-----	\$19,184
5	Supervising psychiatric technician-----	21,725
9	Total-----	\$40,909

To provide the necessary supervisory area nursing personnel for the activation of Fairview. The proposed staff, together with the 1 supervising psychiatric nurse presently authorized will enable the hospital to operate 2 nursing areas.

Administrative Personnel

1	Assistant superintendent—treatment-----	\$14,400
1	Chief of service (medical and surgical)-----	10,800
1	Chief of service (psychiatric)-----	10,800
3	Total-----	\$36,000

The 3 positions are proposed for the activation of Fairview. The classes proposed reflect the new administrative organization for the state hospitals which was recognized in the current year by the authorization of positions at 3 of the other state hospitals.

1	Service and supply supervisor-----	\$6,360
---	------------------------------------	---------

The position is proposed for Atascadero in order to provide relief to the assistant superintendent of business services in the area of hospital industry supervision. The latter position is presently responsible for the direct supervision of 22 persons which represent 13 different activities. By the addition of the new position, the number of persons reporting to the assistant superintendent of business services will be reduced to 5, which should enable him to concentrate more on the major policy and program aspects of his administrative responsibilities. The service and supply supervisor position is a proposed new class recommended by the Organization and Cost Control Division Survey No. 744 to perform various duties including those now being performed by the hospital industries supervisor. The latter position has been authorized at every hospital in full operation, except Atascadero. This new position then will provide comparable staffing to that of the other hospitals.

General Medical Records and Clerical

1	Medical records librarian-----	\$3,735
The position is proposed for the activation of Fairview and is comparable to those authorized at the other hospitals.		
1	Supervising clerk I-----	4,740
The position is proposed for the activation of Fairview where it will be assigned to the personnel transactions unit.		
14	Senior stenographer-clerk-----	55,242
13 positions are proposed for each of the state hospitals, except Fairview, to provide the clerical assistance required for the chief of professional education positions. 1 position is proposed for the clinical conference reporting function at Fairview.		
3	Senior clerk-----	9,207
2 positions are proposed for Fairview, where 1 will be assigned to patients' benefits and veterans' claims unit, and the other assigned to the patients' movement records unit. The third position is included for Metropolitan where it is needed for the patients' trust section to meet the additional workload anticipated from the increased population.		
30	Intermediate typist-clerk-----	76,403
8 positions at a cost of \$16,155 are included for central medical clerical pools at the various hospitals. These positions are required for the workload relating to the proposed new positions in the budget and are based on a standard of 1 typist for each 3 professional staff members.		
2 positions at a cost of \$4,299 are included for the personnel sections at Agnews and Fairview because of workload increases relating to new positions in the budget. The workload standard is based on 1 clerk for each 250 positions.		
10 positions at a cost of \$34,560 are proposed for the patients' trust section in 6 hospitals for the mentally ill. As a result of a survey, staffing requirements were determined for the patients' trust sections in order to meet increased workloads caused by expanded social security benefits created by the 1954 and 1956 amendments to the Social Security Act. It was estimated that additional income of \$2,000,000 for the patients resulting in added revenue of \$350,000 annually for the State will be developed from the expanded benefits. Temporary help as well as 10 positions have been administratively established on a temporary basis during the current year to meet application deadlines and other workload factors. These 10 positions are proposed to be continued on a permanent basis.		
1 position at a cost of \$3,456 is included for Metropolitan to meet increased workload in the admission and patients' movement records section caused by the large increase in population and also the projected higher admission rates.		
1 position at a cost of \$3,456 is proposed for Sonoma to perform receptionist and information duties at the new receiving hospital building which was activated in October, 1957. This position is comparable to staffing of similar units at other hospitals.		
8 positions at a cost of \$14,457 are proposed for the activation of Fairview and they will be assigned as follows: 1, patients' trust section; 2, nursing areas; 1, clinical laboratory; 1, rehabilitation section; 1, in-service training; 1, chief of maintenance section; and 1, school section.		
1	Intermediate account clerk-----	3,456
The position is included for Metropolitan for its cashier and patients' property and funds function. This position will make 2 for this function which will enable the hospital to meet the added workload caused by the increased population.		
6	Intermediate clerk-----	13,656
1	Junior clerk-----	1,458
7	Total-----	\$15,114

The 7 positions are all proposed for the activation of Fairview and will be assigned as follows: 1, patients' admission and movements records section; 1, property records section; 2, information and receptionist functions; 2, marking, linen and clothing room function; and 1, mail, mimeograph and messenger service. These positions are comparable in class and number to those provided the other state hospitals.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED—Continued

NEW POSITIONS

General Business Services Administration

1	Bookkeeping machine operator I	\$1,686
2	Storekeeper I	8,592
3	Total	\$10,278
4	The 3 positions are proposed for the activation of Fairview. The bookkeeping machine operator will be assigned to the business office; 1 storekeeper will be assigned to maintenance stores and the other to commissary stores.	
5	Accounting technician II	\$4,092
6	The position is included for Fairview and together with 1 presently authorized position will make a total of 2 accounting technicians at this hospital at the time of activation.	
7	Telephone operator	\$16,311
8	1 telephone operator position is included for Metropolitan for operation of the new 3 position switchboard. 5 telephone operator positions are proposed at Fairview to operate the 2 position switchboard.	

Food Service Personnel

1	Institution food administrator I	\$830
2	The position is required at Fairview for the supervision of the special diet preparation unit which will be a part of the feeding program of this new hospital.	
3	Food service supervisor I	\$3,830
4	1 position is required for Fairview for the supervision of the congregate dining rooms. A second position of this class is proposed for Metropolitan and will enable the hospital to meet the added workload which will develop from the increased population and additional food service assistants requested to service that population.	
5	Supervising cook I	\$6,552
6	Both positions are required for Fairview to provide supervision for 2-shift coverage.	
7	Cook	\$3,996
8	Assistant cook	6,588
9	Total	\$10,584
10	1 cook is required at Modesto to staff the diet kitchen facilities which have been added in connection with the remodeling of the food service building. 2 assistant cooks are required at Metropolitan to man an additional post in the general patients' kitchen in order to meet the increased patient population load.	
11	Butcher-meat cutter II	\$2,503
12	The position is required for Fairview to meet the need for this food service activity.	
13	Food service assistant	\$357,789
14	Distribution by hospitals as follows:	

	Dining rooms	Kitchen
Metropolitan	77	—
Modesto	—	3
Napa	11	—
Patton	6	—
Fairview	53	2
Totals	147	5

Metropolitan requires 77 positions on a post assignment basis, 48 posts plus 29 relief positions, in order to staff the congregate dining rooms in the 2 new 800-bed ward buildings. The proposed staffing of a dining room unit on one floor would result in 6 post assignments for one shift or a total of 12 posts per day in each unit.

Modesto requires 3 positions to man 3 posts in the remodeled food preparation area. With the completion of the remodeling project, the hospital will be able to centralize their electrically heated food cart method of food distribution, which will provide portion and sanitary controls in addition to improving food standards.

Napa requires 11 positions to man 7 posts plus 4 relief positions in their tuberculosis hospital unit. This will make a total post assignment of 18 which will service 2 congregate dining rooms of 727 patients. The present authorized staff for the unit has not been sufficient to carry the increased workload caused by a change in care and treatment concepts regarding tubercular patients. The original staffing was based on the premise that a majority of the patients would be fed in the wards. However, with the change in program a majority of the patients are being fed in the congregate dining rooms which requires heavier staffing.

Patton requires 6 positions to man 4 posts plus 2 positions for relief for a congregate dining room in Unit 19. The unit has not been adequately staffed to operate as a congregate dining room since it was put into use approximately 2 years ago.

Fairview requires 53 positions to man 33 posts plus 20 positions for relief in addition to the 13 presently authorized to properly staff 7 congregate dining room units. These positions will provide for the complete staffing of the hospital unit and 50 percent of the ultimate requirements of the other units. 2 food service assistants are included in addition to the 6 presently authorized positions for the kitchen areas. The above staffing is based upon the same post assignment principles applied to the other hospitals for the mentally retarded.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED—Continued

NEW POSITIONS

Clothing, Laundry, and Housekeeping Personnel

1 Shoemaker -----	\$1,185
1 Seamer-seamstress -----	1,950
4 Assistant seamstress -----	9,336
6 Total -----	\$12,471
1 shoemaker, 1 seamer-seamstress, and 2 assistant seamstresses are proposed for Fairview. These will be the only positions in the clothing section at the time of activation of the hospital. 1 assistant seamstress is included for Metropolitan to meet the large anticipated population increase and resulting workload increase. 1 assistant seamstress is provided for Sonoma due to an increase in population and significant increase in the mending load.	
1 Laundry supervisor I -----	\$2,925
19 Laundryman -----	61,239
2 Laundress -----	3,778
3 Laundry helper -----	5,139
25 Total -----	\$73,081
1 laundry supervisor I, 3 laundrymen, 2 laundresses, and 3 laundry helpers are proposed for Fairview. These positions together with 5 presently authorized laundry personnel will result in a total of 14 positions at the time of activation of the hospital. 8 laundrymen each are included for Metropolitan and Sonoma to meet increased workloads resulting from population increases at these hospitals.	
4 Janitor -----	\$9,804
3 Housekeeper -----	7,353
7 Total -----	\$17,157
4 janitor positions and 3 housekeeper positions are provided for Fairview. Along with the 2 presently authorized personnel, this will result in a total of 9 positions for the activation of the hospital.	

Teaching Personnel

2 Elementary teacher -----	\$2,728
Establishment of these two positions, along with the two presently authorized personnel, will provide a total of 4 teaching positions in the education section at Fairview for the activation of the hospital education program.	

Plant Operation Personnel

2 Painter -----	\$2,616
1 Plumber -----	2,616
1 Mason -----	1,308
1 Building maintenance man -----	2,148
1 Locksmith -----	2,616
1 Stationary engineer -----	2,616
1 Electrician -----	2,616
3 Stationary fireman -----	8,355
1 Institution fire marshal -----	2,616
1 Institution fire fighter (part-time and relief) -----	2,615
13 Total -----	\$30,122
These positions are proposed for Fairview for the maintenance, light, heat, and power and fire protection sections. Along with the 16 presently authorized positions, this will provide a total of 29 positions in these sections of plant operation for activation of the hospital.	
1 Automobile mechanic -----	\$3,924
8 Automotive equipment operator I -----	20,730
9 Total -----	\$24,654
1 automobile mechanic and 5 automotive equipment operators are proposed for Fairview. These positions together with 1 presently authorized position will make a total staff of 7 for the hospital at the time of activation. 2 automotive equipment operators are included for Patton to expand the electrically heated food cart system of food distribution. The opening of a new food service building next year will permit more wards to convert to the food cart system. 1 automotive equipment operator is provided for Stockton for garbage disposal in lieu of construction of a new incinerator.	
5 Groundsman -----	\$14,175
1 position is provided for Metropolitan to meet the additional workload of earing for the landscaped area created by the construction of the 1,600-bed wards. 3 groundsman are included for Fairview which will provide a staff of 5 at the time of activation. 1 position is proposed at Sonoma to meet the additional landscaping for the new 700-bed wards at the hospital.	

Farming Personnel

2 Milker -----	\$7,992
1 Orchardman -----	4,512
1 Total -----	\$3,480
1 milker position each is included for Camarillo and Patton to meet additional milk requirements for these hospitals. 1 orchardman is abolished at Sonoma because of a reduction in orchard operations.

GENERAL ANALYSIS

ADMINISTRATION

The central office Administration Division of the Department of Mental Hygiene performs the primary functions of policy formulation, co-ordination and direction of the overall activities of the department including its hospitals, clinics and other facilities. Services are provided in the following areas: research, community mental health activities, public information, business and fiscal management, co-ordination of the nursing and rehabilitation service programs, personnel management and training, food administration, statistics, engineering, guardianships, deportation and institution transfers, and inspection and licensing of private institutions. Also, the department is responsible for the administration of National Mental Health Act funds for California, and the 5 staff positions and operating expenses formerly in the outpatient clinic budget have been transferred to this budget.

During the current year, the new community services program authorized by the Short-Doyle Act is in the process of being implemented. Regulations have been adopted and several local jurisdictions have submitted operational plans for the remainder of the current year. These plans are eligible for 50 percent reimbursement upon approval. 9 additional positions have been added to the budget for this program and include 4 field representatives, 1 statistician, 1 accounting and 3 clerical positions. Research projects at the various hospitals financed from the current \$200,000 appropriation have been approved, and this program is well under way. Also, plans are currently being made for a study of the forms and records used in the various hospitals.

The major program changes provided in this budget include additional funds for research, which is explained in detail in the departmental general summary, and the following additional proposed new positions:

1 intermediate account clerk to meet a current and anticipated increased workload in the Accounting Section caused by the expansion of research project accounting, out-of-state recruitment, special large conferences, family care program, deportations and transfers, private institution licenses, and travel claims and expenses.

1 intermediate typist-clerk for the Nursing Services Section to meet the increased clerical workload which has developed because of expanding nursing programs in the hospitals which are given overall direction by the Nursing Service Section.

1 accounting-tabulating machine supervisor II, 1 tabulating machine operator, 1 key punch operator, and 1 intermediate typist-clerk for the Statistics Section are required to implement the change in accounting system whereby the patients' accounts are maintained in the tabulating unit of this section instead of in the Bureau of Patients' Accounts, where 12 existing positions are to be abolished as a result of the system change.

1 intermediate account clerk for the Guardianship Section in Sacramento to meet an increasing workload in accounting for real property, rental units, receipts issued, checks drawn, and total cash postings.

1 intermediate stenographer-clerk for the Guardianship Section, Los Angeles office, to relieve the agent I of office duties so that he can handle the increasing field workload in Southern California which has more than doubled since 1951 when the agent I position was established.

21	BUREAU OF PATIENTS ACCOUNTS						
22	GENERAL ANALYSIS						
23	The Bureau of Patients Accounts assesses and collects charges for the care and treatment of the mentally ill patients within the						
24	ability of the patients or their responsible relatives to pay. In addition, reviews are made for the purpose of determining possible						
25	benefits to which patients are entitled. The effectiveness of the bureau's program is indicated in the following chart of annual						
26	collections for patients' care and treatment:						
27		Actual	Actual	Actual	Estimated	Estimated	
28		1954-55	1955-56	1956-57	1957-58	1958-59	
29		\$6,243,790	\$7,327,980	\$8,341,236	\$9,328,000	\$10,050,000	
30	The program changes include the abolishment of 12 positions as a result of the accounting system change whereby the patients						
31	accounts are maintained in the Tabulating Unit of the Statistics Section. It is estimated that there will be an overall saving of						
32	about \$10,000 per year as a result of this revision.

1	BUREAU OF SOCIAL SERVICE							
2	GENERAL ANALYSIS							
3								
4								
5								
6	The Bureau of Social Service conducts preleave investigations, arranges placements to permit hospital leaves for mentally							
7	ill and mentally retarded patients, and assists in re-establishing the patients as responsible members of the community							
8	Determining and arranging for employment opportunities and living accommodations, developing the most healthful family							
9	relationships, and frequent patient contact to effect a firm and lasting adjustment are all important elements of the overall							
10	leave program of the department. In this regard, the department arranges home leaves, industrial leaves, and family care							
11	home leaves.							
12	The program changes include the addition of 2 supervising psychiatric social workers I, 9 senior psychiatric social workers							
13	and 4 intermediate typist-clerks which are required at the currently authorized level of service of 1 case worker to 70.5							
14	cases to meet the increased workload of 600 cases; an increase from 9,100 cases originally estimated for the 1957-58 Fiscal							
15	Year to an estimated 9,700 cases for the 1958-59 Fiscal Year. The following schedule indicates the measure of performance							
16	for the social service program:							
17								
18	SOCIAL WORKER CASELOAD AND UNIT COST							
19	Year-end number of active assigned leave of absence cases-----				9,116	9,300	9,700	400

8									
9	GENERAL ANALYSIS								
10	Objectives								
11	The outpatient mental hygiene clinics provide for the prevention, early diagnosis, and treatment of mental illness, retardation or								
12	disorder, and are established to assist persons not requiring hospitalization.								
13	Program and Performance								
14	The programs provided by the 6 state-supported clinics, and the 1 federally-supported clinic at Berkeley, are comparable in the type								
15	of treatment service and preventive work authorized and planned under Chapter 1989, Statutes of 1957, known as the Com-								
16	munity Services or Short-Doyle Act. This act provides matching state support for the operation of local government facilities								
17	extending mental health services. This will make psychiatric outpatient service available on a statewide basis, and will sub-								
18	stantially improve the level of service available. It is believed that the 6 existing state fully supported clinics should in equity								
19	be converted at an appropriate time to a matching support basis as provided under such Community Services Act for new and								
20	existing local facilities. To accomplish this, it is appropriate to allow for sufficient time to arrange for such conversion. There-								
21	fore, support of these existing state clinics is continued at full state expense for the remainder of the 1957-58 year and for the								
22	full 1958-59 Budget Year, which is believed should allow for conversion to local operation with State matching effective July								
23	1, 1959. The subvention part of this budget contains \$1,900,000 for State matching of local expenditures for the operation of								
24	new and existing mental health programs.								
25	The total performance of the clinics is indicated by the following schedule which shows the number of hours spent by professional								
26	employees in interviews with patients (on either an individual or a group basis), and in preventive services to communities.								
27	The hours spent by patients in individual and group therapy are also shown. Of the professional time allocated to all services,								
28	87 percent was directed toward treatment of clinic outpatients and 13 percent toward preventive work in the community in the								
29	year 1956-57. It is estimated that the percentages will remain the same for both the 1957-58 and the 1958-59 Fiscal Years.								
30	The chief factors responsible for the variation in cost per service hour from clinic to clinic are: (1) the duration of normally								
31	occurring vacancies (e.g., in areas remote from metropolitan centers, recruiting is more difficult); (2) the proportion between								
32	children and adults in the caseload of patients (e.g., a child's case takes 2 to 3 times more staff time than does an adult case);								
33	(3) the ratio between group psychotherapy and individual psychotherapy offered in a given clinic (e.g., 10 hours of professional								
34	staff time may produce 100 patient-hours in group therapy but only 10 patient-hours in individual treatment interviews); (4)								
35	other extraneous factors.

The section for administration of National Mental Health Act funds formerly in this budget has been transferred to the Department of Mental Administration budget.

* Federal grants and expenditures therefrom are not included in the overall budget totals.

a Hours spent in direct services, excluding time spent in case review and administration.

b Cost of treatment services (total cost prorated on basis of employee service-hours), divided by patient-hours.

c Excludes Langley Porter and Los Angeles Neuropsychiatric Institutes.

d Includes full-time services of 3.4 psychiatric residents.

e Includes full-time services of 3.7 psychiatric residents.

f Includes full-time services of 4.6 psychiatric residents.

GENERAL ANALYSIS

Objectives

The Langley Porter Neuropsychiatric Institute is a teaching and research center and provides care and treatment for patients with early curable types of mental disorders as a part of the overall teaching and research program.

Program and Performance

The statistics presented in the following summary are indicative of the performance of this institute as reflected by inpatient and outpatient caseloads. The number of both hospital inpatient days and outpatient annual interviews are expected to increase significantly from the 1956-57 Fiscal Year level.

Caseload:

67	Hospital inpatient days-----	27,010	33,945	35,770	1,825
68	Outpatient annual interviews ^e -----	18,041	18,500	18,500	—
69	Allocation of Costs: ^f				
70	Inpatient department -----	\$953,236	\$1,136,731	\$1,239,004	\$102,273
71	Outpatient department -----	317,746	378,910	413,002	34,092
72	Average Cost Per Patient:				
73	Inpatient (daily) -----	35.29	33.49	34.64	1.15
74					(3.4%)
75	Outpatient (per interview)-----	17.61	20.48	22.32	1.84
76					(9%)

With the activation of a 4-story addition during the 1959-60 Fiscal Year, treatment and research facilities will be expanded and bed capacity will be increased by 16.

^a Composed of savings in salaries and wages, \$3,609; operating expenses, \$3,007; and equipment, \$552.

^b Composed of savings in operating expenses.

^c Federal grants and expenditures therefrom are not included in the overall budget totals.

^d Represents average count Monday through Friday and excludes weekend visits.

^e Represents total number of interviews by the professional staff.

^f Costs have been allocated between inpatient and outpatient departments on the basis of estimated time distribution of all employees and a proportioned allocation of other expenses.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	
1	GENERAL ANALYSIS—Continued				
2					
3					
4	Program and Performance—Continued				
5					
6	The current program includes psychiatric residency and nursing training, training courses for mental hospital staff members, research				
7	in all areas of mental health, and a day/night care program. The major program changes proposed are as follows:				
8	(1) Strengthening of the administrative organization through the addition of a chief of clinical services position. This				
9	position will be responsible for directing and co-ordinating all clinical service functions, including inpatient, outpatient,				
10	social work, psychology services, and assisting the assistant superintendent in overall planning of the institute's activ-				
11	ities. The Chief of Clinical Services is considered to be a key position in the greatly-needed strengthening of the insti-				
12	tute's organization. 1 senior psychiatric social worker position is required to replace a like position which was reclassified				
13	to a supervising position to head up the social service unit. The reclassification was approved administratively during				
14	the current year in order to effect a part of the reorganization.				
15	(2) 2 psychiatrist II positions are proposed to perform staff duties with administrative and resident supervisory responsi-				
16	bilities. This function is now performed by psychiatric residents III; however, the clinic plans to train the residents in				
17	the advanced skills of training and research. 1 clinical psychologist II position is proposed to meet the workload of				
18	the evening service for the new day-night program which is budgeted in the 1957-58 Fiscal Year for the first time, and				
19	also to meet the need for more psychological testing which is necessary to evaluate the new forms of treatment. 5 inter-				
20	mediate stenographer-clerk positions are proposed. 2 clerks will provide clerical services for the 5 proposed professional				
21	positions, and 3 clerks will service the clerical needs of approximately 20 psychiatric resident positions.

9						
10	GENERAL ANALYSIS					
11						
12	Objectives					
13						
14	The Neuropsychiatric Institute at University of California, Los Angeles, is a teaching and research center and provides care and treatment for patients with early curable types of mental disorders as a part of the overall teaching and research program.					
15						
16						
17	Program and Performance					
18						
19	The Neuropsychiatric Institute is to be built as a part of the Medical School of the University of California at Los Angeles. The institute is now housed in temporary quarters assigned by the university pending construction of permanent buildings.					
20	In the 1956-57 Fiscal Year, a limited program was initiated, which included an outpatient clinic, in order to meet the teaching needs of the school of medicine. For 1957-58 the institute was authorized to assume full support of an expanded outpatient clinic program to meet the teaching needs of the medical school and to prepare for the ultimate opening of the permanent institute. The major program changes for 1958-59 include the position of assistant medical superintendent and a clerk for necessary stenographic services. The new position will be, as at the Langley Porter Neuropsychiatric Institute, responsible to the medical superintendent in all his activities, and will relieve him of the administrative details which will result from the development of the training and research program of the institute. Also 2 psychiatric resident II positions are proposed as part of the plan for the orderly expansion of the resident staff in order to insure an adequate number of residency positions to be available for the opening of the permanent institute building, and also to further discharge the institute's responsibility of functioning as a training center for the vitally needed professional positions in the State Hospital System.

Personnel man-years	1,198.8	1,271	1,345.6	74.6

GENERAL ANALYSIS

Objectives

Agnews State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts and epileptics without mental retardation, and primarily serves the counties of Santa Clara, San Mateo, Santa Cruz, San Francisco, Alameda, San Benito and Monterey.

Program and Performance

The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1954-55	1955-56	1956-57
Total admissions	3,009	3,275	3,402
Total net releases	3,087	3,292	3,304
Net transfers to other hospitals	237	123	76

Overcrowding for the department is concentrated at Agnews and is estimated to be about 465 by the end of the budget year. This is planned in anticipation of the 512 additional beds now under construction which will be available in the 1959-60 Fiscal Year. Extensive remodeling of the older wards is under way and will continue in the future on a yearly increment basis as funds are available.

^a Composed of savings in salaries and wages, \$18,261; operating expenses, \$5,791; and equipment, \$500.

^b Composed of savings in salaries and wages.

3							
4							
5							
6	The major program changes proposed are for training the professional staff in psychiatric techniques, the addition of a pharmacist						
7	position to provide 6-day coverage of the pharmacy, and increases in funds for regular drugs and for tranquilizing drugs. Other						
8	cost increases are due to workload factors, and include 46 additional psychiatric technician-trainee and 3 clerical positions.						
9	These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally						
10	Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected						
11	where appropriate.						
12	3 positions are discontinued due to the change in workload which affects their function.

GENERAL ANALYSIS

Objectives

Atascadero State Hospital provides care and treatment for mentally ill male patients who require maximum security, and for sex psychopaths, and serves all counties of the State.

Program and Performance

The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department. While the facilities are designed for maximum security, the program emphasis is on treatment.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1954-55	1955-56	1956-57
Total admissions-----	736	1,302	1,193
Total net releases-----	502	1,338	1,151
Net transfers from other hospitals-----	808	-19	29

This is a relatively new hospital, and was activated in the 1954-55 Fiscal Year. Funds for an additional capacity of 432 beds were provided in the 1957-58 Budget, and these facilities should be available by July, 1959.

The major program changes proposed are for training the professional staff in psychiatric techniques, and for increases in funds for regular drugs and for tranquilizing drugs. Other costs are due to workload factors, and include 1 psychiatrist, 1 social worker, 8 psychiatric technician trainees, and a service and supply supervisor. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

2 positions are discontinued due to change in workload which affects their function.

GENERAL ANALYSIS

Objectives

Camarillo State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation, and minors and juvenile court observation cases committed under Section 740.5 of the Penal Code. It primarily serves the counties of Los Angeles, Ventura, Santa Barbara and San Luis Obispo.

Program and Performance

The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. A juvenile unit is located on the hospital grounds where a specialized treatment program is conducted for minors.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1954-55	1955-56	1956-57
Total admissions -----	3,362	3,690	3,697
Total net releases -----	3,434	3,471	3,698
Net transfers to other hospitals -----	179	13	447

There is no overcrowding planned for this hospital in the 1958-59 Fiscal Year as compared to an overcrowding of 579 estimated in the 1957-58 budget.

The major program changes proposed are for training the professional staff in psychiatric techniques, and increases in funds for regular drugs and for tranquilizing drugs. Other cost increases are due to workload factors and include 2 clerical positions for the patients' accounts section and 1 milker for the dairy. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

110 positions are discontinued due to the change in workload which affects their function. Most of the workload reduction is due to a decrease in population with the attendant elimination of overcrowding.

GENERAL ANALYSIS

Objectives

DeWitt State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and a limited number of mentally retarded patients. It primarily serves the counties of El Dorado, Yolo, Sutter, Yuba, Placer, Nevada, Sierra, Butte, and Plumas.

Program and Performance

It is planned that the average population at this institution will consist of 2,326 mentally ill and 564 mentally retarded patients during the 1958-59 Fiscal Year. The level of care and the treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill and/or mentally retarded, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	Mentally Ill:	1954-55	1955-56	1956-57
	Total admissions -----	529	594	629
	Total net releases -----	602	703	624
	Net transfers from other hospitals -----	312	2	179
	Mentally Retarded:			
	Total admissions -----	-	-	-
	Total net releases -----	25	19	6
	Net transfers to other hospitals -----	228	2	-

The major program changes proposed are for training the professional staff in psychiatric techniques, and increases in funds for regular drugs and for tranquilizing drugs. The other change in program is caused by the addition of 27 psychiatric technician trainees which is primarily due to ward reclassifications resulting from changes in types of patients. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

4 positions are discontinued due to the change in workload which affects their function.

TOTAL EXPENDITURES	\$4,114,704	\$4,829,363	\$4,903,603	\$74,240
Support (General Fund)				(1.5%)
Average population	2,259	2,298	2,370	72
Per capita costs	\$1,821	\$2,102	\$2,069	(3.1%)
Personnel man-years	694.6	778.3	782.8	—\$33 (1.5%)

GENERAL ANALYSIS

Objectives

Mendocino State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation, and primarily serves the Counties of Marin, Sonoma, Mendocino, Humboldt, Del Norte, Siskiyou, Modoc, Trinity, Shasta, Lassen, Tehama, Glenn, Colusa and Lake.

Program and Performance

The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1954-55	1955-56	1956-57
Total admissions	925	727	873
Total net releases	904	877	965
Net transfers to other hospitals	230	—170	—18

It is planned that there will be no overcrowding of facilities during the 1958-59 Fiscal Year. One of the older wards with a capacity of 270 beds was reactivated in the 1957-58 year after being remodeled and modernized.

The major program changes proposed are for training the professional staff in psychiatric techniques and provision of increased funds for regular drugs and for tranquilizing drugs. These programs are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

12 positions have been discontinued due to the change in workload which affects their function.

^a Composed of savings in salaries and wages, \$30,487; operating expenses, \$24,972; equipment, \$5,580, and loss in reimbursements, \$6,456.

GENERAL ANALYSIS

Objectives

Metropolitan State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts and epileptics without mental retardation, and primarily serves the Counties of Los Angeles and Orange.

Program and Performance

The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. Also, an after-care facility is operated by this hospital, and extends psychiatric, medical and therapy treatment during the day at periodic intervals as necessary, allowing the patients to return to their homes at night. This is a new program initiated in the current year.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1954-55	1955-56	1956-57
Total admissions-----	1,432	1,517	1,633
Total net releases-----	1,253	1,543	1,462
Net transfers to other hospitals-----	390	57	—35

It is planned that new ward buildings with a capacity of 1,665 additional beds will be available for patient occupancy during the first part of the 1958-59 Fiscal Year, and that full advantage of this new capacity can be taken by June 30, 1959. This will provide for 3,811 patients at that time as compared to 2,400 at the end of the 1957-58 Fiscal Year. The 1957-58 Budget planned for an overcrowding of 370 patients, which will be completely relieved by the new bed capacity. Also, funds for an additional capacity of 200 beds has been appropriated, and it is estimated that these beds will be available during the 1959-60 Fiscal Year.

The major program changes proposed are for training the professional staff in psychiatric techniques, the addition of a pharmacist to provide 6-day coverage of the pharmacy, and increases in funds for regular drugs and for tranquilizing drugs. Other cost increases are due to workload factors mainly relating to the operation of the 1,665 additional beds. This enlargement requires 114 new positions in addition to the nursing positions which were provided for in the current year budget to become effective near the end of the year, thus allowing time for training prior to the actual care of patients in the new wards. The 1957-58 Budget lists the effective dates of establishment of those positions. These programs and new positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded," which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

69 psychiatric technician-trainee positions are discontinued. This is possible primarily because of the elimination of overcrowding and the consequent change in the workload of various wards.

The entire farming operation was discontinued effective January 1, 1958, because of operating problems in a rapidly expanding metropolitan area.

a Composed of savings in salaries and wages, \$9,383; operating expenses, \$23,534; equipment, \$1,768; and excess reimbursements, \$3,792.

b Composed of savings in operating expenses.

GENERAL ANALYSIS

Objectives

Modesto State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics, and for a limited number of mentally retarded patients. It primarily serves the counties of Stanislaus, Tuolumne, Mono, Mariposa, Merced, Madera, Fresno, Kings, Tulare and Kern.

Program and Performance

It is planned that the average population at this hospital will consist of 2,968 mentally ill and 296 mentally retarded patients during the 1958-59 Fiscal Year. The level of care and the treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill and/or mentally retarded, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

Mentally Ill:	1954-55	1955-56	1956-57
Total admissions-----	501	471	415
Total net releases-----	560	623	516
Net transfers from other hospitals-----	290	212	231
Mentally Retarded:			
Total admissions-----	-	-	-
Total net releases-----	5	12	8
Net transfers to other hospitals-----	258	161	1

It is planned to deactivate one 50-bed ward now accommodating mentally retarded patients, who will be transferred to other hospitals caring exclusively for the mentally retarded by the end of the budget year.

The major program changes proposed are for training the professional staff in psychiatric techniques, and increases in funds for regular drugs and for tranquilizing drugs. Other program increases are due to workload factors, and include 2 psychiatrists, 1 psychologist, 5 social workers, 3 clerical and 4 food service positions. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded," which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

1 position is being discontinued due to a change in workload which affects its function.

^a Composed of savings in salaries and wages, \$6,539; operating expenses, \$25,422; equipment, \$776; and excess reimbursements, \$4,385.

12					
13	GENERAL ANALYSIS				
14					
15	Objectives				
16					
17	Napa State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation, minors and juvenile court observation cases committed under Section 740.5 of the Penal Code and primarily serves the Counties of Marin, Solano, Contra Costa, San Francisco, Alameda, Sonoma, and Napa.				
18					
19					
20					
21	Program and Performance				
22					
23	The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasizes treatment rather than custody. A large tuberculosis treatment unit is maintained and cares for all mentally ill patients in the northern part of the State suffering with this disease; a juvenile unit is located on the grounds where a specialized program is conducted; and a special program for the treatment of alcoholics is available.				
24	The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:				
25		1954-55	1955-56	1956-57	
26	Total admissions -----	3,521	3,012	3,320	
27	Total net releases -----	3,240	3,204	3,306	
28	Net transfers from other hospitals -----	8	69	251	
29					
30					
31	It is planned that the overcrowding of about 320 as estimated in the 1957-58 Budget will be completely eliminated by the end of the 1958-59 Fiscal Year. An appropriation was made in the 1957-58 Budget for a new juvenile unit with a capacity of 192 beds. This facility should be available about February, 1960.				
32	The major program changes proposed are for training the professional staff in psychiatric techniques, and increases in funds for regular drugs and for tranquilizing drugs. Other cost increases are due to workload factors, and include 1 psychiatrist, 1 psychologist, 2 social workers, 4 clerical, and 11 food service assistant positions. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded," which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.				
33	One hundred and forty-four positions are discontinued due to the change in workload, and include 2 occupational therapists and 142 psychiatric technician trainee positions. The latter positions will not be needed primarily because of the elimination of overcrowding and the consequent reduction of workload on various wards.

13	GENERAL ANALYSIS				
14					
15	Objectives				
16					
17					
18	Patton State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without				
19	mental retardation, and primarily serves the Counties of Inyo, San Bernardino, Los Angeles, Riverside, San Diego, and Imperial.				
20					
21	Program and Performance				
22					
23	The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals				
24	for the mentally ill operated by the department, and emphasizes treatment rather than custody. A large tuberculosis treatment				
25	unit is maintained, and cares for all mentally ill patients in the southern part of the State suffering with this disease.				
26	The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular				
27	form as follows:				
28		1954-55	1955-56	1956-57	
29	Total admissions -----	3,018	2,757	2,878	
30	Total net releases-----	2,808	2,754	2,710	
31	Net transfers to other hospitals-----	336	210	109	
32					
33	There is no overcrowding planned for this hospital in the 1958-59 Fiscal Year as compared to an overcrowding of about 400 esti-				
34	mated in the 1957-58 Budget. 2 additional ward buildings are now under construction with a capacity of 1,062 beds. These will				
35	be available to receive patients early in the 1959-60 Fiscal Year.				
36	The major program changes proposed are for training the professional staff in psychiatric techniques, and increases in funds for				
37	regular drugs and for tranquilizing drugs. Other cost increases are due to workload factors, and include 1 psychiatrist, 1 psy-				
38	chologist, 1 social worker, 1 laboratory technician, 3 clerical, 2 equipment operators, 6 food service assistants, and 1 milker posi-				
39	tions. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and				
40	Mentally Retarded," which follows the departmental summary and general analysis. Changes in price and population have been				
41	reflected where appropriate.				
42	52 positions are discontinued due to the change in workload which affects their function. Most of the workload reduction is due				
43	to the decrease in population with the attendant elimination of overcrowding.

12					
13					
14	GENERAL ANALYSIS				
15	Objectives				
16					
17	Stockton State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts and epileptics without				
18	mental retardation, and primarily serves the counties of Sacramento, Amador, Alpine, Alameda, Contra Costa, San Joaquin, and				
19	Calaveras.				
20					
21	Program and Performance				
22					
23	The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals				
24	for the mentally ill operated by the department, and emphasize treatment rather than custody. Also, an after-care facility is				
25	operated by this hospital, and extends psychiatric, medical and therapy treatment at periodic intervals as necessary, allowing				
26	the patients to return to their homes at night. This is a new program initiated in the current year.				
27	The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular				
28	form as follows:				
29		1954-55	1955-56	1956-57	
30	Total admissions -----	2,095	2,700	2,673	
31	Total net releases -----	1,995	2,492	2,835	
32	Net transfers to other hospitals -----	39	29	91	
33					
34	There is no overcrowding planned for this hospital in the 1958-59 Fiscal Year as compared to an overcrowding of 350 estimated				
35	in the 1957-58 Budget. The hog and poultry ranch operations will be discontinued effective July 1, 1958.				
36	The major program changes are for training the professional staff in psychiatric techniques, and increases in funds for regular				
37	drugs and for tranquilizing drugs. Other cost increases are due to workload, and include one clerical and one automotive				
38	equipment operator position. These programs and positions are explained in detail in the section titled "State Hospitals				
39	for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price				
40	and population have been reflected where appropriate.				
41	61 positions are discontinued due to the change in workload which effects their function. Most of the workload reduction is due				
42	to a decrease in population with the attendant elimination of overcrowding.

13	GENERAL ANALYSIS				
14	Objectives				
15					
16	Fairview State Hospital provides care and treatment for mentally retarded patients, and serves the southern counties of the State.				
17					
18	Program and Performance				
19					
20	The budget for this hospital is predicated on the activation of the hospital during the 1958-59 Fiscal Year, with the first patients				
21	planned for admission by January, 1959. The program calls for patients to be admitted at the rate of 100 per month, which				
22	will make an estimated resident population of 600 by June 30, 1959. The hospital will continue to receive patients into the				
23	1959-60 Fiscal Year until it fills its rated bed capacity, which will be 1,665 beds on June 30, 1959.				
24	The level of care and the treatment techniques at this hospital will be comparable to those employed at the other state hospitals for the				
25	mentally retarded operated by the department, and will emphasize treatment rather than custody.				
26	Positions that are now authorized and were previously set up on a staggered basis have been rescheduled to more closely coincide				
27	with the latest activation date. A total of 531.2 additional positions are proposed in this budget for all the various hospital				
28	functions which are necessary to operate a complete facility. These positions also are set up on a staggered basis so that the				
29	necessary recruiting and training period is provided prior to the admission of patients. These programs and positions are				
30	explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the depart-				
31	mental summary and general analysis.

GENERAL ANALYSIS

Objectives

Pacific State Hospital provides care and treatment for mentally retarded patients, and serves the southern counties of the State.

Program and Performance

The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital, and extends psychiatric, medical and therapy treatment during the day at periodic intervals as necessary, allowing the patients to return to their homes at night. This is a new program initiated in the current year.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1954-55	1955-56	1956-57
Total admissions	754	328	314
Total net releases	176	299	242
Net transfers from other hospitals	6	9	7

The major program changes proposed are for training the professional staff in the techniques of treating mental retardation, the addition of a pharmacist position to provide additional coverage of the pharmacy, and increases in funds for regular drugs. Other cost increases are due to workload factors, and include 13 additional psychiatric technician trainee positions. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

11 positions are discontinued due to the change in workload which affects other than the nursing function.

^a Composed of savings in salaries and wages, \$99,857; and operating expenses, \$5,329.

^b Composed of savings in salaries and wages, \$167,181; and operating expenses, \$35,879.

43	GENERAL ANALYSIS					
44	Objectives					
45						
46	Porterville State Hospital provides care and treatment for mentally retarded patients, and serves the central and southern counties of the State.					
47						
48						
49	Program and Performance					
50						
51	The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.					
52	The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:					
53						
54		1954-55	1955-56	1956-57		
55	Total admissions-----	336	588	514		
56	Total net releases-----	136	184	211		
57	Net transfers from other hospitals-----	355	189	12		
58						
59						
60	The major program changes proposed are for training the professional staff in the techniques of treating mental retardation, the addition of a pharmacist position to provide additional coverage of the pharmacy, and increases in funds for regular drugs. Other cost increases are due to workload factors, and include 1 psychiatrist, 1 social worker, and 92 psychiatric technician trainee positions. The latter positions are needed primarily because of ward reclassifications resulting from changes in types of patients. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

GENERAL ANALYSIS

Objectives

Sonoma State Hospital provides care and treatment for mentally retarded patients, and serves the northern counties of the State.

Program and Performance

The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1954-55	1955-56	1956-57
Total admissions -----	470	401	188
Total net releases-----	191	213	174
Net transfers to other hospitals-----	111	48	10

The activation of 700 additional beds is planned early in the 1958-59 Fiscal Year.

The major program changes proposed are for training the professional staff in the techniques of treating mental retardation, the addition of a pharmacist position to provide additional coverage of the pharmacy, and increases in funds for regular drugs. Other cost increases are due to workload factors, and include 2 clerks, 1 psychiatrist, 1 clinical psychologist, 3 therapists, 1 seamstress, 8 laundrymen, and 1 groundsman. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis.

Changes in price and population have been reflected where appropriate.

18 positions are discontinued due to the change in workload which affects their function.

11					
12					
13					
14	GENERAL ANALYSIS				
15					
16	Objectives				
17					
18	The Military Department includes: the California National Guard, to help guarantee internal security of the State and provide an				
19	organization prepared in an emergency to become a part of the active federal military forces; the California National Guard				
20	Reserve, to provide for defense and security of California while the California National Guard is in active federal service; and				
21	the California Cadet Corps to provide military training for high school, junior college, and college students.				
22					
23	Program and Performance				
24					
25	The two primary programs of the Military Department are the operation of the California Army National Guard and the California				
26	Air National Guard. Within these two programs the State:				
27	Provides a personnel procurement program which enters the field of selection and appointment of officers and warrant officers				
28	and recruitment of enlisted personnel; maintains records of the military history of individuals, recording personnel actions,				
29	verification of service or deeds, and points for federal retirement; publishes orders and directives on policies and procedures				
30	affecting the military; determines locations of organizations and units allocated to the State; provides for training, in				
31	conformance with the discipline prescribed by the Department of the Army and Department of the Air Force; operates				
32	an Army Officer Candidate School at Sacramento, Alameda, Fresno, Ontario, and San Diego; prepares plans for usage				
33	of National Guard as state military forces and uses such forces as required for emergency situations, such as recent flood				
34	duty; participates in the air defense program of the United States both in antiaircraft artillery and fighter interceptor				
35	aircraft; provides housing for units of the Army National Guard, and supervises utilization of federal funds for providing				
36	facilities required for maintenance and operation of equipment and facilities for units of the Air National Guard; main-				
37	tains and operates armories, airfields, rifle ranges, supply points, repair and other facilities; establishes priorities for the				
38	use and distribution of federal funds, equipment, and supplies; administers federal funds in excess of \$27,000,000 allocated				
39	to California, covering pay, schools, uniforms, equipment, materiel and supplies.				
40	The California National Guard Reserve program encompasses all the activities of the California Army National Guard, except for				
41	those activities financed from federal funds and the Officer Candidate School. All activities are conducted at a reduced level due				
42	to the cadre nature of the organization.				
43	The following tables show personnel strength, units, and installations of the state military forces:				
44					
45	National Guard:	Actual	Estimated	Estimated	
46	Ground Forces:	1956-57	1957-58	1958-59	
47	Personnel -----	23,172	23,820	23,790	
48	Units -----	326	328	332	
49	Air Force:				
50	Personnel -----	4,631	4,876	5,245	
51	Units -----	47	44	44	
52	Reserve Forces:				
53	Personnel -----	775	792	830	
54	Units -----	32	32	33	
55	Installations:				
56	Ground Forces:				
57	State-owned -----	93	104	119	
58	Leased -----	42	31	20	
59	Air Force:				
60	Flying bases -----	4	4	4	
61	Other bases -----	3	3	3	
62					
63	During the current year the assistant adjutant general position was vacated and the organization of the Military Department, after				
64	reallocating some of the administrative authority presently in the position of assistant adjutant general, will be so constituted				
65	that it will not be necessary to fill the vacated position. The 2 deputy adjutant general (colonel) positions will absorb the reallo-				
66	cated authority and in recognition of this increased responsibility it is proposed that they be promoted from colonel to brigadier				
67	general.				
68	Increased workload and responsibilities make it necessary to separate the duties of the deputy for air personnel and administration,				
69	and to establish a new position in the air organization of executive officer. To accomplish this it is proposed that the state active				
70	duty position of major established for the deputy, air personnel and administration and reimbursed from federal funds be regraded				
71	to a lieutenant colonel position without reimbursement from federal sources and reclassified as executive officer, air division; and				
72	that federal funds released due to stopping of the reimbursement be used to employ an NGC-12 (federal class) to perform the				
73	duties of deputy for personnel and administration.				
74	A major, air operations staff officer is proposed to serve as assistant to the deputy for air operations and training, to analyze accident				
75	reports and publish flying safety bulletins, to develop air operations and training branch state and federal financial plans, and to				
76	replace headquarters air crew personnel on occasion. There is only 1 officer in the Operations and Training branch and delays in				
77	headquarters work occur while field duties are being performed.				
78	It is proposed to establish 3 additional armory custodian I positions for new armories to be completed during the budget year.				
79

45	CALIFORNIA CADET CORPS							
46								
47	Objectives							
48								
49	The California Cadet Corps is organized to provide a program of military education for high schools and junior colleges. The purposes							
50	of California Cadet Corps are:							
51	To develop the quality of leadership which will be useful in civilian life and the military service.							
52	To assist the schools in educating our youth for citizenship by training the cadets to work together as a team.							
53	To develop a solid sense of patriotism in the cadets, respect for constituted authority, and to teach them the limited role							
54	of the military in a democracy.							
55	To assist cadets to understand basic military concepts in case they are, at some future time, called into service; also, to							
56	provide background for college R. O. T. C., service academies, and armed forces reserve.							
57								
58								
59	Program and Performance							
60								
61	The California Cadet Corps Program Is To:							
62	Provide the schools of this State with courses in leadership built around the military framework as an integral part of the school							
63	program; further, to provide a central headquarters in Sacramento and a statewide organization.							
64	Provide at state expense, uniforms, rifles, ammunition, targets, and training equipment to participating schools.							
65	Provide activities for cadets such as military field meets, training conferences, weekend bivouacs, leadership schools, state rifle							
66	matches, Camp Perry team, and the annual 2-week summer encampment.							
67	Make available to the participating schools a Cadet Corps regional supervisor, to assist in supply, administration, cadet officer							
68	boards, regional leadership schools and other activities which might arise during the school year.							
69	The following tables show personnel strength and schools in the California Cadet Corps Program:

14					
15	GENERAL ANALYSIS				
16					
17	Objectives				
18					
19					
20	This regulatory and tax collection agency issues the license which allows a motor vehicle to be operated in California, issues the				
21	license to the qualified individual to operate motor vehicles on public roads, and ascertains the financial ability to respond of				
22	individuals involved in motor vehicle accidents.				
23					
24	Program and Performance				
25					
26	The department operates through 4 divisions headquartered in Sacramento. Branch offices are maintained in principal cities of the				
27	State and part-time service is provided to many communities by traveling crews. Through this media the department collects				
28	motor vehicle registration and weight fees and vehicle license fees imposed in lieu of property taxes. Driving and written				
29	examinations are conducted preparatory to licensing individuals to operate motor vehicles on public streets and highways.				
30	Records of driver performance are maintained and licenses are revoked or suspended when necessary for the safety of other				
31	drivers or pedestrians. Automobile accidents involving bodily injury, death, or property damage exceeding \$100 are reported				
32	to the department, and the involved individuals are required to post bond or show other evidence of financial responsibility.				
33	Drivers failing to provide such evidence are deprived of the privilege of operating motor vehicles in the State.				
34	Increased expenditures during the budget year include provisions for workload as well as program increases. Statutes enacted at				
35	the 1957 General Session will require considerable additional expenditures.				
36	Principal increases include:				
37					
38		MAN-YEARS		COST	
39	1. Routine workload increases-----	173		\$710,000	
40	2. Driver improvement program-----	134		500,000	
41	3. Driver examination for expired licenses--relaxed minimum				
42	age requirements-----	76		340,000	
43	4. Increased length of driving examination-----	50		231,000	
44	5. Investigation of automobile dealers and wreckers-----	38		206,000	
45	6. Licensing of automobile salesmen-----	48		168,000	
46	7. Drivers' licenses expiring on birthday-----	7		23,000	
47					
48	New legislation provides for 2-, 3-, and 5-year licenses depending upon the record of the applicant, and requires that a driving				
49	test must be given to all applicants if renewal of an expired license is not applied for within 30 days after expiration. The				
50	minimum driving age for a general license was decreased from 16 to 15½ and qualifications for conditional licenses were eased.				
51	All licenses will now expire on the licensee's birthdays. All automotive vehicle salesmen must be licensed by July 1, 1958, and				
52	vehicle dealers and wreckers must post bond with the department. A second increment of a 5-year program expansion in dealer				
53	and wrecker investigations is included in this budget and a second increment of a 4-year program expansion to increase the				
54	length of the driving examination is also included.				
55	Additional positions are included to design, if possible, an electronic data processing procedure, and positions added to the driver				
56	improvement program in 1957-58 for 1 year only are proposed as permanent positions. Workload positions are included in				
57	each of the 4 divisions because of increased population and the resulting increase in vehicle registration and licensed drivers.				
58	Provision for 9 new branch offices is included in this budget.				
59	Chapter 2273, Statutes 1957, requiring photographs on drivers' licenses, is not financed in this budget.				
60	Since the enactment of the law requiring photographs on drivers' licenses, the Department of Motor Vehicles has diligently studied				
61	the problems which would arise from placing a picture upon a driver's license. Due, primarily, to the size of the installation,				
62	the novelty of the problem presented, and the lack of suitable equipment, it has not been possible to assemble the facts				
63	necessary to a reliable solution of the problems by the time of submission of the budget.				
64	Of particular concern is the procedure which would permit the integration of the photograph with the license. Initiating the wrong				
65	procedure at this point would ultimately result in excessive expenditures for handling.				
66	It appears that extensive changes in procedure will be required. It may also be necessary for suitable cameras and other equipment				
67	to be devised and manufactured. It is believed that the studies will have progressed to the point that the department will be able				
68	to present to the Legislature, by March, facts upon which reasonably reliable decisions can be made and estimates of costs				
69	presented.

DEPARTMENT OF MOTOR VEHICLES—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)			
1	DIVISION OF ADMINISTRATION						
2	Objectives						
3							
4	The director and his assistants establish departmental policy and direct the work of the operating divisions.						
5							
6	Program and Performance						
7							
8	This division provides the director with information on fiscal expenditures and develops budget planning for current and long range requirements. Department-wide service activities consist of assisting the director and the division chiefs in personnel matters, including in-service training and providing legal counsel and representation when required. Real property rentals are located, negotiated, and executed for the department, and supplies, including license plates, are purchased, stored, and distributed. Departmental programs and procedures are analyzed toward effecting more efficient and economical administration, and an information officer prepares releases through appropriate media, with particular emphasis on laws, rules, and regulations requiring compliance by certain deadline dates.						
9	Budget year increases include an assistant division chief to reduce the span of control of the chief, and a budget officer to develop current and long range fiscal requirements. The latter position was created during the current year but is shown as proposed new for reporting purposes. Additional legal assistance is necessitated for anticipated administrative hearings in regard to licensing of automobile salesmen and bonding of automobile dealers and wreckers. Increased registration and licensed drivers and the resulting increased revenue will require 5 additional account clerks in accounting. The overall departmental personnel increase necessitates 1 additional analyst and 2 additional personnel clerks. 2 positions are included for the Procedures and Analysis Section to maintain operating manuals and to provide analytical review of the driver improvement program.						
10	Additional departmental locations will require an augmentation of the stockroom staff.						
11	Operating expenses are increased in accordance with added positions and anticipated workload increases. Major increases occur in printing of motor vehicle codes and summaries and additional studies and surveys in connection with electronic data processing system for registration of the State's 7,000,000 vehicles.						
12

27	DIVISION OF REGISTRATION						
29	Objectives						
31	This division is responsible for the registration of all motor vehicles, the processing of all transactions related to such registration, and						
32	the licensing of automobile dealers, wreckers and salesmen.						
34	Program and Performance						
36	This division is charged with the registration of approximately 7,500,000 vehicles in this State. Accomplished through the processing						
37	and service units, vehicle registration affords a system of ready identification and control, provides a means of establishing owner-						
38	ship of vehicles, and provides the mechanism for collecting motor vehicle taxes and service fees. This division maintains in its						
39	Sacramento files a history of every motor vehicle registered in California. The files contain about 45 million records and are						
40	maintained under the registered owner's name in alphabetical order, under the license number in numerical sequence, and by						
41	engine or identification number in numerical sequence.						
42	Included in this division is the automation function which employs punched cards containing all data concerning all California						
43	vehicles. As the fees are reduced from year to year, the mechanical equipment is used to redate the vehicles, and prepare poten-						
44	tial registration cards which are mailed in advance of the renewal period. These cards contain the fees due for each of the fol-						
45	lowing 2 years.						
46	The investigation of automobile dealers and wreckers as pertains to fees due the State and improper practices is accomplished by this						
47	division through the use of trained investigators. These men also serve briefs for the department, collect fees in the event of						
48	improper or inadequate payments, and perform other allied investigative functions, among them being the licensing and regula-						
49	tion of salesmen.						
50	Proposed increases for this function include program and workload increases and provision for programs directed by 1957 legislation.						
51	Program increases include 38 positions for the second increment of a 5-year program expansion in the area of dealer and wrecker						
52	investigations. The total programmed expansion will permit a detailed audit of about 25 percent of the dealers and all licensed						
53	wreckers. The audit is required because of improper reports of sales and inadequate revenue paid to the State. Licensing of auto-						
54	mobile salesmen, as directed by Chapter 1318, Statutes of 1957, will require 19 additional permanent positions and 29 man-years						
55	temporary help. With the increased investigative programs, it was necessary to reorganize both the field and office units. To effect						
56	this, 2 field supervisors and 4 office supervisors were authorized during the current year and are included as proposed new in						
57	the budget year. It is estimated that 40,000 salesmen will be licensed during the budget year. 4 positions are included to						
58	continue a review of available electronic processes to insure the use of the most economical method of recording, processing,						
59	and retaining registrations of all motor vehicles. 3 tabulating machine supervisors are required for correction of an accumu-						
60	lated deficiency in training and the control unit. 3 tabulating positions and a clerk are included for procedural and planning						
61	workload. 1 additional staff assistant is included to assist with procedures and special studies resulting from staff and program						
62	increases.						
63	Workload increases require 40.8 man-years temporary help to process the projected increased registrations, and 10.8 man-years tem-						
64	porary help, key punching, to record the increased registration. 5 additional investigators and 4 clerks are included because of						
65	increased workload in the area of brief service, original permit application, and special investigations, all uncontrollable work-						
66	load factors.						
68	SALARIES AND WAGES

DEPARTMENT OF MOTOR VEHICLES—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)			
1	DIVISION OF DRIVERS LICENSES						
2	Objectives						
3							
4							
5							
6	The primary responsibilities of this division are the issuance of all original drivers' licenses, the renewal of expiring licenses, the						
7	maintaining of driving histories of all drivers, and the administration of the State's financial responsibility laws.						
8							
9	Program and Performance						
10							
11	This division is responsible for the licensing of approximately 7,300,000 drivers in this State. A record file is maintained which						
12	contains more than 30,000,000 records pertaining to drivers. This licensing function is accomplished primarily by clerical						
13	forces versed in the handling and processing of applications as received from the field. The functions of the division have						
14	increased in magnitude and importance year after year as registrations have increased and the demand for better drivers has						
15	become greater. At the present time the division issues approximately 2,000,000 licenses per year, of which slightly more						
16	than 25 percent are original licenses.						
17	Discretionary functions are classified under the general heading of driver improvement. It is under this classification that the						
18	division deals with those drivers who are habitual violators of the law, or who have physical or mental disabilities which						
19	affect their ability to drive safely. To carry out this function the division uses re-examinations, interviews, investigations,						
20	formal warnings, and hearings before a referee. A specially trained staff of driver improvement analysts is maintained for						
21	this purpose. Under this program the division endeavors to correct bad driving habits and attitudes. As a general policy it is						
22	preferable to keep the individual driving safely rather than to take him off the road. To this end, liberal use is made of the						
23	power to impose conditions of probation on drivers with poor records.						
24	A further responsibility of this division is the administration of the financial responsibility laws. It is the purpose of this function						
25	to provide reasonable assurance that persons suffering bodily injury or property damage in motor vehicle accidents are com-						
26	pensated by those responsible for such injury or damage. Drivers who fail to meet their financial obligations are deprived of						
27	the privilege of operating a motor vehicle, and their vehicle registration may be suspended for the same cause. Experienced						
28	evaluators are employed to perform the more difficult aspects of this service.						
29	An additional 35 clerical positions are proposed for general operations to meet increased workload. 7 of these positions are						
30	required due to law changes relative to the duration of licenses. 29 positions were authorized during the current year for this						
31	same purpose.						
32	An additional 24 positions plus the extension to permanent of 110 positions authorized for 1 year in the 1957-58 Budget are						
33	required in order to maintain the existing level of service in the driver improvement program.						
34	Workload increases in the Financial Responsibility Section require 20 additional clerical positions.						
35							
36	General Operations						
37

DEPARTMENT OF MOTOR VEHICLES—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)			
1	DIVISION OF FIELD OFFICE OPERATIONS						
2	Objectives						
3							
4	The division provides 130 permanent branch offices which offer complete vehicle registration and driver licensing facilities for the						
5	convenience of the taxpayer and licensee. The activities of the division also include traveling representatives who provide licens-						
6	ing facilities on regular schedule to communities lacking branch offices. The division furnishes information regarding the Financial						
7	Responsibility Law and regulates automobile driving schools and instructors.						
8							
9	Program and Performance						
10							
11	Driver examination service is given at 200 locations throughout California by a staff of trained examiners. Examiners make trips at						
12	stated intervals in order to provide service for applicants living in isolated areas. Applicants for licenses must submit to a written						
13	test of their knowledge of the Vehicle Code, a vision screening test, give an actual demonstration of their ability to drive, and						
14	prove their ability to read simple English. A \$3 application fee entitles the applicant to 3 tests within a period of 6 months.						
15	Complete registration service is available in all principal cities of the State. During the annual registration renewal period, service on						
16	potential registration cards is offered at nearly 150 banks in addition to the services rendered by automobile clubs. Traveling						
17	registration crews visit many other points for stated periods as a convenience to the taxpayer.						
18	The various field offices also serve as headquarters for motor vehicle investigators and driver improvement analysts.						
19	50 drivers license examiners are proposed for the budget year as the second increment of a 4-year program expansion to increase the						
20	driving portion of the drivers license examination from 12 minutes to 22 or 23 minutes. Legislation enacted at the 1957 General						
21	Session will require 76 additional positions. Chapter 611, Statutes of 1957, requires a driving test if a licensee fails to apply for						
22	renewal within 30 days after expiration. This will necessitate 457,000 additional driving tests and 63 additional positions. Chap-						
23	ters 610 and 2273, Statutes of 1957, relax the minimum age limit and requirements for drivers licenses. This will generate 56,000						
24	additional workload items and will require 13 additional positions. Population increase and increased persons reaching the mini-						
25	mum driving age will necessitate 19.5 additional positions and new offices will require 14.5 additional positions. The new offices						
26	are proposed for Banning, Midway City, Fremont, Fall River Mills, Tracy, Tulare, Truckee, Auburn, and Los Gatos.						
27

GENERAL ANALYSIS

Objectives

Fundamental objectives of the department are the protection, propagation, preservation, and investigation of the State's fish and game resources, including ocean fisheries and marine products, for the utilization of and general benefit and recreation of the people of California.

Program and Performance

The director, under general policy established by the Fish and Game Commission and as prescribed by statute, administers the department and its program. Included in the department are the Wildlife Conservation Board and the Marine Research Committee.

For purposes of administration and operation the department is organized into several functions corresponding to its major activities. General policy direction is provided by the Fish and Game Commission. The commission is composed of 5 members appointed by the Governor. Besides establishing general policy they regulate the taking of fish and game by promulgation of regulations establishing open and closed seasons; bag and possession limits; and areas for the taking of fish and game. The commission also regulates commercial fishing to insure the taking and delivery of fish in a wholesome and sanitary condition and to prevent deterioration and waste of fish.

During the current year 8 small uneconomical fish and game installations have been closed, resulting in savings in operation costs and 8 hunter and trapper positions have been eliminated in accordance with legislative budget amendments. In response to further legislative direction adjustments have also been made in the federal aid programs of fish management and game management to provide for use of a greater portion of available funds for management and maintenance projects. Certain positions and expenses have been transferred from the support budget to the federal aid program budget. The organization study of the department authorized by the Legislature is also under way by a private management consulting organization. A further current year change which is contained in the budget year is the provision of legal services by contract to represent the department in hearings on San Joaquin water releases.

With the additional revenue provided by the increased license fees authorized by the 1957 Legislature, the department's proposed 1958-59 Budget is financed within the revenue estimated to be available to the department. One-half of the additional revenue accruing from increased license fees, estimated to be \$672,500 for 1957-58 and \$1,620,000 for 1958-59, is reserved in the Fish and Game Preservation Fund.

The Budget for 1958-59 proposes increases only in workload areas. The overall increase is mainly attributable to increased operating costs due to general price and salary increases; additional plant maintenance; and budgeting of necessary additional operating equipment such as radios, conservation films and farming equipment.

With the advent of several newly planned water development projects in Region I which will affect the habitat of fish and wildlife in the area, it is considered necessary to have a position in the region to study the projects and gather data to assure that adequate water reservations and flow are maintained to sustain fish and wildlife. A position of Fisheries Manager II is proposed for these region-wide duties.

Because of the increased use of the State's water resources resulting from the pressures of growing population and industrial growth, the problem of water pollution control as it affects fish and wildlife has greatly increased. In addition, under existing law, the department is required to prove whether discharges of wastes are detrimental to fish and wildlife in order to obtain correction of the conditions. As the situation is especially critical in Regions III and V, the San Francisco and Los Angeles areas, a Pollution Analyst position is proposed for each of these regions for establishment in 1958-59.

^a Federal grants are deposited in the Fish and Game Preservation Fund subject to the provisions of the Pittman-Robertson Act and the Dingell-Johnson Act. Neither the revenues nor the expenditures are included in the overall budget total.

30	REGIONAL OPERATIONS						
31							
32	Objectives						
33							
34	Regional offices were established in the department to relieve the central staff of an enormous volume of administrative work. The						
35	hunting and angling public come in contact with the department through the regional offices which are located at Redding, Sac-						
36	ramento, San Francisco, Fresno, and Los Angeles. These offices provide staff familiar with problems of the locality and co-						
37	ordinate with a headquarters group responsible for statewide planning and research. Through decentralization, local supervisors						
38	of the various functions are located in the field where they can take action based on intimate knowledge and field work.						
39							
40	Program and Performance						
41							
42	In general the regional program in addition to a headquarters function, includes inland fisheries, game management, and wildlife pro-						
43	tection. The activities of the inland fisheries operations are concentrated on hatcheries, stream improvement, fisheries investiga-						
44	tion, and local water development problems. The activities of the game management program in the field include all phases of						
45	research, applied research, and management of big game and upland game. Field operation of the patrol is under the wildlife						
46	protection function. This latter function also supervises hunter safety programs, educational programs, and many field mainte-						
47	nance responsibilities. Direct costs of regional operations by function, excluding employees' retirement, are as follows:						
48							
49					1956-57	1957-58	1958-59

1								
2	GAME MANAGEMENT IN CO-OPERATION WITH							
3	THE FEDERAL GOVERNMENT							
4								
5	Under the provisions of the Pittman-Robertson Act, 75 percent of the cost of these projects is paid by the Federal Government.							
6	During the current year 6 positions with their operating expenses formerly financed from State support for game management							
7	areas were transferred to the Pittman-Robertson program. Other operating and program adjustments have also been made to							
8	place greater emphasis under the federal co-operative program on management and maintenance activities.							
9								
10								
11	SUMMARY OF PROJECT COSTS							
12								
13	Wildlife management co-ordination				\$31,623	\$40,800	\$37,000

3	THE FEDERAL GOVERNMENT—Continued						
5	Expenditure Detail by Project—Continued						
7	Grizzly Island Waterfowl Management Area						
9	Operation of the Grizzly Island area makes an additional location available for waterfowl feeding and resting and provides public shooting facilities. The project consists of:						
11	Development—construction of levees, ditches, roads, and buildings; farming for waterfowl feed crops; and ponding to provide resting areas and shooting facilities						
12	Maintenance of buildings, equipment, and other facilities						
13	Conducting public shooting on the area						
16	SALARIES AND WAGES	8.8	11.6	12	\$36,745	\$50,158	\$52,087

57	Totals, Mendota Waterfowl Management Area				\$73,883	\$98,400	\$104,900
59	Waterfowl Management Area and Winter Deer Range Land Acquisition						
61	Funds are provided for acquisition of additional lands for waterfowl management areas and winter deer ranges.						
64	OPERATING EXPENSES				—	\$50,000	\$50,000
66	History and Management of Ring-necked Pheasant						
68	This project provides for a detailed study of the life history of the ring-necked pheasant, and the gathering of data pertinent to the management of the species and setting of proper seasons and bag limits. Development of practical habitat improvement procedures is also provided. Detailed projects include:						
70	Investigations—trap, band, and fluoroscope birds to measure hunting pressure and population turnover; analyze and interpret data; and make investigations on habitat improvement						
71	Management—train regional personnel, in data gathering; take statewide pheasant censuses and formulate recommendations on seasons and bag limits; check hunting programs; and prepare special reports on pheasant management as required						
77	SALARIES AND WAGES	5.5	5.7	5.7	\$23,677	\$26,470	\$28,050

5							
6	Waterfowl Studies						
7							
8	This project provides for detailed surveys and evaluation of waterfowl migration, breeding areas, and wintering areas. The compiled						
9	data is utilized for efficient management of waterfowl. The development of practical techniques for marshlands management for						
10	waterfowl use is also a goal. Included in this project are:						
11	Investigations—trap, band and fluoroscope birds to establish migration patterns and determine local production of water-						
12	fowl; establish methods of growing natural foods and increasing waterfowl use of marsh areas; and analyze data						
13	and write reports of investigations----- 62%						
14	Management—make annual censuses on breeding areas and wintering grounds to determine population changes; make						
15	reports on status of waterfowl populations for Pacific Flyway Committee as the basis for recommending seasons						
16	and bag limits to the Fish and Wildlife Service; and make bag checks on annual game take and make recommen-						
17	dations to waterfowl management area managers as to marshlands management procedures----- 38%

Contributions to State Employees' Retirement Fund				1,589	1,689	1,774	
Totals, Fish Management Co-ordination				\$21,399	\$23,500	\$23,700	
Stream and Lake Improvement							
Purpose of this project is to increase the yield of sport fishes through the restoration and improvement of habitat. During the 1958-59 Fiscal Year it is estimated that the program will receive the following emphasis:							
Habitat improvement by removal of barriers and development of stream and lake improvement devices							30%
Habitat improvement by control of undesirable fish species and aquatic plants							60%
Construction, improvement, and maintenance							10%
SALARIES AND WAGES	6.5	8.8	9.3	\$27,875	\$38,356	\$39,506

DEPARTMENT OF FISH AND GAME—Continued

FISHERIES MANAGEMENT IN CO-OPERATION WITH THE FEDERAL GOVERNMENT—Continued						
Expenditure Detail by Project—Continued						
Sacramento-San Joaquin River Salmon and Steelhead Study						
Purpose of this project is to collect necessary facts and to manage salmon and steelhead populations of the Sacramento-San Joaquin River system. During the 1958-59 Fiscal Year it is estimated that the program will receive the following emphasis:						
Determine results of stocking yearling steelhead in the Sacramento River system						40%
Evaluate losses of salmon and steelhead through unscreened irrigation diversions						20%
Assist with annual king salmon spawning inventory						20%
Investigate success of silver salmon introduction						10%
Construction, improvement, and maintenance						10%
SALARIES AND WAGES	7.6	7.6	6.7	\$31,853	\$34,796	\$33,082
(See page 245, Salary Supplement)						
OPERATING EXPENSES				10,895	12,920	12,218
EQUIPMENT				907	500	200
Contributions to State Employees' Retirement Fund				2,292	2,684	2,500
Totals, Sacramento-San Joaquin River Salmon and Steelhead Study				\$45,947	\$50,900	\$48,000
Trout Management Study						
Purpose of this project is to find better methods of managing the trout resources of the State, including the improvement of artificial stocking procedures, wild trout management, and evaluating the results of catchable trout stocking.						
During the 1958-59 Fiscal Year it is estimated that the program will receive the following emphasis:						
Co-ordinate and assist the regions with the development of a method for the uniform allocation of catchable trout						20%
Co-ordination of statewide experimental fisheries management work on large cold water reservoirs						25%
Research into various disease and survival problems						26%
Evaluation and testing of management methods						29%
SALARIES AND WAGES	9.8	11.1	11.5	\$47,519	\$55,834	\$58,749
(See page 245, Salary Supplement)						
OPERATING EXPENSES				21,569	21,131	21,881
EQUIPMENT				1,459	600	1,225
Contributions to State Employees' Retirement Fund				3,316	4,135	4,645
Totals, Trout Management Study				\$73,863	\$81,700	\$86,500
Sturgeon and Striped Bass Study						
Purpose of this project is to follow trends of resource in this major fishery to provide adequate regulation of the take. All investigational work and virtually all striped bass and sturgeon management functions, aside from patrol, fall within the scope of this project. During the 1958-59 Fiscal Year it is estimated that the program will receive the following emphasis:						
Carrying out a tagging study including study of party boat records to determine angler harvest and migrational pattern of striped bass						60%
Carrying out and analyzing the annual tow net survey for striped bass in order to obtain an index of spawning success						25%
Investigation of pollution and water diversion and their effect on striped bass and sturgeon in the Sacramento-San Joaquin Delta						5%
Other miscellaneous related studies						10%
SALARIES AND WAGES	2.2	2.8	3	\$10,689	\$13,101	\$13,595

4	Coastal Stream Anadromous Trout and Salmon Study						
5	Purpose of this study is to determine the most effective method of maintaining and increasing runs of salmon and steelhead in coastal streams. During the 1958-59 Fiscal Year it is estimated that the program will receive the following emphasis:						
6	Evaluation of the results of stocking yearling steelhead and silver salmon in coastal streams, including assistance with the rearing of these fish at Cedar Creek Experimental Station						50%
7	Evaluation of the effects of logging activities on the anadromous trout and salmon fisheries of the north-coastal area						25%
8	Obtaining the basic facts necessary for sound regulation of the salmon and steelhead fishing on coastal streams						10%
9	Investigation of stream flow and gravel requirements for the successful spawning of salmon and steelhead						5%
10	Assistance to regional, Marine Resources, and United States Fish and Wildlife Service personnel with salmon and steelhead spawning inventories in north-coastal streams						10%

17	Northern California Sport Fish Survey						
18	Purpose of this survey is to provide necessary data and information for the proper management of the Northern California marine sport fishes. During the 1958-59 Fiscal Year it is estimated that the program will receive the following emphasis:						
19	Sampling of marine sport catch (creel census) in all major saltwater fishing areas within the project boundaries. This sampling is designed to obtain total catch and effort by species, area, time, and gear						60%
20	Determine how many salmon are caught by sport fishermen including information on species, sizes, and age in the ocean off California, where the catches are made, what type of equipment is used, and how much effort and money are expended in making these catches						25%
21	Comparison of the importance of the species landed in the sport and commercial fisheries in order to determine the interfishery competition						5%
22	Gathering size and age composition of catch, as well as other basic information on each important species						10%
23	SALARIES AND WAGES	3	5.4	3.9	\$14,386	\$24,655	\$20,326

29	Warmwater Forage Study						
30	Purpose of this study is to test introductions of new warmwater forage fishes. Primary emphasis is being placed on an evaluation of results from the introduction of threadfin shad into Southern California waters. During the 1958-59 Fiscal Year it is estimated that the program will receive the following emphasis.						
31	Comparison of the sport fisheries before and after the introduction of the shad						50%
32	Sampling the forage fish populations to determine their extent and composition						20%
33	Determination of the food habits of threadfin shad						20%
34	Determination of the age composition and growth rates of warmwater fish populations						10%

6								
7	Barracuda-White Sea Bass Study							
8								
9	Purpose of this study is to obtain data on the abundance, distribution, range and life history of these 2 important marine sport							
10	fishes in order to institute proper management practices. During the 1958-59 Fiscal Year it is estimated that the program will							
11	receive the following emphasis:							
12	Tagging and analysis of tag recoveries to determine movement, rate of exploitation, and distribution of barracuda							
13	and white sea bass							35%
14	Biological studies including age, and rate of growth, maturity and fecundity, food habits, and racial studies							35%
15	Maintenance and analysis of catch statistics on both species							10%
16	Collection and analysis of oceanographic data in order to evaluate these data with respect to barracuda and white							
17	sea bass							5%
18	Sampling the sport and commercial catches to learn their age and size composition, and to obtain material for bio-							
19	logical studies							15%

32	Ocean Fish Habitat Development Project							
33								
34	Purpose of this study is to increase the yield of marine sport fishes through the development, testing, and application of methods							
35	for the restoration and improvement of their environment. During the 1958-59 Fiscal Year it is estimated that the program							
36	will review the following emphasis:							
37	Development, installation, and evaluation of devices to increase and concentrate marine sport fishes in order to im-							
38	prove the angler harvest. Scuttled ships, boats, old car bodies, rock, concrete rubble, and other objects or material							55%
39	will be used to create artificial fishing banks							
40	Establish new kelp beds on artificial fishing banks and on existing apparently suitable areas where kelp beds are							25%
41	absent							
42	Miscellaneous development work including obtaining of access areas, introduction and transplantation of fishes and							20%
43	related work

GENERAL ANALYSIS

Objectives

Objectives of the Marine Research Committee are the development of commercial fisheries of the Pacific Ocean and of marine products susceptible to being made available to the people of this State.

Program and Performance

Research projects are selected by the 9-member committee which includes 5 members actively engaged in the sardine industry, at least 1 representative of organized sportsmen's groups, and at least 1 representative of organized labor.

Research is financed from a privilege tax of 5 cents per 100 pounds on sardines, Pacific and Jack mackerel, squid, herring and anchovies. Chapter 1459, Statutes of 1957, extended the privilege tax for an additional 2-year period, or until December 31, 1959.

The carrying out of research projects selected by the committee is accomplished by contracting with other public and private agencies. The principal agencies whose services are utilized are the United States Fish and Wildlife Service, Scripps Institute of Oceanography and the Department of Fish and Game.

Principal research and investigations sponsored by the committee have concerned the Pacific Sardine Fishery which declined to a very low ebb in 1947-48. It was during this period the Marine Research Committee was formed by the Legislature and since has devoted a major share of its revenues to sardine investigations in an effort to restore this fishery.

In addition to sardine research the committee sponsors research and investigations of mackerel, anchovy, herring and related species; studies of oceanographic factors, including food habits, relating to the life history of these fish; and assesses the abundance and distribution of the various species.

The budget proposed for 1958-59 continues these investigations and research projects by the contracting agencies in amounts approved by the committee. The substantial increase proposed for contract with the United States Fish and Wildlife Service is attributed to increased availability of that agency's facilities to do certain work for the committee. The program assigned the Fish and Wildlife Service for the budget year is concerned with the investigation of subpopulations of sardines, and of the relation of oceanographic conditions to the survival of pelagic marine fishes, especially the sardine and associated species.

8					
9					
10	GENERAL ANALYSIS				
11					
12	Objectives				
13					
14	Under provisions of the Wildlife Conservation Law of 1947 the board is authorized to acquire, restore, and maintain in a high state				
15	of productivity areas which can successfully sustain wildlife and provide adequate and suitable recreation for the people of				
16	the State. To accomplish this end the board may study and investigate suggested programs.				
17					
18	Program and Performance				
19					
20	The board is composed of the Director of Finance, the Director of Fish and Game and the President of the Fish and Game Com-				
21	mission. The board is advised by a joint interim investigation committee consisting of 3 Members of the Senate and 3				
22	Members of the Assembly. Annually \$750,000 is transferred to the Wildlife Restoration Fund from license fees collected				
23	for conducting horse races. The board is charged with the administration of this fund.				
24	Through its staff the board conducts necessary investigations and studies to determine the areas within the State most essential				
25	and suitable for wildlife production and preservation and which will provide recreational advantages.				
26	As a result of such studies the board determines which lands or rights in lands or water should be acquired by the State to				
27	effectuate the wildlife conservation and recreation program. After acquisition and completion of such development and facilities				
28	as are necessary for the purpose for which the lands were acquired, the areas are managed and maintained by the Department				
29	of Fish and Game. The department is authorized to contract with other public agencies for such construction, management				
30	or maintenance.				
31	The current program, with emphasis on warm water fishing projects and providing access to fishing areas, is projected for the				
32	1958-59 Fiscal Year.

GENERAL ANALYSIS

Objectives

The principal functions of this division are to provide office facilities and staff services for the director; provide accounting, personnel, budgetary, and property services to the divisions of the department and other related agencies under contract; and co-ordinate the department's conservation education program.

Program and Performance

Conservation, development, and utilization of the State's primary natural assets in the fields of forest, mineral, soil, and recreational resources comprises the program of the department.

This division, in addition to providing administrative and office services, assists the director through exercise of the review function with regard to departmental budgetary, fiscal, and personnel operations, and provides consultative and advisory services on operating and financial matters for the several divisions of the department, the Committee for the Development of the California Public Outdoor Recreation Plan, and the State Water Pollution Control Boards. The 1957 Session of the Legislature added the Division of Small Craft Harbors. Cost of these services is distributed and charged to the Special and General Fund Divisions and other agencies on a pro rata basis for services provided to each.

During the current year an accounting officer IV position and an intermediate stenographer-clerk were established to strengthen the top administrative structure and provide for increased workload resulting from the department's program growth and legislation approved at the 1957 Session of the Legislature. These positions are continued for the budget year as proposed new positions. A temporary help position of consultant-appraiser in the amount of \$5,000 was added to review property appraisals arising out of the Division of Beaches and Parks acquisition program. Expenditures for consultant appraisers will be fully reimbursed by the Division of Beaches and Parks.

In order to maintain the present level of service a position of bookkeeping machine operator is proposed for 1958-59. Cost of this position is partially offset by a reduction in temporary help at a net increased cost of \$1,967 for the Bookkeeping Machine Section.

Increased operating expense funds are required in the current and budget year for workload of the division and for expanded activities including the provision of a tabulating system to provide better expenditure analysis information. This system was authorized and partially budgeted in the current year; an installation is planned for completion in the budget year.

At the present time the division has prepared a property manual and procedure which should subsequently provide savings in personnel. Under the program a substantial portion of the workload related to property accounting is being decentralized and modified to simplify necessary record keeping.

^a Grants received under the Federal Clarke-McNary program are deposited and reported in the General Fund.

^b Nonrevenue funds. Neither the revenues nor the expenditures are included in the budget totals.

GENERAL ANALYSIS

Objectives

The State Park System has three essential objectives. They are to acquire and develop those recreation areas that are of statewide importance, to preserve for public enjoyment and education outstanding scenic areas of the State, and to acquire, restore and preserve significant historic sites and buildings.

Program and Performance

Under policies established by the State Park Commission the State Park System is administered by the Division of Beaches and Parks. The agency is presently engaged in an extensive acquisition and development program authorized principally by the Legislature during the 1956 and 1957 Sessions. Appropriations to the division for acquisition and development aggregating in excess of 50 million dollars were approved by those sessions.

Financing for this major program was contemplated from impounded tidelands oil revenues as well as from a continuing allocation of revenue from the State Lands Act Fund. Initially this allocation was established at 7 million dollars annually; however, Chapter 2367, Statutes of 1957, recognizing an impending deficiency in program resources, provided for an increase in the allocation to 12 million dollars annually. Recent estimates indicate that this anticipated resource will not be realized because of a general deficiency in resources available to the State Lands Act Fund. Under the circumstances it would appear that the State Beach and Park Fund is over appropriated.

As new areas are acquired, and as existing areas are expanded to accommodate visitors, it is evident that personnel costs and operational costs of the division will be increasing. The proposed budget provides primarily for this expanded workload created by new areas and increased attendance. Details are reported in the discussion of the various operating sections. In addition certain organizational changes are provided in the budget year. These organizational changes which are provided, as well as others still pending, have been recommended in a management survey called for by Senate Resolution No. 28, Statutes of 1957.

Workload considerations in the acquisition and development program are the primary problem of the headquarters organization. The scope of this problem for the current year and the budget year is indicated in the Capital Outlay section of the budget. To expedite the present acquisition program toward completion prior to June 30, 1961, additional staff was added to the Land Section in the current year.

The proposed budget for the 1958-59 Fiscal Year provides for an expansion of funds available for the roadside rest program. The increase is attributed to the increase in number of units to be in operation. The division is presently gathering information to permit an evaluation of the various methods of operation of these facilities. A further collateral program in the budget year provides for preparation of topographic maps in co-operation with the United States Geological Survey.

^a Composed of savings in salaries and wages, \$2,119; operating expenses, \$6,488; equipment, \$597; and loss in reimbursements, \$8,071.

^b Composed of savings in operating expenses, \$1,512; equipment, \$1,935; and excess reimbursements, \$16,301.

^c For statement of fund condition see Capital Outlay Budget, Division of Beaches and Parks.

		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)			
1	ADMINISTRATION						
2							
3							
4	Program and Performance						
5							
6	The administration program includes staff and funds for operations of the State Park Commission; the chief of the division; and pro-						
7	vides for divisional business management activities, conservation education, and history sections.						
8	In line with organization changes to provide better administrative coverage and relieve the chief of excessive administrative detail, an						
9	additional deputy chief position was established by reclassification in the current year. This provides a deputy chief to direct						
10	operations of the 6 districts and a similar position to supervise Sacramento administration and the Land and Development Sec-						
11	tions. Two additional secretarial positions are proposed for 1958-59 to serve the new deputy and a position of information officer						
12	for which secretarial help was not provided previously.						
13	Five additional clerical positions are also proposed for workload increases resulting from additional activities and expansion of the						
14	park system. An intermediate stenographer-clerk and account clerk are for assignment to the fiscal group; the intermediate clerk						
15	will assist with stockroom, shipping, and general office duties; the file clerk is needed to meet increased demands on the central						
16	file system; and a large increase in the division's staff during recent years makes an additional intermediate typist-clerk for the						
17	personnel section necessary.						
18	The proposed 1958-59 budget provides for continuation of the program of observance of anniversaries of significant events initiated by						
19	Chapter 2277, Statutes of 1957.

		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)			
1	MAINTENANCE AND OPERATION						
2							
3							
4	Program and Performance						
5							
6	For administrative and operational purposes the State has been divided into 6 districts, each under direct supervision of a district						
7	superintendent (state park ranger VI) who is responsible for the operation and maintenance of state park facilities in his						
8	district for the beneficial use of the public. Facilities provided include ocean beaches, lakes and reservoirs, inland parks, his-						
9	torical monuments, riding and hiking trails, and roadside rests. Assistance with the acquisition and development of new areas						
10	is provided to each district by the headquarters staff and the Land and Development Sections located in Sacramento.						
11	In order to provide staffing required for new and existing facilities in the State Park System the following additional positions						
12	with related operating expenses and equipment are proposed for the 1958-59 Fiscal Year:						
13	1. District Headquarters:						
14	a. 4 assistant construction inspectors—one each for Districts II, III, IV and VI, are proposed to provide a position at						
15	the district level for preparing construction contracts and inspecting development projects to relieve the district admin-						
16	istrative staff of this activity.						
17	b. 2 junior landscape architects for Districts II and IV are proposed for a greatly increased workload of preparing plans						
18	and drawings for park developments in these districts.						
19	c. 1 stock clerk position is requested for District III which has not previously been authorized such a position for exist-						
20	ing workload. All other districts have a position authorized.						
21	d. 6 intermediate typist-clerks—1 for each district, are proposed for workload increases resulting from expansion of the						
22	number of parks and an increased number of technical positions requiring typing services.						
23	e. 5 drafting aid II positions for Districts I through V are required for drafting workload and to relieve other technical						
24	positions of this detailed work.						
25	2. Staffing proposed for opening and operation of new areas:						
26	a. Lake Berryessa—state park ranger III is proposed for development planning for this area behind Monticello Dam.						
27	b. Hearst Castle—state park ranger IV (park supervisor), state park ranger II, supervising groundsman, groundsman (4),						
28	supervising housekeeper, janitor (3), watchman, state park attendant (4), historical guides (6), intermediate stenographer-						
29	clerk and park aid (40 man-months) are proposed to open Hearst Castle to public view.						
30	c. Carmel River and Asilomar Beaches—state park attendant is provided to service 14,000 feet of beach frontage and be						
31	stationed at Point Lobos.						
32	d. Weaverville Joss House—state park attendant is proposed to provide a complement of 2 positions required to open the						
33	historical monument to the public.						
34	e. William B. Ide Adobe—park aid (3 man-months) required to open historical monument.						
35	f. Benicia Capitol—park aid (3 man-months) required for vacation relief and seasonal help at this historical monument.						
36	g. Folsom Lake State Park—park aid (60 man-months), beach lifeguard supervisor (24 man-months) and beach lifeguard						
37	(16 man-months) are proposed to provide adequate coverage and lifeguard service for an estimated attendance increase						
38	from 500,000 to 1,000,000 visitors during 1958.						
39	h. Historic ship—4 park aids are proposed as caretakers of the historic ships Tongass and Thayer being acquired in the cur-						
40	rent year.						
41	3. Staffing for existing areas on basis of workload and existing facilities:						
42	a. Intermediate stenographer-clerk for Santa Cruz Area Office.						
43	b. Park attendant for Fort Humboldt (1), Humboldt Redwoods (1), Standish and Hickey Groves (2), Sonoma Coast (1),						
44	Brannan Island (1), San Juan Bautista (1), Angel Island (1), Henry Cowell Redwoods (3), Mt. Tamalpais (1),						
45	Tomales Bay (1), Morro Bay (1), Emma Wood Beach (1), La Purisima (1), Monterey Monuments (1), Point Lobos						
46	(1), and Salton Sea (1).						
47	c. Beach lifeguard (8 man-months) for Stinson Beach.						
48	d. Highway equipment operator-laborer for the San Mateo Beaches.						
49	e. Intermediate typist-clerk for Silver Strand Beach (1), Carpinteria Beach (1), Calaveras Big Trees (0.5) and Richardson						
50	Grove (0.6).						
51	f. Seasonal man-months are provided as follows on the basis of workload:						
52	Park aid for Azalea Reserve (5), Prairie Creek (37), Standish and Hickey Groves (6), Patrick's Point (15), Armstrong						
53	Redwoods (2), Castle Crags (3), Brannan Island (6), Emerald Bay (25), D. L. Bliss (6), Caswell Memorial (6), Gold						
54	Discovery Site (4), Sutter's Fort (1), Donner Memorial (6), Henry Cowell Redwoods (12), Tomales Bay (8), San Mateo						
55	Beaches (16), Stinson Beach (12), Mt. Diablo (4), Natural Bridges (3), Sunset Beach (4), Portola (3), and Silver						
56	Strand (6).

DEVELOPMENT						
Program and Performance						
This function surveys sites; prepares plans for construction projects for the development and maintenance of beaches, parks, historical monuments, riding and hiking trails, and roadside rests; inspects construction, surveys property boundaries; prepares landscaping studies; and provides engineering surveys for projects to be constructed for the division.						
The following additional positions are proposed for increased workload resulting from the overall expansion of the State Park System and the collateral requirements of park development:						
a. Architectural assistant to prepare drawings and other data of historical buildings pertinent to their restoration.						
b. Assistant landscape architect to complete staffing of a development planning team.						
c. Junior drafting aid for workload increase.						
d. Temporary help to provide student trainees as axmen to assist survey crews and provide summer employment for students as an incentive to future recruitment.

32							
33							
34	Negotiation for acquisition of beach and park property and acquisition of rights-of-way for riding and hiking trails is the function						
35	of this section.						
36	In an effort to step up the property acquisition program in order to attempt to accomplish the acquisitions authorized by the						
37	1956 and 1957 Legislatures within a reasonable period of time, 12 additional positions, consisting of 4 associate real property						
38	appraisers and negotiators, 4 land title examiners, and 4 intermediate stenographer-clerks were added to the Land Section staff						
39	during the current year. 9 positions have been assigned to Sacramento and 3 to the Los Angeles office.						
40	Effective with the 1958-59 Fiscal Year, it is proposed to transfer the function of reservoir studies to the Land Section as a subordinate						
41	for new project investigations.						
42	The 9 positions proposed for 1957-58 are to meet workload needs for new project investigations.

ROADSIDE RESTS

The maintenance and operation of the roadside rest project is an outgrowth of a program established by the Budget Act of 1956. By June 30, 1958, the division expects to have approximately 30 units in operation, plus an additional 30 units to be placed in operation during 1958-59.

With no previous experience in an operation of this type a lump sum allotment is proposed until sufficient experience is developed, to permit inclusion as a part of the Maintenance and Operation function.

Operation and maintenance of roadside rests -----	-	\$50,000	\$100,000
---	---	----------	-----------

SACRAMENTO WEST END ZONE OF PRESERVATION

Chapter 2315, Statutes of 1957, appropriated \$15,000 for the study of the development of a zone of preservation and acquisition of historic artifacts, including a museum in the West End of Sacramento. The division is proceeding with the study and estimates the balance of the appropriation will be expended during 1958-59.

CONTRACT SERVICES -----	-	\$11,700	\$3,300

GENERAL ANALYSIS

Objectives

The primary mission of the Division of Forestry is the protection of approximately 28,000,000 acres of state and private lands having statewide interest with regard to timber production, rangelands and watershed values. The various wild land management programs include the prevention and suppression of forest fires; the administration and enforcement of forest practice rules; forestry advisory services; range improvement programs; production of nursery stock for public planting, windbreaks, soil erosion control and reforestation purposes; management of state forests; control of white pine blister rust and forest insect infestations in co-operation with federal and private agencies; and co-operation with the Federal Government on forest surveys. The division directly provides fire protection for approximately 20,000,000 acres of state and private lands. Five million acres are protected under a contract arrangement with the United States Forest Service and 3,000,000 acres are protected through contracts with 6 counties. In addition to the fire protection provided for statewide interest land, the division protects approximately 10,000,000 acres of rural areas under contracts providing reimbursement from 25 counties.

Program and Performance

The pressures of a constantly expanding population have brought about definite problems in the management and protection of California wild lands. The use of California wild lands for recreation and for permanent and summer home sites has increased tremendously in the past few years. The values of the natural resources of timber, watersheds and rangelands have also increased with the demands of an ever expanding population. Due to these expanding uses and pressures, the division revised its Basic Fire Plan in 1956 and added personnel, equipment, and facilities to cope with the new program. The 1957-58 Budget provided approximately 25 percent of these increased needs, totaling approximately \$2,000,000. Funds became available July 1, 1957, to meet the augmented program. Since the division was well into what was predicted to be a serious fire season the program could not be activated in its entirety at that time, as the movement of personnel to new assignments would seriously affect the striking ability of fire control forces. Therefore, the program was implemented in planned groups with the major moves being made following the end of the fire season. The full effects of the 1957-58 augmentation will be realized in the Fiscal Year 1958-59. The proposed additions for 1958-59 while compatible with the 1956 Fire Plan are primarily to meet increased workloads. Details of these specific increases are discussed under the appropriate function.

Several of the division programs which affect the national interest are reimbursed under grants from the Federal Government. The Clarke-McNary Act provides approximately \$1,300,000 for fire protection on timberlands and primary watersheds. It also provides \$17,000 for the Service Forestry Program. \$29,000 is provided to assist in the forestation of denuded or understocked timberlands.

ADMINISTRATION

The function of administration includes the office of the State Forester, Business Management, Fire Control, Engineering Section, and the operation of the Davis warehouse and equipment repair shop. The prime objectives are to develop operating policies, rules and regulations in accordance with the fire laws and administrative procedures of the State.

Program and Performance

The Fire Control Section co-ordinates the statewide fire fighting forces both within the division and with other fire control organizations. In addition it is responsible for forest fire research, equipment development, equipment maintenance, fire plans, facility evaluation, communications, and fire statistics. Positions added by the Budget Act of 1957 have allowed the division to enter more fully into fire research and to adapt and analyze research developments with regard to field activities as well as strengthen the co-ordination of existing forces and those of co-operating agencies.

a Grants received under the Federal Clarke-McNary Program are deposited and reported in the General Fund. These funds are provided to assist in the protection of forest and watershed lands of national interest and to assist in forestation of timber lands.

1	ADMINISTRATION—Continued						
2							
3	Program and Performance—Continued						
4							
5							
6	The Business Management Section is responsible for the budget development, fiscal control, procurement agreements, and the operation phase of personnel transactions. This section also supervises the activities of the Davis warehouse. In the 1958-59						
7	Budget an additional position of State Forest Ranger I is provided to assist the field forces in establishment of proper ware-						
8	house management, the development of fiscal manuals applicable to forestry activities and general assistance in the increasing						
9	workload of this section.						
10	The Engineering Section prepares the general administrative and fire control maps for the division's area of responsibility. In						
11	addition they prepare construction plans and give guidance and supervision to the division's Capital Outlay and maintenance						
12	program. The section also co-ordinates the activities of the Forestry Camp Program and develops standards for construction						
13	and maintenance of roads, firebreaks, and telephone lines.						
14	The Training Section has greatly expanded its services during the current year with the establishment of 2 training centers in the						
15	Field Services Budget.						
16

1	FIRE PREVENTION EDUCATION						
2							
3							
4	Program and Performance						
5							
6	This function co-ordinates the fire prevention program with other co-operating government agencies, industrial firms and citizen						
7	groups. The function is also responsible for the co-ordination of the law enforcement program of the division involving both						
8	civil and criminal cases.						
9	In the field of mass media education the division utilizes all major types of contacts, including television, radio, and motion pictures.						
10	Motion picture films for television and other educational programs have been developed. A total of 95 television spot announce-						
11	ment prints providing 5 different fire prevention messages were distributed to motion picture theaters and television stations						
12	throughout the year. In addition, 200 prints involving 2 fire prevention messages were released to various theaters for public						
13	viewing.						
14	During 1957-58 progress was made in developing a forest fire prevention research program in an effort to more effectively reach the						
15	group of people that statistics reveal are causing the largest percentage of man-caused fires.						
16	In addition a position of supervisor of law enforcement, added by the Budget Act of 1957, will plan, develop, and co-ordinate pro-						
17	cedures for enforcement of forest and fire laws. This position will strengthen the fire prevention program by assisting in train-
